Title 3—

The President

Proclamation 7510 of November 30, 2001

World Aids Day, 2001

By the President of the United States of America

A Proclamation

This year marks the 20th year that the world has been fighting the disease that we now know as Acquired Immunodeficiency Syndrome (AIDS). AIDS has inflicted a terrible toll upon the world, taking millions of lives and causing untold grief to the families and friends of its victims. An estimated 40 million people worldwide are living with the Human Immunodeficiency Virus (HIV), which causes AIDS; and more than 8,000 people across the globe die from AIDS every day. Sadly, since its inception, AIDS has claimed the lives of more than 22 million individuals.

This year's World AIDS Day theme is "I Care . . . Do You? Youth and AIDS in the 21st Century." The goal underscoring this year's theme is ensuring greater education and involvement of young people in preventing HIV/AIDS. And it seeks to stress that every individual has both the responsibility and the opportunity to help prevent the spread of HIV/AIDS and to assist those suffering from the disease.

In many countries, including the United States, young people and adolescents are at a higher risk for contracting HIV infection. We know from epidemiological data that young people under the age of 25 comprise half of all new HIV infections worldwide. This sobering reality is a clarion call to public health networks around the world to redouble their efforts in providing information to young people about preventing HIV/AIDS, and most importantly, about abstinence and how it can help to prevent the spread of this disease.

The AIDS epidemic has had a devastating impact on diverse communities, and disadvantaged youth have borne the brunt of this devastation. Impoverished conditions and depressed economic circumstances tend to accompany an increased presence of HIV in these communities. We must develop and implement better ways to communicate to youth about abstinence and other effective measures that will help them to avoid the disease and to envision a future filled with possibility.

We must also continue our efforts to develop a vaccine that will protect individuals from becoming infected with HIV. Our children deserve to live in a world free from the fear of HIV/AIDS, and the United States will not weaken in its resolve to lead the world towards that goal.

As we enter the third decade of the AIDS pandemic, our hearts go out to those who have been afflicted with or affected by this deadly disease. We resolve to stand together as a Nation and with the world to fight AIDS on all fronts. We resolve to provide the resources necessary to combat HIV/AIDS. And we resolve to ensure that those suffering with HIV/AIDS receive effective care and treatment, compassionate understanding, and encouraging hope.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim December 1, 2001, as World AIDS Day. I invite the Governors of the States and the Commonwealth of Puerto Rico, officials of the other territories subject to the jurisdiction

of the United States, and the American people to join me in reaffirming our commitment to combat HIV/AIDS. I encourage every American to participate in appropriate commemorative programs and ceremonies in workplaces, houses of worship, and other community centers to reach out and protect and educate our children, and to help comfort all people who are living with HIV and AIDS.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of November, in the year of our Lord two thousand one, and of the Independence of the United States of America the two hundred and twenty-sixth.

Rules and Regulations

Federal Register
Vol. 66, No. 234
Wednesday, December 5, 2001

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 00–088–2]

Karnal Bunt; Regulated Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations by adding new areas to the list of areas regulated because of Karnal bunt, a fungal disease of wheat, due to the detection during the 2000 harvest of bunted kernels in grain grown in these areas. We are also removing certain fields from regulation because wheat is no longer grown in those fields or because fields previously classified as regulated areas have produced grain that has tested negative for Karnal bunt. These actions will help prevent the spread of Karnal bunt into noninfested areas of the United States and remove from regulation certain fields where restrictions no longer appear to be warranted.

EFFECTIVE DATE: December 5, 2001.

FOR FURTHER INFORMATION CONTACT: Dr. Vedpal S. Malik, National Karnal Bunt Coordinator, PPQ, APHIS, USDA, 4700 River Road Unit 134, Riverdale, MD 20737–1236; (301) 734–6774.

SUPPLEMENTARY INFORMATION:

Background

Karnal bunt is a fungal disease of wheat (*Triticum aestivum*), durum wheat (*Triticum durum*), and triticale (*Triticum aestivum X Secale cereale*), a hybrid of wheat and rye. Karnal bunt is caused by the fungus *Tilletia indica* (Mitra) Mundkur and is spread by spores, primarily through the planting of infected seed. Some countries in the international wheat market regulate Karnal bunt as a fungal disease requiring quarantine; therefore, without measures taken by the Animal and Plant Health Inspection Service (APHIS), United States Department of Agriculture (USDA), to prevent its spread, the presence of Karnal bunt in the United States could have significant consequences with regard to the export of wheat to international markets.

The regulations regarding Karnal bunt are set forth in 7 CFR 301.89–1 through 301.89–16 (referred to below as the regulations).

On April 20, 2001, we published in the **Federal Register** (66 FR 20204–20208, Docket No. 00–088–1) a proposal to amend the regulations by adding new areas to the list of areas regulated because of Karnal bunt due to the detection during the 2000 harvest of bunted kernels in grain grown in those areas. We also proposed to remove fields from regulation because wheat is no longer grown in those fields or because the fields, which were previously classified as regulated areas because they were planted with seed that was suspected to be contaminated with Karnal bunt, have now produced grain that has tested negative for Karnal bunt.

We solicited comments concerning our proposal for 60 days ending June 19, 2001. We did not receive any comments. Therefore, for the reasons given in the proposed rule, we are adopting the proposed rule as a final rule, without change. However, since the publication of the proposed rule, we have published two interim rules adding regulated areas in Texas. Specifically, in an interim rule effective on June 8, 2001, and published on June 14, 2001, (66 FR 32209–32210, Docket No. 01–058–1), we added Throckmorton and Young Counties, TX, to the list of regulated areas in § 301.89–3(f) and solicited comments on that action for 60 days ending on August 13, 2001. Subsequently, we published a second interim rule, effective on July 13, 2001, and published on July 19, 2001 (66 FR 37575–37576, Docket No. 01–063–1), that added Archer and Baylor Counties, TX, to that list, and solicited comments on that action for 60 days ending on September 17, 2001. The addition of those four counties to the list of regulated areas is reflected in § 301.89–3(f) in this rule.

Effective Date

This is a substantive rule that, in part, relieves restrictions and, pursuant to the provisions of 5 U.S.C. 553(d)(1), the provisions of this rule that relieve restrictions may be made effective less than 30 days after publication in the **Federal Register**. This rule removes certain fields in Arizona and New Mexico from the list of areas regulated because of Karnal bunt either because wheat is no longer grown in those fields or because grain from those fields has tested negative for Karnal bunt. This action will eliminate restrictions on the movement of wheat and other regulated articles from these fields.

This rule also adds certain fields in Arizona to the list of regulated areas due to the detection of Karnal bunt. This action is necessary to help prevent the spread of the disease to noninfested areas in the United States. Consequently, we find good cause under 5 U.S.C. 553(d)(3) to make these restrictions effective less than 30 days after publication in the **Federal Register**.

Therefore, the Administrator of the Animal and Plant Health Inspection Service has determined that this rule should be effective upon publication in the **Federal Register**.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review under Executive Order 12866.

Upon the initial detection of Karnal bunt in Arizona in March of 1996, a Federal quarantine and emergency actions were imposed to prevent the interstate spread of the disease to other wheat producing areas in the United States. The quarantine has remained in effect, although it has since been modified in terms of its physical boundaries and restrictions on the production and movement of regulated articles.

Effects on Deregulated Areas

This final rule will remove from regulation 9 fields in Arizona and 16 fields in New Mexico, reducing the size of the regulated area in both States. The fields that are being removed by this rule cover about 290 acres in Arizona and 530 acres in New Mexico.

We estimate that one wheat producer in Arizona and six wheat producers in New Mexico will be affected by that aspect of this rule. Under the regulations, wheat, durum wheat, and triticale may only be moved from regulated areas to nonregulated areas if it tests negative for bunted kernels. Additionally, commercial wheat seed may not be moved from regulated to nonregulated areas. Producers whose fields are removed from regulation will benefit because they will be able to move wheat and other regulated articles from these fields without restriction.

These benefits, however, are likely to be minimal. Considering that the testing of grain for Karnal bunt is already a free service for all producers in regulated areas, the elimination of testing requirements removes an inconvenience only, not a financial burden. Further, little or no commercial wheat seed is, or is expected to be, grown in the affected fields.

Similarly, this aspect of the rule will not serve to significantly reduce the need for equipment cleaning by producers or by custom combine harvesters who routinely move their machines into and out of regulated areas to harvest wheat for multiple producers. In the past, there has been little need for such cleaning because crops harvested in the affected fields have not produced bunted kernels, and equipment must be cleaned only if it has been used to harvest host crops that test positive for Karnal bunt.

One field in Arizona will be removed from regulation because it is currently being used for the construction of houses. In this case, no wheat producers or custom harvesters will be affected because the field is not being used for agricultural purposes.

Effects on Regulated Areas

The new areas being added to the regulated area in Arizona cover about 23,100 acres and contain approximately 600 fields. We estimate that about 15 wheat producers and 6 custom combine harvesters will be affected by this aspect of the rule. However, the effect on each is not likely to be significant. As previously stated, the required grain testing is performed free of charge for producers in regulated areas. Also, little or no commercial wheat seed is, or is expected to be, grown in the affected fields. Finally, mechanized harvesting equipment does not have to be cleaned and disinfected prior to movement from a regulated area unless it has been used to harvest crops that test positive for Karnal bunt.

Overall, the regulated agricultural acreage in Arizona will increase by about 22,810 acres to approximately 281,000 acres. In New Mexico, regulated agricultural acreage will decrease by approximately 530 acres to about 3,300 acres.

The Regulatory Flexibility Act requires that agencies consider the economic effects of their rules on small businesses; organizations, and governmental jurisdictions. In this case, entities that will be most affected by this rule are wheat producers and custom combine harvesters. The size of these entities is unknown. It is reasonable to assume, however, that most are small in size according to the U.S. Small Business Administration's (SBA) criteria. This assumption is based on composite data for providers of the same and similar services. For example, in 1997, of the 6,135 wheat and other farms in Arizona, 89 percent had annual sales of less than $0.5 million, the SBA's threshold for a small wheat farm. Similarly, in 1997, there were 366 U.S. firms involved in mechanical harvesting and related activities, including combining of crops. Of these firms, 93 percent had less than $5.0 million in annual sales, which is the SBA's threshold for a small entity for businesses of that type.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform.

This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This final rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

Accordingly, we are amending 7 CFR part 301 as follows:

PART 301—DOMESTIC QUARANTINE NOTICES

1. The authority citation for part 301 continues to read as follows:

Authority: 7 U.S.C. 166, 7711, 7712, 7714, 7731, 7735, 7751, 7752, 7753, and 7754; 7 CFR 2.22, 2.80, and 371.3.

Section 301.75–15 also issued under Sec. 204, Title II, Pub. L. 106–113, 113 Stat. 1501A–293; sections 301.75–15 and 301.75–16 also issued under Sec. 203, Title II, Pub. L. 106–224, 114 Stat. 400 (7 U.S.C. 1421 note).

2. In § 301.89–3, paragraph (f) is revised to read as follows:

§ 301.89–3 Regulated areas.

* * * * *

(f) The following areas or fields are designated as regulated areas (maps of the regulated areas may be obtained by contacting the Animal and Plant Health Inspection Service, Plant Protection and Quarantine, 4700 River Road Unit 134, Riverdale, MD 20737–1236):

Arizona

La Paz County. (1) Beginning at the southeast corner of sec. 33, T. 5 N., R. 21 W.; then west to the Colorado River; then north along the Colorado River to the west edge of sec. 26, T. 6 N., R. 22 W.; then north to the northwest corner of sec. 26, T. 6 N., R. 22 W.; then east to the northeast corner of sec. 27, T. 6 N., R. 21 W.; then south to the southeast corner of sec. 10, T. 5 N., R. 21 W.; then west to the southwest corner of sec. 10, T. 5 N, R. 21 W.; then south to the point of beginning.

(2) Beginning at the southeast corner of sec. 6, T. 7 N., R. 20 W.; then west to the southeast corner of sec. 35, T. 7 N., R. 21 W.; then south to the southeast corner of sec. 2, T. 6 N., R. 21 W; then west to the southeast corner of sec. 3, T. 6 N., R. 21 W.; then south to the southeast corner of sec. 15, T. 6 N., R. 21 W.; then west to the southwest corner of sec. 13, T. 6 N., R. 22 W., then north to the northwest corner of sec. 25, T. 7 N., R. 22 W.; then east to the southwest corner of sec. 19, T. 7 N., R. 21 W.; then north to the Colorado River; then northeast along the Colorado River to the north edge of sec. 32, T. 8 N., R. 21 W.; then east to the northeast corner of sec. 31, T. 8 N., R. 20 W.; then south to the point of beginning.

Maricopa County. (1) Beginning at the southeast corner of sec. 12, T. 6 S., R. 6 W.; then west to the southwest corner of sec. 7, T. 6 S., R. 6 W.; then north to the northwest corner of sec. 7, T. 6 S., R. 6 W.; then west to the southwest corner of sec. 2, T. 6 S., R. 7 W.; then north to the northwest corner of sec. 14, T. 5 S., R. 7 W.; then east to the northeast corner of sec. 18, T. 5 S., R. 6 W.; then south to the southeast corner of sec. 19, T. 5 S., R. 6 W.; then east to the northeast corner of sec. 25, T. 5 S., R. 6 W.; then south to the point of beginning.

(2) Beginning at the southeast corner of sec. 34, T. 1 N., R. 2 W.; then west to the northeast corner of sec. 5, T. 1 S., R. 2 W.; then south to the southeast corner of sec. 8, T. 1 S., R. 2 W.; then west to the southeast corner of sec. 11, T. 1 S., R. 4 W.; then south to the southeast corner of sec. 14, T. 1 S, R. 4 W.; then west to the southwest corner of sec. 14, T. 1 S., R. 5 W.; then north to the northwest corner of sec. 14, T. 1 N., R. 5 W.; then east to the northwest corner of sec. 17, T. 1 N., R. 2 W.; then north to the northwest corner of sec. 8, T. 1 N., R. 2 W.; then east to the northeast corner of sec. 10, T. 1 N., R. 2 W.; then south to the point of beginning.

(3) Beginning at the southeast corner of sec. 28, T. 1 S., R. 2 E.; then west to the southwest corner of sec. 30, T. 1 S., R. 2 E.; then north to the southwest corner of sec. 18, T. 1 S., R. 2 E.; then west to the southwest corner of sec. 14, T. 1 S., R. 1 E.; then north to the southwest corner of sec. 2, T. 1 S., R. 1 E.; then west to the southwest corner of sec. 4, T. 1 S., R. 1 E.; then north to the northwest corner of sec. 4, T. 1 S., R. 1 E.; then west to the southwest corner of sec. 36, T. 1 N., R. 2 W.; then north to the southwest corner of sec. 25, T. 2 N., R. 2 W.; then west to the southwest corner of sec. 27, T. 2 N., R. 2 W.; then north to the northwest corner of sec. 3, T. 3 N., R. 2 W.; then east to the northeast corner of sec. 1, T. 3 N., R. 1 W.; then south to the northwest corner of sec. 19, T. 3 N., R. 1 E.; then east to the northeast corner of sec. 23, T. 3 N., R. 1 E.; then south to the southeast corner of sec. 35, T. 3 N., R. 1 E.; then east to the northeast corner of sec. 1, T. 2 N., R. 1 E.; then south to the northwest corner of sec. 18, T. 1 N., R. 2 E.; then east to the northeast corner of sec. 13, T. 1 N., R. 2 E.; then south to the southeast corner of sec. 12, T. 1 S., R. 2 E.; then west to the southeast corner of sec. 9, T. 1 S., R. 2 E.; then south to the point of beginning.

(4) Beginning at the southeast corner of sec. 34, T. 2 N., R. 5 E.; then west to the southwest corner of sec. 31, T. 2 N., R. 5 E.; then north to the northwest corner of sec. 7, T. 2 N., R. 5 E.; then east to the northeast corner of sec. 10, T. 2 N., R. 5 E.; then south to the point of beginning.

(5) Beginning at the intersection of the Maricopa/Pinal County line and the southwest corner of sec. 31, T. 2 S., R. 5 E.; then north to the northwest corner of sec. 31, T. 2 S., R. 5 E.; then west to the southwest corner of sec. 25, T. 2 S., R. 4 E.; then north to the southwest corner of sec. 13, T. 2 S., R. 4 E.; then west to the southwest corner of sec. 15, T. 2 S., R. 4 E; then north to the northwest corner of sec. 3, T. 2 S., R. 4 E.; then east to the southwest corner of sec. 35, T. 1 S., R. 4 E.; then north to the northwest corner of sec. 35, T. 1 S., R. 4 E.; then east to the northwest corner of sec. 34, T. 1 S., R. 5 E.; then north to the northwest corner of sec. 22, T. 1 S., R. 5 E.; then east to the northwest corner of sec. 20, T. 1 S., R. 6 E.; then north to the northwest corner of sec. 8, T. 1 S., R. 6 E.; then east to the northeast corner of sec. 7, T. 1 S., R. 7 E.; then south to the southeast corner of sec. 31, T. 1 S., R. 7 E.; then east to the northeast corner of sec. 5, T. 2 S., R. 7 E.; then south to the southeast corner of sec. 5, T. 2 S., R. 7 E.; then east to the Maricopa/Pinal County line; then south and west along the Maricopa/Pinal County line to the point of beginning.

(6) The following individual fields in Maricopa County are regulated areas:

301060505, 301060506, 301060601, 301060602, 301060603 301060604, 301102505, 301102506, 303111502, 303111503, 304031904, 304031906, 304073004, 304073005, 304073010, 304081410, 304081413, 304081415, 304081417, 304081505, 304081506, 304082202, 304082302, 304082303, 304082607, 304082703, 306013222, 306013231, 306020404, 306020501, 306020601, 306020623, 316123301, 316123302, 316123303, 316131901, 316131904, 316132302, 316132604,

Pinal County. (1) Beginning at the intersection of the Maricopa/Pinal County line and the northwest corner of sec. 7, T. 2 S., R. 8 E.; then east to the northeast corner of sec. 8, T. 2 S., R. 8 E.; then south to the southeast corner of sec. 8, T. 2 S., R. 8 E.; then east to the northeast corner of sec. 16, T. 2 S., R. 8 E., then south to the southeast corner of sec. 28, T. 2 S., R. 8 E.; then west to the southeast corner of sec. 29, T. 2 S., R. 8 E.; then south to the southeast corner of sec. 32, T. 2 S., R. 8 E.; then west to the Maricopa/Pinal County line; then north along the Maricopa/Pinal County line to the point of beginning.

(2) Beginning at the point of intersection of the Maricopa/Pinal County line and the northeast corner of sec. 5, T. 3 S., R. 6 E.; then south to the southeast corner of sec. 32, T. 3 S., R. 6 E.; then west to the southwest corner of sec. 34, T. 3 S., R. 5 E.; then north to the southwest corner of sec. 3, T. 3 S., R. 5 E.; then west to the southwest corner of sec. 6, T. 3 S., R. 5 E.; then north to the Maricopa/Pinal County line; then east along the Maricopa/Pinal County line to the point of beginning.

(3) Beginning at the southeast corner of sec. 5, T. 6 S., R. 4 E.; then west to the southwest corner of sec. 5, T. 6 S., R. 3 E.; then north to the southwest corner of sec. 28, T. 5 S., R. 3 E.; then west to the southwest corner of sec. 25, T. 5 S., R. 2 E.; then north to the southwest corner of sec. 24, T. 5 S., R. 2 E.; then west to the southwest corner of sec 23, T. 5 S., R. 2 E.; then north to the northwest corner of sec. 35, T. 4 S., R. 2 E.; then east to the northwest corner of sec. 36, T. 4 S., R. 2 E.; then north to the northwest corner of sec. 25, T. 4 S., R. 2 E.; then east to the northwest corner of sec. 29, T. 4 S., R. 3 E.; then north to the northwest corner of sec. 20, T. 4 S.,R. 3 E.; then east to the northeast corner of sec. 21, T. 4 S., R. 4 E.; then south to the northeast corner of sec. 4, T. 5 S., R. 4 E.; then east to the northeast corner of sec. 3, T. 5 S., R. 4 E., then south to the southeast corner of sec. 22, T. 5 S., R. 4 E.; then west to the southeast corner of sec. 21, T. 5 S., R. 4 E.; then south to the point of beginning.

(4) The following individual fields in Pinal County are regulated areas:

307012207, 308102604, 308102605, 309021801, 309021804, 309021812, 309031304, 309033507, 309042544, 309042545, 309042601, 309042607, 309042619, 309042620, 309042621, 309050104, 309050109, 309050122, 309050207, 309050209,

Yuma County. The following individual fields in Yuma County are regulated areas: 321011103, 321033501, 321033502, 321033503, 321033516, 321033517, 321033518, 321033519, 321040405, 321040911, 321040912, 321040915, 321040917, 321040918, 321040921, 321040922, 321041908, 321041919, 323030401, 323030402, 323030403, 323030404, 323030405, 323030406, 323030501, 323030502, 323030512, 323030513, 323030514, 323030515, 323030521.

California

Imperial County. Beginning at the intersection of the Riverside/Imperial County line and the California/Arizona State line; then west to the northwest corner of sec. 1, T. 9 S., R. 21 E.; then south to the California/Arizona State line; then east and north along the State line to the point of beginning.

Riverside County. Beginning at the intersection of the Riverside/Imperial County line and the California/Arizona State line; then west to the southwest corner of sec. 31, T. 8 S., R. 22 E.; then north to the northwest corner of sec. 30, T. 7 S., R. 22 E.; then north and northeast along the Palo Verde Valley agriculture area to the California/Arizona State line; then south along the State line to the point of beginning.

New Mexico

Dona Ana County. The following individual fields in Dona Ana County are regulated areas: 113040501, 113040502, 113040506, 113040507, 113040508, 113040602, 113040702, 113040902, 113042601, 113042707, 113042708, 113043401, 113043407, 113050201, 113050202, 113050301, 113060702, 113060703, 113060801, 113060809, 113060901, 113060902, 113070702, 113072701, 113072702, 113072703, 113072704, 113072705, 113072706, 113173103, 113210401, 113210402, 113210403, 113210406, 113210407, 113210808, 113212103, 113212802, 113212806, 113241601, 113242708,

Hildalgo County. The following individual fields in Hidalgo County are regulated areas: 123272403, 123353001.

Luna County. BILLING CODE 3410–34–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2001–NM–349–AD; Amendment 39–12526; AD 2001–23–51]

RIN 2120–AA64

Airworthiness Directives; Airbus Model A300 B4–600, B4–600R, and F4–600R (Collectively Called A300–600) Series Airplanes; and Model A310 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This document publishes in the **Federal Register** an amendment adopting airworthiness directive (AD) 2001–23–51 that was sent previously to all known U.S. owners and operators of certain Airbus Model A300 B4–600, B4–600R, and F4–600R (collectively called A300–600) series airplanes; and Model A310 series airplanes by individual notices. This AD requires a one-time detailed visual inspection to detect repairs and alterations to, and damage of the vertical stabilizer attachment fittings, including the main attachment lugs and the transverse (side) load fittings; and the rudder hinge fittings, hinge arms, and support fittings for all rudder hinges, and rudder actuator support fittings; and repair, if necessary. This AD also requires that operators report results of inspection findings to the FAA. This action is prompted by an airplane accident shortly after takeoff from John F. Kennedy International Airport, Jamaica, New York. The actions specified by this AD are intended to prevent failure of the vertical stabilizer-to-fuselage attachment fittings or transverse (side) load fittings, or rudder-to-vertical stabilizer attachment fittings, which could result in loss of the vertical stabilizer and/or rudder and consequent loss of control of the airplane.

DATES: Effective December 10, 2001, to all persons except those persons to whom it was made immediately effective by emergency AD 2001–23–51, issued on November 16, 2001, which contained the requirements of this amendment.

Comments for inclusion in the Rules Docket must be received on or before January 4, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2001–NM–

349–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-iarcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2001–NM–349–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

Information pertaining to this AD may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Henry Offermann, Aerospace Engineer; Airframe and Cabin Safety Branch, ANM–115, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; telephone (425) 227–2676; fax (425) 227–1100.

SUPPLEMENTARY INFORMATION: On November 16, 2001, the FAA issued emergency AD 2001–23–51, which is applicable to certain Airbus Model A300 B4–600, B4–600R, and F4–600R (collectively called A300–600) series airplanes; and Model A310 series airplanes airplanes.

Background

On November 12, 2001, an Airbus Model A300 B4–605R airplane was involved in an accident shortly after takeoff from John F. Kennedy International Airport, Jamaica, New York. The cause of the accident is under investigation by the National Transportation Safety Board (NTSB). Although the NTSB has not determined the cause of the accident, it has determined that the vertical stabilizer departed the airplane. In addition, the rudder was found separated from the vertical stabilizer.

The vertical stabilizer on Airbus Model A300–600 series airplanes with Airbus Modification 4886 is manufactured of advanced composite materials. The vertical stabilizer on Airbus Model A310 series airplanes with the same modification is manufactured of the same materials. Failure of the vertical stabilizer-to-fuselage attachment fittings, transverse (side) load fittings, or rudder-to-vertical stabilizer attachment fittings, if not corrected, could result in loss of the vertical stabilizer and/or rudder and consequent loss of control of the airplane.

The FAA considers that, before structural failure, it may be possible to detect indications of possible failure modes that could result in separation of the vertical stabilizer from the airplane. These indications include edge delaminations, cracked paint, surface distortions, other surface damage, and failure of the transverse (side) load fittings. Similarly, indications of failure of the rudder assembly, which could lead to failure of the vertical stabilizer, may also be detectable with such an inspection. Although neither the FAA nor the NTSB have reached conclusions with respect to these possible failures on the accident airplane, we consider it prudent to require an inspection of these structures to identify any such indication that may exist.

These airplane models are manufactured in France and are type-certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. The FAA has coordinated this action with the Direction Generale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, and the DGAC has taken similar action.

Explanation of the Requirements of the Rule

Since the unsafe condition described is likely to exist or develop on other airplanes of the same type design registered in the United States, the FAA issued emergency AD 2001–23–51 to prevent failure of the vertical stabilizer-to-fuselage attachment fittings or transverse (side) load fittings, or rudder-to-vertical stabilizer attachment fittings, which could result in loss of the vertical stabilizer and/or rudder and consequent loss of control of the airplane. The AD requires a one-time detailed visual inspection to detect repairs and alterations to, and damage of the vertical stabilizer attachment fittings, including the main attachment lugs and the transverse (side) load fittings; and the rudder hinge fittings, hinge arms, and support fittings for all rudder hinges, and rudder actuator support fittings; and repair, if necessary. Damage of the metallic areas includes pulled or loose fasteners, wear areas, distorted flanges, cracks, and corrosion. Damage of the composite areas includes delamination; distorted surfaces that may indicate delamination; cracks in the paint surface; evidence of moisture damage; and cracked, splitting, or frayed fibers. This AD also requires that operators report results of inspection findings to the FAA.

Interim Action

This is considered to be interim action. The inspection report that is required by this AD will enable the FAA, DGAC, and manufacturer to obtain better insight into the potential unsafe condition, and eventually to develop final action to address it, if necessary. If final action is identified, the FAA may consider further rulemaking.

Determination of Rule's Effective Date

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual notices issued on November 16, 2001, to all known U.S. owners and operators of certain Airbus Model A300 B4–600, B4–600R, and F4–600R (collectively called A300–600) series airplanes; and Model A310 series airplanes. These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to section 39.13 of the Federal Aviation Regulations (14 CFR 39.13) to make it effective as to all persons.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that

summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2001–NM–349–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

AD 2001–23–51 Airbus Industrie: Amendment 39–12526. Docket 2001–NM–349–AD.

Applicability: Model A300 B4–600, B4–600R, and F4–600R (collectively called A300–600) series airplanes; and Model A310 series airplanes; certificated in any category; having a vertical stabilizer made of composite material (reference Airbus Modification 4886).

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished within the last 6 months.

To prevent failure of the vertical stabilizer-to-fuselage attachment fittings or transverse (side) load fittings, or rudder-to-vertical stabilizer attachment fittings, which could result in loss of the vertical stabilizer and/or rudder and consequent loss of control of the airplane, accomplish the following:

Compliance Time

(a) Within 15 days after the effective date of this AD, do the inspections specified in paragraphs (b) and (c) of this AD.

Note 2: For the purposes of this AD, a detailed visual inspection is defined as: "An intensive visual examination of a specific structural area, system, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at intensity deemed appropriate by the inspector. Inspection aids such as mirror, magnifying lenses, etc., may be used. Surface cleaning and elaborate access procedures may be required."

Inspection and Corrective Actions

(b) Perform a one-time detailed visual inspection to detect repairs and alterations to, and damage of the vertical stabilizer attachment fittings, including the main attachment lugs and the transverse (side) load fittings. Any alteration made to the composite structures, either during production or post-production, is considered areas of primary concern. Gain access to the vertical stabilizer attachment fittings by removing external fairings and internal access covers and inspect both sides of affected attachment fittings. Damage of the metallic areas includes pulled or loose fasteners, wear areas, distorted flanges, cracks, and corrosion. Damage of the composite areas includes delamination; distorted surfaces that may indicate delamination; cracks or abrading in the paint surface; surface damage; evidence of moisture damage; and cracked, splitting, or frayed fibers.

(1) If any damage is found to the vertical stabilizer attachment fittings, including the main attachment lugs and the transverse (side) load fittings, before further flight, repair per a method approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate.

(2) If any repair or alteration to the attachment lug areas of the vertical stabilizer has been accomplished previously, before further flight, the repair or alteration must be approved by the Manager, International Branch, ANM–116.

(c) Perform a one-time detailed visual inspection to detect damage of the rudder hinge fittings, hinge arms, and support fittings for all rudder hinges, and rudder actuator support fittings. Damage of the metallic areas includes pulled or loose fasteners, wear areas, distorted flanges, cracks, and corrosion. Damage of the composite areas includes delamination; distorted surfaces that may indicate delamination; cracks or abrading in the paint surface; surface damage; evidence of moisture damage; and cracked, splitting, or frayed fibers. If any damage is found, before further flight, repair per the manufacturer's structural repair manual, or per a method approved by the Manager, International Branch, ANM–116.

Report

(d) Submit a report of inspection findings (both positive and negative) to the Manager, International Branch, ANM–116; fax (425) 227–1149; at the applicable time specified in paragraph (d)(1) or (d)(2) of this AD. The report must include the inspection results, a description of any repair, alteration, or discrepancy found, including digital photographs of the damaged area, the airplane serial number, and the number of flight cycles and flight hours on the airplane. Information collection requirements contained in this AD have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120–0056.

(1) For airplanes on which the inspection is accomplished after the effective date of this AD: Submit the report within 5 days after performing the inspection required by paragraph (a) of this AD.

(2) For airplanes on which the inspection has been accomplished prior to the effective date of this AD: Submit the report within 5 days after the effective date of this AD.

Alternative Methods of Compliance

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 3: Information concerning the existence of approved alternative methods of

compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

Special Flight Permits

(f) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Effective Date

(g) This amendment becomes effective on December 10, 2001, to all persons except those persons to whom it was made immediately effective by emergency AD 2001–23–51, issued on November 16, 2001, which contained the requirements of this amendment.

Issued in Renton, Washington, oh November 26, 2001.

Vi L. Lipski,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2001–NM–345–AD; Amendment 39–12553; AD 2001–25–01]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model DC–8–33, –43, –51, –52, –53, and –55 Series Airplanes; Model DC–8F–54, and –55 Series Airplanes; and Model DC–8–61, –61F, –62, –62F, –63, –63F, –71, –71F, –72, –72F, –73, and –73F Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC–8–33, –43, –51, –52, –53, and –55 series airplanes; Model DC–8F–54, and –55 series airplanes; and Model DC–8–61, –61F, –62, –62F, –63, –63F, –71, –71F, –72, –72F, –73, and –73F series airplanes. This action requires repetitive inspections of the electrical connectors of the explosive cartridge wiring of the engine fire extinguisher containers to verify if the identification number labels are installed and legible; repetitive electrical tests of all explosive cartridge wiring of the engine fire extinguisher containers to verify proper installation and function; and corrective actions, if necessary. This action is necessary to detect and correct cross-wired electrical connectors of the fire extinguishing system, which could release fire extinguishing agent into the incorrect engine nacelle in the event of an engine fire.

DATES: Effective December 20, 2001.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 20, 2001.

Comments for inclusion in the Rules Docket must be received on or before February 4, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2001–NM–345–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-iarcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2001–NM–345–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in this AD may be obtained from Boeing Commercial Aircraft Group, Long Beach Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Data and Service Management, Dept. C1–L5A (D800–0024). This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: William Bond, Aerospace Engineer, Propulsion Branch, ANM–140L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5253; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION: The FAA has received reports of electrical connectors of the engine fire extinguishing agent containers being cross-wired on certain McDonnell Douglas DC–8 series airplanes. The fire extinguishing system on these airplanes consists of independent left- and right-wing fixed fire extinguisher installations. Each wing installation includes two containers with two fire extinguishing agent deployment lines per container. Either container of a wing installation may be discharged into either engine nacelle of the same wing. In one incident, six of eight electrical connectors of the explosive cartridges were found installed on the incorrect cartridge/discharge valve. These reported incidents were caused by unclear maintenance instructions and an inadequate wire harness design that does not prevent cross-connecting the electrical connectors. Cross-wired electrical connectors of the fire extinguishing system, if not corrected, could release fire extinguishing agent into the incorrect engine nacelle in the event of an engine fire.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Alert Service Bulletin DC8–26A046, dated November 7, 2001. The service bulletin describes procedures for repetitive inspections of the electrical connectors of the explosive cartridge wiring of the fire extinguisher containers to verify if the identification number labels are installed and legible; and installation of a label or replacement of the label with a new label, if necessary. The service bulletin also describes procedures for repetitive electrical tests of the explosive cartridge wiring of the fire extinguisher container to verify proper installation and function, and for troubleshooting and repairing the wiring of the Firex Discharge system, if necessary.

Explanation of the Requirements of the Rule

Since an unsafe condition has been identified that is likely to exist or develop on other McDonnell Douglas Model DC–8–33, –43, –51, –52, –53, and –55 series airplanes; Model DC–8F–54, and –55 series airplanes; and Model DC–8–61, –61F, –62, –62F, –63, –63F, –71, –71F, –72, –72F, –73, and –73F series airplanes of the same type design, this AD is being issued to detect and correct cross-wired electrical connectors of the fire extinguishing system, which could release fire extinguishing agent into the incorrect engine nacelle in the event of an engine fire. This AD requires accomplishment of the actions specified in the service bulletin described previously, except as discussed below.

Differences Between Proposed Rule and Service Bulletin

Operators should note that, although the service bulletin recommends accomplishing the inspection within two days (from the issue date of the service bulletin), the FAA has determined that a compliance time of 30 days will not adversely affect safety, and will allow the inspections and tests to be performed at a base during regularly scheduled maintenance where special equipment and trained maintenance personnel will be available if necessary. In addition, there has only been one reported engine fire in the entire DC–8 worldwide fleet in the last five years. Therefore, we find that a compliance time of 30 days is warranted.

Interim Action

This is considered to be interim action until final action is identified, at which time the FAA may consider further rulemaking.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the AD is being requested.
- Include justification (e.g., reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2001–NM–345–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2001–25–01 McDonnell Douglas: Amendment 39–12553. Docket 2001–NM–345–AD.

Applicability: Model DC–8–33, –43, –51, –52, –53, and –55 series airplanes; Model DC–8F–54, and –55 series airplanes; and Model DC–8–61, –61F, –62, –62F, –63, –63F, –71, –71F, –72, –72F, –73, and –73F series airplanes; certificated in any category; as listed in Boeing Alert Service Bulletin DC8–26A046, dated November 7, 2001.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To detect and correct cross-wired electrical connectors of the fire extinguishing system, which could release fire extinguishing agent into the incorrect engine nacelle in the event of an engine fire, accomplish the following:

Repetitive Inspections and Tests, and Corrective Action(s), if Necessary

(a) Within 30 days after the effective date of this AD, do the action(s) specified in paragraphs (a)(1) and (a)(2) of this AD per Boeing Alert Service Bulletin DC8–26A046, dated November 7, 2001.

(1) Do an inspection of the electrical connectors of the explosive cartridge wiring of the engine fire extinguisher containers to verify if the identification number labels are installed and legible. If any identification number label is missing or is not legible, before further flight, install a label or replace the label with a new label, as applicable. Repeat the inspection after each maintenance action for the Firex Discharge system.

(2) Do an electrical test of all explosive cartridge wiring of the engine fire extinguisher containers to verify proper installation and function, using the cockpit warning lamps. If the lamp fails to illuminate, before further flight, troubleshoot and repair the wiring of the Firex Discharge system. Repeat the test after each maintenance action for the Firex Discharge system.

Note 2: Inspections, tests, and corrective actions, if necessary, done per Boeing BOECOM M–7200–01–02632, dated November 5, 2001, before the effective date of this AD, are considered acceptable for compliance with the requirements of this AD.

Alternative Methods of Compliance

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

Special Flight Permits

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(d) The actions shall be done in accordance with Boeing Alert Service Bulletin DC8–26A046, dated November 7, 2001. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Aircraft Group, Long Beach Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Data and Service Management, Dept. C1–L5A (D800–0024). Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Effective Date

(e) This amendment becomes effective on December 20, 2001.

Issued in Renton, Washington, on November 29, 2001.

Ali Bahrami,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 01–30084 Filed 12–4–01; 8:45 am]

RIN 2120–AA64

Airworthiness Directives; Fokker Model F.28 Mark 0100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Fokker Model F.28 Mark 0100 series airplanes. This action requires repetitive inspections of certain main landing gear (MLG) main fittings to detect forging defects, and rework of the main fittings if necessary. This action is necessary to detect forging defects of the MLG main fittings, which could lead to cracking and result in significant structural damage to the airplane and possible injury to the occupants.

DATES: Effective December 20, 2001.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 20, 2001.

Comments for inclusion in the Rules Docket must be received on or before January 4, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2001–NM–327–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-iarcomment@faa.gov*. Comments sent via the Internet must contain "Docket No. 2001–NM–327–AD" in the subject line and need not be submitted in triplicate. Comments sent via fax or the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in this AD may be obtained from Fokker Services B.V., P.O. Box 231, 2150 AE Nieuw-Vennep, the Netherlands. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aerospace Engineer, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–1137; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION: The Civil Aviation Authority—The Netherlands (CAA–NL), which is the airworthiness authority for the Netherlands, notified the FAA that an unsafe condition may exist on certain Fokker Model F.28 Mark 0100 series airplanes. The CAA–NL advises that, upon touchdown, a main landing gear (MLG) main fitting failed, causing the lower part of the main fitting to break off, including the MLG sliding member, wheels, and brakes. Subsequent inspection revealed a crack, located 5 centimeters outboard from the inboard face of the upstop damper abutment, which measured 12 millimeters in length and 2.5 millimeters in depth. In that same area, an operator found 3 more MLG main fittings with an indication of an eddy current defect. In several other cases, the crack was determined to be due to a forging defect. This condition, if not corrected, could lead to cracking and result in significant structural damage to the airplane and possible injury to the occupants.

Explanation of Relevant Service Information

Messier-Dowty Limited has issued Messier-Dowty Service Bulletin No. F100–32–101, including Appendices A and B, dated October 25, 2001, which describes procedures for two inspections of the MLG fittings for cracking and rework of the MLG main fittings within certain areas.

Service Bulletin No. F100–32–101 refers to Messier-Dowty Service Bulletin No. F100–32–100, Revision 1, dated June 19, 2001, and Fokker Service Bulletin SBF100–32–131, dated October 25, 2001, as additional sources of service information for the inspections and rework actions.

The CAA–NL classified Messier-Dowty Service Bulletin No. F100–32–100 as mandatory and issued Dutch airworthiness directive BLA 2001–080, dated June 29, 2001, for a one-time eddy current inspection and rework actions to assure the continued airworthiness of these airplanes in the Netherlands.

FAA's Determination

Although the previously referenced Dutch airworthiness directive specifies

a one-time eddy current inspection on MLG main fittings and rework actions per Messier-Dowty Service Bulletin No. F100–32–100, the FAA has determined that the initial and repetitive inspections required by paragraph (a) of this AD and the rework actions, if necessary, required by paragraph (b) of this AD must be made per Messier-Dowty Service Bulletin No. F100–32–101. This determination was made because the manufacturer informed the FAA that findings made after the issuance of Service Bulletin F100–32–100 indicate the need for additional eddy current inspections of the MLG main fittings. Findings also reveal that detection of closed forging folds might not be possible and that the forging folds would open when the main fittings are subjected to certain landing load levels. Because some detectable indications could be missed during the initial inspection, repetitive inspections are required to identify all detectable forging fold defects. To address these findings, Messier-Dowty has issued Service Bulletin No. F100–32–101 to specify additional inspections to safeguard the structural integrity of the MLG. As a result, the inspections required by paragraph (a) of this AD must be done per Service Bulletin No. F100–32–101 instead of Service Bulletin No. F100–032–100.

FAA's Conclusions

This airplane model is manufactured in the Netherlands and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA–NL has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA–NL, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, this AD is being issued to detect forging defects of the MLG, and rework of the MLG main fittings if necessary. This AD requires initial and repetitive eddy current inspections of certain MLG main fittings to detect forging defects, and rework of the main fittings if necessary. This AD also would require that operators report all findings of the eddy current inspections to Fokker Services B.V. This AD requires accomplishment of the actions per Messier-Dowty Service Bulletin No. F100–32–101, as described previously, except as discussed below.

Differences Between Dutch Airworthiness Directive and This AD

Operators should note that, as described earlier, Dutch airworthiness directive BLA 2001–080 specifies only a one-time eddy current inspection of the MLG main fittings and rework actions per Messier-Dowty Service Bulletin No. F100–32–100, or a later revision approved by the CAA–NL. However, this AD requires an initial eddy current inspection and repetitive inspections, and rework of the MLG main fittings if necessary, per Messier-Dowty Service Bulletin No. F100–32–101. The CAA–NL has notified the FAA that it will issue a new Dutch airworthiness directive to mandate the inspections, and rework if necessary, specified by Service Bulletin No. F100–32–101. However, operators should note that this AD differs from Dutch airworthiness directive BLA 2001–080 in that it would require continuing the inspections until a final terminating action is identified.

Operators also should note that a later revision of a service bulletin may not be referenced in an AD because the use of the phrase "or a later revision" would violate Office of the Federal Register regulations regarding the approval of materials that are incorporated by reference.

Differences Between the Service Information and This AD

Operators should note the following differences between Service Bulletin No. F100–32–101 and this AD:

- Although the referenced service bulletin specifies only two eddy current inspections, this AD requires an initial inspection and repetitive inspections until a final terminating action is identified. The FAA point outs that the exclusion of continued inspections after only two inspections relies on a damage tolerance approach. This approach leads the manufacturer to the conclusion that the crack growth is of a magnitude that would not lead to failure prior to overhaul. However, we do not agree with such a conclusion as there are a number of unknown variables associated with detecting and anticipating the effects of forging fold defects. For this reason, we have determined that requiring only two inspections would not adequately address the identified unsafe condition and that continued inspections until accomplishment of a terminating action are necessary to ensure the continued airworthiness of the fleet.
- Although the referenced service bulletin specifies that the parts manufacturer may be contacted for disposition of certain discrepancies, this AD would require the repair of those conditions to be accomplished in accordanee with a method approved by either the FAA, or CAA–NL (or its delegated agent). In light of the type of repair that would be required to address the identified unsafe condition, and in consonance with existing bilateral airworthiness agreements, the FAA has determined that, for this AD, a repair approved by either the FAA or CAA–NL (or its delegated agent) would be acceptable for compliance with this AD.
- The referenced service bulletin specifies that, after accomplishing the actions specified in that service bulletin, rework of the MLG main fittings is to be accomplished per a new service bulletin, Messier-Dowty Service Bulletin F100–32–102. However, because the new service bulletin has not been issued yet, this AD cannot specify that service bulletin. The new service bulletin is expected to include procedures that would terminate the need for the inspections required by this AD.

Interim Action

This is considered to be interim action. The manufacturer has advised that it currently is developing rework procedures that will positively address the unsafe condition addressed by this AD. Once this procedure is developed, approved, and available, the FAA may consider additional rulemaking.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before

the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the AD is being requested.
- Include justification (e.g., reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2001–NM–327–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2001–24–10 Fokker Services B.V.: Amendment 39–12527. Docket 2001–NM–327–AD.

Applicability: Model F.28 Mark 0100 series airplanes, certificated in any category, equipped with Messier-Dowty main landing gear units having part numbers (P/N) 201072011, 201072012, 201072013, 201072014, 201072015, or 201072016, that include main fitting subassemblies having P/Ns 201072283, 201072284, or 201251258 (main fittings having P/Ns 201072383, 201072384, or 201072389).

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (f) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

Note 2: This AD references Messier-Dowty Service Bulletin No. F100–32–101, including Appendices A and B, dated October 25, 2001, which is not referenced in Dutch airworthiness directive BLA 2001–080, dated June 29, 2001. In addition, this AD specifies additional inspections that are beyond those included in the service bulletin. Where there are differences between the AD and the service information, the AD prevails.

To detect forging defects of the main landing gear (MLG), which could lead to cracking and result in significant structural damage to the airplane and possible injury to the occupants, accomplish the following:

Initial and Repetitive Inspections

(a) Before the accumulation of 1,000 total landings on a new MLG, or within 30 days after the effective date of this AD, whichever occurs later: Do an initial eddy current inspection on all MLG main fittings to detect forging defects per Messier-Dowty Service Bulletin No. F100–32–101, including Appendices A and B, dated October 25, 2001. After accomplishment of the initial inspection, repeat the inspection thereafter at intervals not to exceed 500 landings or 6 months, whichever occurs first, per the service bulletin.

Rework

(b) After any inspection required by paragraph (a) of this AD, before further flight, accomplish the applicable actions required by paragraph (b)(1) or (b)(2) of this AD.

(1) If any cracking is found within the limits specified in Messier-Dowty Service Bulletin No. F100–32–101, including Appendices A and B, dated October 25, 2001: Rework the MLG main fitting per the service bulletin.

(2) If any cracking is found that exceeds the limits specified in Messier-Dowty Service Bulletin No. F100–32–101, including Appendices A and B, dated October 25, 2001: Rework the MLG main fitting per a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the Civil Aviation Authority " The Netherlands (CAA–NL) (or its delegated agent).

Exception to Service Information

(c) During any action required by this AD, if the service bulletin specifies to contact Messier-Dowty for an appropriate action: Before further flight, repair per a method approved by the Manager, International Branch, ANM–116; or the CAA–NL (or its delegated agent).

Reporting Requirement

(d) Within 7 days after accomplishing any inspection required by paragraph (a) of this AD: Submit a report of the inspection findings (positive and negative) to Fokker Services B.V, Technical Services Dept., P.O. Box 231, 2150 AE Nieuw-Vennep, the Netherlands, fax number 31 (0) 252 627211. The report must include MLG crack indication, part number, serial number, crack depth and length, and a description of any rework of the MLG main fittings accomplished. Information collection requirements contained in this AD have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120–0056.

Spares

(e) As of the effective date of this AD, no person shall install on any airplane, an MLG main fitting or main fitting subassembly having a part number specified in Paragraph 1.A of the "Effectivity" in Messier-Dowty

Service Bulletin No. F100–32–101, including Appendices A and B, dated October 25, 2001, unless the MLG fitting has been inspected, and the rework actions accomplished if necessary, per the service bulletin.

Alternative Methods of Compliance

(f) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

Special Flight Permits

(g) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(h) Except for the actions required by paragraphs (b)(2) and (c) of this AD, the actions shall be done in accordance with Messier-Dowty Service Bulletin No. F100–32–101, including Appendices A and B, dated October 25, 2001. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Fokker Services B.V., P.O. Box 231, 2150 AE Nieuw-Vennep, the Netherlands. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Note 4: The subject of this AD is addressed in Dutch airworthiness directive BLA 2001–080, dated June 29, 2001.

Effective Date

(i) This amendment becomes effective on December 20, 2001.

Issued in Renton, Washington, on November 26, 2001.

Vi L. Lipski,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 381

[Docket No. RM02–6–000]

Annual Update of Filing Fees

November 29, 2001.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; annual update of Commission filing fees.

SUMMARY: In accordance with 18 CFR 381.104, the Commission issues this update of its filing fees. This notice provides the yearly update using data in the Commission's Management, Administrative, and Payroll System to calculate the new fees. The purpose of updating is to adjust the fees on the basis of the Commission's costs for Fiscal Year 2000.

EFFECTIVE DATE: January 4, 2002.

FOR FURTHER INFORMATION CONTACT: Troy Cole, Office of the Executive Director, Federal Energy Regulatory Commission, 888 First Street, NE., Room 42–66, Washington, DC 20426, 202–219–2970.

SUPPLEMENTARY INFORMATION:

Document Availability

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through FERC's Home Page (*http://www.ferc.gov*) and in FERC's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street, NE., Room 2A, Washington, DC 20426.

From FERC's Home Page on the Internet, this information is available in both the Commission Issuance Posting System (CIPS) and the Records and Information Management System (RIMS).

—CIPS provides access to the texts of formal documents issued by the Commission since November 14, 1994.

—CIPS can be accessed using the CIPS link or the Energy Information Online icon. The full text of this document is available on CIPS in ASCII and WordPerfect 8.0 format for viewing, printing, and/or downloading.

—RIMS contains images of documents submitted to and issued by the Commission after November 16, 1981. Documents from November 1995 to the present can be viewed and printed from FERC's Home Page using the RIMS link or the Energy Information Online icon. Descriptions of documents back to November 16, 1981, are also available from RIMS on the Web; requests for copies of these and other older documents should be submitted to the Public Reference Room.

User assistance is available for RIMS, CIPS, and the Website during normal business hours from our Help line at (202) 208–2222 (E

Mail to *WebMaster@ferc.fed.us*) or the Public Reference at (202) 208–1371 (E-Mail to *public.referenceroom@ferc.fed.us*).

During normal business hours, documents can also be viewed and/or printed in FERC's Public Reference Room, where RIMS, CIPS, and the FERC Website are available. User assistance is also available.

The Federal Energy Regulatory Commission (Commission) is issuing this notice to update filing fees that the Commission assesses for specific services and benefits provided to identifiable beneficiaries. Pursuant to 18 CFR 381.104, the Commission is establishing updated fees on the basis of the Commission's Fiscal Year 2000 costs. The adjusted fees announced in this notice are effective January 4, 2002. The Commission has determined with the concurrence of the Administrator of the Office of Information and Regulatory Affairs of the Office of Management and Budget, that this final rule is not a major rule within the meaning of section 251 of Subtitle E of Small Business Regulatory Enforcement Fairness Act 5 U.S.C. 804(2). The Commission is submitting this final rule to both houses of the United States Congress and to the Comptroller General of the United States.

The new fee schedule is as follows:

Fees Applicable to the Natural Gas Policy Act	
1. Petitions for rate approval pursuant to 18 CFR 284.123(b)(2). (18 CFR 381.403)	$8,230
Fees Applicable to General Activities	
1. Petition for issuance of a declaratory order (except under Part I of the Federal Power Act). (18 CFR 381.302(a))	16,530
2. Review of a Department of Energy remedial order:	

Amount in controversy	
$0–9,999. (18 CFR 381.303(b))	100
10,000–29,999. (18 CFR 381.303(b))	600
30,000 or more. (18 CFR 381.303(a))	24,140
3. Review of a Department of Energy denial of adjustment:	
Amount in controversy	
$0–9,999. (18 CFR 381.304(b))	100
10,000–29,999. (18 CFR 381.304(b))	600
30,000 or more. (18 CFR 381.304(a))	12,650
4. Written legal interpretations by the Office of General Counsel. (18 CFR 381.305(a))	4,740
Fees Applicable to Natural Gas Pipelines	
1. Pipeline certificate applications pursuant to 18 CFR 284.224. (18 CFR 381.207(b))	[1] 1,000
Fees Applicable to Cogenerators and Small Power Producers	
1. Certification of qualifying status as a small power production facility. (18 CFR 381.505(a))	14,220
2. Certification of qualifying status as a cogeneration facility. (18 CFR 381.505(a))	16,090
3. Applications for exempt wholesale generator status. (18 CFR 381.801)	970

[1] This fee has not been changed.

List of Subjects in 18 CFR Part 381

Electric power plants, Electric utilities, Natural gas, Reporting and recordkeeping requirements.

Thomas R. Herlihy,

Executive Director and Chief Financial Officer.

In consideration of the foregoing, the Commission amends Part 381, Chapter I, Title 18, Code of Federal Regulations, as set forth below.

PART 381—FEES

1. The authority citation for Part 381 continues to read as follows:

Authority: 15 U.S.C. 717–717w; 16 U.S.C. 791–828c, 2601–2645; 31 U.S.C. 9701; 42 U.S.C. 7101–7352; 49 U.S.C. 60502; 49 App. U.S.C. 1–85.

§ 381.302 [Amended]

2. In § 381.302, paragraph (a) is amended by removing "$ 15,760" and adding "$ 16,530" in its place.

§ 381.303 [Amended]

3. In 381.303, paragraph (a) is amended by removing "$ 23,010" and adding "$ 24,140" in its place.

§ 381.304 [Amended]

4. In § 381.304, paragraph (a) is amended by removing "$ 12,060" and adding "$ 12,650" in its place.

§ 381.305 [Amended]

5. In § 381.305, paragraph (a) is amended by removing "$ 4,520" and adding "$ 4,740" in its place.

§ 381.403 [Amended]

6. Section 381.403 is amended by removing "$ 7,840" and adding "$ 8,230" in its place.

§ 381.505 [Amended]

7. In § 381.505, paragraph (a) is amended by removing "$ 13,550" and adding "$ 14,220" in its place and by removing "$ 15,340" and adding "$ 16,090" in its place.

§ 381.801 [Amended]

8. Section 381.801 is amended by removing "$ 1,310" and adding "$ 970" in its place.

BILLING CODE 6717–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 510

New Animal Drugs; Change of Sponsor's Address

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect a change of sponsor's address for Merial Ltd.

DATES: This rule is effective December 5, 2001.

FOR FURTHER INFORMATION CONTACT: Lonnie W. Luther, Center for Veterinary Medicine (HFV–102), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0209.

SUPPLEMENTARY INFORMATION: Merial Ltd., 2100 Ronson Rd., Iselin, NJ 08830–3077, has informed FDA of a change of sponsor's address to 3239 Satellite Blvd., Bldg. 500, Duluth, GA 30096–4640. Accordingly, the agency is amending the regulations in 21 CFR 510.600(c)(1) and (c)(2) to reflect the change.

This rule does not meet the definition of "rule" in 5 U.S.C. 804(3)(A) because it is a rule of "particular applicability." Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects in 21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 510 is amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR part 510 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 379e.

2. Section 510.600 is amended in the table in paragraph (c)(1) by revising the entry for "Merial Ltd." and in the table in paragraph (c)(2) by revising the entry for "050604" to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
Merial Ltd., 3239 Satellite Blvd., Bldg. 500, Duluth, GA 30096–4640..	050604

(2) * * * .

Drug labeler code	Firm name and address
050604	Merial Ltd., 3239 Satellite Blvd., Bldg. 500, Duluth, GA 30096–4640.

Dated: November 15, 2001.

Claire M. Lathers,

Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 510 and 524

Ophthalmic and Topical Dosage Form New Animal Drugs; Ivermectin Pour-On

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of an abbreviated new animal drug application (ANADA) filed by Virbac AH, Inc. The ANADA provides for topical use of ivermectin on cattle for treatment and control of various species of external and internal parasites.

DATES: This rule is effective December 5, 2001.

FOR FURTHER INFORMATION CONTACT: Lonnie W. Luther, Center for Veterinary Medicine (HFV–102), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0209, e-mail: lluther@cvm.fda.gov.

SUPPLEMENTARY INFORMATION: Virbac AH, Inc., 3200 Meacham Blvd., Ft. Worth, TX 76137, filed ANADA 200–318 for VIRBAMEC (ivermectin) Pour-On. The ANADA provides for topical use of 0.5 percent ivermectin solution on cattle for the treatment and control of various species of gastrointestinal nematodes, lungworms, grubs, horn flies, lice, and mites. Virbac's VIRBAMEC Pour-On is approved as a generic copy of Merial Ltd.'s IVOMEC Pour-On for Cattle, approved under NADA 140–841. The ANADA 200–318 is approved as of September 21, 2001, and the regulations in 21 CFR 524.1193 are amended to reflect the approval. The basis of approval is discussed in the freedom of information summary.

In addition, Virbac AH, Inc., has not been previously listed in the animal drug regulations as a sponsor of an approved application. At this time, 21 CFR 510.600(c) is being amended to add entries for the firm.

In accordance with the freedom of information provisions of 21 CFR part 20 and 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.33(a)(1) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This rule does not meet the definition of "rule" in 5 U.S.C. 804(3)(A) because it is a rule of "particular applicability." Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 524

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR parts 510 and 524 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR part 510 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 379e.

2. Section 510.600 is amended in the table in paragraph (c)(1) by alphabetically adding an entry for "Virbac AH, Inc." and in the table in paragraph (c)(2) by numerically adding an entry for "051311" to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
Virbac AH, Inc., 3200 Meacham Blvd., Ft. Worth, TX 76137	051311

(2) * * *

Drug labeler code	Firm name and address
051311	Virbac AH, Inc., 3200 Meacham Blvd., Ft. Worth, TX 76137

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS

3. The authority citation for 21 CFR part 524 continues to read as follows:

Authority: 21 U.S.C. 360b.

§ 524.1193 [Amended]

4. Section 524.1193 *Ivermectin pour-on* is amended in paragraph (b) by adding "051311," after "051259," and in paragraph (e)(2) by removing "Damalina" and by adding in its place "Damalinia".

Dated: November 9, 2001.

Stephen F. Sundlof,

Director, Center for Veterinary Medicine.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 520

Oral Dosage Form New Animal Drugs; Carprofen

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Pfizer, Inc. The supplemental NADA provides for a once daily, 2-milligram per pound (mg/lb) dosage of carprofen, by oral caplet, for the relief of pain and inflammation associated with osteoarthritis in dogs.

DATES: This rule is effective December 5, 2001.

FOR FURTHER INFORMATION CONTACT: Melanie R. Berson, Center for Veterinary Medicine (HFV–110), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–7540.

SUPPLEMENTARY INFORMATION: Pfizer, Inc., 235 East 42d St., New York, NY 10017–5755, filed a supplement to approved NADA 141–053 that provides for veterinary prescription use of RIMADYL (carprofen) Caplets for the relief of pain and inflammation associated with osteoarthritis in dogs. The supplemental NADA provides for a once daily, 2-mg/lb dosage for the oral caplet dosage form. The supplemental application is approved as of September 27, 2001, and the regulations are amended in 21 CFR 520.309 to reflect the approval. The basis of approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of 21 CFR part 20 and 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

Under section 512(c)(2)(F)(iii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(c)(2)(F)(iii)), this approval for non-food-producing animals qualifies for 3 years of marketing exclusivity beginning September 27, 2001, because the application contains substantial evidence of effectiveness of the drug involved or any studies of animal safety required for approval of the application and conducted or sponsored by the applicant.

The agency has determined under 21 CFR 25.33(d)(1) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This rule does not meet the definition of "rule" in 5 U.S.C. 804(3)(A) because it is a rule of "particular applicability." Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects in 21 CFR Part 520

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 520 is amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS

1. The authority citation for 21 CFR part 520 continues to read as follows:

Authority: 21 U.S.C. 360b.

2. Section 520.309 is amended in paragraph (a) by adding "(mg)" after "milligrams"; and by revising paragraph (d) to read as follows:

§ 520.309 Carprofen.

* * * * *

(d) *Conditions of use in dogs*—(1) *Amount*—(i) *Caplet.* 2 mg per pound (/lb) of body weight once daily or 1 mg/lb twice daily.

(ii) *Chewable tablet.* 1 mg/lb twice daily.

(2) *Indications for use.* For the relief of pain and inflammation associated with osteoarthritis in dogs.

(3) *Limitations.* Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Dated: November 9, 2001.
Stephen F. Sundlof,
Director, Center for Veterinary Medicine.

Food and Drug Administration

21 CFR Part 520

Oral Dosage Form New Animal Drugs; Ivermectin Liquid

AGENCY: Food and Drug Administration, HHS.
ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of an abbreviated new animal drug application (ANADA) filed by First Priority, Inc. The ANADA provides for oral use of ivermectin solution in horses for the treatment and control of various species of internal and cutaneous parasites.

DATES: This rule is effective December 5, 2001.

FOR FURTHER INFORMATION CONTACT: Lonnie W. Luther, Center for Veterinary Medicine (HFV–102), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0209.

SUPPLEMENTARY INFORMATION: First Priority, Inc., 1585 Todd Farm Dr., Elgin, IL 60123, filed ANADA 200–321 for PRIMECTIN™ (ivermectin) Equine Oral Liquid. The application provides for oral use of a 1.0 percent ivermectin solution in horses for the treatment and control of various species of gastrointestinal nematodes, lungworms, stomach bots, and cutaneous larvae and microfilariae. First Priority's PRIMECTIN™ Equine Oral Liquid is approved as a generic copy of Merial Ltd.'s EQVALAN® (ivermectin) Oral Liquid for Horses, approved under NADA 140–439. ANADA 200–321 is approved as of September 7, 2001, and 21 CFR 520.1195 is amended to reflect the approval. The basis of approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of 21 CFR part 20 and 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.33(a)(1) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This rule does not meet the definition of "rule" in 5 U.S.C. 804(3)(A) because it is a rule of "particular applicability." Therefore, it is not subject to congressional review requirements in 5 U.S.C. 801–808.

List of Subjects in 21 CFR Part 520

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 520 is amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS

1. The authority citation for 21 CFR part 520 continues to read as follows:

Authority: 21 U.S.C. 360b.

2. Section 520.1195 is amended in paragraph (b) by adding "058829," after "051259"; by revising the heading of paragraph (c) and paragraph (c)(1); in paragraph (c)(2) by removing "It is used in horses"; and in paragraph (c)(3) by removing the first sentence to read as follows:

§ 520.1195 Ivermectin liquid.

* * * * *

(c) *Conditions of use in horses*—(1) *Amount.* 200 micrograms per kilogram of body weight as a single dose by stomach tube or as an oral drench.

Dated: November 9, 2001.
Stephen F. Sundlof,
Director, Center for Veterinary Medicine.

BILLING CODE 4160–01–S

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[AZ060–OPP; FRL–7112–8]

Clean Air Act Full Approval of the Operating Permits Program for the Pinal County Air Quality Control District, AZ

AGENCY: Environmental Protection Agency (EPA).
ACTION: Final rule.

SUMMARY: EPA is taking final action to fully approve the Pinal County Air Quality Control District (Pinal or District) operating permits program. The Pinal program was submitted in response to the directive in the 1990 Clean Air Act (CAA) Amendments that permitting authorities develop, and submit to EPA, programs for issuing operating permits to all major stationary sources and to certain other sources within the permitting authorities' jurisdiction. On October 30, 1996, EPA granted interim approval to Pinal's operating permits program. The District revised its program to satisfy the conditions of the interim approval, and EPA proposed full approval in the **Federal Register** on September 20, 2001, contingent upon Pinal submitting the rules to EPA as a revision to its part 70 program. Pinal County did so, and EPA did not receive any comments on the proposed action. This action promulgates final full approval of the Pinal operating permits program.

EFFECTIVE DATE: This rule is effective on November 30, 2001.

ADDRESSES: Copies of Pinal's submittal and other supporting information used in developing this final full approval are available for inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, California 94105. You may also see copies of the submitted title V program at the following location: Pinal County Air Quality Control District, Building F, 31 North Pinal Street, Florence, Arizona 85232.

FOR FURTHER INFORMATION CONTACT: Emmanuelle Rapicavoli, EPA Region 9, at (415) 972–3969 or rapicavoli.emmanuelle@epa.gov.

SUPPLEMENTARY INFORMATION: This section contains additional information about our final rulemaking, organized as follows:

I. Background on the Pinal County Air Quality Control District operating permits program
II. EPA's Final Action
III. Effective date of EPA's full approval of the Pinal County Air Quality Control District operating permits program

I. Background on the Pinal County Air Quality Control District Operating Permits Program

The Clean Air Act (CAA) Amendments of 1990 required all state and local permitting authorities to develop operating permits programs that meet certain federal criteria. Pinal's operating permits program was submitted in response to this directive. Because the District program

substantially, but not fully, met the requirements of part 70, EPA granted interim approval to the program in a rulemaking published on October 30, 1996. See 61 FR 55910. The interim approval notice described the conditions that had to be met in order for the District program to receive full approval.

After Pinal revised its program to address the conditions of the interim approval, EPA promulgated a proposal to approve the District's title V operating permits program on September 20, 2001, contingent upon Pinal submitting the rules that were adopted on September 5, 2001, as a revision to its part 70 program. See 66 FR 48402.

II. EPA's Final Action

EPA is granting full approval to the operating permits program submitted by the Pinal County Air Quality Control District based on the revisions adopted on September 5, 2001, and submitted to EPA on September 18, 2001, which satisfactorily address the program deficiencies identified in EPA's October 30, 1996 interim approval (61 FR 55910). In addition, EPA is approving, as a title V operating permits program revision, additional changes to Pinal's rules. The deficiency corrections and the additional program revisions are described in detail in the September 20, 2001 proposal and its accompanying technical support document. See 66 FR 48402.

The rules for which we are granting final approval are listed below.

Rule No.	Rule title	Adoption date	Submittal date
PCR 1–3–140 (79)	Definitions (definition of stationary source only)	9/5/01	9/18/01
PCR 3–1–040	Applicability and Classes of Permits	9/5/01	9/18/01
PCR 3–1–045	Transition from Installation and Operating Permit Program	9/5/01	9/18/01
PCR 3–1–050	Permit Application Requirements	9/5/01	9/18/01
PCR 3–1–081	Permit Conditions	9/5/01	9/18/01
PCR 3–4–420	Standards of Conditional Orders	9/5/01	9/18/01
PCR 3–5–490	Application for Coverage under a General Permit	9/5/01	9/18/01
PCR 3–5–550	Revocations of Authority to Operate under a General Permit	9/5/01	9/18/01

In its program submission, Pinal County did not assert jurisdiction over Indian country. To date, no tribal government in Pinal County has applied to EPA for approval to administer a title V program in Indian country within the County. EPA regulations at 40 CFR part 49 govern how eligible Indian tribes may be approved by EPA to implement a title V program on Indian reservations and in non-reservation areas over which the tribe has jurisdiction. EPA's part 71 regulations govern the issuance of federal operating permits in Indian country. EPA's authority to issue permits in Indian country was challenged in *Michigan* v. *EPA*, (D.C. Cir. No. 99–1151). On October 30, 2001, the court issued its decision in the case, vacating a provision that would have allowed EPA to treat areas over which EPA determines there is a question regarding the area's status as if it is Indian country, and remanding to EPA for further proceedings. EPA will respond to the court's remand and explain EPA's approach for further implementation of part 71 in Indian country in a future action.

III. Effective Date of EPA's Full Approval of the Pinal County Air Quality Control District Operating Permits Program

EPA is using the good cause exception under the Administrative Procedure Act (APA) to make the full approval of the District's program effective on November 30, 2001. In relevant part, the APA provides that publication of "a substantive rule shall be made not less than 30 days before its effective date, except—* * * (3) as otherwise provided by the agency for good cause found and published with the rule." 5 U.S.C. 553(d)(3). Section 553(b)(3)(B) of the APA provides that good cause may be supported by an agency determination that a delay in the effective date is impracticable, unnecessary, or contrary to the public interest. EPA finds that it is necessary and in the public interest to make this action effective sooner than 30 days following publication. In this case, EPA believes that it is in the public interest for the program to take effect before December 1, 2001. EPA's interim approval of Pinal County's program expires on December 1, 2001. In the absence of this full approval of Pinal County's amended program taking effect on November 30, the federal program under 40 CFR part 71 would automatically take effect in Pinal County and would remain in place until the effective date of the fully-approved state program. EPA believes it is in the public interest for sources, the public and Pinal County to avoid any gap in coverage of the state program, as such a gap could cause confusion regarding permitting obligations. Furthermore, a delay in the effective date is unnecessary because Pinal County has been administering the title V permit program for 5 years under an interim approval. Through this action, EPA is approving a few revisions to the existing and currently operational program. The change from the interim approved program which substantially met the part 70 requirements, to the fully approved program is relatively minor, in particular if compared to the changes between a state-established and administered program and the federal program.

Administrative Requirements

Under Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), this final approval is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) the Administrator certifies that this final approval will not have a significant economic impact on a substantial number of small entities because it merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. This rule does not contain any unfunded mandates and does not significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) because it approves pre-existing requirements under state law and does not impose any additional enforceable duties beyond that required by state law. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as

specified by Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). This rule also does not have Federalism implications because it will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, "Federalism" (64 FR 43255, August 10, 1999). This rule merely approves existing requirements under state law, and does not alter the relationship or the distribution of power and responsibilities between the State and the Federal government established in the Clean Air Act. This final approval also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) or Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001), because it is not a significant regulatory action under Executive Order 12866. This action will not impose any collection of information subject to the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq., other than those previously approved and assigned OMB control number 2060–0243. For additional information concerning these requirements, see 40 CFR part 70. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In reviewing State operating permit programs submitted pursuant to title V of the Clean Air Act, EPA will approve State programs provided that they meet the requirements of the Clean Air Act and EPA's regulations codified at 40 CFR part 70. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a State operating permit program for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permit program, to use VCS in place of a State program that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective on November 30, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 4, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

BILLING CODE 5560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[NJ002; FRL–7113–1]

Clean Air Act Final Full Approval of Operating Permit Program; New Jersey

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is promulgating final full approval of the operating permit program submitted by the State of New Jersey in accordance with Title V of the Clean Air Act (the Act) and its implementing regulations. This approved program allows New Jersey to issue federally enforceable operating permits to all major stationary sources and to certain other sources within the State's jurisdiction.

EFFECTIVE DATE: November 30, 2001.

ADDRESSES: Copies of the State's submittal and other supporting information used in developing the final full approval are available for inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 2, 290 Broadway, 25th Floor, New York, New York 10007–1866.

FOR FURTHER INFORMATION CONTACT: Steven C. Riva, Chief, Permitting Section, Air Programs Branch, at the above EPA office in New York or at telephone number (212) 637–4074.

SUPPLEMENTARY INFORMATION: This section provides additional information by addressing the following questions:

1. What is the operating permits program?
2. What is being addressed in this document?
3. What are the program changes that EPA is approving?
4. What is involved in this final action?
5. What is the effective date of EPA's final full approval of the New Jersey title V program?

1. What Is the Operating Permits Program?

Title V of the Clean Air Act (CAA) and its implementing regulations at 40 CFR part 70 (part 70) direct all states to develop and implement operating permit programs that meet certain criteria. Operating permit programs are intended to consolidate into single

federally enforceable documents all CAA requirements that apply to individual sources. This consolidation of all of the applicable requirements for a source enables the source, the public, and permitting authorities to more easily determine what CAA requirements apply and whether the source is complying with them. Sources required to obtain operating permits include "major" sources of air pollution and certain other sources specified in CAA section 501 and in EPA's regulations at 40 CFR 70.3.

The EPA reviews state programs pursuant to title V of the CAA and part 70, which outline the criteria for approval or disapproval. Where a program substantially, but not fully, meets the requirements of part 70, EPA may grant the program interim approval which would be effective for two years. If a state does not have in place a fully approved program by the time the interim approval expires, the federal operating permit program under 40 CFR part 71 (part 71) will be implemented. Due to unexpected circumstances that affected states' timeliness in developing fully approvable programs, EPA extended the effective date of all interim approvals until December 1, 2001. For any state that has not received full approval from EPA by December 1, 2001, its interim approval will then expire and be immediately replaced by the federal part 71 program. All sources subject to the federal program that do not have final part 70 permits already issued to them by the state are then required to submit a part 71 permit application and the appropriate fees within one year to their respective EPA Regional offices under part 71.

2. What Is Being Addressed in This Document?

New Jersey's first version of its operating permit program substantially, but not fully, met the requirements of part 70; therefore, EPA granted the program interim approval on May 16, 1996, which became effective on June 17, 1996 (61 FR 24715). EPA identified four issues that needed correction before New Jersey would be eligible for full approval. New Jersey submitted a corrected program to EPA on May 31, 2001, which addressed each of the four deficiencies.

On October 25, 2001, EPA proposed full approval of New Jersey's title V operating permit program and provided the public a period of 30 days to submit comments on EPA's proposed action (66 FR 53969). During the 30-day comment period, EPA received no comments on the proposed full approval. However, EPA finds it appropriate to clarify a statement made in the "Nonmajor Sources Section" of the proposal. Where it was stated that "[a]n exemption not only relieves the subject sources from the permitting requirement; it also relieves them from the substantive requirements," EPA did not mean to imply that an exemption from the permitting requirement would also exempt the subject source for substantive requirements in the standard. The subject nonmajor source must check the individual standards to determine if requirements other than the need to obtain a part 70 permit apply to it. This document finalizes EPA's action on the proposal.

3. What Are the Program Changes That EPA Is Approving?

The details on the program changes can be found in EPA's proposed action which was published in the October 25, 2001 issue of the **Federal Register** (see 66 FR 53969). In summary, EPA approves the following changes to the New Jersey Operating Permit Rule that became effective on August 2, 1999:

(1) N.J.A.C. 7:27–22.20(b)(7);

(2) N.J.A.C. 7:27–22.29(a) and 22.29(e); and

(3) N.J.A.C. 7:27–22.1.

4. What Is Involved in This Final Action?

The State of New Jersey has fulfilled the conditions of the interim approval granted on May 16, 1996. EPA is therefore taking final action to fully approve New Jersey's operating permit program. EPA is also taking final action to approve other program changes made by the State since the interim approval was granted as identified in the October 25, 2001 issue of the **Federal Register** notice (see 66 FR 53969). This final full approval has no expiration date. However, the State may revise its operating permit program as appropriate in the future by following the procedures stipulated in 40 CFR 70.4(i). EPA may also exercise its oversight authorities under section 502(i) of the Act to require changes to the State's program consistent with the procedure stipulated in 40 CFR 70.10.

In its program submittal, New Jersey did not assert jurisdiction over Indian country. To date, no tribal government in New Jersey has applied to EPA for approval to administer a title V program in Indian country within the State. On February 12, 1998, EPA promulgated regulations (40 CFR part 49) under which eligible Indian tribes may be approved by EPA to implement a title V program on Indian reservations and in non-reservation areas over which the tribe has jurisdiction. EPA has promulgated regulations (40 CFR part 71) governing the issuance of federal operating permits in Indian country. EPA's authority to issue permits in Indian country was challenged in *Michigan* v. *EPA*, (D.C. Cir. No. 99–1151). On October 30, 2001, the court issued its decision in the case, vacating a provision that would have allowed EPA to treat areas over which EPA determines there is a question regarding the area's status as if it is Indian country, and remanding to EPA for further proceedings. EPA will respond to the court's remand and explain EPA's approach for further implementation of part 71 in Indian country in a future action.

5. What Is the Effective Date of EPA's Final Full Approval of the New Jersey Title V Program?

EPA is using the good cause exception under the Administrative Procedure Act (APA) to make the full approval of the State's program effective on November 30, 2001. In relevant part, section 553(d) provides that publication of "a substantive rule shall be made not less than 30 days before its effective date, except—* * * (3) as otherwise provided by the agency for good cause found and published with the rule." Good cause may be supported by an agency determination that a delay in the effective date is "impracticable, unnecessary, or contrary to the public interest." APA section 553(b)(3)(B). EPA believes that it is necessary and in the public interest to make this action effective sooner than 30 days following publication. In this case, EPA believes that it is in the public interest for the program to take effect before December 1, 2001. EPA's interim approval of New Jersey's program expires on December 1, 2001. In the absence of this full approval taking effect on November 30, 2001, the federal part 71 program would automatically take effect in New Jersey and would remain in place until the effective date of the fully-approved state program. EPA believes it is in the public interest for sources, the public and the State to avoid any gap in coverage of the State program, as such a gap could cause confusion regarding permitting obligations. Furthermore, a delay in the effective date is unnecessary because New Jersey has been administering the title V permit program for five years under an interim approval. Through this action, EPA is approving a few revisions to the existing and currently operational program. The change from the interim approved program which substantially but did not fully meet the part 70 requirements, to the fully approved program is relatively minor, in

particular if compared to the changes between a state-approved program and the federal program. Finally, sources are already complying with many of the newly approved requirements as a matter of state law. Thus, there is little or no additional burden with complying with these requirements under the federally approved State program.

Administrative Requirements

Under Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), this final approval is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) the Administrator certifies that this final approval will not have a significant economic impact on a substantial number of small entities because it merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. This rule does not contain any unfunded mandates and does not significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) because it approves pre-existing requirements under state law and does not impose any additional enforceable duties beyond that required by state law. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). This rule also does not have Federalism implications because it will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, "Federalism" (64 FR 43255, August 10, 1999). This rule merely approves existing requirements under state law, and does not alter the relationship or the distribution of power and responsibilities between the State and the Federal government established in the Clean Air Act. This final approval also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) or Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001), because it is not a significant regulatory action under Executive Order 12866. This action will not impose any collection of information subject to the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, other than those previously approved and assigned OMB control number 2060–0243. For additional information concerning these requirements, see 40 CFR part 70. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In reviewing State operating permit programs submitted pursuant to title V of the Clean Air Act, EPA will approve State programs provided that they meet the requirements of the Clean Air Act and EPA's regulations codified at 40 CFR part 70. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a State operating permit program for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permit program , to use VCS in place of a State program that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective on November 30, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 4, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control; Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Dated: November 28, 2001.

William J. Muszynski,

Acting Regional Administrator, Region 2.

For reasons set out in the preamble, chapter I, of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

2. Appendix A to part 70 is amended by adding paragraph (c) to the entry for New Jersey to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permit Programs

* * * * *

New Jersey

* * * * *

(c) The New Jersey Department of Environmental Protection submitted program revisions on September 17, 1999 and May 31, 2001. The rule revisions contained in the September 17, 1999 and May 31, 2001 submittals adequately addressed the conditions of the interim approval effective on June 17, 1996, and which would expire on December 1, 2001. The State is hereby granted final full approval effective on November 30, 2001.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[OK–FRL–7113–7]

Clean Air Act Full Approval of Operating Permits Program; State of Oklahoma

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final full approval.

SUMMARY: The EPA is promulgating full approval of the Operating Permit

Program of the State of Oklahoma. Oklahoma's Operating Permit Program was submitted in response to the directive in the 1990 Clean Air Act (CAA) Amendments that States develop, and submit to EPA, programs for issuing operating permits to all major stationary sources and to certain other sources within the States' jurisdiction. The EPA granted interim approval to Oklahoma's Operating Permit Program on February 5, 1996 (61 FR 4220). Oklahoma revised its program to satisfy the conditions of the interim approval, and EPA proposed full approval in the **Federal Register** on October 16, 2001.

EFFECTIVE DATE: November 30, 2001.

ADDRESSES: Copies of the State's submittal and other supporting documentation relevant to this action are available for inspection during normal business hours at the U.S. EPA, Region 6, Air Permitting Section (6PD–R), 1445 Ross Avenue, Suite 700, Dallas, Texas 75202–2733, and the Oklahoma Department of Environmental Quality, 707 North Robinson, Oklahoma City, Oklahoma 73102. Anyone wanting to examine these documents should make an appointment with the appropriate office at least two working days in advance.

FOR FURTHER INFORMATION CONTACT: Ms. Mary Stanton, Regional Title V Air Operating Permits Projects Manager, Air Permitting Section (6PD–R), Environmental Protection Agency, Region 6, 1445 Ross Avenue, Suite 700, Dallas, Texas 75202–2733, at (214) 665–8377.

SUPPLEMENTARY INFORMATION: This section provides additional information by addressing the following questions:

What is the Operating Permit Program?
Why is EPA Taking this Action?
What is Involved in this Final Action?
What is the Effective Date of EPA's Full Approval of the Oklahoma Title V program?
What is the Scope of EPA's Full Approval?

What Is the Operating Permit Program?

The CAA Amendments of 1990 required all States to develop Operating Permit Programs that met certain Federal criteria. In implementing the Operating Permit Programs, the permitting authorities require certain sources of air pollution to obtain permits that contain all applicable requirements under the CAA. The focus of the Operating Permit Program is to improve enforcement by issuing each source a permit that consolidates all of the applicable CAA requirements into a federally enforceable document. By consolidating all of the applicable requirements for a facility into a single document, the source, the public, and the regulators can more easily determine what CAA requirements apply and how compliance with those requirements is determined.

Sources required to obtain an operating permit under this program include "major" sources of air pollution and certain other sources specified in the CAA or in EPA's implementing regulations. For example, all sources regulated under the acid rain program, regardless of size, must obtain operating permits. Examples of major sources include those that have the potential to emit 100 tons per year or more of volatile organic compounds (VOCs), carbon monoxide, lead, sulfur dioxide, nitrogen oxides, or particulate matter; those that emit 10 tons per year of any single hazardous air pollutant (HAP) (specifically listed under the CAA); or those that emit 25 tons per year or more of a combination of HAPs. In areas that are not meeting the National Ambient Air Quality Standards for ozone, carbon monoxide, or particulate matter, major sources are defined by the gravity of the nonattainment classification. For example, in ozone nonattainment areas classified as serious, major sources include those with the potential of emitting 50 tons per year or more of VOCs.

Why Is EPA Taking This Action?

Where an Operating Permit Program substantially, but not fully met the criteria outlined in the implementing regulations codified at 40 CFR part 70, EPA granted interim approval contingent on the State revising its program to correct the deficiencies. Because Oklahoma's Operating Permit Program substantially, but not fully met the requirements of part 70, EPA granted interim approval to the program in a rulemaking published on February 5, 1996 (61 FR 4220). Interim approval of Oklahoma's program expires on December 1, 2001.

What Is Involved in This Final Action?

The Oklahoma Department of Environmental Quality (ODEQ) has fulfilled the conditions of interim approval granted on February 5, 1996. On October 16, 2001, EPA published a document in the **Federal Register** (66 FR 52562) proposing full approval of Oklahoma's title V Operating Permits Program, and proposing approval of certain other program revisions. The EPA received comments from one person during the comment period that ran from October 16, 2001, until November 15, 2001. Two of the comments agreed with EPA that the deficiencies for the first, second, and fourth conditions (transition schedule for permit issuance, major source definition, and permit language content) for full approval have been corrected. The remainder of the comments disagreed with EPA's position, and are set forth below.

1. Oklahoma Administrative Code/ Tracking Part 70 Language

The first adverse comment was a general comment that Oklahoma should amend its operating permits regulations so that the language tracks the language in 40 CFR part 70. The commenter contends that Oklahoma's regulations must track the language of 40 CFR part 70 to retain the effect and intent of the Clean Air Act. Otherwise, according to the commenter, EPA is put in the position of trying to renegotiate the Clean Air Act.

EPA does not concur with the comment. Part 70 provides for the establishment of a comprehensive State air quality permitting program consistent with the requirements of title V of the Clean Air Act. 40 CFR 70.1(a). The state's program does not have to exactly track the language in part 70, but it must be consistent with it. 40 CFR 70.1(c). This allows for flexibility by the State to adopt the regulations to fit its needs while maintaining national consistency. The EPA has determined that Oklahoma's program is consistent with part 70 with the exception of the minor issues outlined in the Notice of Deficiency located elsewhere in this **Federal Register**.

2. Insignificant Activities List

The second adverse comment questioned why the insignificant activities definition in Oklahoma's rule and the approved list of insignificant activities in Appendix I of Subchapter 8 remain as a part of the Oklahoma Administrative Code if the EPA is not approving the list. The commenter questioned whether EPA has the authority to approve the list and whether the regulation tracks the language of 40 CFR part 70.

The authority to approve an insignificant activities list is found at 40 CFR 70.5(c), which states that "the Administrator may approve as a part of the State program a list of insignificant activities and emissions levels which need not be included in permit applications." As EPA stated in the **Federal Register** when it granted final interim approval to Oklahoma, "even though insignificant activities are not a required element of a part 70 program, a State that opts to establish such activities must nevertheless meet certain requirements, including prior approval

by EPA." 61 FR 4220, 4221. As EPA stated when it proposed granting full approval, the emission levels in the definition are consistent with the levels in other approved State Operating Permit Programs. Even though EPA did not approve the list of insignificant activities, the list remains a part of Oklahoma's regulations as a matter of state law. However, it is not part of Oklahoma's approved title V program. Therefore, EPA does not concur with this comment.

3. Judicial Review

The third adverse comment involved what the commenter characterized as the "judicial review" process, but was not related to the deficiency as outlined by EPA when we granted Oklahoma interim approval. The comment dealt with whether certain construction permits are classified as a Tier II or Tier III permit and how this affects "judicial review." If a permit is characterized as Tier II, the commenter claims that "judicial review" is avoided because of the lack of an administrative hearing. If it is classified as a Tier III permit and a hearing is held, the commenter contends that certain regulations governing administrative hearings such as employment of the administrative law judge, declaratory ruling procedures, restricting attendance at administrative hearings in appropriate cases, and burden of proof restrict judicial review.

EPA does not agree with this comment. Judicial review in this instance refers to the ability of an individual to appeal a decision from an administrative agency to state court, not how (or whether) the state conducts an administrative hearing. Thus, the comments are not related to judicial review but instead are related to the Tier II and Tier III permit process as outlined in Oklahoma Administrative Code (OAC) Title 252, Chapter 4. The EPA is not approving this entire Chapter as a part of this action. As previously stated, EPA is not approving any provision of Subchapter 8 which relates to construction permits, or any other provision contained in the submittal which does not pertain to Title V. 66 FR at 52564. The EPA found only one issue with judicial review as it relates to the state's Operating Permit program (no judicial review for persons who made oral comments), and that deficiency has been corrected. The EPA does not believe that these comments are relevant to any interim approval issue or to the action that EPA is taking today.

4. Enhanced New Source Review (NSR) Procedures

The fourth adverse comment states that by not defining the term "Enhanced New Source Review (NSR) procedures", Oklahoma has effectively avoided the NSR procedures in the Clean Air Act. The commenter believes that permits which should have been subject to 40 CFR part 70 will be shielded from the NSR procedures. The commenter feels that the state should use the exact language of 40 CFR part 70 in regards to "Enhanced NSR procedures" and that Oklahoma is allowed to approve permits without using NSR procedures.

The commenter appears to believe that because Oklahoma used the undefined term "enhanced NSR procedures" in the Title V context, certain sources that would have otherwise been subject to NSR procedures will no longer be subject to those procedures. However, this is not the case. The title V program and the NSR program have different procedures and requirements. As noted in the October 16, 2001 proposed full approval, Oklahoma has deleted the term "enhanced NSR procedures" from its regulations and has instead made the commitments detailed in the proposal and discussed in paragraph 6. Thus, we will describe the issue in more general terms. Under certain conditions, a state may allow the incorporation into a part 70 permit, the requirements from preconstruction review permits authorized under an EPA-approved program through the use of the administrative permit amendment process. As provided in 70.7(d)(1)(v), the EPA approved NSR permitting program must meet procedural requirements substantially equivalent to the requirements of part 70 that would be applicable to the change if the change were subject to review as a permit modification. Thus, the procedures required by 40 CFR 70.7(d)(1)(v) for use of the administrative amendment process are in addition to the Clean Air Act's New Source Review requirements and do not abrogate those requirements. These procedures are not related to the installation of pollution controls as stated by the commenter. The EPA does not concur with these comments.

5. Options To Address Use of Administrative Amendment Process To Incorporate Requirements From Preconstruction Permits Into the Title V Permit

In the **Federal Register**, EPA stated that it had given Oklahoma four options to address outstanding issues from the sixth and seventh interim approval deficiencies. These options included Oklahoma either including provisions in the title V permit that meet the requirements of 40 CFR 70.7 and 70.8 (the option ultimately chosen by Oklahoma) or amending the regulation to track the language in 40 CFR 70.7(d)(1)(v). The commenter contends that the regulation should be amended so that the language tracks the language in part 70. Otherwise, according to the commenter, it opens the door to renegotiate the language of the Clean Air Act.

As set forth in response to the first comment, a State does not have to use the exact language of part 70 when promulgating its operating permits program. Therefore, we do not agree with this comment.

6. Permit Language

As stated in the **Federal Register**, EPA and Oklahoma agreed on nine conditions it would include in its permits to implement its desire to use the administrative amendment process to incorporate requirements from preconstruction permits into a title V permit. 66 FR at 52564. The commenter had several objections to these provisions. Three of these comments related to the 30 day public notice and comment period, contending that 30 days is insufficient to analyze the permit and that the public will not have another 30 day comment period when the construction permit is incorporated in the title V permit. However, this permit condition is consistent with the federal requirements outlined in 40 CFR 70.7(h)(4) which requires the permitting authority to provide at least 30 days for public comment.

The commenter also objected to the requirement that the public notice state that EPA review, EPA objection, and petitions to EPA will not be available when the preconstruction requirements are incorporated into a title V permit. However, EPA review, EPA objection, and the EPA petition process is available during the construction permit process. The purpose of requiring this language in the public notice is to put the public on notice that the time to object to the permit is during the construction permit process, not when it is incorporated into the title V permit. This procedure is authorized by 40 CFR 70.7(d)(1)(v), and thus we do not agree with this comment.

Two comments related to the criteria for determining what States are affected (*i.e.*, affected states). The federal definition of "affected states" is found at 40 CFR 70.2. Oklahoma's definition (OAC 252:100–8–2) is consistent with the federal definition.

The commenter states that EPA review, objections, and petitions should be posted on the ODEQ and EPA web sites. There is no legal requirement to post EPA review, objections, or petitions on Oklahoma's or EPA's website. However, EPA does post title V petitions and its response to the petition on a website. These documents can be found at http://www.epa.gov/region07/programs/artd/air/title5/petitiondb/petitiondb.htm.

Finally, the commenter asserts that the language of 40 CFR 70.7(f) and (g) should be a part of the Oklahoma Administrative Code (OAC) and not be modified by OAC 252:100–8–7.3(a), (b), and (c). The language of 40 CFR 70.7(f) and (g) is not modified by OAC 252:100–8–7.3(a), (b), and (c). The citations to the Oklahoma Administrative Code are to the procedures for reopening permits that EPA has approved as meeting the part 70 requirements. They do not modify 40 CFR 70.7(f) and (g). If EPA reopens a permit for cause, it will use the procedures in 40 CFR 70.7(f) and (g).

7. Approval by the Governor

There were two comments relating to the Governor's approval of Oklahoma's proposed revisions to OAC 252:100–8–8, which corrected the deficiencies relating to permit review by EPA and affected states. EPA noted that the Governor must approve this regulation before it becomes effective. The commenter was concerned that the Governor would not approve these revisions. However, the Governor has approved these revisions, and Oklahoma submitted these revisions to EPA by letter dated October 19, 2001.

8. Program Deficiencies

The commenter also asserted that the issues identified as additional program deficiencies were not minor and that they should be corrected prior to full approval. The EPA stated in the October 16, 2001 notice that it would publish a notice of deficiency concerning revisions Oklahoma made to its Operating Permits Program that did not meet the requirements of part 70. These deficiencies relate to public participation, Tier I air quality applications, definitions, permit content, administrative permit amendments, minor permit modification procedures, and permit review by EPA and affected States.[1] These deficiencies were identified in a June 12, 2001 letter to Oklahoma.

[1] The deficiencies relating to permit review by EPA and affected states has been corrected. See Item 7 above.

However, for the reasons discussed below, we disagree that these deficiencies prohibit us from granting Oklahoma full program approval at this time.

In 1990, Congress amended the CAA, 42 U.S.C. 7401 *et seq.*, by adding title V, 42 U.S.C. 7661 to 7661f, which requires certain air pollutant emitting facilities, including "major source[s]" and "affected source[s]," to obtain and comply with operating permits. *See* 42 U.S.C. 7661a(a). Title V is intended to be administered by local, state or interstate air pollution control agencies, through permitting programs that have been approved by EPA. *See* 42 U.S.C. 7661a(a). EPA is charged with overseeing the State's efforts to implement an approved program, including reviewing proposed permits and vetoing improper permits. *See* 42 U.S.C. 7661a(i) and 7661d(b). Accordingly, title V of the CAA provides a framework for the development, submission and approval of state operating permit programs. Following the development and submission of a state program, the CAA provides two different approval options that EPA may utilize in acting on state submittals. *See* 42 U.S.C. 7661a(d) and (g). Pursuant to section 502(d), EPA "may approve a program to the extent that the program meets the requirements of the Act * * *". EPA may act on such program submittals by approving or disapproving, in whole or in part, the state program. An alternative option for acting on state programs is provided by the interim approval provision of section 502(g). This section states: "[i]f a program * * * substantially meets the requirements of this title, but is not fully approvable, the Administrator may by rule grant the program interim approval." This provision provides EPA with the authority to act on State programs that substantially, but do not fully, meet the requirements of title V and part 70. Only those program submittals that meet the requirements of eleven key program areas are eligible to receive interim approval. *See* 40 CFR 70.4(d)(3)(i)–(xi). Finally, section 502(g) directs EPA to "specify the changes that must be made before the program can receive full approval." 42 U.S.C. 7661a(g); 40 CFR 70.4(e)(3). This explicit directive encompasses another, implicit one: once a state corrects the specified deficiencies, then it will be eligible for full program approval. EPA believes this is so even if deficiencies have been identified sometime after final interim approval, either because the deficiencies arose after EPA granted interim approval or, if the deficiencies existed at that time, EPA failed to identify them as such in proposing to grant interim approval.

Thus, an apparent tension exists between these two statutory provisions. Standing alone, section 502(d) appears to prevent EPA from granting a state operating permit program full approval until the state has corrected all deficiencies in its program no matter how insignificant, and without consideration as to when such deficiency was identified. Alternatively, section 502(g) appears to require that EPA grant a state program full approval if the state has corrected those issues that the EPA identified in the final interim approval. The central question, therefore, is whether by virtue of correcting the deficiencies identified in the final interim approval Oklahoma is eligible at this time for full approval or whether Oklahoma must also correct any new or recently identified deficiencies as a prerequisite to receiving full program approval.

According to settled principles of statutory construction, statutory provisions should be interpreted so that they are consistent with one another. *See Citizens to Save Spencer County* v. *EPA*, 600 F.2d 844, 870 (D.C. Cir. 1979). Where an agency encounters inconsistent statutory provisions, it must give maximum possible effect to all of the provisions, while remaining within the bounds of its statutory authority. *Id.* at 870–71. Whenever possible, the agency's interpretation should not render any of the provisions null or void *Id.* Courts have recognized that agencies are often delegated the responsibility to interpret ambiguous statutory terms in such a fashion. *See Chevron U.S.A, Inc.* v. *Natural Resources Defense Council*, Inc., 467 U.S. 837, 845 (1984). Harmonious construction is not always possible, however, and furthermore should not be sought if it requires distorting the language in a fashion never imagined by Congress. *Citizens to Save Spencer County*, 600 F.2d at 870.

In this situation, in order to give effect to the principles embodied in title V that major stationary sources of air pollution be required to have an operating permit that conforms to certain statutory and regulatory requirements, and that operating permit programs be administered and enforced by state permitting authorities, the appropriate and more cohesive reading of the statute recognizes EPA's authority to grant Oklahoma full approval in this situation while working simultaneously with the state, in its oversight capacity, on any additional problems that were recently identified. To conclude

otherwise would disrupt the current administration of the state program and cause further delay in Oklahoma's ability to issue operating permits to major stationary sources. A smooth transition from interim approval to full approval is in the best interest of the public and the regulated community and best reconciles the statutory directives of title V.

Furthermore, requiring the State to fix all of the deficiencies that were identified in the June 12, 2001 letter to receive full approval runs counter to the established regulatory process that is already in place to deal with newly identified program deficiencies. Section 502(i)(4) of the CAA and 40 CFR 70.4(i) and 70.10 provides EPA with the authority to issue notices of deficiency ("NOD") whenever EPA makes a determination that a permitting authority is not adequately administering or enforcing a part 70 program, or that the State's permit program is inadequate in any other way. The Oklahoma title V interim approval expires on December 1, 2001. This deadline does not provide adequate time for the State to correct newly identified issues prior to the expiration of interim approval. Allowing the State's program to expire because of issues identified as recently as June 12, 2001 would cause disruption and further delay in the issuance of permits to major stationary sources in Oklahoma. As explained above, we do not believe that title V requires such a result. Rather, the appropriate mechanism for dealing with additional deficiencies that are identified sometime after a program received interim approval, but prior to being granted full approval is a NOD as discussed above. This process provides the State an adequate amount of time after such findings to implement any necessary changes without unduly disrupting the entire state operating permit program. As a result, addressing newly identified problems separately from the full approval process will not cause these issues to go unaddressed. Therefore, the deficiencies EPA identified are not a barrier to granting full approval to States.

9. Comments on Pre-Construction Permit

The commenter also made several comments regarding a preconstruction permit. Since these comments do not pertain to the action proposed in the **Federal Register** notice or to Oklahoma's Operating Permits Program, EPA is not providing a response.

What Is the Effective Date of EPA's Full Approval of the Oklahoma Title V Program?

The EPA is using the good cause exception under the Administrative Procedure Act (APA) to make the full approval of the State's program effective on November 30, 2001. In relevant part, the APA provides that publication of "a substantive rule shall be made not less than 30 days before its effective date, except—* * * (3) as otherwise provided by the agency for good cause found and published with the rule." 5 U.S.C. 553(d)(3). Good cause may be supported by an agency determination that a delay in the effective date is "impracticable, unnecessary, or contrary to the public interest." 5 U.S.C. 553(b)(3)(B). The EPA finds that it is necessary and in the public interest to make this action effective sooner than 30 days following publication. In this case, EPA believes that it is in the public interest for the program to take effect before December 1, 2001. The EPA's interim approval of Oklahoma's program expires on December 1, 2001. In the absence of the full approval of Oklahoma's program taking effect on November 30, the federal program under 40 CFR part 71 would automatically take effect in Oklahoma and would remain in place until the effective date of the fully-approved state program. EPA believes it is in the public interest for sources, the public, and the State of Oklahoma to avoid any gap in coverage of the State program, as such a gap could cause confusion regarding permitting obligations. Furthermore, a delay in the effective date is unnecessary because Oklahoma has been administering the title V permit program for over five years under an interim approval. Through this action, EPA is approving a few revisions to the existing and currently operational program. The change from the interim approved program, which substantially but not fully met the part 70 requirements, to the fully approved program is relatively minor, in particular if compared to the changes between a state-approved program and the Federal program.

What Is the Scope of EPA's Full Approval?

In its program submission, Oklahoma did not assert jurisdiction over Indian country. To date, no tribal government in Oklahoma has applied to EPA for approval to administer a title V program in Indian country within the state. EPA regulations at 40 CFR part 49 govern how eligible Indian tribes may be approved by EPA to implement a title V program on Indian reservations and in non-reservation areas over which the tribe has jurisdiction. EPA's part 71 regulations govern the issuance of federal operating permits in Indian country. EPA's authority to issue permits in Indian country was challenged in *Michigan* v. *EPA*, (D.C. Cir. No. 99–1151). On October 30, 2001, the court issued its decision in the case, vacating a provision that would have allowed EPA to treat areas over which EPA determines there is a question regarding the area's status as if it is Indian country, and remanding to EPA for further proceedings. EPA will respond to the court's remand and explain EPA's approach for further implementation of part 71 in Indian country in a future action.

Administrative Requirements

Under Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), this final approval is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Administrator certifies that this final approval will not have a significant economic impact on a substantial number of small entities because it merely approves State law as meeting Federal requirements and imposes no additional requirements beyond those imposed by State law. This rule does not contain any unfunded mandates and does not significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) because it approves pre-existing requirements under state law and does not impose any additional enforceable duties beyond that required by state law. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). This rule also does not have Federalism implications because it will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, "Federalism" (64 FR 43255, August 10, 1999). The

rule merely approves existing requirements under state law, and does not alter the relationship or the distribution of power and responsibilities between the State and the Federal government established in the Clean Air Act. This final approval also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) or Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001), because it is not a significantly regulatory action under Executive Order 12866. This action will not impose any collection of information subject to the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, other than those previously approved and assigned OMB control number 2060–0243. For additional information concerning these requirements, see 40 CFR part 70. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In reviewing State operating permit programs submitted pursuant to title V of the Clean Air Act, EPA will approve State programs provided that they meet the requirements of the Clean Air Act and EPA's regulations codified at 40 CFR part 70. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a State operating permit program for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permit program, to use VCS in place of a State program that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective on November 30, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 4, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401–7671q.

Dated November 29, 2001.

Lawrence E. Starfield,

Acting Deputy Regional Administrator, Region 6.

For the reasons set out in the preamble, Appendix A of part 70 is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

2. Appendix A to part 70 is amended under the entry for Oklahoma by adding paragraph (b) to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

Oklahoma

* * * * *

(b) The Oklahoma Department of Environmental Quality submitted program revisions on July 27, 1998. The rule revisions adequately addressed the conditions of the interim approval effective on March 6, 1996, and which will expire on December 1, 2001. The State is hereby granted final full approval effective on November 30, 2001.

* * * * *

[FR Doc. 01–30149 Filed 12–4–01; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[AZ062–OPP; FRL–7113–4]

Clean Air Act Full Approval of the Operating Permits Program; Arizona Department of Environmental Quality, Maricopa County Environmental Services Department, Pima County Department of Environmental Quality, AZ

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to fully approve the operating permits programs submitted by the State of Arizona (collectively "the Arizona programs") on behalf of the Arizona Department of Environmental Quality ("ADEQ" or "State"), Maricopa County Environmental Services Department ("MCESD" or "Maricopa"), and Pima County Department of Environmental Quality, Arizona ("PDEQ" or "Pima"). The Arizona programs were submitted in response to the directive in the 1990 Clean Air Act (CAA) Amendments that permitting authorities develop, and submit to EPA, programs for issuing operating permits to all major stationary sources and to certain other sources within the permitting authorities' jurisdiction. On October 30, 1996, EPA granted interim approval to the ADEQ, MCESD and PDEQ operating permits programs. These agencies revised their programs to satisfy the conditions of the interim approval, and EPA proposed full approval of the ADEQ, MCESD, and PDEQ programs in the **Federal Register** on October 2, 2001, October 18, 2001, and September 10, 2001, respectively. EPA received three comments on our proposed full approval of the ADEQ program and one comment on the Maricopa program. EPA's responses are included in Section II of this action.

This action promulgates final full approval of the ADEQ, MCESD and PDEQ operating permits programs.

EFFECTIVE DATE: This rule is effective on November 30, 2001.

ADDRESSES: Copies of the ADEQ, MCESD, and PDEQ submittals and other supporting information used in developing this final full approval are available for inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, California 94105. You may also see copies of the submitted title V programs for each of the respective agencies at the following locations:

(1) ADEQ—Arizona Department of Environmental Quality, 3033 North central Avenue, Phoenix, Arizona 85012–2809.
(2) MCESD—Maricopa County Environmental Services Department, Air Quality Division, 1001 North Central Avenue, Suite 201, Phoenix, Arizona 85004.
(3) PDEQ—Pima County Department of Environmental Quality, 130 West Congress Street, Tucson, Arizona 85701

FOR FURTHER INFORMATION CONTACT: Emmanuelle Rapicavoli, EPA Region 9, at 415–972–3969 or rapicavoli.emmanuelle@epa.gov.

SUPPLEMENTARY INFORMATION: This section contains additional information about our final rulemaking, organized as follows:

I. Background on the ADEQ, MCESD, and PDEQ Operating permits programS
II. Comments received by EPA on our proposed rulemaking and EPA's responses
III. EPA's final action.

I. Background on the ADEQ, MCESD, and PDEQ Operating Permits Programs

The Clean Air Act (CAA) Amendments of 1990 required all state and local permitting authorities to develop operating permits programs that meet certain federal criteria. The ADEQ, MCESD, and PDEQ operating permits programs were submitted in response to this directive. Because the Arizona programs substantially, but not fully, met the requirements of part 70, EPA granted interim approval to the programs in a rulemaking published on October 30, 1996. See 61 FR 55910. The interim approval notice described the conditions that had to be met in order for the Arizona programs to receive full approval.

The State, Maricopa and Pima revised their title V programs to address the conditions of the interim approval. EPA promulgated proposals to approve the ADEQ, MCESD, and PDEQ programs on October 2, 2001 (66 FR 50136), October 18, 2001 (66 FR 52882), and September 10, 2001 (66 FR 46972), respectively.

II. Comments Received by EPA on Our Proposed Rulemaking and EPA's Responses

EPA received three comment letters on our proposed full approval of the ADEQ program and one comment letter on the Maricopa program. With one exception, all of the comment letters focused exclusively on the need to revise the major source definition in Part 70. EPA published a final rule addressing this issue on November 27, 2001 and therefore EPA is not responding to those comments. EPA's response to the remaining comments on the ADEQ program, submitted by The Arizona Center for Law in the Public Interest (ACLPI), is set out below.

1. Excess Emissions Provision

ACLPI objects to language in R18–2–310 that establishes an affirmative defense for violations occurring during startup and shutdown. EPA has proposed to approve the removal of R18–2–310 from the title V program:

In addition to proposing to approve the rules listed in Table 1, EPA is also proposing to approve the removal of R18–2–310, Excess Emissions, from the State's title V program.

See 66 FR 50138, October 2, 2001. Therefore, EPA construes ACLPI's comment as supporting its proposed action.

2. Reference Test Methods and Credible Evidence

ACLPI contends that ADEQ's title V permits routinely require only specific test methods and do not allow for additional credible evidence to be presented to prove, or disprove, an alleged violation. They state that the State's operating permit program does not appear to include EPA's credible evidence rule. ACLPI concludes that, before Arizona's title V program is fully approved, ADEQ must make the necessary changes to include the Credible Evidence Rule.

EPA agrees with the commenter's point that state implementation plans and permits should not bar the use of credible evidence for determining whether a source is in compliance. We disagree, however, with the commenter's suggestion that a permit condition that requires a source to monitor in accordance with a specific method bars the use of additional credible evidence in determining compliance.

The preamble to EPA's Credible Evidence Revisions states that the "regulation merely removes [from 40 CFR parts 51, 52, 60 and 61] what some have construed to be a regulatory bar to the admission of non-reference test data to prove a violation of an emission standard." See 62 FR 8315, February 24, 1997. One aspect of EPA's review of title V programs and permits includes a determination that no bars to enforcement are included. For example, EPA would consider language such as "compliance shall be determined by test method X" as problematic. Contrary to ACLPI's position, neither the CAA nor EPA's regulations require part 70 programs or permits to include specific references to credible evidence. The presumption is that, absent language precluding its use, credible evidence can be used. ACLPI argues, for example, that the North Star Steel draft permit requires that the permittee shall perform initial and annual performance tests to determine opacity using EPA Method 9. ACLPI suggests that this condition bars the use of credible evidence to prove or disprove an alleged violation. EPA disagrees. Permits must impose monitoring requirements on sources and, in order to be effective, must specify the type of monitoring a source must undertake. See 40 CFR 70.6(a)(3). The language in the draft North Star Steel permit does not bar the use of other credible evidence. It merely sets out the source's monitoring obligations.EPA understands that ADEQ shares our interpretation.

3. Arizona's Confidentiality Provision

ACLPI commented that Arizona's operating permits program is not approvable because it does not adequately satisfy federal standards and that A.R.S. 49–432 must be amended to accommodate the public's right to have access to information. The opportunity for public comment on EPA's proposed action to grant full approval of the ADEQ program was limited to the issue of whether ADEQ corrected the items EPA had identified as program deficiencies during the interim approval process. Thus, EPA's proposal to grant full approval did not include ADEQ's confidentiality provisions, which EPA had previously approved as part of ADEQ's program. See 61 FR 55915, October 30, 1996. The comment is therefore beyond the scope of this rulemaking. However, EPA will be responding to this same comment, which was also raised by ACLPI during the 90-day public comment period, under separate cover by December 14, 2001.

4. Definition of Major Source

ACLPI comments that EPA cannot lawfully approve Arizona's major source definition unless EPA completes the rulemaking process that will change the definition in part 70. EPA agrees with ACLPI and in fact took that position in the notice proposing full approval of ADEQ's program. We stated that our full approval of the ADEQ program was contingent on EPA finalizing changes to the major source definition that would result in ADEQ's major source definition being consistent with part 70. See 66 FR 50138, October 2, 2001. EPA finalized these changes in a rule signed by the Administrator on November 19, 2001, and published in the **Federal**

Register on November 27, 2001 (See 66 FR 59161).

5. Fugitive Emissions From Agricultural Equipment

ACLPI states that there is no legitimate reason to exclude agricultural equipment from regulation under title V and therefore, EPA cannot fully approve Arizona's title V program until A.R.S. § 49–426(B) is amended to require that agricultural sources count fugitive emissions.

Arizona's program does not exclude agricultural equipment from regulation under title V. As noted in EPA's notice granting interim approval of ADEQ's title V program, the Arizona Attorney General submitted an opinion that the legislature in no way sought to exempt any major sources when it granted an exemption to agricultural equipment used in normal farm operations. The opinion went on to state that this was clarified by AAC R18–2–302(c)(3), which provides that agricultural equipment used in normal farm operations does not include equipment that requires a permit under title V or is subject to a standard under 40 CFR parts 60 or 61. EPA deferred to that opinion, but noted that if there is a successful legal challenge to the ADEQ's regulation, we would revisit this portion of the program approval. See 61 FR 55915, October 30, 1996.

Part 70 currently requires that fugitive emissions generated by sources that are subject to a standard promulgated under section 111 or 112 of the Clean Air Act must be included when determining whether a source is major. Sources are also required to count all fugitive emissions of hazardous air pollutants. Under part 70, fugitive emissions from any agricultural equipment regulated by such standards or that emits hazardous air pollutants must count towards the major source threshold. ADEQ's rules are consistent with this approach.

After carefully reviewing and considering the issues raised by the commenter, EPA is taking final action to give full approval to the Arizona operating permits program.

III. EPA's Final Action

A. Full Approval of Operating Permit Programs

EPA is granting full approval to the operating permits programs submitted by ADEQ, MCESD, and, Pima based on the revisions submitted for ADEQ on August 11, 1998, May 9, 2001, and September 7, 2001, for MCESD on September 7, 2001, and for PDEQ on May 28, 1998 and November 9, 2001, which satisfactorily address the program deficiencies identified in EPA's October 30, 1996 interim approval (61 FR 55910). EPA is also approving, as title V operating permits program revisions, additional changes made to the Arizona programs. These deficiency corrections and additional program revisions are described in detail in the **Federal Register** notices proposing full approval of the Arizona programs and their accompanying technical support documents.

In our proposed approvals of the Arizona programs, we noted that ADEQ, MCESD, and PDEQ had revised their major source definition in anticipation of EPA finalizing a previously proposed change (59 FR 44460; August 29, 1994) to the major source definition in part 70. Paragraph (c) of Arizona programs' definition of major source lists source categories that must count fugitives. Subparagraph (xxvii) has been modified to read: "All other stationary source categories regulated by a standard promulgated as of August 7, 1980 under section 111 or 112 of the Act, but only with respect to those air pollutants that have been regulated for that category." Emphasis added. The addition of this 1980 cutoff date restricts the types of sources that are required to count fugitives towards the major source threshold. At the time of our proposed full approvals this change was inconsistent with part 70. Because EPA's proposed revision to the major source definition would incorporate the 1980 cutoff date we proposed to approve the ADEQ, MCESD, and PDEQ definition of major source contingent on EPA finalizing our proposed change to part 70.

On November 19, 2001, the Administrator signed a rulemaking package that finalized EPA's change to paragraph (2)(xvii) of the part 70 definition of major source. The revised paragraph now reads, "(xvii) Any other stationary source category, which as of August 7, 1980 is being regulated by a standard promulgated under section 111 or 112 of the Act." This change means that part 70 no longer requires states to provide that sources in categories subject to standards under sections 111 or 112 promulgated after August 7, 1980 must include fugitive emissions in determining major source status under section 302 or part D of title I of the Clean Air Act. As a consequence of this change to part 70, the definition of major source in the Arizona programs is no longer inconsistent with part 70 and is now fully approvable.

In addition to the above described change, EPA has deleted the phrase "but only with respect to those air pollutants that have been regulated for that category" from paragraph (c)(xvii) of the part 70 definition of major source. EPA proposed to delete this phrase in its 1995 supplemental proposal to revise part 70. See 60 FR 45530, August 31, 1995. States, including the Arizona agencies, must revise their part 70 programs accordingly, and submit the revision to EPA within 12 months of the date of publication of the final rule. If a state can demonstrate that additional legal authority is needed, the deadline for submittal of a revised program can be extended to 24 months after EPA's rule is published.

For more details on these changes to the part 70 major source definition, please see the notice signed by the Administrator on November 19, 2001 and published in the **Federal Register** on November 27, 2001 (See 66 FR 59161). Interested parties can download the final rule from EPA's website on the Internet under recent actions at the following address: *http//www.epa.gov/ttn.oarpg/ramain.html*.

The rules for which we are granting full approval are listed in the tables below.

TABLE 1.—ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY

Rule No.	Rule title and specific sections being approved	Effective	Submitted
R18–2–101 (61)	Definitions—definition of "Major source" only	6/4/98	8/11/98
R18–2–304	Permit application processing procedures	12/20/99	5/9/01
R18–2–306	Permit contents	6/4/98	8/11/98
R18–2–320	Significant Permit Revisions	12/20/99	5/9/01
R18–2–331	Material Permit Conditions	6/4/98	8/11/98

In addition to proposing to approving the rules listed in Table 1, EPA is also removing R18–2–310, Excess Emissions, from the State's title V program.

TABLE 2.—MARICOPA COUNTY ENVIRONMENTAL SERVICES DEPARTMENT

Rule No.	Rule title and specific sections proposed for approval	Adopted	Submitted
Regulation I, Rule 100	General Provisions and Definitions • The following provisions from §200, Definitions: §200.26 "Building, Structure, Facility, or Installation" §200.58 "Insignificant Activity" §200.60 "Major Source" §200.107 "Trade Secret" §200.108 "Trivial Activity" • §402, Confidentiality of Information • §500 Monitoring of Records	8/22/01	9/7/01
Regulation I, Rule 130	Emergency Provisions	7/26/00	9/7/01
Regulation II, Rule 200	Permit Requirements • §308—Standards for Applications • §312—Transition from Installation and Operating Permit Program to Unitary Permit Program	8/22/01	9/7/01
Regulation II, Rule 210	Title V Permit Provisions • §301.4(h) • §302.1(j) • §302.1(n) • §404—Administrative Permit Amendments • §405.1 • §408—Public Participation	2/7/01	9/7/01

17.12.180	Permit contents	4/7/98	5/28/98
17.12.345	Public notification	4/7/98	5/28/98

B. Effective Date of Full Approval

EPA is using the good cause exception under the Administrative Procedure Act (APA) to make the full approval of the Arizona programs effective on November 30, 2001. In relevant part, the APA provides that publication of "a substantive rule shall be made not less than 30 days before its effective date, except—* * * (3) as otherwise provided by the agency for good cause found and published with the rule." 5 U.S.C. 553(d)(3). Section 553(b)(3)(B) of the APA provides that good cause may be supported by an agency determination that a delay in the effective date is impracticable, unnecessary, or contrary to the public interest. EPA finds that it is necessary and in the public interest to make this action effective sooner than 30 days following publication. In this case, EPA believes that it is in the public interest for the Arizona programs to take effect before December 1, 2001. EPA's interim approval of the Arizona programs expires on December 1, 2001. In the absence of this full approval of Arizona's amended programs taking effect on November 30, the federal program under 40 CFR part 71 would automatically take effect in Arizona and would remain in place until the effective date of the fully-approved state program. EPA believes it is in the public interest for sources, the public, ADEQ, MCESD, and PCDEQ to avoid any gap in coverage of the Arizona program, as such a gap could cause confusion regarding permitting obligations. Furthermore, a delay in the effective date is unnecessary because ADEQ, MCESD, and PCDEQ have been administering the title V permit program for 5 years under an interim approval. Through this action, EPA is approving a few revisions to the existing and currently operational program. The change from the interim approved program which substantially met the part 70 requirements, to the fully approved program is relatively minor, in particular if compared to the changes between a state-established and administered program and the federal program.

C. Scope of the Full Approval

In their program submissions, neither ADEQ, Maricopa County nor Pima Country asserted jurisdiction over Indian country. To date, no tribal government in Arizona has applied to EPA for approval to administer a title V program in Indian country within the state. EPA regulations at 40 CFR part 49 govern how eligible Indian tribes may be approved by EPA to implement a title V program on Indian reservations and in non-reservation areas over which the tribe has jurisdiction. EPA's part 71 regulations govern the issuance of federal operating permits in Indian country. EPA's authority to issue permits in Indian country was challenged in *Michigan* v. *EPA*, (D.C. Cir. No. 99–1151). On October 30, 2001, the court issued its decision in the case, vacating a provision that would have allowed EPA to treat areas over which EPA determines there is a question regarding the area's status as if it is Indian country, and remanding to EPA for further proceedings. EPA will respond to the court's remand and explain EPA's approach for further implementation of part 71 in Indian country in a future action.

D. Public Comment Letters

On May 22, 2000, EPA promulgated a rulemaking that extended the interim approval period of 86 operating permits programs until December 1, 2001. (65 FR 32035) The action was subsequently

challenged by the Sierra Club and the New York Public Interest Research Group (NYPIRG). In settling the litigation, EPA agreed to publish a notice in the **Federal Register** that would alert the public that they may identify and bring to EPA's attention alleged programmatic and/or implementation deficiencies in Title V programs and that EPA would respond to their allegations within specified time periods if the comments were made within 90 days of publication of the **Federal Register** notice.

Two groups submitted comments on what they believe to be deficiencies with respect to the Arizona, Maricopa County and Pima County Title V programs. As stated in the **Federal Register** notice published on October 2, 2001 (66 FR 50136), October 18, 2001 (66 FR 52882), and September 10, 2001 (66 FR 46972) proposing to fully approve Arizona, Maricopa County and Pima County operating permit programs respectively, EPA takes no action on those comments in today's action. Rather, EPA expects to respond by December 14, 2001 to timely public comments on programs that have obtained interim approval, and by April 1, 2002 to timely comments on fully approved programs. We will publish a notice of deficiency (NOD) when we determine that a deficiency exists, or we will notify the commenter in writing to explain our reasons for not making a finding of deficiency. In addition, we will publish a notice of availability in the **Federal Register** notifying the public that we have responded in writing to these comments and how the public may obtain a copy of our response. An NOD will not necessarily be limited to deficiencies identified by citizens and may include any deficiencies that we have identified through our program oversight. Furthermore, in the future, EPA may issue an additional NOD if EPA or a citizen identifies other deficiencies.

Administrative Requirements

Under Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), this final approval is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) the Administrator certifies that this final approval will not have a significant economic impact on a substantial number of small entities because it merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. This rule does not contain any unfunded mandates and does not significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) because it approves pre-existing requirements under state law and does not impose any additional enforceable duties beyond that required by state law. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). This rule also does not have Federalism implications because it will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, "Federalism" (64 FR 43255, August 10, 1999). This rule merely approves existing requirements under state law, and does not alter the relationship or the distribution of power and responsibilities between the State and the Federal government established in the Clean Air Act. This final approval also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) or Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001), because it is not a significant regulatory action under Executive Order 12866. This action will not impose any collection of information subject to the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, other than those previously approved and assigned OMB control number 2060–0243. For additional information concerning these requirements, see 40 CFR part 70. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In reviewing State operating permit programs submitted pursuant to title V of the Clean Air Act, EPA will approve State programs provided that they meet the requirements of the Clean Air Act and EPA's regulations codified at 40 CFR part 70. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a State operating permit program for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permit program , to use VCS in place of a State program that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

The Congressional Review Act, 5 U.S.C. section 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. section 804(2). This rule will be effective on November 30, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 4, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Dated: November 28, 2001.

Wayne Nastri,

Regional Administrator, Region 9.

40 CFR part 70, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

2. Appendix A to part 70 is amended by revising paragraphs (a) and (b), and adding paragraph (c)(3) under Arizona to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

Arizona

(a) Arizona Department of Environmental Quality:

(1) Submitted on November 15, 1993 and amended on March 14, 1994; May 17, 1994; March 20, 1995; May 4, 1995; July 22, 1996; and August 12, 1996; interim approval effective on November 29, 1996; interim approval expires December 1, 2001.

(2) Revisions submitted on August 11, 1998, May 9, 2001 and September 7, 2001. Full approval is effective on November 30, 2001.

(b) Maricopa County Environmental Services Department:

(1) Submitted on November 15, 1993 and amended on December 15, 1993; January 13, 1994; March 9, 1994; and March 21, 1995; July 22, 1996; and August 12, 1996; interim approval effective on November 29, 1996; interim approval expires December 1, 2001.

(2) Revisions submitted on September 7, 2001. Full approval is effective on November 30, 2001.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[NY002; FRL–7113–3]

Clean Air Act Final Full Approval of Operating Permit Program; State of New York

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is promulgating final full approval of the operating permit program submitted by the State of New York in accordance with Title V of the Clean Air Act (the Act) and its implementing regulations codified. This approved program allows New York to issue federally enforceable operating permits to all major stationary sources and to certain other sources within the State's jurisdiction. However, because certain of the regulations are emergency rules that will expire on December 21, 2001, unless extended, EPA is approving this program only until the expiration date of the emergency rules. EPA has proposed approval of permanent rules that are substantively the same as the emergency rules and the State expects to submit those rules in final adopted form shortly. Once these rules become effective, EPA will promulgate another final program approval to replace this action. In the interim, the emergency rules will still be in effect and, therefore, New York will still have a fully approved program. If EPA has not approved the State's revised permanent rules before the emergency rules expire, New York's title V permit program will expire and the federal program will automatically apply. If New York's emergency rules expire as discussed above and a federal program under part 71 takes effect in the state, EPA will provide notice to the public within two weeks of the effective date of the federal program in a subsequent **Federal Register** document. Because EPA received adverse comments on the proposed action published in the October 25, 2001 **Federal Register** (66 FR 53966), this action responds to those comments.

EFFECTIVE DATE: November 30, 2001.

ADDRESSES: Copies of the State's submittal and other supporting information used in developing this final full approval are available for inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 2, 290 Broadway, 25th Floor, New York, New York 10007–1866.

FOR FURTHER INFORMATION CONTACT: Steven C. Riva, Chief, Permitting Section, Air Programs Branch, at the above EPA office in New York or at telephone number (212) 637–4074.

SUPPLEMENTARY INFORMATION: This section provides additional information by addressing the following questions:

1. What is the operating permit program?
2. What is being addressed in this document?
3. What were the concerns raised by the commenters?
4. What is the public's role in identifying program deficiencies?
5. What are the program changes that EPA is approving?
6. What is involved in this final action?
7. What is the scope of EPA's full approval?
8. What is the effective date of EPA's final full approval of the State of New York title V program?

1. What Is the Operating Permit Program?

Title V of the Clean Air Act (the Act) and its implementing regulations at 40 CFR part 70 (part 70) direct all states to develop and implement operating permit programs that meet certain criteria. Operating permit programs are intended to consolidate into single federally enforceable documents all requirements of the Act that apply to individual sources. This consolidation of all of the applicable requirements for a source enables the source, the public, and permitting authorities to more easily determine what requirements of the Act apply and whether the source is complying with them. Sources required to obtain operating permits include "major" sources of air pollution and certain other sources specified in section 501 of the Act and in EPA's regulations at 40 CFR 70.3.

The EPA reviews state programs pursuant to title V of the Act and part 70, which outline the criteria for approval or disapproval. Where a program substantially, but not fully, meets the requirements of part 70, EPA may grant the program interim approval which would be effective for two years. If a state does not have in place a fully approved program by the time the interim approval expires, the federal operating permit program under 40 CFR part 71 (part 71) will automatically take effect. Due to unexpected circumstances that affected states' timeliness in developing fully approvable programs, EPA extended the effective date of all interim approvals until December 1, 2001. For any state that has not received full approval from EPA by December 1, 2001, its interim approval will then expire and be immediately replaced by the federal part 71 program. All sources subject to the federal program that do not have final part 70 permits already issued to them by the state will be required to submit a part 71 permit application and the appropriate fees within one year to their respective EPA Regional offices under part 71.

2. What Is Being Addressed in This Document?

New York State's first version of its operating permit program substantially, but not fully, met the requirements of part 70; therefore, EPA granted interim program approval on November 7, 1996, which became effective on December 9, 1996 (61 FR 57589). In the interim approval rulemaking EPA identified eight issues that needed correction before New York would be eligible for final full approval. New York State submitted a corrected program to EPA

on June 8, 1998, which addressed three of the deficiencies. The State submitted a second corrected program to EPA on October 5, 2001, which addressed three additional deficiencies. The latter three corrections were submitted in final form as emergency rules, which will expire on December 21, 2001, unless extended. At the same time, New York submitted proposed permanent rules (which were identical to the emergency rules) which will replace the emergency rules, and which the State is currently in the process of adopting. The State will submit the permanent rules shortly after the completion of the State's public comment process, and before the expiration of the emergency rules.

As discussed in the proposed approval notice (66 FR 53966), EPA no longer considers the remaining two issues to be deficiencies. First, because New York State affords more time than part 70 requires for citizens to file a petition for judicial review, this issue is not considered to be a program deficiency. The second issue related to the definition of "major source." EPA recently promulgated regulations revising the definition of major source, which is now consistent with the definition included in the New York State operating permit program. As such, there is no longer a program deficiency with respect to this definition.

On October 25, 2001, EPA proposed full approval of New York State's title V operating permit program and provided the public a period of 30 days to submit comments on EPA's proposed action (66 FR 53966). The proposed approval concerned the three permanent rules submitted on June 8, 1998 (effective on June 26, 1998) as well as the emergency and draft permanent rules submitted on October 5, 2001. During the 30-day comment period, EPA received one comment letter dated November 23, 2001, from the New York Public Interest Research Group (NYPIRG). The comments contained in that letter are addressed below.

3. What Were the Concerns Raised by the Commenters?

On November 23, 2001, we received a comment letter from NYPIRG on the proposed full approval of the New York program. In this notice, we are only addressing the comments which relate to our determination that New York has corrected the interim approval deficiencies in its title V program. Most of the comments submitted by NYPIRG are outside the scope of this action because they do not address the interim approval deficiencies and the subsequent correction of these deficiencies. Some of these issues have been raised previously by NYPIRG, either in its April 13, 1999 petition on the New York State Title V program, in subsequent facility specific petitions, or in its March 11, 2001 letter submitted in response to EPA's December 2000 notice.

Of the remaining comments, four are new allegations of deficiencies in the New York State Title V program. That is, these allegations were not submitted in response to EPA's December 2000 notice that alerted the public to identify and bring to EPA's attention alleged programmatic and/or implementation deficiencies in state operating permit programs. These four comments are also outside of the scope of the eight issues identified by EPA in the November 7, 1996 **Federal Register** notice granting interim program approval to New York State. Nonetheless, EPA will investigate these allegations to ascertain whether they constitute a deficiency in the New York State's Title V program, and EPA will respond appropriately.

In its comment letter, NYPIRG challenged our ability to proceed with full approval of New York's program when, according to the comment, the program does not clearly conform to the requirements of part 70.

EPA is aware that issues other than those listed in the November 7, 1996, interim approval may exist in the New York program. EPA agrees that these issues must be addressed. For the reasons discussed below, however, we disagree that newly identified deficiencies that may exist prohibit us from granting New York full program approval at this time.

In 1990, Congress amended the Clean Air Act, 42 U.S.C. 7401 to 7671q ("CAA" or "Act"), by adding title V, 42 U.S.C. 7661 to 7661f, which requires certain air pollutant emitting facilities, including "major source[s]" and "affected source[s]," to obtain and comply with operating permits. *See* 42 U.S.C. 7661a(a). Title V is intended to be administered by local, state or interstate air pollution control agencies, through permitting programs that have been approved by EPA. *See* 42 U.S.C. 7661a(a). EPA is charged with overseeing the State's efforts to implement an approved program, including reviewing proposed permits and vetoing improper permits. *See* 42 U.S.C. §§ 7661a(i) and 7661d(b). Accordingly, Title V of the CAA provides a framework for the development, submission and approval of state operating permit programs. Following the development and submission of a state program, the Act provides two different approval options that EPA may utilize in acting on state submittals. *See* 42 U.S.C. 7661a(d) and (g). Pursuant to section 502(d), EPA "may approve a program to the extent that the program meets the requirements of the Act * * *" EPA may act on such program submittals by approving or disapproving, in whole or in part, the state program. An alternate option for acting on state programs is provided by the interim approval provision of section 502(g). This section states: "If a program * * * substantially meets the requirements of this title, but is not fully approvable, the Administrator may by rule grant the program interim approval." This provision provides EPA with the authority to act on State programs that substantially, but do not fully, meet the requirements of Title V and part 70. Only those program submittals that meet the requirements of eleven key program areas are eligible to receive interim approval. *See* 40 CFR 70.4(d)(3)(i)–(xi). Finally, section 502(g) directs EPA to "specify the changes that must be made before the program can receive full approval." 42 U.S.C. 7661a(g); 40 CFR 70.4(e)(3). This explicit directive encompasses another, implicit one: Once a state corrects the specified deficiencies then it will be eligible for full program approval. EPA believes this is so even if deficiencies have been identified sometime after final interim approval, either because the deficiencies arose after EPA granted interim approval or, if the deficiencies existed at that time, EPA failed to identify them as such in proposing to grant interim approval.

Thus, an apparent tension exists between these two statutory provisions. Standing alone, section 502(d) appears to prevent EPA from granting a state operating permit program full approval until the state has corrected all deficiencies in its program no matter how insignificant, and without consideration as to when such deficiency was identified. Alternately, section 502(g) appears to require that EPA grant a state program full approval if the state has corrected those issues that the EPA identified in the final interim approval. The central question, therefore, is whether New York by virtue of correcting the deficiencies identified in the final interim approval is eligible at this time for full approval, or whether New York must also correct any new or recently identified deficiencies that may exist as a prerequisite to receiving full program approval.

According to settled principles of statutory construction, statutory provisions should be interpreted so that they are consistent with one another.

See Citizens to Save Spencer County v. *EPA*, 600 F.2d 844, 870 (D.C. Cir. 1979). Where an agency encounters inconsistent statutory provisions, it must give maximum possible effect to all of the provisions, while remaining within the bounds of its statutory authority. *Id.* at 870–71. Whenever possible, the agency's interpretation should not render any of the provisions null or void. *Id.* Courts have recognized that agencies are often delegated the responsibility to interpret ambiguous statutory terms in such a fashion. *See Chevron U.S.A, Inc.* v. *Natural Resources Defense Council, Inc.*, 467 U.S. 837, 845 (1984). Harmonious construction is not always possible, however, and furthermore should not be sought if it requires distorting the language in a fashion never imagined by Congress. Citizens to Save Spencer County, 600 F.2d at 870.

In this situation, in order to give effect to the principles embodied in Title V that major stationary sources of air pollution be required to have an operating permit that conforms to certain statutory and regulatory requirements, and that operating permit programs be administered and enforced by state permitting authorities, the appropriate and more cohesive reading of the statute recognizes EPA's authority to grant New York full approval in this situation while working simultaneously with the state, in its oversight capacity, on any additional problems that were recently identified. To conclude otherwise would disrupt the current administration of the state program and cause further delay in the state's ability to issue operating permits to major stationary sources. A smooth transition from interim approval to full approval is in the best interest of the public and the regulated community and best reconciles the statutory directives of Title V.

Furthermore, requiring the State to fix all of the deficiencies that may exist and that have been recently identified prior to receiving full approval runs counter to the established regulatory process that is already in place to deal with newly identified program deficiencies. Section 502(i)(4) of the Act and 40 CFR 70.4(i) and 70.10 provide EPA with the authority to issue notices of deficiency ("NOD") whenever EPA makes a determination that a permitting authority is not adequately administering or enforcing a part 70 program, or that the State's permit program is inadequate in any other way. Consistent with these provisions, in its NOD EPA will specify a reasonable time frame for the permitting authority to correct the identified deficiency. The New York Title V interim approval expires on December 1, 2001. This deadline does not provide adequate time for the State to correct newly identified issues that may exist prior to the expiration of interim approval. Allowing the State's program to expire because of issues identified as recently as March 2001 will cause disruption and further delay in the issuance of permits to major stationary sources in New York. As explained above, we do not believe that Title V requires such a result. Rather, the appropriate mechanism for dealing with additional deficiencies that are identified sometime after a program received interim approval but prior to being granted full approval is the notice of program deficiency or administration deficiency as discussed herein. This process provides the State an adequate amount of time after such findings to implement any necessary changes without unduly disrupting the entire state operating permit program. As a result, addressing newly identified problems separately from the full approval process will not cause these issues to go unaddressed. Moreover, proceeding in this manner allows for a more rational and orderly method for addressing new issues as they arise.

In addition, NYPIRG submitted one comment that directly relates to New York's full program approval process. This comment relates to the definition of "major source." NYPIRG commented that EPA can only grant full approval if a program complies with part 70 as it exists on the date of full program approval. That is, approval cannot be based on a determination that a program complies with proposed regulations. EPA agrees. The decision to grant full approval is based on the fact that the definition of major source in New York State's program is now consistent with the definition in part 70. In EPA's proposed approval of the New York State program, it was noted that the agency had proposed revisions to part 70 relative to the major source definition that, when finalized, would be consistent with the definition in New York's rules. New York's definition of major source, which lists source categories that must include fugitive emissions in determining major source status reads, in part: "All other source categories regulated by a standard under Sections 111, for which EPA has completed a rulemaking proceeding under 302(j) of the Act or 112 of the Act, but only with respect to those air pollutants that have been regulated for that category as of the effective date of this Part." On November 27, 2001, the Agency published in the **Federal Register** a rule that finalized EPA's change to paragraph (2)(xvii) of the part 70 definition of major source. See 66 FR 59161, November 27, 2001. The revised paragraph now reads, "(xvii) Any other stationary source category, which as of August 7, 1980 is being regulated by a standard promulgated under section 111 or 112 of the Act." This change means that part 70 no longer requires states to provide that sources in categories subject to standards under sections 111 or 112 promulgated after August 7, 1980 must include fugitive emissions in determining major source status under section 302 or part D of title I of the Act. The definition of major source in the New York program is now consistent with part 70. Although the New York definition is different than the EPA definition, the State's definition covers at least the same source categories as part 70 (as revised) and, therefore, it is now fully approvable.

In addition to the above described change, EPA has deleted the phrase "but only with respect to those air pollutants that have been regulated for that category" from paragraph (c)(xvii) of the part 70 definition of major source. EPA proposed to delete this phrase in its 1995 supplemental proposal to revise part 70. See 60 FR 45530, August 31, 1995. States, including New York, must revise their part 70 programs accordingly, and submit the revision to EPA within 12 months of the date of publication of the final rule. If a state can demonstrate that additional legal authority is needed, the deadline for submittal of a revised program can be extended to 24 months after EPA's rule is published.

4. What Is the Public's Role in Identifying Program Deficiencies?

On May 22, 2000, EPA promulgated a rulemaking that extended the interim approval period of 86 operating permit programs until December 1, 2001. (65 FR 32035). The action was subsequently challenged by the Sierra Club and NYPIRG. In settling the litigation, EPA agreed to publish a notice in the **Federal Register** that would alert the public that they may identify and bring to EPA's attention alleged programmatic and/or implementation deficiencies in title V programs and that EPA would respond to their allegations within specified time periods if the comments were made within 90 days of publication of the **Federal Register** notice. EPA published that notice on December 11, 2000. (65 FR 77276).

Several citizens commented on what they believe to be deficiencies with respect to the New York State Title V

program. As stated in the **Federal Register** notice published on October 25, 2001 proposing to fully approve New York State's operating permit program, EPA takes no action on those comments in today's action. Rather, EPA expects to respond by December 14, 2001, to timely public comments on programs that had obtained interim approval, and by April 1, 2002, to timely comments on fully approved programs. EPA will publish a notice of deficiency (NOD) when it is determined that a deficiency exists, or EPA will notify the commenter in writing to explain the agency's reasons for not making a finding of deficiency. In addition, EPA will publish a notice of availability in the **Federal Register** notifying the public that the agency has responded in writing to these comments and how the public may obtain a copy of such a response. An NOD will not necessarily be limited to deficiencies identified by citizens and may include any deficiencies that EPA has identified through its program oversight. Furthermore, in the future, EPA may issue an additional NOD if EPA or a citizen identifies other deficiencies.

5. What Are the Program Changes That EPA Is Approving?

The details on the program changes can be found in EPA's proposed action which was published in the October 25, 2001 issue of the **Federal Register** (see 66 FR 53966). In summary, EPA approves the three rule revisions that became effective on June 26, 1998, and the three other rule revisions that were promulgated pursuant to emergency rulemaking on September 21, 2001.

6. What Is Involved in This Final Action?

The State of New York has adequately fulfilled the conditions of the interim approval promulgated on November 7, 1996. EPA is therefore taking final action to fully approve New York State's operating permit program as revised by the three permanent rules submitted on June 8, 1998 and the three emergency rules submitted on October 5, 2000. However, as previously discussed, since the emergency rules expire on December 21, 2001, unless extended, this final full approval will expire if EPA has not approved the State's revised permanent rules before the emergency rules expire. New York State has commenced a separate rulemaking proposal (that is, the "normal" rulemaking process utilized in the State of New York, including the opportunity for public participation), containing the identical regulatory changes. The permanent rules will replace the "emergency" rules once the rulemaking proposal is finalized. Today's approval, however, is contingent upon the final permanent rules being substantively the same as the draft rules on which EPA proposed this action and which were the same as the emergency rules that are already in effect. Once these permanent rules become effective, EPA will promulgate another final program approval to replace this action. In the interim, the emergency rules will still be in effect and, therefore, New York will still have a fully approved program. If the State of New York fails to adopt rules that are effective before expiration of the emergency rules, then the New York State operating permit program will expire and the federal part 71 program will automatically take effect. As previously discussed, if necessary, EPA will publish a notice in the **Federal Register** within two weeks of the effective date of the federal program.

New York State may revise its operating permit program as appropriate in the future by following the procedures stipulated in 40 CFR 70.4(i). EPA may also exercise its oversight authorities under section 502(i) of the Act to require changes to the State's program consistent with the procedure stipulated in 40 CFR 70.10.

7. What Is the Scope of EPA's Full Approval?

In its program submittal, New York State did not assert jurisdiction over Indian country. To date, no tribal government in New York has applied to EPA for approval to administer a title V program in Indian country within the State. On February 12, 1998, EPA promulgated regulations (40 CFR part 49) under which eligible Indian tribes may be approved by EPA to implement a title V program on Indian reservations and in non-reservation areas over which the tribe has jurisdiction. EPA has promulgated regulations (40 CFR part 71) governing the issuance of federal operating permits in Indian country. EPA's authority to issue permits in Indian country was challenged in *Michigan* v. *EPA*, (D.C. Cir. No. 99–1151). On October 30, 2001, the court issued its decision in the case, vacating a provision that would have allowed EPA to treat areas over which EPA determines there is a question regarding the area's status as if it is Indian country, and remanding to EPA for further proceedings. EPA will respond to the court's remand and explain EPA's approach for further implementation of part 71 in Indian country in a future action.

8. What Is the Effective Date of EPA's Final Full Approval of the State of New York Title V Program?

EPA is using the good cause exception under the Administrative Procedure Act (APA) to make the full approval of the State's program effective on November 30, 2001. In relevant part, section 553(d) provides that publication of "a substantive rule shall be made not less than 30 days before its effective date, except—* * * (3) as otherwise provided by the agency for good cause found and published with the rule." Good cause may be supported by an agency determination that a delay in the effective date is "impracticable, unnecessary, or contrary to the public interest." APA section 553(b)(3)(B). EPA finds that it is necessary and in the public interest to make this action effective sooner than 30 days following publication. In this case, EPA believes that it is in the public interest for the program to take effect before December 1, 2001: EPA's interim approval of New York State's program expires on December 1, 2001. In the absence of this full approval taking effect on November 30, the federal part 71 program would automatically take effect in New York State and would remain in place until the effective date of the fully-approved state program. EPA believes it is in the public interest for sources, the public and the State to avoid any gap in coverage of the State program, as such a gap could cause confusion regarding permitting obligations. Furthermore, a delay in the effective date is unnecessary because New York has been administering the title V permit program for five years under an interim approval. Through this action, EPA is approving revisions to the existing and currently operational program. The change from the interim approved program which substantially but did not fully meet the part 70 requirements, to the fully approved program is relatively minor, in particular if compared to the changes between a state-approved program and the federal program. Finally, sources are already complying with many of the newly approved requirements as a matter of state law. Thus, there is little or no additional burden with complying with these requirements under the federally approved State program.

Administrative Requirements

Under Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), this final approval is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and

Budget. Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) the Administrator certifies that this final approval will not have a significant economic impact on a substantial number of small entities because it merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. This rule does not contain any unfunded mandates and does not significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) because it approves pre-existing requirements under state law and does not impose any additional enforceable duties beyond that required by state law. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). This rule also does not have Federalism implications because it will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, "Federalism" (64 FR 43255, August 10, 1999). This rule merely approves existing requirements under state law, and does not alter the relationship or the distribution of power and responsibilities between the State and the Federal government established in the Clean Air Act. This final approval also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) or Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001), because it is not a significant regulatory action under Executive Order 12866. This action will not impose any collection of information subject to the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, other than those previously approved and assigned OMB control number 2060–0243. For additional information concerning these requirements, see 40 CFR part 70. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In reviewing State operating permit programs submitted pursuant to title V of the Clean Air Act, EPA will approve State programs provided that they meet the requirements of the Clean Air Act and EPA's regulations codified at 40 CFR part 70. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a State operating permit program for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permit program, to use VCS in place of a State program that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective on November 30, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 4, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Dated: November 29, 2001.

William J. Muszynski,

Acting Regional Administrator, Region 2.

For reasons set out in the preamble, Appendix A of part 70 of title 40, chapter I, of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

2. Appendix A to part 70 is amended by adding paragraph (c) in the entry for New York to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permit Programs

* * * * *

New York

* * * * *

(c) The New York State Department of Environmental Conservation submitted program revisions on June 8, 1998 and October 5, 2001. The rule revisions contained in the June 8, 1998 and October 5, 2001 submittals adequately addressed the conditions of the interim approval effective on December 9, 1996, and which would expire on December 1, 2001. The October 5, 2001 submission consists of rules adopted pursuant to New York's emergency rulemaking procedures. The State is hereby granted final full approval effective on November 30, 2001.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[FRL–7113–9]

Clean Air Act Full Approval of Operating Permits Program in Alaska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to fully approve the operating permits program submitted by the State of Alaska. Alaska's operating permits program was submitted in response to the directive in the 1990 Clean Air Act Amendments that permitting authorities develop, and submit to EPA, programs for issuing operating permits to all major stationary sources and to certain other sources within the permitting authority's jurisdiction.

DATES: Effective November 30, 2001.

ADDRESSES: Copies of the State of Alaska's submittal and other supporting

information used in developing this final, full approval are available for inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington, 98101. Interested persons wanting to examine these documents should make an appointment with the appropriate office at least 24 hours before the visiting day. A reasonable fee may be charged for copies.

FOR FURTHER INFORMATION CONTACT: Denise Baker, EPA, Region 10, Office of Air Quality (OAQ–107), 1200 6th Avenue, Seattle, WA 98101, (206) 553–8087.

SUPPLEMENTARY INFORMATION:

I. Background

The Clean Air Act (CAA) Amendments of 1990 require all state and local permitting authorities to develop operating permits programs that meet certain Federal criteria. The State of Alaska submitted a program in response to this directive. EPA granted interim approval to Alaska's air operating permits program on December 5, 1996, (61 FR 64463). The interim approval notice identified 19 remaining conditions that Alaska must meet in order to receive full approval of its Title V operating permits program.

After Alaska revised its operating permits program to address the conditions of the interim approval, EPA promulgated a proposal to approve Alaska's Title V operating permits program on July 26, 2001, (66 FR 38966). At the same time, because EPA viewed the proposal as a noncontroversial action and did not anticipate adverse public comment on the proposal, EPA also published a direct final rule approving the Alaska operating permits program (66 FR 38940). EPA received one adverse public comment on the proposal. Therefore, EPA removed the direct final approval on September 20, 2001, (66 FR 48357). After carefully reviewing and considering the issues raised by the commenter, EPA is taking final action to give full approval to the Alaska operating permits program.

II. What Is the Effective Date of EPA's Full Approval of Alaska's Title V Program?

EPA is using the good cause exception under the Administrative Procedure Act (APA) to make the full approval of the state's program effective on November 30, 2001. In relevant part, the APA provides that publication of "a substantive rule shall be made not less than 30 days before its effective date, except— * * * (3) as otherwise provided by the agency for good cause found and published with the rule." 5 U.S.C. 553(d)(3). Section 553(b)(3)(B) of the APA provides that good cause may be supported by an agency determination that a delay in the effective date is impracticable, unnecessary, or contrary to the public interest. EPA finds that it is necessary and in the public interest to make this action effective sooner than 30 days following publication. In this case, EPA believes that it is in the public interest for the program to take effect before December 1, 2001. EPA's interim approval of Alaska's prior program expires on December 1, 2001. In the absence of this full approval of Alaska's amended program taking effect on November 30, the federal program under 40 CFR part 71 would automatically take effect in Alaska and would remain in place until the effective date of the fully-approved state program. EPA believes it is in the public interest for sources, the public and the State of Alaska to avoid any gap in coverage of the state program, as such a gap could cause confusion regarding permitting obligations. Furthermore, a delay in the effective date is unnecessary because Alaska has been administering the Title V permit program for nearly five years under an interim approval. Through this action, EPA is approving a few revisions to the existing and currently operational program. The change from the interim approved program which substantially met the part 70 requirements, to the fully approved program is relatively minor, in particular if compared to the changes between a state-established and administered program and the federal program.

III. Response to Comments

EPA received one comment letter in response to our July 26, 2001, (66 FR 38966) proposed approval notice for the Alaska Title V operating permits program. The commenter stated that EPA should withhold approval of Alaska's program until two issues were resolved. First, the commenter stated that "Alaska's plan is not yet in compliance with the federal Clean Air Act and its implementing regulations (40 CFR part 70)." The commenter argued that Alaska had failed to meet several Title V requirements, including the requirement to include monitoring, recordkeeping and reporting sufficient to assure compliance with and enforcement of each applicable requirement. Second, the commenter stated that "there is an ongoing review of Alaska's entire Title V program that will not be completed until December 1, 2001." The comments provided to EPA in response to our July 26, 2001, (66 FR 38966) proposed approval notice for Alaska were made by the same party and raised issues that had previously been discussed in the commenter's letter submitted on March 12, 2001, in response to 65 FR 77376 (December 11, 2000).

A. Response to Issue #1—Assertion That Alaska Is Not Yet in Compliance With Certain Requirements of the Title V Program

On May 22, 2000, EPA promulgated a rulemaking that extended the interim approval period of 86 operating permits programs, including Alaska, until December 1, 2001 (65 FR 32035). The action was subsequently challenged by the Sierra Club and the New York Public Interest Research Group (NYPIRG). In settling the litigation, EPA agreed to publish a notice in the **Federal Register** that would alert the public that they may identify and bring to EPA's attention alleged programmatic and/or implementation deficiencies in Title V programs that had received interim or full approval. This notice was published on December 11, 2000 (65 FR 77376). In the notice, EPA committed to respond to the merits of any such claims of deficiency on or before December 1, 2001, for those states, such as Alaska, that have received interim approval and on or before April 1, 2002, for states that have received full approval.

As noted above, one citizen organization commented on what it believes to be deficiencies with respect to the Alaska Title V program. EPA takes no action on those comments in today's action. Rather, EPA expects to respond by December 14, 2001, to timely public comments on programs that have obtained interim approval, and by April 1, 2002, to timely comments on fully approved programs. We will publish a notice of deficiency (NOD) when we determine that a deficiency exists, or we will notify the commenter in writing to explain our reasons for not making a finding of deficiency. In addition, we will publish a notice of availability in the **Federal Register** notifying the public that we have responded in writing to these comments and how the public may obtain a copy of our response. A NOD will not necessarily be limited to deficiencies identified by citizens, and may include any deficiencies that we have identified through our program oversight. Furthermore, in the future, EPA may issue an additional NOD if EPA or a citizen identifies other deficiencies.

For the reasons described below, EPA is not in the context of this action responding to the comments submitted after the December 11, 2000, notice that identify potential new deficiencies.

B. Response to Issue #2—Ongoing Review

The commenter referred to the ongoing review of Alaska's Title V program, and took the position that EPA should not grant full approval to Alaska's program until that review is completed. In support of this, the commenter asserted that the subject matter of the ongoing review, namely, the adequacy of the Alaska Title V program, is essentially the same as the subject matter of the proposal to fully approve the Alaska program. The commenter stated that EPA must base its decision of whether to grant full approval on the adequacy of the Alaska program as it currently exists, not as it existed at the time of interim approval. The commenter further stated that EPA must take into account any deficiency existing in the Alaska program, regardless of whether it had been identified in the granting of interim approval. According to the commenter, any other position would eviscerate EPA's oversight responsibilities.

For the reasons discussed below, we disagree that any deficiencies that may be identified following interim approval would prohibit us from granting Alaska full program approval at this time.

In 1990, Congress amended the Clean Air Act, 42 U.S.C. 7401 to 7671q ("CAA" or "Act"), by adding Title V, 42 U.S.C. 7661 to 7661f, which requires certain air pollutant emitting facilities, including "major source[s]" and "affected source[s]," to obtain and comply with operating permits. *See* 42 U.S.C. 7661a(a). Title V is intended to be administered by local, state or interstate air pollution control agencies, through permitting programs that have been approved by EPA. *See* 42 U.S.C. 7661a(a). EPA is charged with overseeing the State's efforts to implement an approved program, including reviewing proposed permits and vetoing improper permits. *See* 42 U.S.C. 7661a(i) and 7661d(b). Accordingly, Title V of the CAA provides a framework for the development, submission and approval of state operating permits programs. Following the development and submission of a state program, the Act provides two different approval options that EPA may utilize in acting on state submittals. *See* 42 U.S.C. 7661a(d) and (g). Pursuant to section 502(d), EPA "may approve a program to the extent that the program meets the requirements of the Act * * *" EPA may act on such program submittals by approving or disapproving, in whole or in part, the state program. An alternative option for acting on state programs is provided by the interim approval provision of section 502(g). This section states: "If a program * * * substantially meets the requirements of this title, but is not fully approvable, the Administrator may by rule grant the program interim approval." This provision provides EPA with the authority to act on State programs that substantially, but do not fully, meet the requirements of Title V and part 70. Only those program submittals that meet the requirements of eleven key program areas are eligible to receive interim approval. *See* 40 CFR 70.4(d)(3)(i)–(xi). Finally, section 502(g) directs EPA to "specify the changes that must be made before the program can receive full approval." 42 U.S.C. 7661a(g); 40 CFR 70.4(e)(3). This explicit directive encompasses another, implicit one: Once a state corrects the specified deficiencies then it will be eligible for full program approval. EPA believes this is so even if deficiencies have been identified sometime after final interim approval, either because the deficiencies arose after EPA granted interim approval or, if the deficiencies existed at that time, EPA failed to identify them as such in proposing to grant interim approval.

Thus, an apparent tension exists between these two statutory provisions. Standing alone, section 502(d) appears to prevent EPA from granting a state operating permits program full approval until the state has corrected all deficiencies in its program no matter how insignificant, and without consideration as to when such deficiency was identified. Alternatively, section 502(g) appears to require that EPA grant a state program full approval if the state has corrected those issues that the EPA identified in the final interim approval. The central question, therefore, is whether Alaska, by virtue of correcting the deficiencies identified in the final interim approval, is eligible at this time for full approval, or whether Alaska must also correct any new or recently identified deficiencies that may exist, as a prerequisite to receiving full program approval.

According to settled principles of statutory construction, statutory provisions should be interpreted so that they are consistent with one another. *See Citizens to Save Spencer County* v. *EPA*, 600 F.2d 844, 870 (D.C. Cir. 1979). Where an agency encounters inconsistent statutory provisions, it must give maximum possible effect to all of the provisions, while remaining within the bounds of its statutory authority. *Id.* at 870–71. Whenever possible, the agency's interpretation should not render any of the provisions null or void. *Id.* Courts have recognized that agencies are often delegated the responsibility to interpret ambiguous statutory terms in such a fashion. *See Chevron U.S.A., Inc.* v. *Natural Resources Defense Council, Inc.*, 467 U.S. 837, 845 (1984). Harmonious construction is not always possible, however, and furthermore should not be sought if it requires distorting the language in a fashion never imagined by Congress. *Citizens to Save Spencer County*, 600 F.2d at 870.

In this situation, in order to give effect to the principles embodied in Title V that major stationary sources of air pollution be required to have an operating permit that conforms to certain statutory and regulatory requirements, and that operating permits programs be administered and enforced by state permitting authorities, the appropriate and more cohesive reading of the statute recognizes EPA's authority to grant Alaska full approval in this situation while working simultaneously with the state, in its oversight capacity, on any additional issues that were recently identified. To conclude otherwise would disrupt the current administration of the state program, by causing the program to transfer to administration by EPA, and would cause further delay in Alaska's ability to issue operating permits to major stationary sources. A smooth transition from interim approval to full approval is in the best interest of the public and the regulated community and best reconciles the statutory directives of Title V.

Furthermore, requiring the State to address the deficiencies, if there are any, that have been identified in the past year to receive full approval runs counter to the established regulatory process that is already in place to deal with newly identified program deficiencies. Section 502(i)(4) of the Act and 40 CFR 70.4(i) and 70.10 provides EPA with the authority to issue notices of deficiency ("NOD") whenever EPA makes a determination that a permitting authority is not adequately administering or enforcing a part 70 program, or that the State's permit program is inadequate in any other way. Consistent with these provisions, in its NOD EPA will specify a reasonable time frame for the permitting authority to correct any identified deficiency. The Alaska Title V interim approval expires on December 1, 2001. This deadline does not provide adequate time for the State to correct newly identified issues

prior to the expiration of interim approval. Allowing the State's program to expire because of issues identified as recently as March 2001, will cause disruption and further delay in the issuance of permits to major stationary sources in Alaska. As explained, Title V does not require such a result. Rather, the appropriate mechanism for dealing with additional deficiencies that are identified sometime after a program received interim approval but prior to being granted full approval is the notice of program deficiency or administration deficiency as discussed herein. This process provides the State an adequate amount of time after such findings to implement any necessary changes without disrupting the continuity of the state operating permits program. Addressing newly identified issues on a separate track from the granting of full approval still ensures that these issues will be addressed in due course. Rather than undermining EPA's oversight authority as the commenter suggests, proceeding in this manner allows for a more rational and orderly method for addressing new issues as they arise.

At this time, EPA has identified one concern regarding the Alaska Title V program for which it has asked the State for an immediate response. This concern relates to the rate of Title V permit issuance by Alaska. In response to EPA's request, Alaska has provided EPA with a commitment letter that includes a timeline and milestones for issuance of remaining permits. Specifically, the State has committed to issuing all outstanding Alaska Title V air operating permits on or before December 1, 2003. EPA is satisfied that this timeline for issuance of remaining permits represents reasonable progress towards issuance of all permits. Accordingly, EPA is not issuing a notice of deficiency because the State's commitment that future permits will be issued consistent with state and federal requirements addresses EPA's concern. However, it will be important to ensure that the State actually meets this commitment. EPA will monitor the State's efforts over the next two years to ensure the State is proceeding on a pace to meet the commitment and that the commitment is ultimately met.

IV. What Is the Scope of EPA's Full Approval?

In its program submission, Alaska did not assert jurisdiction over Indian country. To date, no tribal government in Alaska has applied to EPA for approval to administer a title V program in Indian country within the state. EPA regulations at 40 CFR part 49 govern how eligible Indian tribes may be approved by EPA to implement a title V program on Indian reservations and in non-reservation areas over which the tribe has jurisdiction. EPA's part 71 regulations govern the issuance of federal operating permits in Indian country. EPA's authority to issue permits in Indian country was challenged in *Michigan* v. *EPA*, (D.C. Cir. No. 99–1151). On October 30, 2001, the court issued its decision in the case, vacating a provision that would have allowed EPA to treat areas over which EPA determines there is a question regarding the area's status as if it is Indian country, and remanding to EPA for further proceedings. EPA will respond to the court's remand and explain EPA's approach for further implementation of part 71 in Indian country in a future action.

V. Administrative Requirements

Under Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), this final approval is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. Under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) the Administrator certifies that this final approval will not have a significant economic impact on a substantial number of small entities because it merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. This rule does not contain any unfunded mandates and does not significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) because it approves pre-existing requirements under state law and does not impose any additional enforceable duties beyond that required by state law. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). This rule also does not have Federalism implications because it will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, "Federalism" (64 FR 43255, August 10, 1999). This rule merely approves existing requirements under state law, and does not alter the relationship or the distribution of power and responsibilities between the State and the Federal government established in the Clean Air Act. This final approval also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) or Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001), because it is not a significant regulatory action under Executive Order 12866. This action will not impose any collection of information subject to the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq., other than those previously approved and assigned OMB control number 2060–0243. For additional information concerning these requirements, see 40 CFR part 70. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In reviewing State operating permits programs submitted pursuant to Title V of the Clean Air Act, EPA will approve State programs provided that they meet the requirements of the Clean Air Act and EPA's regulations codified at 40 CFR part 70. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a State operating permits program for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permits program, to use VCS in place of a State program that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it

is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. section 804(2). This rule will be effective November 30, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 4, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Dated: November 29, 2001.

L. John Iani,

Regional Administrator, Region 10.

40 CFR part 70, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

2. In appendix A to part 70, the entry for Alaska is amended by revising paragraph (a) to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

Alaska

(a) Alaska Department of Environmental Conservation: submitted on May 31, 1995, as supplemented by submittals on August 16, 1995, February 6, 1996, February 27, 1996, July 5, 1996, August 2, 1996, and October 17, 1996; interim approval effective on December 5, 1996; revisions submitted on June 5, 1996, October 3, 1996, August 25, 1998, and May 24, 1999; full approval effective on November 30, 2001.

40 CFR Part 70

[NV 063–P170; FRL–7113–8]

Clean Air Act Full Approval of Title V Operating Permits Programs; Clark County Department of Air Quality Management, Washoe County District Health Department, and Nevada Division of Environmental Protection, Nevada

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to fully approve the operating permits program of the Clark County Department of Air Quality Management ("Clark County"), the Washoe County District Health Department ("Washoe County"), and the Nevada Division of Environmental Protection ("NDEP"). These three programs were submitted in response to the directive in the 1990 Clean Air Act (CAA) Amendments that permitting authorities develop, and submit to EPA, programs for issuing operating permits to all major stationary sources and to certain other sources within the permitting authorities' jurisdiction. EPA granted interim approval to Clark County's operating permits program on July 13, 1995, to Washoe County's program on January 5, 1995, and to NDEP's program on December 12, 1995. All three permitting agencies revised their programs to satisfy the conditions of interim approval, and EPA proposed full approval in the **Federal Register** on October 10, 2001. EPA received comments on our proposed approval of Clark County's program from Mr. Robert Hall of the Nevada Environmental Coalition, and on our proposed approval of NDEP's program from NDEP. After carefully reviewing and considering the issues raised by the commenters, EPA is taking final action to give full approval to the Clark County and NDEP operating permits programs. EPA received no comments on our proposed approval of the Washoe County program and we are also granting full approval to that program in today's action.

EFFECTIVE DATE: This rule is effective on November 30, 2001.

ADDRESSES: Copies of the three program submittals and other supporting information used in developing this final full approval, including the two comment letters on our proposed approval, are available for inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, California 94105.

FOR FURTHER INFORMATION CONTACT: David Albright, EPA Region 9, at 415–972–3971 or at albright.david@epa.gov.

SUPPLEMENTARY INFORMATION: This section contains additional information about our final rulemaking, organized as follows:

I. Background on the Clark County, Washoe County, and NDEP operating permits programs
II. Comments received by EPA on our proposed rulemaking and EPA's responses
III. EPA's final action
A. Full Approval of the Clark County, Washoe County, and NDEP Operating Permit Programs
B. Effective date of EPA's full approval
C. The scope of EPA's full approval
D. Citizen comment letters

I. Background on the Clark County, Washoe County, and NDEP Operating Permits Programs

The Clean Air Act (CAA) Amendments of 1990 required all state and local permitting authorities to develop operating permits programs that meet certain federal criteria. Clark County, Washoe County, and NDEP submitted their operating permits programs in response to this directive. Because the Clark County, Washoe County, and NDEP programs substantially, but not fully, met the requirements of part 70, EPA granted interim approval to each program in three separate rulemakings, published on July 13, 1995 (60 FR 36070), January 5, 1995 (60 FR 1741), and December 12, 1995 (60 FR 63631), respectively. Each interim approval notice described the conditions that had to be met in order for the programs to receive full approval.

After Clark County, Washoe County, and NDEP revised their programs to address the conditions of interim approval, EPA proposed to approve all three title V operating permits programs on October 10, 2001 (66 FR 51620).

II. Comments Received by EPA on Our Proposed Rulemaking and EPA's Responses

EPA received two comment letters during the public comment period. Mr. Robert Hall, Nevada Environmental Coalition, submitted a letter on November 9, 2001 commenting on our proposed approval of the Clark County program and NDEP submitted a letter on November 9, 2001 commenting on our proposed approval of the Nevada program. Copies of these letters are

included in the docket for this rulemaking maintained at the EPA Region 9 office.

A. Letter From Mr. Robert Hall, Nevada Environmental Coalition (NEC) Dated November 9, 2001

Mr. Hall, president of the NEC, raised numerous issues in his comment letter with respect to DAQM's implementation of the Clean Air Act. EPA responds below to those comments that are germane to EPA's proposal on October 10, 2001, to approve the Clark County DAQM operating permits program based upon the specific revisions made to the Clark County program addressing their interim approval deficiencies. However, many of Mr. Hall's comments relate to non-title V air permitting issues or to title V program issues that were not the subject of EPA's proposed action. Both categories of comments are beyond the scope of EPA's proposed action, which pertained specifically to whether Clark County had corrected the issues identified as deficiencies when EPA granted the program interim approval. In this notice, EPA is not responding to comments submitted by Mr. Hall that are beyond the scope of our present rulemaking. Nevertheless, many of the concerns raised by Mr. Hall are similar to issues that he raised in his comment letter submitted in response to EPA's 90-day public comment period that provided members of the public an opportunity to identify and bring to EPA's attention alleged programmatic and/or implementation deficiencies in title V programs. (65 FR 77376, December 11, 2000) The 90-day comment period was made available as part of EPA's settlement of a lawsuit over EPA's extension of all title V operating permits program interim approvals. As described in section III.D of this notice, EPA expects to respond in writing to Mr. Hall's earlier comments by December 14, 2001.

Set out below are the relevant issues raised by Mr. Hall in his comment letter and EPA's responses to the issues.

1. Program Submittal by the Clark County Department of Air Quality Management

Mr. Hall argues that because the title V program interim approval was originally granted to the Clark County Health District and revisions to the interim approved program were submitted by the Health District, EPA cannot grant full approval of the title V program to the Clark County Department of Air Quality Management. Mr. Hall contends that the Clark County program submittal is legally insufficient unless the revised program is re-written and re-submitted in the name of the Clark County Department of Air Quality Management.

As EPA noted in our proposed approval of the Clark County title V program (66 FR 51620, October 10, 2001), on August 7, 2001, the Governor of Nevada officially transferred responsibility for air quality management in Clark County from the County's Health District to the newly created Department of Air Quality Management, overseen by the Board of County Commissioners of Clark County. In a letter dated June 21, 2001 to the Clark County Commission, Governor Guinn designates "the Board of County Commissioners as the regulatory, enforcement and permitting authority for implementing applicable provisions of the federal Clean Air Act, any amendments to that Act, and any regulations adopted pursuant to that Act within Clark County." The change is essentially a shift in the organizational location of the County's air quality management program and all rules, regulations, and policies of the Health District that comprise Clark County's title V operating permits program were carried over to the new Department, pursuant to the Governor's designation.

In addition, the revised Clark County title V operating permits program was submitted by Allen Biaggi, Administrator of the Nevada Division of Environmental Protection, on behalf of Nevada Governor Kenny C. Guinn, as his appointed designee. Thus, the commenter's suggestion that the revised Clark County program submittal was made by an entity lacking the necessary legal authority under part 70 is clearly not the case. Moreover, DAQM has assured EPA that it assumes all air quality management commitments made by the County's Health District. For these reasons, EPA believes it is appropriate that full title V program approval is granted to the Clark County Department of Air Quality Management.

2. Clark County Regulations Are Not SIP-Approved

Mr. Hall also comments that the applicant submitted, as part of its revised title V operating permits program, local regulations that are not approved into the Nevada State Implementation Plan (SIP), and that the submittal should have contained only rules that are SIP-approved. The commenter also claims that the applicant does not identify the versions (by date of adoption) of the rules submitted.

The rules revised by Clark County to address interim approval deficiencies are Sections 0 ("Definitions") and 19 ("Part 70 Operating Permits"). Mr. Hall is correct that neither of these two rules are currently SIP-approved. However, Mr. Hall is mistaken in his belief that the rules constituting an agency's title V operating permits program need to be approved into the SIP. The establishment of operating permits programs is separate and distinct from the state implementation plan process. The statutory requirements for operating permit programs are contained in title V of the CAA (42 U.S.C. 7661–7661f), whereas the statutory requirements for state implementation plans are contained in title I of the Act (42 U.S.C. 7410). Nothing in the Act requires the local regulations relied upon by agencies for establishing permitting programs under title V of the Act to be incorporated into the state implementation plans required under title I of the Act.

Further, EPA's regulations implementing title V, which are codified at 40 CFR part 70, require that submitted operating permits programs include identification of "the specific statutes, administrative regulations, and, where appropriate, judicial decisions that demonstrate adequate authority" to carry out all aspects of the program, and that the statutes and regulations cited "shall be in the form of lawfully adopted State statutes and regulations. * * *" (*See* 40 CFR 70.4). While these statutes and regulations clearly need to be consistent with the requirements of title V and 40 CFR part 70, they do not need to be part of the State's implementation plan. EPA has determined that the revisions Clark County made to Sections 0 and 19 are consistent with the requirements of part 70, which makes the revisions approvable as part of Clark County's title V operating permits program.

As for Mr. Hall's assertion that the revised Clark County submittal does not identify the versions of the rules upon which it is based, EPA disagrees. The revised Clark County program submittal clearly identifies the versions of Sections 0 and 19 (the two regulations revised specifically to address interim approval deficiencies) as being those adopted by Clark County on May 24, 2001.

3. Clark County's Definitions Rule

Mr. Hall further comments that Clark County's revised title V program submittal contains a revision to a regulation (Clark County Section 0—Definitions) that was recently vacated by the 9th Circuit Court of Appeals. The commenter claims that since the date of EPA's proposed approval of the Clark County title V program (October 10,

2001) is well after the date of the court's decision to vacate EPA's approval of Clark County's Section 0 (August 29, 2001), EPA has erred in its proposal to grant full approval to the Clark County program, which relies, in part, on this vacated rule section.

The commenter is correct that EPA's final rulemaking approving Clark County Section 0 ("Definitions") and other rules into the Clark County portion of the Nevada SIP was recently vacated by the court. Mr. Hall is also correct that the revised Clark County operating permits program relies, in part, on the definitions in Section 0. However, the commenter is incorrect in his evaluation of the impact of the court's action relative to the County's title V program. While the court did vacate EPA's approval of Section 0 into the SIP, this action does not vacate Section 0 as a valid Clark County regulation. Section 0 remains valid and legally enforceable by Clark County. As noted in our response to issue 2 above, EPA regulations require that the rules comprising programs submitted for approval under part 70 must be enforceable by the State (or local entity), not EPA, and must meet the requirements of part 70. The Clark County title V program was granted only interim approval, in part, because the definition of "applicable requirement" in Section 0 did not match the definition in 40 CFR 70.3. EPA is now granting full approval to the revised Clark County operating permits program because all of its interim approval deficiencies have been fixed, including Clark County's modification of the definition of "applicable requirement" in Section 0. Since Clark County's revised definition of applicable requirement is consistent with part 70 and is contained in a rule (Section 0) that is valid and legally enforceable by Clark County, EPA believes that this interim program deficiency previously identified by the Agency has been fully resolved.

4. EPA Unlawfully Extended Interim Approval

The commenter also cites his belief that the requirements of the CAA and 40 CFR part 70 were not met when EPA extended interim approval of the Clark County title V operating permits program more than two years beyond the August 14, 1995 initial interim approval date. Mr. Hall further claims that EPA is required to implement a federal permitting program in Clark County and to impose sanctions as set forth in 40 CFR 70.10.

On August 29, 1997, EPA published a final rule in the **Federal Register** extending interim approval of operating permits programs nationwide to October 1, 1998 (62 FR 45732). In further rulemakings, EPA extended interim approvals again, ultimately promulgating a final rule on May 22, 2000 extending all operating permits program interim approvals up to December 1, 2001 (65 FR 32035). Section 307(b)(1) of the CAA requires in pertinent part that "[a]ny petition for review under this subsection shall be filed within sixty days from the date notice of such promulgation, approval, or action appears in the **Federal Register**.* * *" The sixty day window for filing challenges to the current interim approval extension closed on July 21, 2000. Clearly, Mr. Hall's current claim that EPA unlawfully extended interim approval of the Clark County operating permits program and his request that EPA impose a federal part 71 program and sanctions against Clark County is not within the statutorily-mandated timeframe for such appeals.

Moreover, a timely challenge to EPA's subsequent extension of all operating permits program interim approvals was brought in the Court of Appeals for the D.C. Circuit against EPA, and a settlement agreement resolving this challenge was entered November 21, 2000, in *Sierra Club and the New York Public Interest Research Group* v *EPA*. A component of that settlement agreement was that EPA would amend 40 CFR part 70 to clarify that all existing interim approved programs expire on December 1, 2001 and cannot be extended. EPA is, therefore, acting in accordance with existing regulations in granting final title V operating permits program approval to Clark County, effective November 30, 2001, based on Clark County's revisions to their program which adequately addressed all interim approval deficiencies.

After carefully reviewing and considering the issues raised by Mr. Hall, EPA is taking final action to give full approval to the Clark County operating permits program.

B. Letter From Colleen Cripps, Bureau of Air Quality, NDEP Dated November 9, 2001

NDEP submitted a letter commenting on EPA's October 10, 2001 notice, in which the Agency proposed to take no action on four rule changes made by the State that were not required as conditions for receiving full program approval. Specifically, EPA proposed to take no action on the State's changes to Nevada Administrative Code (NAC) sections 445B.094, 445B.187, 445B.290, and 445B.294 because EPA deemed these changes to be unapprovable.

In its letter, NDEP requested that EPA reconsider approval of sections 445B.094 and 445B.290 in our final rulemaking. As noted in the technical support document (TSD) for our proposed action, EPA was concerned that NAC section 445B.094 (the definition of "major source") did not provide a major source threshold for PM_{10} sources in attainment areas nor in PM_{10} nonattainment areas that are not classified as "serious" because of an exclusion in section 445B.094. NDEP clarified in their comments that the exclusion in section 445B.094 applies only to particulate matter greater than 10 microns in size. Thus, there is no exclusion for PM_{10}, which is particulate matter less than 10 microns in size. EPA's concern about NAC section 445B.290 ("Class I–B application for Class I operating permit; filing requirement") was that it appeared to not require certain nonmajor affected sources to apply for a Class I permit. NDEP's comments clarified that when section 445B.290 is read together with the "Class I source" definition at NAC 445B.036, there is a clear requirement that all affected sources apply for and obtain Class I operating permits.

EPA agrees with NDEP that the revisions to NAC sections 445B.094 and 445B.290 are consistent with the requirements of part 70 and today's action grants approval to these two additional changes as part of our full approval of the NDEP operating permits program.

III. EPA's Final Action

A. Full Approval of the Clark County, Washoe County, and NDEP Operating Permit Programs

EPA is granting full approval to the operating permits programs submitted by Clark County, Washoe County, and NDEP based on the revisions submitted on June 1, 2001, May 8, 2001, and May 30, 2001, respectively. The revisions submitted by the three agencies satisfactorily address the program deficiencies identified in EPA's interim approvals published on July 13, 1995 for Clark County (60 FR 36070), January 5, 1995 for Washoe County (60 FR 1741), and December 12, 1995 for NDEP (60 FR 63631).

In addition, EPA is approving, as a revision to NDEP's title V program, several additional rule changes made by the State, including the revisions described in section II.B above to sections 445B.094 (definition of major source) and 445B.290 (class I operating permit filing requirement) upon which EPA had proposed to take no action. As discussed in greater detail in the

proposal, EPA also approves a revision to NAC section 445B.138, the definition of potential to emit ("PTE"), based on NDEP's representations that it will implement the PTE definition in a manner that is consistent with judicial decisions and EPA policies. In the future, if NDEP does not implement the PTE definition consistent with our guidance, and/or has not established a sufficient compliance incentive absent federal and citizen's enforceability, EPA could find that the State has failed to administer or enforce its program and may take action as authorized by 40 CFR 70.10(b). Finally, EPA also finalizes the other rule revisions listed in Table 1 of EPA's October 10, 2001 proposed rulemaking.

B. Effective Date of Full Approval

EPA is using the good cause exception under the Administrative Procedures Act (APA) to make the full approval of the Clark County, Washoe County, and NDEP programs effective on November 30, 2001. In relevant part, the APA provides that publication of "a substantive rule shall be made not less than 30 days before its effective date, except—. . . (3) as otherwise provided by the agency for good cause found and published with the rule." 5 U.S.C. 553(d)(3). Section 553(b)(3)(B) of the APA provides that good cause may be supported by an agency determination that a delay in the effective date is impracticable, unnecessary, or contrary to the public interest. EPA finds that it is necessary and in the public interest to make this action effective sooner than 30 days following publication. In this case, EPA believes that it is in the public interest for the program to take effect before December 1, 2001. EPA's interim approval of the Clark County, Washoe County, and NDEP programs expires on December 1, 2001. In the absence of this full approval of the amended programs taking effect on November 30, the federal program under 40 CFR part 71 would automatically take effect statewide in Nevada and would remain in place until the effective date of fully-approved programs. EPA believes it is in the public interest for sources, the public and the State and local permitting authorities to avoid any gap in coverage of the part 70 program, as such a gap could cause confusion regarding permitting obligations. Furthermore, a delay in the effective date is unnecessary because Clark County, Washoe County, and NDEP have been administering title V permit programs for 6 years under an interim approval. Through this action, EPA is approving a few revisions to the existing and currently operational programs. The change from the interim approved programs which substantially met the part 70 requirements, to the fully approved programs is relatively minor, in particular if compared to the changes between state and locally-established and administered programs and the federal program.

C. The Scope of EPA's Full Approval

In their program submissions, Clark County, Washoe County, and NDEP did not assert jurisdiction over Indian country. To date, no tribal government in Nevada has applied to EPA for approval to administer a title V program in Indian country within the state. EPA regulations at 40 CFR part 49 govern how eligible Indian tribes may be approved by EPA to implement a title V program on Indian reservations and in non-reservation areas over which the tribe has jurisdiction. EPA's part 71 regulations govern the issuance of federal operating permits in Indian country. EPA's authority to issue permits in Indian country was challenged in *Michigan* v. *EPA*, (D.C. Cir. No. 99–1151). On October 30, 2001, the court issued its decision in the case, vacating a provision that would have allowed EPA to treat areas over which EPA determines there is a question regarding the area's status as if it is Indian country, and remanding to EPA for further proceedings. EPA will respond to the court's remand and explain EPA's approach for further implementation of part 71 in Indian country in a future action.

D. Citizen Comment Letters

On May 22, 2000, EPA promulgated a rulemaking that extended the interim approval period of 86 operating permits programs until December 1, 2001. (65 FR 32035) The action was subsequently challenged by the Sierra Club and the New York Public Interest Research Group (NYPIRG). In settling the litigation, EPA agreed to publish a notice in the **Federal Register** that would alert the public that they may identify and bring to EPA's attention alleged programmatic and/or implementation deficiencies in title V programs and that EPA would respond to their allegations within specified time periods if the comments were made within 90 days of publication of the **Federal Register** notice.

Two individuals commented on what they believe to be deficiencies with respect to the Clark County title V program. As stated in the **Federal Register** notice published on October 10, 2001 (66 FR 51620) proposing to fully approve Clark County's operating permits program, EPA takes no action on those comments in today's action. Rather, EPA expects to respond by December 14, 2001 to timely public comments on programs that have obtained interim approval, and by April 1, 2002 to timely comments on fully approved programs. We will publish a notice of deficiency (NOD) when we determine that a deficiency exists, or we will notify the commenter in writing to explain our reasons for not making a finding of deficiency. In addition, we will publish a notice of availability in the **Federal Register** notifying the public that we have responded in writing to these comments and how the public may obtain a copy of our response. An NOD will not necessarily be limited to deficiencies identified by citizens and may include any deficiencies that we have identified through our program oversight. Furthermore, in the future, EPA may issue an additional NOD if EPA or a citizen identifies other deficiencies.

Administrative Requirements

Under Executive Order 12866, "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), this final approval is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) the Administrator certifies that this final approval will not have a significant economic impact on a substantial number of small entities because it merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. This rule does not contain any unfunded mandates and does not significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) because it approves pre-existing requirements under state law and does not impose any additional enforceable duties beyond that required by state law. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). This rule also does not have Federalism implications because it will not have substantial direct effects on the States, on the relationship between the national

government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, "Federalism" (64 FR 43255, August 10, 1999). This rule merely approves existing requirements under state law, and does not alter the relationship or the distribution of power and responsibilities between the State and the Federal government established in the Clean Air Act. This final approval also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) or Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001), because it is not a significant regulatory action under Executive Order 12866. This action will not impose any collection of information subject to the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, other than those previously approved and assigned OMB control number 2060–0243. For additional information concerning these requirements, see 40 CFR part 70. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In reviewing State operating permit programs submitted pursuant to title V of the Clean Air Act, EPA will approve State programs provided that they meet the requirements of the Clean Air Act and EPA's regulations codified at 40 CFR part 70. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a State operating permit program for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permit program , to use VCS in place of a State program that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective on November 30, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 4, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Dated: November 29, 2001.

Laura Yoshii,

Acting Regional Administrator, Region 9.

40 CFR part 70, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401, et seq.

2. Appendix A to part 70 is amended by revising paragraphs (a) (b), and (c) under Nevada to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

Nevada

* * * * *

(a) Nevada Division of Environmental Protection:

(1) Submitted on February 8, 1995; interim approval effective on January 11, 1996; interim approval expires December 1, 2001.

(2) Revisions submitted on May 30, 2001. Full approval is effective on November 30, 2001.

(b) Washoe County District Health Department:

(1) Submitted on November 18, 1993; interim approval effective on March 6, 1995; interim approval expires December 1, 2001.

(2) Revisions submitted on May 8, 2001. Full approval is effective on November 30, 2001.

(c) Clark County Department of Air Quality Management:

(1) Submitted on January 12, 1994 and amended on July 18 and September 21, 1994; interim approval effective on August 14, 1995; interim approval expires on December 1, 2001.

(2) Revisions submitted on June 1, 2001. Full approval is effective on November 30, 2001.

[FR Doc. 01–30097 Filed 12–4–01; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP–300734A; FRL–6804–4]

RIN 2070–AB78

4-Amino-6-(1,1-dimethylethyl)-3-(methylthio)-1,2,4-triazin-5(4H)-one [Metribuzin], Dichlobenil, Diphenylamine, Sulprofos, Pendimethalin, and Terbacil; Tolerance Actions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This final rule establishes, modifies, and revokes specific tolerances for residues of the herbicides dichlobenil, metribuzin, pendimethalin, and terbacil; the plant growth regulator diphenylamine, and the insecticide sulprofos. EPA is revoking certain tolerances because EPA has canceled the food uses associated with them. The regulatory actions proposed in this final rule are part of the Agency's reregistration program under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), and the tolerance reassessment requirements of the Federal Food, Drug, and Cosmetic Act (FFDCA) section 408(q), as amended by the Food Quality Protection Act (FQPA) of 1996. By law, EPA is required by August 2002 to reassess 66% of the tolerances in existence on August 2, 1996, or about 6,400 tolerances. This final rule revokes 29 tolerances, but only one tolerance reassessment (sulprofos) is counted here toward the August, 2002 review deadline. The tolerances associated with the other 28 revocations were reassessed and counted previously through the Reregistration Eligibility Decision (RED) process.

DATES: This regulation is effective March 5, 2002. Objections and requests for hearings, identified by docket control number OPP–300734A, must be

received by EPA on or before February 4, 2002.

ADDRESSES: Written objections and hearing requests may be submitted by mail, in person, or by courier. Please follow the detailed instructions for each method as provided in Unit IV. of the **SUPPLEMENTARY INFORMATION**. To ensure proper receipt by EPA, your objections and hearing requests must identify docket control number OPP–300734A in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: By mail: Joseph Nevola, Special Review and Reregistration Division (7508C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW.,Washington, DC 20460; telephone number: (703) 308-8037; and e-mail address: nevola.joseph@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected categories and entities may include, but are not limited to:

Categories	NAICS	Examples of Potentially Affected Entities
Industry	111 112 311 32532	Crop production Animal production Food manufacturing Pesticide manufacturing

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in the table could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether or not this action might apply to certain entities. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.*You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/. A frequently updated electronic version of 40 CFR part 180 is available at http://www.access.gpo.gov/nara/cfr/cfrhtml_180/Title_40/40cfr180_00.html, a beta site currently under development.

2. *In person.* The Agency has established an official record for this action under docket control number OPP–300734A. The official record consists of the documents specifically referenced in this action, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

II. Background

A. What Action is the Agency Taking?

This final rule establishes, modifies, and revokes the tolerances for residues of 4-Amino-6-(1,1-dimethylethyl)-3-(methylthio)-1,2,4-triazin-5(4H)-one, metribuzin, dichlobenil, diphenylamine, sulprofos, pendimethalin, and terbacil in or on certain specified commodities.

The tolerances revoked by this rule are no longer necessary to cover residues of the relevant pesticides in or on domestically treated commodities or commodities treated outside but imported into the United States. These pesticides are no longer used on those specified commodities within the United States, and no one commented that there was a need for EPA to retain the tolerances to cover residues in or on imported foods. EPA has historically expressed a concern that retention of tolerances that are not necessary to cover residues in or on legally treated foods could potentially encourage misuse of pesticides within the United States. Thus, it is EPA's policy to issue a final rule revoking those tolerances for residues of pesticide chemicals for which there are no active registrations under FIFRA, unless any person commenting on the proposal demonstrates a need for the tolerance to cover residues in or on imported commodities or domestic commodities legally treated.

Today's final rule does not revoke or modify those tolerances for which EPA received comments demonstrating a need for the tolerance to remain as currently expressed. Generally, EPA will proceed with the revocation or modification of these tolerances on the grounds discussed above only if: (i) Prior to EPA's issuance of a section 408(f) order requesting additional data or issuance of a section 408(d) or (e) order revoking the tolerances on other grounds, commenters retract the comment identifying a need for the tolerance to be retained, (ii) EPA independently verifies that the tolerance is no longer needed or should be otherwise modified, or (iii) the tolerance is not supported by data that demonstrate that the tolerance meets the requirements under FQPA.

In the **Federal Register** of October 16, 1998 (63 FR 55565) (FRL–6035–7), EPA issued a proposed rule to establish, revise, or revoke the tolerances listed in this final rule. EPA proposed revocations pertaining to pesticides whose registrations were canceled because the registrant failed to pay the required maintenance fee and/or the registrant voluntarily canceled all registered uses associated with the tolerance revocations for these pesticides. Also, the October 16, 1998 proposal invited public comment for consideration and for support of tolerance retention under FFDCA standards.

The following comments were received by the Agency in response to the document published on October 16, 1998:

1. *Diphenylamine.* A comment was received from the European Union (EU) that expressed concern with EPA's proposed actions to establish 0.01 ppm (the limit of detection) for residues of diphenylamine in milk, meat, fat, and meat byproducts (excluding liver) of cattle, goats, horses, and sheep. The EU believed that EPA's evaluation appeared to consider the limit of detection as the only acceptable limit for all the commodities listed. The EU argued that an accurate study of animal metabolism has not been carried out by EPA before taking such action.

Also, the EU wrote that the European Community did an evaluation which led

to different proposed Maximum Residue Limits (MRLs) for diphenylamine about two years prior to the proposed rule. In addition, the EU believed that a clear import tolerance and pesticide policy had not been established by the Agency.

Agency response. A Reregistration Eligibility Decision (RED) for diphenylamine was approved on September 30, 1997. Through the RED process, EPA determined that the tolerances recommended in the RED document met the safety standards under FQPA. In particular, adequate data indicate that tolerances for residues in milk and meat could be increased from the current level of 0.0 ppm and established as separate tolerances set at 0.01 ppm. Both a 1996 study on edible tissues and milk from lactating dairy cows, and a 1996 study on milk and tissues from lactating goats are cited in the bibliography of the RED regarding tolerance recommendations for milk and meat, fat, and meat byproducts (excluding liver) of cattle, goats, horses, and sheep. The Agency believes that these data sufficiently support EPA's finding.

When possible, EPA seeks to harmonize U.S. tolerances with Codex MRLs, although EPA may establish a tolerance that is different. In this case, differences between Codex and U.S. tolerances on milk and meat at 0.01 ppm is justified by data. Further, no diphenylamine Codex MRLs are listed for milk or meat in the Food and Agriculture Organization of the United Nations Statistical (FAOSTAT) database for pesticide residues in food, as of the last update on September 2, 1999. Also, no diphenylamine MRLs are listed for milk or meat in the EU MRLs listed in EU's Food Safety database for pesticide residues, as of the last update on March 12, 2001.

Since the time when the EU comment on import tolerances was received, EPA published in the **Federal Register** on June 1, 2000 (65 FR 35069) (FRL–6559–3) an import tolerance guidance entitled "Pesticides; Guidance on Pesticide Imporf Tolerances and Residue Data for Imported Food: Request for Comment." in this document. EPA solicited comments on the approach reflected in the guidance on how to obtain an import tolerance, both for establishing new import tolerances and for modifying or maintaining existing U. S. tolerances for import purposes when U.S. uses or registrations are canceled.

Therefore, EPA is establishing tolerances in 40 CFR 180.190 for diphenylamine at 0.01 ppm for milk, meat, fat, and meat byproducts, except liver of cattle, goats, horses, and sheep. Also, EPA is establishing separate tolerances at 0.1 ppm for liver of cattle, goats, horses, and sheep. In addition, EPA is establishing a tolerance at 30 ppm for "apple, wet pomace" because data from an adequate apple processing study indicate that it is needed. EPA is changing the name of the commodity tolerance "apple, preharvest or postharvest, including wraps" in 40 CFR 180.190 to "apple from preharvest or postharvest use, including use of impregnated wraps" to conform to current Agency practice.

2. *Terbacil.* Comment from DuPont Agricultural Products. A comment was received by the Agency from DuPont Agricultural Products agreeing with the proposed reassessment action for terbacil and the EPA Terbacil RED that the tolerance definition listed under 40 CFR 180.209(a) and (b) should be identical for all commodities, and all tolerances should be listed under one section. However, DuPont requested that the terbacil tolerance expression should be further simplified by including only the parent and metabolite A. DuPont claimed that analysis of all three minor metabolites for each commodity is not needed to assure compliance with the label directions since metabolites B and C are rarely detected. DuPont declared that the existing tolerance levels for terbacil are adequate to assure compliance with label directions, but that it would be appropriate to include the more conservative, higher levels as proposed in the October 16, 1998 document for those crops other than alfalfa forage and hay.

Agency response. The Agency believes the tolerances for terbacil must include all the metabolites. A tolerance is the maximum pesticide chemical residue allowable in or on a food from the use of a pesticide registered under FIFRA. The term "pesticide chemical residue" is defined under section 201(q)(2) of the FFDCA as "a pesticide chemical or any other substance that is present on or in the commodity or food primarily as a result of the metabolism or other degradation of a pesticide chemical."

EPA has determined that the pesticide chemical residues in the tolerance expression for terbacil are the parent and its metabolites, labelled A, B, and C. The metabolites were included in the terbacil risk assessment as residues of toxic concern (i.e., all four chemicals contribute to the risk) and therefore, all four should be regulated in the tolerance expression. DuPont's comments regarding compliance with label directions do not offer any reason why metabolites B and C should not be regulated as pesticide chemical residues of toxic concern. The reason for the tolerance is to limit the risk, not merely to ensure compliance with label directions, even though such compliance may be an important factor in limiting the risk. The Agency will maintain the proposed tolerance expression for terbacil.

Therefore, the tolerance expressions are unified to include terbacil (3-tert-butyl-5-chloro-6-methyluracil) and its metabolites [3-tert-butyl-5-chloro-6-hydroxymethyluracil], [6-chloro-2,3-dihydro-7-hydroxymethyl 3,3-dimethyl-5H-oxazolo (3,2-a) pyrimidin-5-one], and [6-chloro-2,3-dihydro-3,3,7-trimethyl-5H-oxazolo (3,2-a) pyrimidin-5-one], calculated as terbacil. In accordance, 40 CFR 180.209, paragraphs (a)(1) and (a)(2) are combined. To reflect the combined limit of detection for terbacil and its three regulated metabolites, EPA is increasing the tolerances for (i) peaches from 0.1 to 0.2 ppm and revising the name to "peach," (ii) blueberries from 0.1 to 0.2 ppm and revising the name to "blueberry," and (iii) caneberries (blackberries, boysenberries, dewberries, loganberries, raspberries, and youngberries) from 0.1 to 0.2 ppm and revising the name to "caneberry." Based upon available residue data, the Agency is increasing tolerances for (i) apples from 0.1 to 0.3 ppm and revising the name to "apple," (ii) asparagus from 0.2 to 0.4 ppm, and (iii) sugarcane from 0.1 to 0.4 ppm.

Also, available data support the establishment of lower alfalfa tolerances. Therefore, EPA is decreasing the tolerances for "alfalfa, forage" from 5.0 to 1.0 ppm, and "alfalfa, hay" from 5.0 to 2.0 ppm. The Agency has determined that once these tolerances on alfalfa are decreased, the tolerances for residues of terbacil and its metabolites on all animal commodities could be revoked because there is no reasonable expectation of finite residues in animal commodities 40 CFR 180.6(a)(3). Therefore, EPA is revoking the tolerances in 40 CFR 180.209 for residues of terbacil and its metabolites in or on cattle, fat; cattle, mbyp: cattle, meat; goats, fat; goats, mbyp; goats, meat; hogs, fat; hogs, mbyp; hogs, meat; horses, fat; horses, mbyp; horses, meat; milk, fat; sheep, fat; sheep, mbyp; and sheep, meat.

In addition, EPA is revoking the tolerances for residues of terbacil and its metabolites in or on pears; pecans; sainfoin, forage; and sainfoin hay in 40 CFR 180.209 because no registered uses exist.

Note, a tolerance for citrus fruits appeared in the table under 180.209 in the rule of October 16, 1998 (63 FR 55565) because it existed at that time.

However, that citrus fruits tolerance had been previously proposed for revocation on February 5, 1998 (63 FR 5907) (FRL–5743–9) and was later revoked in a final rule published on October 26, 1998 (63 FR 57067) (FRL–6035–6).

EPA is changing the name of the commodity tolerances "mint hay (peppermint and spearmint)" given on one line in 40 CFR 180.209 by listing the two tolerances on separate lines and revising their names to "peppermint, tops" and "spearmint, tops" to conform to current Agency practice. EPA is also revising the name "strawberries" to "strawberry."

No comments were received by the Agency concerning the following:

3. *Metribuzin.* In the codification section of the proposed rule (October 16, 1998, 63 FR 55565), EPA inadvertently listed the tolerance for metribuzin on lentil in error as 0.5 instead of the correct level of 0.05 ppm. That tolerance change was an unintended typographical error. No change concerning the lentil tolerance level was proposed for metribuzin. The name change from lentils (dried) to lentil was proposed as one of the "other terminology changes." Therefore, EPA is changing the tolerance name to "lentil," but the tolerance level will remain at 0.05 ppm.

In the proposed rule of October 16, 1998, the tolerance for sugarcane molasses in 40 CFR 180.332 was noted to be listed incorrectly as 0.3 ppm, and was proposed to be revised to reflect the correct tolerance of 2 ppm (August 24, 1978, 43 FR 35915), along with a terminology revision to "sugarcane, molasses." A final rule on May 24, 2000 (65 FR 33691) (FRL–6043–1) transferred the tolerance for sugarcane molasses at 2.0 ppm from 185.250 to 180.332(a), increased the existing tolerance in 40 CFR 180.332(a) for sugarcane molasses from 0.3 ppm to 2.0 ppm, and removed the duplicate entry for sugarcane molassses at 2.0 ppm created by the transfer. Therefore, no further action in this rule is required to implement the metribuzin RED regarding sugarcane molasses.

The metribuzin RED, approved on May 20, 1997, stated that the tolerance for sweet corn should be revoked because there were no registered uses. However, a registered use for sweet corn was approved in August, 1997. Therefore, the tolerance for corn, fresh (inc. sweet K + CWHR) is not revoked. EPA is revoking the tolerance in 40 CFR 180.332 for residues of metribuzin and its metabolites in or on lentils, vine hay because it is no longer considered a significant livestock feed commodity; therefore a tolerance is not necessary.

In 40 CFR 180.332, EPA is establishing tolerances for both barley, hay and wheat, hay at 7 parts per million (ppm). EPA is increasing tolerances for asparagus from 0.05 to 0.1 ppm and for soybeans from 0.1 to 0.3 ppm, and is revising the name from "soybeans " to "soybean, seed." The tolerance for peas, vine hay is increased from 0.05 to 4 ppm, and the named is revised to " pea, field, hay."

Other terminology changes are given in the regulatory text as follows: "Alfalfa, green " to "alfalfa, forage;" "barley, milled fractions (except flour)" to "barley, pearled barley;" "carrots " to "carrot;" "cattle, mbyp" to "cattle, meat byproducts;" "corn, fodder" to "corn, field, stover" and "corn, sweet, stover;" "corn, forage" to "corn, field, forage" and "corn, sweet, forage;" "corn, fresh (inc. sweet K+CWHR)" to "corn, sweet, kernel plus cob with husks removed;" "corn, grain (inc. popcorn)" to "corn, field, grain " and "corn, pop, grain;" "eggs" to "egg;" "goats, fat;" to "goat, fat;" " goats, mbyp;" to "goat, meat byproducts;" "goats, meat;" to "goat, meat;" "grass" to "grass, forage;" "hogs, fat;" to "hog, fat;" "hogs, mbyp;" to "hog, meat byproducts;" "hogs, meat;" to "hog, meat;" "horses, fat;" to "horse, fat;" "horses, mbyp;" to "horse, meat byproducts;" "horses, meat;" to "horse, meat;" "peas" to "pea, succulent;" "peas (dried)" to "pea, dry, seed;" "peas, forage" to "pea, field, vines;" "potatoes, processed (inc. potato chips)" to "potato, processed potato waste " and "potato, chips;" "poultry, mbyp;" to "poultry, meat byproducts;" "sainfoin" to "sainfoin, forage;" "sheep, mbyp;" to "sheep, meat byproducts;" "soybeans, forage" to "soybean, forage;" "soybeans, hay" to "soybean, hay;" "sugarcane molasses" to "sugarcane, molasses;" "tomatoes" to "tomato;" and "wheat, milled fractions (except flour)" to "wheat, bran;" "wheat, middlings;" "wheat, shorts;" and "wheat, germ."

4. *Dichlobenil.* In 40 CFR 180.231, the metabolite 2,6-Dichlorobenzamide (BAM) is added to the tolerance expression of dichlobenil (2,6-dichlorobenzonitrile) and the metabolite 2,6-dichlorobenzoic acid (2,6-DCBA) is deleted from the tolerance expression. Based upon the available residue data and to reflect the combined residues of dichlobenil and BAM, tolerances for apples and pears are increased from 0.15 to 0.5 ppm, and tolerances for blackberries, cranberries, and raspberries are decreased from 0.15 to 0.10 ppm.

EPA is revoking the tolerances for residues of dichlobenil and its metabolite in or on almond hulls; avocados; citrus; figs; and mangoes in 40 CFR 180.231 because no registered uses exist. The Agency is revoking the tolerance for nuts in 40 CFR 180.231 and is establishing a tolerance for filbert at 0.1 ppm as a separate tolerance because no other tree nut uses are being supported by the registrant.

Terminology changes are given in the regulatory text as follows: "Apples" to "apple," "blackberries" to "blackberry," "blueberries" to "blueberry," "cranberries" to "cranberry," "grapes" to "grape," "pears" to " pear," "raspberries" to "raspberry" and "stone fruits" to "fruit, stone, group."

5. *Pendimethalin.* In 40 CFR 180.361, EPA is establishing a tolerance at 0.1 ppm for rice, straw; and is increasing the tolerance on rice grain from 0.05 to 0.1 ppm based on available field trial data and to reflect the analytical method's limit of quantitation for the combined residues of pendimethalin and its regulated metabolite. EPA also combines the tolerance for garlic, listed under § 180.361(c) "Tolerances with regional registrations," with § 180.361(a), which lists tolerances for registrations without regional restriction, since EPA has data that support a national registration and tolerance for garlic at the same level (0.1 ppm).

EPA is revoking the tolerance in 40 CFR 180.361 for residues of pendimethalin and its metabolite in or on peanut, forage because it is no longer considered a significant livestock feed commodity; therefore a tolerance is not necessary.

Terminology changes are given in the regulatory text as follows: "beans, lima (dry, snap)" to "bean, lima, seed" and "bean, lima, succulent;" "beans, forage" to "bean, forage " "beans, hay" to "bean, hay;" "corn, fodder" to "corn, field, stover" and "corn, sweet, stover;" "corn, forage" to "corn, field, forage" and "corn, sweet, forage;" "corn, grain" to "corn, field, grain" and "corn, pop, grain;" "corn, fresh (including sweet, K+CWHR)" to "corn, sweet, kernel plus cob with husks removed;" "cottonseed" to "cotton, undelinted seed;" "onions, dry bulb" to "onion, dry bulb;" "peanuts" to "peanut;" "peas (except field peas)" to "pea, succulent;" "potatoes" to "potato;" "sorghum, fodder" to "sorghum, grain, stover;" "sorghum, grain" to "sorghum, grain, grain;" "soybeans " to "soybean, seed;" "soybeans, forage" to "soybean, forage;" "soybeans, hay" to "soybean, hay;" and "sunflower, seeds" to "sunflower, seed."

6. *Sulprofos.* EPA is revoking the tolerance in 40 CFR 180.542 for residues of sulprofos and its cholinesterase-inhibiting metabolites in cottonseed oil

because no registered use exists. In the proposed rule, the cottonseed oil tolerance was listed in 40 CFR 185.3000 (63 FR 55565); however, that tolerance was moved into 40 CFR 180.542 and § 185.3000 was removed (65 FR 33703, May 24, 2000) (FRL–6041–9).

B. What is the Agency's Authority for Taking this Action?

EPA has issued Reregistration Eligibility Decisions (REDs) for the active ingredients listed in this final rule with the exception of sulprofos. During the reregistration process, EPA approved the registrant's request for voluntary cancellation of sulprofos registrations (61 FR 65218, December 11, 1996) (FRL–5573–6). No active registrations exist for sulprofos.

EPA may issue a regulation establishing, modifying, or revoking a tolerance under FFDCA section 408(e). EPA is establishing, modifying, and revoking tolerances to implement the tolerance recommendations made during the reregistration process. As part of the reregistration process, EPA is required to determine whether each of the amended tolerances meets the safety standards under the Food Quality Protection Act (FQPA). The safety finding determination is found in detail in each RED for the active ingredient. RED recommendations, such as establishing or modifying tolerances, require assessment under the FQPA standard of "reasonable certainty of no harm." However, tolerance revocations recommended in those REDs because there are no registered uses may be revoked in this document without such assessment, because the tolerances are no longer necessary. REDs propose certain tolerance actions to be implemented to meet safety findings and change commodity names and groupings in accordance with new EPA policy. Printed copies of the REDs may be obtained from EPA's National Service Center for Environmental Publications (EPA/NSCEP), P.O. Box 42419, Cincinnati, OH 45242-2419, telephone 1-800-490-9198; fax 513-489-8695 and from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161, telephone 1-800-553-6847 or 703-605-6000. Electronic copies of the RED are available on the internet at http://www.epa.gov/pesticides/reregistration/status.htm.

It is EPA's general practice to revoke tolerances for residues of pesticide active ingredients on crop uses for which FIFRA registrations no longer exist. EPA has historically been concerned that retention of tolerances that are not necessary to cover residues in or on legally treated foods may encourage misuse of pesticides within the United States. Nonetheless, EPA will establish and maintain tolerances even when corresponding domestic uses are canceled if the tolerances, which EPA refers to as "import tolerances," are necessary to allow importation into the United States of food containing such pesticide residues. However, where there are no imported commodities that require these import tolerances, the Agency believes it is appropriate to revoke tolerances for unregistered pesticides in order to prevent potential misuse.

C. When Do These Actions Become Effective?

These actions become effective 90 days following publication of this final rule in the **Federal Register**. EPA has delayed the effectiveness of these revocations for 90 days following publication of this final rule to ensure that all affected parties receive notice of EPA's actions. Consequently, the effective date is March 5, 2002. For this final rule, tolerances that were revoked because registered uses did not exist concerned uses which have been canceled for more than a year. Therefore, commodities containing these pesticide residues should have cleared the channels of trade.

Any commodities listed in the regulatory text of this document that are treated with the pesticides subject to this final rule, and that are in the channels of trade following the tolerance revocation or modification, shall be subject to FFDCA section 408(1)(5), as established by the FQPA. Under this section, any residue of these pesticides in or on such food shall not render the food adulterated so long as it is shown to the satisfaction of FDA that, (i) the residue is present as the result of an application or use of the pesticide at a time nd in a manner that was lawful under FIFRA, and (ii) the residue does not exceed the level that was authorized at the time of the application or use to be present on the food under a tolerance or exemption from a tolerance. Evidence to show that food was lawfully treated may include records that verify the dates that the pesticide was applied to such food.

D. What is the Contribution to Tolerance Reassessment?

By law, EPA is required to reassess 66% or about 6,400 of the tolerances in existence on August 2, 1996, by August 2002. EPA is also required to assess the remaining tolerances by August, 2006. As of November 27, 2001, EPA has reassessed over 3,830 tolerances. In this document, EPA revokes 29 tolerances of which 28 were previously counted as reassessed via the RED process. Therefore, one tolerance revocation is counted here as a tolerance reassessment toward the August, 2002 review deadline of FFDCA section 408(q), as amended by FQPA in 1996.

III. Are There Any International Trade Issues Raised by this Final Action?

EPA is working to ensure that the U.S. tolerance reassessment program under FQPA does not disrupt international trade. EPA considers Codex Maximum Residue Limits (MRLs) in setting U.S. tolerances and in reassessing them. MRLs are established by the Codex Committee on Pesticide Residues, a committee within the Codex Alimentarius Commission, an international organization formed to promote the coordination of international food standards. When possible, EPA seeks to harmonize U.S. tolerances with Codex MRLs. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain in a **Federal Register** document the reasons for departing from the Codex level. EPA's effort to harmonize with Codex MRLs is summarized in the tolerance reassessment section of individual REDs. The U.S. EPA has developed guidance concerning submissions for import tolerance support (65 FR 35069, June 1, 2000) (FRL–6559–3). This guidance will be made available to interested persons. Electronic copies are available on the internet at http://www.epa.gov/. On the Home Page select "Laws and Regulations," then select "Regulations and Proposed Rules" and then look up the entry for this document under **Federal Register**—Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/.

IV. Objections and Hearing Requests

A. What Do I Need to Do to File an Objection or Request a Hearing?

You must file your objection or request a hearing on this regulation in accordance with the instructions provided in this unit and in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket control number OPP–300734A in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before February 4, 2002.

1. *Filing the request.* Your objection must specify the specific provisions in the regulation that you object to, and the

grounds for the objections (40 CFR 178.25). If a hearing is requested, the objections must include a statement of the factual issues(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). Information submitted in connection with an objection or hearing request may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the information that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice.

Mail your written request to: Office of the Hearing Clerk (1900), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. You may also deliver your request to the Office of the Hearing Clerk in Rm. C400, Waterside Mall, 401 M St., SW., Washington, DC 20460. The Office of the Hearing Clerk is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Office of the Hearing Clerk is (202) 260–4865.

2. *Objection/hearing fee payment.* If you file an objection or request a hearing, you must also pay the fee prescribed by 40 CFR 180.33(i) or request a waiver of that fee pursuant to 40 CFR 180.33(m). You must mail the fee to: EPA Headquarters Accounting Operations Branch, Office of Pesticide Programs, P.O. Box 360277M, Pittsburgh, PA 15251. Please identify the fee submission by labeling it "Tolerance Petition Fees."

EPA is authorized to waive any fee requirement "when in the judgement of the Administrator such a waiver or refund is equitable and not contrary to the purpose of this subsection." For additional information regarding the waiver of these fees, you may contact James Tompkins by phone at (703) 305–5697, by e-mail at tompkins.jim@epa.gov, or by mailing a request for information to Mr. Tompkins at Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

If you would like to request a waiver of the tolerance objection fees, you must mail your request for such a waiver to: James Hollins, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

3. *Copies for the Docket.* In addition to filing an objection or hearing request with the Hearing Clerk as described in Unit IV.A., you should also send a copy of your request to the PIRIB for its inclusion in the official record that is described in Unit I.B.2. Mail your copies, identified by docket control number OPP–300734A, to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. In person or by courier, bring a copy to the location of the PIRIB described in Unit I.B.2. You may also send an electronic copy of your request via e-mail to: opp-docket@epa.gov. Please use an ASCII file format and avoid the use of special characters and any form of encryption. Copies of electronic objections and hearing requests will also be accepted on disks in WordPerfect 6.1/8.0 or ASCII file format. Do not include any CBI in your electronic copy. You may also submit an electronic copy of your request at many Federal Depository Libraries.

B. When Will the Agency Grant a Request for a Hearing?

A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issues(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

V. Regulatory Assessment Requirements

This final rule establishes, modifies, and revokes tolerances established under FFDCA section 408. The Office of Management and Budget (OMB) has exempted these types of actions; i.e., establishment and modification of a tolerance, and tolerance revocation for which extraordinary circumstances do not exist, from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any other Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note). Pursuant to the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency previously assessed whether establishment of tolerances, exemptions from tolerances, raising of tolerance levels, expansion of exemptions, or revocations of tolerances might significantly impact a substantial number of small entities and concluded that, as a general matter, these actions do not impose a significant economic impact on a substantial number of small entities. These analyses for tolerance establishments and modifications, and for tolerance revocations were published on May 4, 1981 (46 FR 24950) and on December 17, 1997 (62 FR 66020), respectively, and were provided to the Chief Counsel for Advocacy of the Small Business Administration. Taking into account these analyses, and available information concerning the pesticides listed in this rule, I certify that this action will not have a significant economic impact on a substantial number of small entities. Specifically, as per the 1997 notice, EPA has reviewed its available data on imports and foreign pesticide usage and concludes that there is a reasonable international supply of food not treated with canceled pesticides. Furthermore, the Agency knows of no extraordinary circumstances that exist as to the present establishments, modifications, or revocations that would change EPA's previous analyses.

In addition, the Agency has determined that this action will not have a substantial direct effect on States,

on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." This final rule directly regulates growers, food processors, food handlers and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). For these same reasons, the Agency has determined that this rule does not have any "tribal implications" as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175 requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes." This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

VI. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection. Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: November 20, 2001.

Marcia E. Mulkey,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180— [AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346(a) and 371.

2. Section 180.190 is amended by revising paragraph (a) to read as follows:

§ 180.190 Diphenylamine; tolerances for residues.

(a) *General.* Tolerances for residues of the plant regulator diphenylamine are established in or on the following commodities:

Commodity	Parts per million
Apple, wet pomace	30.0
Apple from preharvest or postharvest use, including use of impregnated wraps	10.0
Cattle, fat	0.01
Cattle, liver	0.1
Cattle, meat byproducts, except liver	0.01
Cattle, meat	0.01
Goat, fat	0.01
Goat, liver	0.1
Goat, meat byproducts, except liver	0.01
Goat, meat	0.01
Horse, fat	0.01
Horse, liver	0.1
Horse, meat byproducts, except liver	0.01
Horse, meat	0.01
Milk	0.01
Sheep, fat	0.01
Sheep, liver	0.1
Sheep, meat byproducts, except liver	0.01
Sheep, meat	0.01

* * * * *

3. Section 180.209 is amended by revising paragraph (a) to read as follows:

§ 180.209 Terbacil; tolerances for residues.

(a) *General.* Tolerances are established for combined residues of the herbicide terbacil (3-tert-butyl-5-chloro-6-methyluracil) and its metabolites [3-tert-butyl-5-chloro-6-hydroxymethyluracil], [6-chloro-2,3-dihydro-7-hydroxymethyl 3,3-dimethyl-5H-oxazolo (3,2-a) pyrimidin-5-one], and [6-chloro-2,3-dihydro-3,3,7-trimethyl-5H-oxazolo (3,2-a) pyrimidin-5-one], calculated as terbacil, in or on raw agricultural commodities as follows:

Commodity	Parts per million
Alfalfa, forage	1.0
Alfalfa, hay	2.0
Apple	0.3
Asparagus	0.4
Blueberry	0.2
Caneberry	0.2
Peach	0.2
Peppermint, tops	2.0
Spearmint, tops	2.0
Strawberry	0.1
Sugarcane	0.4

* * * * *

4. Section 180.231 is amended by revising paragraph (a) to read as follows:

§ 180.231 Dichlobenil; tolerances for residues.

(a) *General.* Tolerances are established for the combined residues of the herbicide dichlobenil (2,6-dichlorobenzonitrile) and its metabolite 2,6-dichlorobenzamide in or on the following raw agricultural commodities:

Commodity	Parts per million
Apple	0.5
Blackberry	0.1
Blueberry	0.15
Cranberry	0.1
Filbert	0.1
Fruit, stone, group	0.15
Grape	0.15
Pear	0.5
Raspberry	0.1

* * * * *

5. Section 180.332 is amended by revising the table under paragraph (a) to read as follows:

§ 180.332 Metribuzin; tolerances for residues.

(a) *General.* * * *

Commodity	Parts per million
Alfalfa, forage	2.0
Alfalfa, hay	7.0

Commodity	Parts per million
Asparagus	0.1
Barley, grain	0.75
Barley, hay	7.0
Barley, pearled barley	3.0
Barley, straw	1.0
Carrot	0.3
Cattle, fat	0.7
Cattle, meat	0.7
Cattle, meat byproducts	0.7
Corn, field, forage	0.1
Corn, field, grain	0.05
Corn, field, stover	0.1
Corn, pop, grain	0.05
Corn, sweet, forage	0.1
Corn, sweet, kernel plus cob with husks removed	0.05
Corn, sweet, stover	0.1
Egg	0.01
Goat, fat	0.7
Goat, meat	0.7
Goat, meat byproducts	0.7
Grass, forage	2.0
Grass, hay	7.0
Hog, fat	0.7
Hog, meat	0.7
Hog, meat byproducts	0.7
Horse, fat	0.7
Horse, meat	0.7
Horse, meat byproducts	0.7
Lentil	0.05
Milk	0.05
Pea, dry, seed	0.05
Pea, field, hay	4.0
Pea, field, vines	0.5
Pea, succulent	0.1
Potato	0.6
Potato, chips	3.0
Potato, processed potato waste	3.0
Potato waste, processed (dried)	3.0
Poultry, fat	0.7
Poultry, meat	0.7
Poultry, meat byproducts	0.7
Sainfoin, forage	2.0
Sainfoin, hay	7.0
Sheep, fat	0.7
Sheep, meat	0.7
Sheep, meat byproducts	0.7
Soybean, seed	0.3
Soybean, forage	4.0
Soybean, hay	4.0
Sugarcane	0.1
Sugarcane, molasses	2.0
Tomato	0.1
Wheat, bran	3.0
Wheat, forage	2.0
Wheat, germ	3.0
Wheat, grain	0.75
Wheat, hay	7.0
Wheat, middlings	3.0
Wheat, shorts	3.0
Wheat, straw	1.0

* * * * *

6. Section 180.361 is amended by alphabetically adding the commodity "garlic" in paragraph (c) to the table in paragraph (a), by revising paragraph (a), and removing the remaining text from paragraph (c) and reserving it to read as follows:

§ 180.361 Pendimethalin; tolerances for residues.

(a) *General.* * * *

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01–2734; MM Docket No. 01–178; RM–10195]

Radio Broadcasting Services; Wadley, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In response to a *Notice of Proposed Rule Making*, 66 FR 42622 (August 14, 2001), this document allots Channel 227A to Wadley, Georgia, and provides Wadley with its first local aural transmission service. The coordinates for Channel 227A at Wadley are 32–52–00 North Latitude and 82–24–15 West Longitude.

DATES: Effective January 7, 2002.

FOR FURTHER INFORMATION CONTACT: R. Barthen Gorman, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 01–178, adopted November 14, 2001, and released November 23, 2001. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, 44512th Street, SW, Room CY–A257, Washington, DC, 20554. The document may also be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW, Room CY–B402, Washington, DC, 20554, telephone 202 863–2893. facsimile 202 863–2898, or via e-mail *qualexint@aol.com*.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 600 and 660

[Docket No. 001226367–0367–01; I.D. 111901C]

Fisheries off West Coast States and in the Western Pacific; Pacific Coast Groundfish Fishery; Trip Limit Adjustment for Dover Sole in the Limited Entry Trawl Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Inseason adjustment; request for comments.

SUMMARY: NMFS announces a 1,000 lb (454 kg)/trip limit of Dover sole in the limited entry trawl fishery coastwide for the month of December. This action, which is authorized by the Pacific Coast Groundfish Fishery Management Plan (FMP) and its implementing regulations, is within the 2001 optimum yield (OY) for Dover sole and is intended to allow landings of Dover sole caught incidentally in other flatfish fisheries.

DATES: Changes to management measures are effective 0001 hours local time December 1, 2001, unless modified, superseded, or rescinded through the effective dates of the 2002 specifications and management measures for the Pacific Coast groundfish fishery, which will be published in the **Federal Register**. Comments on this rule will be accepted through December 20, 2001.

ADDRESSES: Submit comments to D. Robert Lohn, Administrator, Northwest Region, NMFS, 7600 Sand Point Way NE, Seattle, WA 98115–0070; or to Rod McInnis, Acting Administrator, Southwest Region, NMFS, 501 West Ocean Blvd, Suite 4200, Long Beach, CA 90802–4213.

FOR FURTHER INFORMATION CONTACT: Yvonne deReynier or Jamie Goen, Northwest Region, NMFS, 206–526–6140.

SUPPLEMENTARY INFORMATION:

Electronic Access

This **Federal Register** document is also accessible via the internet at the website of the Office of the Federal Register: *http://www.access.gpo.gov/su-docs/aces/aces140.html*.

The Pacific Coast Groundfish FMP and its implementing regulations at 50 CFR part 660, subpart G, regulate fishing for over 80 species of groundfish off the coasts of Washington, Oregon, and California. Annual groundfish specifications and management measures are initially developed by the Pacific Fishery Management Council (Council) and are implemented by NMFS. The specifications and management measures for the current fishing year (January 1 through December 31, 2001) were published at 66 FR 2338, January 11, 2001, as amended at 66 FR 10208 (February 14, 2001), at 66 FR 18409 (April 9, 2001), at 66 FR 22467 (May 4, 2001), at 66 FR 28676 (May 24, 2001), at 66 FR 35388 (July 5, 2001), at 66 FR 38162 (July 23, 2001), at 66 FR 50851 (October 5, 2001), at 66 FR 54721 (October 30, 2001), and at 66 FR 55599 (November 2, 2001).

Among the more than 80 species managed under the FMP are Dover sole, thornyheads, sablefish, and flatfish (flatfish is used in this document to mean all flatfish listed at 50 CFR 660.302, except Dover sole). In the trawl fishery, Dover sole is targeted along with thornyheads and sablefish. Because these species are targeted together with trawl gear, they are managed as part of a multi-species complex consisting of Dover sole, thornyheads (shortspine and longspine), and sablefish, known as the DTS complex. In addition to the directed fishery for the DTS complex, Dover sole is also caught incidentally in other flatfish trawl fisheries on the continental shelf and slope.

Through August 2001, the best available information from PacFIN indicated that the DTS complex was approaching the commercial landed catch OY for 3 of 4 species, Dover sole (92 percent), trawl-caught sablefish (89 percent) and shortspine thornyhead (79.7 percent). Based on recommendations from the Council's September meeting, NMFS closed the limited entry trawl directed fishery for the DTS complex, including Dover sole, from October 2, 2001, through the effective date for the 2002 specifications and management measures in order to avoid exceeding the target landed catch OY of Dover sole, sablefish and shortspine thornyhead (66 FR 50851, October 5, 2001). However, other flatfish trawl fisheries, such as Petrale sole and arrowtooth flounder, have remained open since September. Thus, while it has been illegal to land Dover sole and any DTS complex species caught with trawl gear since October 2, 2001, Dover sole is still caught as bycatch in the other flatfish fisheries that have remained open and is assumed to be discarded. This discard is accounted for in calculating total catch by applying a discard rate recommended by the Council based on a trawl logbook analysis of the incidental catch of Dover sole in other flatfish fisheries.

PacFIN data have been updated since the September Council meeting. The best available information indicates that 93 percent of the Dover sole allocation had been taken through October 31, 2001, leaving 515 mt of the Dover sole OY available for harvest. In order to account for the Dover sole caught incidentally in the winter flatfish fisheries, the Council recommended at its October 29 through November 2, 2001, meeting in Millbrae, CA, to allow a 1,000 lb (454 kg)/trip limit of Dover sole in December for the limited entry trawl fleet. This action would allow vessels to retain Dover sole that would otherwise have been incidentally harvested and discarded. Allowing the incidental retention of Dover sole in the flatfish fisheries is not expected to increase incidental interception of sablefish and shortspine thornyhead because flatfish trawling requires different fishing techniques and occurs in different fishing grounds than in the directed DTS trawl fisheries. Taking into account the number of vessels and trips per vessel by other flatfish fisheries over the past 3 years during the month of December, opening up this trip limit for incidentally caught Dover sole is expected to add another 200 to 300 mt to the landed catch OY, well within the approximately 500 mt of remaining OY.

NMFS Actions

NMFS concurs with the Council's recommendation and hereby announces a trip limit for the limited entry trawl fishery coastwide of 1,000 lb (454 kg)/trip of Dover sole from December 1, 2001, through the effective date of the 2002 specifications and management measures for the Pacific Coast groundfish fishery. This trip limit is intended to allow for Dover sole caught incidentally in other flatfish trawl fisheries.

Accordingly, at 66 FR 2338, January 11, 2001, as subsequently amended, in Section IV, under B. Limited Entry Fishery, Table 3 is revised to read as follows:

IV. NMFS Actions

B. Limited Entry Fishery

25	All other flatfish 3	*Small footrope*: no limit; *Large footrope*: 1,000 lb/trip					*Small footrope* 30,000 lb/mo; *Large footrope* 1,000 lb/trip
26	Whiting shoreside 4	20,000 lb/trip	Primary Season				20,000 lb/trip
27	Use of small footrope bottom trawl 5 or midwater trawl required for landing all of the following species:						
28	Minor shelf rockfish						
29	North	300 lb/month	1,000 lb/month			300 lb/month	
30	South	300 lb/month	1,000 lb/month			300 lb/month	
31	Canary rockfish	100 lb/month	300 lb/month			Closed Starting Oct	
32	Widow rockfish						
33	mid-water trawl	20,000 lb/ 2 months	10,000 lb/ 2 months	Jul-Oct, in trips where 10,000 lb or more of whiting are landed, 2,000 lb/mo, with a combined widow/yellowtail limit of 500 lb/trip; otherwise 1,000 lb/mo			25,000 lb/ 2 months
34	small footrope trawl	1,000 lb/month					
35	Yellowtail - North 6						
36	mid-water trawl	30,000 lb/ 2 months	15,000 lb/ 2 months	Jul-Oct, trips where 10,000 lb or more of whiting are landed, 3,000 lb/mo with combined widow/yellowtail limit of 500 lb/trip, otherwise 1,500 lb/mo			15,000 lb/ 2 months
37	small footrope trawl	Without flatfish, 1,500 lb/mo. As flatfish bycatch, per trip limit is the sum of 33% (by weight) of all flatfish except arrowtooth flounder, plus 10% (by weight) of arrowtooth flounder, not to exceed 2,500 lb/trip and 30,000 lb/ 2 months	Without flatfish, 1,500 lb/mo. As flatfish bycatch, per trip limit is the sum of 33% (by weight) of all flatfish except arrowtooth flounder, plus 10% (by weight) of arrowtooth flounder, not to exceed 7,500 lb/trip and not to exceed 15,000 lb/ 2 months				
38	Bocaccio - South 6	300 lb/month	500 lb/month			Closed Starting Oct	
39	Chilipepper - South 6						
40	mid-water trawl	25,000 lb/ 2 months					
41	small footrope trawl	7,500 lb/ 2 months					5,000 lb/ 2 months
42	Cowcod	Retention is Prohibited					
43	Minor nearshore rockfish						
44	North	200 lb/month					
45	South	200 lb/month					
46	Lingcod 7	No retention	400 lb/month			500 lb/month	Closed Starting Nov

1/ Trip limits apply coastwide unless otherwise specified. "North" means 40°10' N. lat. to the U.S.-Canada border. "South" means 40°10' N. lat. To the U.S.-Mexico border. 40°10' N. lat is about 20 nm south of Cape Mendocino, CA.
2/ Gear requirements and prohibitions are explained at paragraph IV.A.(14)
3/ "Other" flatfish means all flatfish at 50 CFR 660.302 except those in this Table 3 with a trip limit.
4/ The whiting "per trip" limit in the Eureka area inside 100 fm is 10,000 lb/ trip throughout the year. See IV.B.(3)(c). The 20,000 lb/trip limit applies before and after the primary season.
5/ Small footrope trawl means a bottom trawl net with a footrope no larger than 8 inches (20 cm) in diameter.
Midwater gear also may be used; the footrope must be bare. See paragraph IV.A. (14)
6/ Yellowtail rockfish and POP in the south, and bocaccio, and chilipepper rockfishes in the north are included in the trip limits for minor shelf rockfish in the appropriate area (Table 2).
7/ The size limit for lingcod is 24 inches (61 cm) total length.

* * * * *

Classification

This action is authorized by the regulations implementing the FMP and the annual specifications and management measures published at 66 FR 2338 (January 11, 2001), as amended at 66 FR 10208 (February 14, 2001), at 66 FR 18409 (April 9, 2001), at 66 FR 22467 (May 4, 2001), at 66 FR 28676 (May 24, 2001), at 66 FR 35388 (July 5, 2001), and 66 FR 38162 (July 23, 2001), at 66 FR 50851 (October 5, 2001), at 66 FR 54721 (October 30, 2001), and at 66 FR 55599 (November 2, 2001), and are based on the most recent data available.

The Assistant Administrator for Fisheries, NOAA, (AA) finds good cause to waive the requirement to provide prior notice and comment on this action pursuant to 5 U.S.C. 553(b)(B), as providing prior notice and opportunity for comment would be impracticable. It would be impracticable because the trip limit allowance is only effective for approximately the last 30 days of the fishing year. Dover sole is below its target landed catch OY for the 2001 fishing year, and any delay in action would not provide enough time for the fisheries to have access to the remaining Dover sole OY. Thus, any delay in action would unnecessarily restrict commercial fishers and impede NMFS's responsibility under the FMP to manage groundfish fisheries to achieve OY.

For these reasons, good cause also exists to waive the 30–day delay in effectiveness requirement of 5 U.S.C. 553 (d)(3).

This action is taken under the authority of 50 CFR 660.323 (b)(1) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 30, 2001.

Jonathan M. Kurland,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 66, No. 234
Wednesday, December 5, 2001

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–107151–00]

RIN 1545–AX99

Constructive Transfers and Transfers of Property to a Third Party on Behalf of a Spouse; Hearing Cancellation

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Cancellation of notice of public hearing on proposed rulemaking.

SUMMARY: This document provides notice of cancellation of a public hearing on proposed regulations relating to the tax treatment of certain redemptions, during marriage or incident to divorce, of stock owned by a spouse or former spouse.

DATES: The public hearing originally scheduled for Friday, December 14, 2001, at 10 a.m., is cancelled.

FOR FURTHER INFORMATION CONTACT: Guy R. Traynor, Regulations Unit, Associate Chief Counsel, (202) 622–7180 (not a toll-free number).

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking and notice of public hearing that appeared in the **Federal Register** on Friday, August 3, 2001, (66 FR 40659) announced that a public hearing was scheduled for December 14, 2001, at 10 a.m., in the auditorium of the Internal Revenue Service Building, 1111 Constitution Avenue NW., Washington, DC 20408. The subject of the public hearing is proposed regulations under section 1041 of the Internal Revenue Code. The public comment period for these proposed regulations expired on November 23, 2001.

The notice of proposed rulemaking and notice of public hearing, instructed those interested in testifying at the public hearing to submit a request to speak and an outline of the topics to be addressed. As of November 29, 2001, no one has requested to speak. Therefore, the public hearing scheduled for December 14, 2001, is cancelled.

Guy R. Traynor,

Federal Register Certifying Officer, Regulations Unit, Associate Chief Counsel (Income Tax & Accounting).

BILLING CODE 4830–01–P

DEPARTMENT OF EDUCATION

34 CFR Chapter VI

Student Financial Assistance

AGENCY: Department of Education.

ACTION: Notice of intention to establish negotiated rulemaking committees on issues for programs authorized under Title IV of the Higher Education Act of 1965, as amended.

SUMMARY: We announce our intention to establish two negotiated rulemaking committees to prepare proposed regulations under Title IV of the Higher Education Act of 1965, as amended (HEA). Each committee will include representatives with interests that are significantly affected by the subject matter of the proposed regulations. We also announce a meeting to discuss the agenda and the procedures for the negotiated rulemaking sessions. We request nominations for members who represent individuals and organizations of key stakeholder constituencies that are involved in the student financial assistance programs authorized under Title IV of the HEA to serve on these committees.

DATES: We must receive your nominations for membership on the committees on or before December 19, 2001. We will hold a public meeting on December 14, 2001, at the Department of Education in Washington, DC for interested parties to discuss the agenda and the procedures for the negotiated rulemaking sessions.

ADDRESSES: Please send your nominations to Rose Fletcher, U.S. Department of Education, 1990 K Street, NW., Room 8061, Washington, DC 20006, or fax to Rose Fletcher at (202) 502–7873. You may also email your nominations to: *Rose.Fletcher@ed.gov.*

The meeting on December 14, 2001 will be held at the GSA Auditorium, Regional Office Building #3, 7th and D Street, SW., Washington, DC from 9:00 am to 12:00 pm. Anyone interested in attending the meeting should contact Rose Fletcher at (202) 502–7812.

FOR FURTHER INFORMATION CONTACT: For information about the meetings and the nomination submission process: Rose Fletcher, U.S. Department of Education, 1990 K Street, NW., Room 8061, Washington, DC 20006. Telephone: (202) 502–7812.

For information about negotiated rulemaking: Carney McCullough, U.S. Department of Education, 1990 K Street, NW., Room 8071, Washington, DC 20006. Telephone (202) 502–7639.

If you use a telecommunications device for the deaf (TDD) you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternative format (*e.g.*, Braille, large print, audiotape, or computer diskette) on request to the contact person for information about the meetings listed in the preceding paragraph.

SUPPLEMENTARY INFORMATION: The meeting site is accessible to individuals with disabilities. If you will need an auxiliary aid or service to participate in the meeting (*e.g.*, interpreting service, assistive listening device, or materials in alternative format), notify the contact person for information about the meeting listed in this notice in advance of the scheduled meeting date. Although we will attempt to meet a request we receive, we may not be able to make available the requested auxiliary aid or service because of insufficient time to arrange it.

Regulatory Issues

We intend to act on regulatory proposals to streamline the current Federal student financial assistance program regulations while maintaining or improving program integrity. Many of these proposals were submitted by individuals and organizations in response to a request for such recommendations from the affected public made on May 24, 2001 by Representative Howard P. "Buck" McKeon and Representative Patsy Mink, the Chairman and Ranking Member of the Subcommittee on 21st Century Competitiveness of the Education and the Workforce Committee of the U.S. House of Representatives. The Subcommittee received over 3,000

responses on the regulations between May and the end of July 2001. Those proposals that would not in fact require statutory amendments have been provided to the Department for consideration.

In acting on these proposals and minor changes from the Department, we intend to advance the Administration's management reform priorities by taking steps that will provide immediate, concrete and measurable results in the near term. In reforming the Federal Government, President Bush has called for an "active, but limited" role for the Federal Government that empowers citizens to make decisions, ensures results through accountability, and promotes innovation through competition. To advance these goals, we intend to place priority on changes that will reduce the expense and difficulty of complying with the current Federal student financial assistance regulations, reduce the operating costs of administering the programs through greater use of e-commerce, simplify processes and improve service, and effect other changes that will improve program management and the integrity of the student financial assistance programs.

Structure of the Committees

We anticipate having two negotiating committees. The ultimate goal of negotiated rulemaking is to reach a consensus on proposed regulations through discussion and negotiation among interested and affected parties, including the Department of Education. With this in mind, we will conduct these negotiations within a structure that is designed to meet this goal fairly and efficiently. One negotiating committee will focus on student loan issues while the other will focus on other program issues. Our goal is to establish committees that are large enough to allow significantly affected parties to be represented while keeping the committees' size manageable.

Nominations of individuals from coalitions of individuals and organizations representing the constituencies identified below are strongly encouraged. Moreover, the Department encourages nominations of individuals who are actively involved in administering the Federal student financial assistance programs or whose interests are significantly affected by the regulations. The committees may also create subgroups on particular topics that would involve additional individuals who are not members of the committees. Individuals who are not selected as members of the committees will be able to attend the meetings, have access to the individuals representing their constituency, and will also be able to participate in informal working groups on various issues between the meetings. The meetings will be open to the public.

The Department has identified the constituencies listed below as having interests that are significantly affected by the subject matter of the negotiated rulemakings. The Department anticipates that individuals representing each of these constituencies will participate as members of one or both of the negotiated rulemaking committees. These constituencies are:

- Students.
- Legal assistance organizations that represent students
- Financial aid administrators at institutions of higher education.
- Business officers and bursars at institutions of higher education and institutional servicers (including collection agencies).
- Institutions of higher education eligible to receive Federal assistance under Title III, Parts A and B and Title V of the HEA, which includes Historically Black Colleges and Universities, Hispanic-Serving Institutions, American Indian Tribally Controlled Colleges and Universities, Alaska Native and Native Hawaiian-Serving Institutions, and other institutions with a substantial enrollment of needy students as defined in Title III.
- Two-year public institutions of higher education.
- Four-year public institutions of higher education.
- Private, non-profit institutions of higher education.
- Private, for-profit institutions of higher education.
- Guaranty agencies and guaranty agency servicers (including collection agencies).
- Lenders, secondary markets, and loan servicers.

While an individual selected to represent a constituency may be a representative of a group, institution, or industry participant, the individual will be expected to represent the interests of the entire constituency on the committee and to confer with other individuals and representatives of groups within that constituency.

Nominations should include:

- The name of the nominee and a description of the interests that he or she represents.
- Evidence of support from individuals or groups of the constituency that he or she will represent.
- The nominee's commitment that he or she will actively participate in good faith in the development of the proposed regulations.

Schedule for Negotiations

We will hold a total of three meetings of each committee, all of which will be held at the Department of Education in Washington, DC. The following is the tentative schedule for negotiations for the committees. This schedule is subject to change.

Meeting 1: Week of January 14, 2002
Meeting 2: Week of March 4, 2002
Meeting 3: Week of April 22, 2002

The committee will use electronic mail to exchange documents and discuss proposals between meetings.

The schedule outlined above is expected to allow sufficient time for us to provide the public with a 60-day comment period for the proposed regulations, as well as to provide sufficient time to address any issues raised in the comment period, while meeting the November 1 statutory deadline for publishing student financial assistance regulations.

BILLING CODE 4000–01–U

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[MO 0134–1134; FRL–7112–9]

Approval and Promulgation of Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the state of Missouri for the Doe Run primary lead smelters in Herculaneum and Glover, Missouri (Doe Run-Herculaneum and Doe Run-Glover). The SIP submitted by the state satisfies the applicable requirements under the Clean Air Act (CAA) and demonstrates attainment of the National Ambient Air Quality Standards (NAAQS) for lead for the Doe Run-Herculaneum area. Approval of this revision will ensure that the Federally approved requirements are current and consistent with state regulations and requirements. The revision for Doe Run-Glover merely reflects a change in ownership of the smelter. If EPA receives adverse comments, the comments will be addressed in the subsequent final rule.

DATES: Comments must be received on or before January 4, 2002.

ADDRESSES: Written comments should be mailed to James F. Hirtz, Environmental Protection Agency, Air Planning and Development Branch, 901 North 5th Street, Kansas City, Kansas 66101.

Copies of documents relative to this action are available for public inspection during normal business hours at the above-listed Region 7 location. Interested persons wanting to examine these documents should make an appointment with the office at least 24 hours in advance.

FOR FURTHER INFORMATION CONTACT: James Hirtz at (913) 551–7472, or E-Mail him at hirtz.james@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever, "we," "us," or "our" is used, we mean EPA. This section provides additional information by addressing the following questions:

Background and Submittal Information

What is a SIP?
What is the background for Doe Run-Herculaneum?
What is the Federal Approval process for a SIP?
What does Federal approval of a state regulation mean to me?
What is being addressed in this document?

EPA's Proposed Actions

Have the requirements for approval of a SIP revision been met under section 172 of the CAA?
What actions are we proposing today?

Background and Submittal Information

What Is a SIP?

Section 110 of the Clean Air Act (CAA) requires states to develop air pollution regulations and control strategies to ensure that state air quality meets the national ambient air quality standards established by EPA. These ambient standards are established under section 109 of the CAA, and they currently address six criteria pollutants. These pollutants are: Carbon monoxide, nitrogen dioxide, ozone, lead, particulate matter, and sulfur dioxide.

Each state must submit these regulations and control strategies to us for approval and incorporation into the Federally enforceable SIP. Each Federally approved SIP protects air quality primarily by addressing air pollution at its point of origin. These SIPs can be extensive, containing state regulations or other enforceable documents and supporting information such as emission inventories, monitoring networks, and modeling demonstrations.

What Is the Background for Doe Run-Herculaneum?

On June 3, 1986, EPA issued a call for a revision to the Missouri SIP in response to violations of the NAAQS for lead in the vicinity of the Doe Run primary lead smelter in Herculaneum, Missouri. Doe Run-Herculaneum is the largest primary lead smelter in the United States with a production capacity of 250,000 tons of refined lead per year. The NAAQS for lead is 1.5 micrograms (μg) of lead per cubic meter (m^3) of air averaged over a calendar quarter. The state submitted a SIP revision on September 6, 1990, and EPA granted limited approval for Missouri's 1990 SIP revision on March 6, 1992 (57 FR 8076), pending submission of a supplemental SIP revision meeting the applicable requirements (Part D of Title I of the CAA as amended in 1990).

A revised SIP meeting the part D requirements was subsequently submitted in 1994. The plan established June 30, 1995, as the date by which the Herculaneum area was to have attained compliance with the lead standard. However, the plan did not result in attainment of the standard, and observed lead concentrations in the Herculaneum area continued to show violations of the standard. Therefore, on August 15, 1997, after taking and responding to public comments, EPA published a document in the **Federal Register** finding that the Herculaneum nonattainment area had failed to attain the lead standard by the June 30, 1995, deadline (62 FR 43647).

On January 10, 2001, Missouri submitted a revised SIP to EPA for the Doe Run-Herculaneum area. The SIP revision was found complete on January 12, 2001. The SIP establishes August 14, 2002, as the attainment date for the area and satisfies the part D requirements of the CAA. The revised plan also contains a control strategy to address the violations of the NAAQS which occurred after implementation of the control measures in the 1995 SIP revision. EPA believes that the dispersion and receptor modeling demonstrate that the selected control measures will result in attainment of the NAAQS for lead.

What Is the Federal Approval Process for a SIP?

In order for state regulations to be incorporated into the Federally enforceable SIP, states must formally adopt the regulations and control strategies consistent with state and Federal requirements. This process generally includes a public notice, public hearing, public comment period, and a formal adoption by a state-authorized rulemaking body.

Once a state rule, regulation, or control strategy is adopted, the state submits it to us for inclusion into the SIP. We must provide public notice and seek additional public comment regarding the proposed Federal action on the state submission. If adverse comments are received, they must be addressed prior to any final Federal action by us.

All state regulations and supporting information approved by EPA under section 110 of the CAA are incorporated into the Federally approved SIP. Records of such SIP actions are maintained in the Code of Federal Regulations (CFR) at Title 40, part 52, entitled "Approval and Promulgation of Implementation Plans." The actual state regulations which are approved are not reproduced in their entirety in the CFR outright but are "incorporated by reference," which means that we have approved a given state regulation with a specific effective date.

What Does Federal Approval of a State Regulation Mean to Me?

Enforcement of the state regulation before and after it is incorporated into the Federally approved SIP is primarily a state responsibility. However, after the regulation is Federally approved, we are authorized to take enforcement action against violators. Citizens are also offered legal recourse to address violations as described in section 304 of the CAA.

What Is Being Addressed in This Document?

Doe Run-Herculaneum

1. Control Strategy

As required by 40 CFR part 51, subpart N, each SIP must contain legally enforceable compliance schedules and provide for compliance as soon as practicable. The Doe Run-Herculaneum SIP calls for full implementation of the control strategy by July 31, 2002. Implementation of the control strategy will result in approximately a 99 percent reduction in fugitive lead emissions from sources that are modeled as contributing significantly to nonattainment in the Herculaneum area.

The SIP contains two regulatory documents: (1) A Missouri Department of Natural Resources (MDNR) lead rule, (10 CSR 10–6.120) adopted by Missouri Air Conservation Commission (MACC) on December 7, 2000, containing emission limits and a Work Practice Manual which specifies operating procedures for specific plant processes at the Doe Run-Herculaneum facility; and (2) an executed Consent Judgment between the state of Missouri, Missouri Department of Natural Resources (MDNR), and MACC with Doe Run-Herculaneum. This judgment sets forth the administrative requirements for the implementation of the control measures at the Doe Run-Herculaneum facility. The plan includes contingency measures to be implemented within 6 months following a violation of the lead standard, after the attainment date of August 14, 2002. The reader is referred to the EPA prepared technical support document for a more complete discussion of the specific control measures to be implemented in the SIP.

2. Attainment Demonstration

Section 192(a) of the CAA requires that SIPs must provide for attainment of the lead NAAQS as expeditiously as practicable but no later than five years from the date of an area's nonattainment designation. This five-year period also applies as the new attainment date following a finding of failure to attain the lead NAAQS. (See sections 179(d)(3), 172(a)(d), and 192(a).) MDNR submitted a revised SIP that met the part D requirements in 1994, and which established June 30, 1995, as the new attainment date for the Herculaneum area. Violations of the NAAQS for lead were still observed and EPA published a notice in the **Federal Register** on August 15, 1997, finding that the Herculaneum area failed to attain the lead standard. The determination became effective on September 14, 1997. The SIP submitted established an attainment date of August 14, 2002, which is within the statutory five-year period. EPA has determined that the state's attainment date is as expeditious as practicable.

In support of the revision to the Doe Run-Herculaneum lead SIP, a dispersion and receptor modeling methodology was developed to predict ambient lead concentrations. The dispersion model that was chosen was the steady state EPA Gaussian plume Industrial Source Complex Short-Term model (ISCST3, version 99155). The receptor modeling that was chosen was Chemical Mass Balance (CMB) receptor model version 7. The CMB model was used to qualititavely evaluate the dispersion model to increase confidence in the modeling results and the control strategy.

The 2000 SIP revision emission inventory relies heavily on source testing and the utilization of the CMB receptor model to provide probable source contribution estimates (SCE) for the major source categories. These categories were defined by common chemistry of the source's particulate emissions. The model is a "best fit" statistical model that estimates the most probable source contribution by comparing the finger prints, or characteristics, of the emission sources with the measured ambient values.

Actual value dispersion modeling was conducted in order to (1) determine the model's ability to replicate actual lead concentrations monitored during the study, and thereby serve as a basis for developing future control strategies, and (2) provide a set of SCEs for reconciliation with those obtained from the CMB receptor model. The actual value modeling was conducted with the actual emission rates, stack parameters, and local meteorological data collected during the study period. The background value of 0.13 $\mu g/m^3$ was added to the predicted air dispersion concentrations. The maximum predicted concentration by the ISCST3 model, including background, is 1.456 $\mu g/m^3$, which is below the NAAQS for lead at 1.5 $\mu g/m^3$.

3. Emission Inventory and Air Quality Data

Section 172(c)(3) of the CAA requires that nonattainment plan provisions include a comprehensive, accurate, current inventory of actual emissions from all sources of relevant pollutants in the nonattainment area.

Development of a comprehensive and accurate emissions inventory was necessary to support modeling and control strategy efforts. An hourly emissions inventory was developed in order to provide input to the ISCST3 dispersion model. These rates were estimated using equations developed from source testing at the facility or from published emission factors.

Speciated emissions data was necessary to provide input to the CMB receptor model. Where possible, these data were obtained during source sampling efforts to identify fugitive emission sources located at the facility. IN other cases, it was obtained from grab samples collected at various locations within the facility or from representative sources.

The state submittal provides a historical summary of the air quality from 1982 through the second calendar quarter of 2000. The average quarterly ambient lead concentrations at several monitors continue to remain above the NAAQS. The reader is referred to the EPA prepared technical support document for a summary of ambient monitoring data collected for the Doe-Run Herculaneum site.

4. Reasonably Available Control Measures (RACM) Including Reasonable Available Control Technology (RACT)

The submittal must contain provisions to assure that RACM (including RACT) are implemented (see section 172(c)(1) of the CAA). (See 57 FR 13498 and 57 FR 13560 dated April 1, 1992, for EPA's interpretation of the RACM and RACT requirements.) Section 172(c)(1) of the CAA requires the implementation of all RACM which include emissions reduction through the adoption of RACT as expeditiously as practicable for all areas in nonattainment to attain the national primary ambient air quality standard. EPA interprets this requirement to impose a duty on all nonattainment areas to consider all available control measures and to adopt and implement such measures as are reasonably available to demonstrate attainment for the area. EPA believes that measures which do not advance the date for attainment need not be implemented.

In the previous SIP (1993), Doe Run-Herculaneum prepared a RACT/RACM evaluation, and the plant has not changed significantly nor is it expected to significantly increase its emissions through production increases. All RACT/RACM measures were implemented as part of the previous SIP. In addition, the requirements under 40 CFR part 63, subpart TTT, the Federal Maximum Achievable Control Technology (MACT) Standards for Primary Lead Smelters, now apply for Doe Run-Herculaneum. This MACT required the preparation and use of a

standard operating procedures manual for all baghouses used to control process, process fugitive, or fugitive dust emission sources for lead. We note that Missouri is currently in the process of addressing a number of issues relating to the delivery of lead concentrate to the Doe Run-Herculaneum facility for processing, and is considering measures to decrease or eliminate lead fugitive emissions from truck hauling. Missouri has analyzed the air quality impact of the delivery system (primarily involving the transport and unloading of concentrate from trucks) and has determined that the air quality impacts of fugitive emissions from this process are minimal. Missouri also reran the attainment demonstration modeling to determine the impact, if any, due to the contribution of fugitive emissions from the truck hauling operation. Missouri concluded that the air quality impact was insignificant, and did not impact the attainment demonstration. Missouri continues to address other environmental concerns relating to truck hauling, primarily relating to soil contamination. However, based on the state's conclusions that the air quality impacts are negligible, and therefore further air pollution controls would not expedite attainment, EPA does not believe that further consideration of the emissions associated with truck hauling is necessary for purposes of the CAA requirements regarding RACT/RACM. In light of the above MACT requirements as well as enforceable limitations for fugitive emissions and the installation of process controls imposed by the state rule and Consent Judgement referenced previously, it would be unnecessary for EPA to have Doe Run-Herculaneum reevaluated RACT/RACM requirements. An assessment of these control measures with dispersion and receptor modeling indicate no additional measures will expedite attainment.

5. Reasonable Further Progress (RFP)

Section 172(c)(2) of the CAA requires that the SIP must provide for RFP as defined in section 171(1) of the CAA. Section 171(1) defines RFP as annual incremental reductions in emissions of the relevant air pollutants as are required by Part D, or may reasonably be required by EPA to ensure attainment of the applicable NAAQS by the applicable date. Part D does not further require specific RFP measures for lead.

Doe Run-Herculaneum has demonstrated RFP as required by section 172(c)(2) of the CAA. For example, Doe Run-Herculaneum is under a compliance schedule, required by regulation and by the Consent Judgement, for implementing (1) installation of emission control equipment; (2) enclosure and ventilation projects to reduce lead emissions; (3) process throughput restrictions and hours of operation limitation; (4) work practice standards; and (5) contingency measures. EPA does not believe that additional incremental reductions are needed to meet the RFP requirement, since all controls to reduce lead emissions are to be implemented within the year, and must be fully implemented by July 31, 2002. The Work Practice Manual establishes process limits and control requirements for the plant and provides a guide to plant operators on how to minimize emissions from certain plant operations. This manual was incorporated into the lead rule (10 CSR 10–6.120), and adopted by the MACC on December 7, 2000, with the effective date of the rule being March 30, 2001.

6. New Source Review (NSR)

Part D of Title I of the CAA requires that the submittal include a permit program for the construction and operation of new and modified major stationary sources. Missouri rule 10 CSSR 10–6.020 identifies the current specific descriptions of the lead nonattainment areas in Missouri, including the area in which the Doe Run facility is located. Rule 10 CSR 10–6.020 is utilized in conjunction with Missouri rule 10 CSR 10–6.060 which requires a permit for construction of, or major modification to, an installation with potential to annually emit one hundred (100) tons or more of a nonattainment pollutant, or a permit for a modification at a major source with potential to annually emit one thousand two hundred (1,200) pounds of lead. These rules have previously been approve by EPA as part of the SIP.

7. Contingency Measures

Pursuant to section 172(c)(9) of the CAA, contingency measures have been prepared that can be implemented if EPA determines that the nonattainment area has failed to make reasonable further progress or fails to attain the NAAQS by the statutory deadline.

The state submission specifies an attainment date for the Herculaneum area of August 14, 2002, as set in the state SIP. If the area has a violation of the NAAQS during this quarter (July 1 to September 30, 2002), or any quarter thereafter, the contingency controls will be implemented after Doe Run-Herculaneum is notified by EPA and/or MDNR. Contingency measures which include enclosures and installing additional process controls will be implemented within 6 months following the calendar quarter in which the violation occurred.

In the event there is a second violation of the quarterly lead standard of 1.5 μ/m^3, after implementation of the initial contingency measures, Doe Run-Herculaneum has also agreed to curtail production utilizing one of three emission and/or production curtailing methods: Method (1), reduce main non-stack emissions by 20 percent; Method (2), limit production to 50,000 short tons/quarter of refined lead produced; and, Method (3), adopt Method 1 and limit production of refined lead production based upon the following formula:

$P = 50{,}000 + (500 \times (1 - A/E) \times 100)$

P = refined lead production in short tons/quarter

A = The aggregate actual quarterly emissions from all fugitive and stack lead emission sources at the facility in tons; except from the main stack (30001)

E = the aggregate estimated quarterly emissions from all fugitive and stack lead emission sources at the facility in tons; except from the main stack (30001); where A/E can't be less than .8 or more than 1.0.

Doe Run-Herculaneum will also maintain current bids on the materials necessary to implement each contingency measure. Doe Run-Herculaneum also may substitute any such controls if Doe Run-Herculaneum can demonstrate to MDNR and EPA that the alternative control measures would equal or exceed controls in the current SIP. Changes to these contingency measures would require a public hearing at the state level, and EPA approval as a formal SIP revision. These measures will help ensure compliance with the lead NAAQS and meet the requirements of section 172(c)(9) of the CAA.

8. Enforceability

All measures and other elements in the SIP must be enforceable by the state and EPA (see sections 172(c)(6), and 110(a)(2)(A) of the CAA, and 57 FR 13556). The state submittal includes a Consent Judgement and the lead rule (10 CSR 10–6.120). The lead rule also incorporates a Work Practice Manual, which specifies operating procedures for specific plant processes.

The state submittal includes a Consent Judgment entered into by the state and the Company which contains all of the control and contingency measures with enforceable dates for implementation. Control measures employed by Doe Run-Herculaneum

involve engineering modifications to the facility which include: Enclosure projects, improved ventilation systems being routed to stacks, improved material handling conveyors, and installation of air pollution control equipment (baghouses). The Company expects to spend approximately $8,500,000 on these projects to control and reduce fugitive air emissions of lead that are affecting the ambient air standard for lead in the Herculaneum area. These control measures will be implemented by July 31, 2002.

Doe Run-Glover

The Missouri SIP submission contains a state rule and a Consent Decree which pertain to the Doe Run Company's Glover lead smelter in Iron County, Missouri. Until 1998, this facility was owned by the ASARCO Company. Due to the change in ownership, the state found it necessary to revise a state rule and the Consent Decree which referred to the facility by ownership name.

The state rule, 10 CSR 10–6.120, "Restriction of Emissions of Lead From Specific Lead Smelter-Refinery Installations," was revised in paragraph (2)(A) to change the owner name from ASARCO to Doe Run Company. No other revisions pertaining to this facility were made in this rule revision. This revision was adopted by the Missouri Air Conservation Commission on December 7, 2000, and became effective in the state on March 30, 2001.

There was also a SIP-approved Consent Decree for this facility with ASARCO. This Consent Decree was also revised to reflect the change in ownership and to update certain provisions. These changes included: (1) Recognizing that the required capital improvements made by ASARCO had indeed already been made; (2) adding language that will terminate the Consent Decree upon redesignation of the Glover area attainment with the understanding that a new enforceable agreement will be in place at that time to ensure continued operation of the controls. This is acceptable to EPA since a maintenance plan would be required prior to any redesignation of the area to attainment, and the maintenance plan would contain all requirements, including enforceable requirements of any document which replaces the Consent Decree, which are necessary to ensure continued attainment of the area for the lead NAAQS; and (3) provision was added which allows the Consent Decree to be modified if both parties agree, or if there is a change in ownership. These provisions were added to avoid having to go back to court to amend the Consent Decree.

EPA's Proposed Actions

Have the Requirements for Approval of a SIP Revision Been Met Under Section 172 of the CAA?

The state submittal has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submittal also satisfied the completeness criteria of 40 CFR part 51, appendix V. In addition, as explained above and in more detail in the technical support document which is part of this document, the revision meets the substantive SIP requirements of the CAA, including section 110 and implementing regulations and part D and is consistent with the guidance set forth in the "State Implementation Plans for Lead Nonattainment Areas; Addendum to the General Preamble for the Implementation of the Clean Air Act Amendments of 1990" (58 FR 67748).

What Actions Are We Proposing Today?

EPA is proposing to find that the Doe Run-Herculaneum nonattainment area SIP submitted by Missouri on January 10, 2001, meets the requirements of section 110, and part D of the CAA and 40 CFR part 51. EPA is also proposing to approve the SIP submission which relates to the Doe Run-Glover facility which is described above.

Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this proposed action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This proposed action merely proposes to approve state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule proposes to approve pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4).

This proposed rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of governments, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely proposes to approve a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the CAA. This proposed rule also is not subject to Executive Order 13045 "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the CAA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This proposed rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01–2753, MM Docket No. 01–325, RM–10136]

Television Broadcast Service; Green Bay, WI

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Green Bay 44, L.L.C., an applicant for a construction permit for a new television station operating on channel 44 at Green Bay, Wisconsin, requesting the substitution of Channel 50 for channel 44 at Green Bay. TV channel 50 can be allotted to Green Bay, Wisconsin, with a plus offset consistent with the criteria set forth in the Commission's Public Notice, released on November 22, 1999, DA 99–2605. The coordinates for channel 50+ at Green Bay are North Latitude 44–30–48 and West Longitude 88–00–24. However, since the community Green Bay is located within 400 kilometers of the U.S.-Canadian border, concurrence by the Canadian government must be obtained for this proposal. Pursuant to the provisions outlined in the Commission's Public Notice, we will not accept competing expressions of interest in the use of television channel 50+ at Green Bay.

DATES: Comments must be filed on or before January 21, 2002, and reply comments on or before February 5, 2002.

ADDRESSES: Federal Communications Commission, 445 12th Street, SW., Room TW–A325, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Andrew S. Kersting, Fletcher, Heald & Hildreth, 11th Floor, 1300 North 17th Street, Arlington, Virginia 22209–3801 (Counsel for Green Bay 44, L.L.C.).

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418–1600.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 01–325, adopted November 29, 2001, and released November 30, 2001. The full text of this document is available for public inspection and copying during regular business hours in the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY–A257, Washington, DC, 20554. This document may also be purchased from the Commission's duplicating contractor, Qualex International, Portals II, 445 12th Street, SW, Room CY–B402, Washington, DC, 20554, telephone 202–863–2893, facsimile 202–863–2898, or via-e-mail *qualexint@aol.com*.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

List of Subjects in 47 CFR Part 73

Television broadcasting.

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 73 as follows:

PART 73—TELEVISION BROADCAST SERVICES

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, and 336.

§ 73.606 [Amended]

2. Section 73.606(b), the Table of Television Allotments under Wisconsin is amended by removing TV Channel 44 and adding TV Channel 50+ at Green Bay.

Federal Communications Commission.

Barbara A. Kreisman,

Chief, Video Services Division, Mass Media Bureau.

Federal Register
Vol. 66, No. 234
Wednesday, December 5, 2001

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 01–097–1]

Notice of Request for Extension of Approval of an Information Collection

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection in support of regulations governing the importation of fruits and vegetables.

DATES: We invite you to comment on this docket. We will consider all comments we receive that are postmarked, delivered, or e-mailed by February 4, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comment (an original and three copies) to: Docket No. 01–097–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 01–097–1. If you use e-mail, address your comment to regulations@aphis.usda.gov. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 01–097–1" on the subject line.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at http://www.aphis.usda.gov/ppd/rad/webrepor.html.

FOR FURTHER INFORMATION CONTACT: For information on regulations governing the importation of fruits and vegetables, contact Ms. Cynthia Stahl, Program Analyst, Port Operations, PPQ, APHIS, 4700 River Road Unit 60, Riverdale, MD 20737–1236; (301) 734–5281. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

SUPPLEMENTARY INFORMATION:

Title: Importation of Fruits and Vegetables.

OMB Number: 0579–0136.

Type of Request: Extension of approval of an information collection.

Abstract: The United States Department of Agriculture (USDA) is responsible for, among other things, the control and eradication of plant pests. The Plant Protection Act authorizes the Department to carry out this mission.

The Plant Protection and Quarantine (PPQ) program of USDA's Animal and Plant Health Inspection Service (APHIS) is responsible for implementing the regulations that carry out the intent of the Act.

Under the regulations in 7 CFR 319.56 through 319.56–8, a number of fruits and vegetables may be imported into the United States, under specified conditions, from certain parts of the world. These fruits and vegetables include cole and mustard crops from Ecuador, El Salvador, Nicaragua, and Peru; rhubarb from Guatemala; parsley from Israel and Nicaragua; salicornia from Mexico; mint and rosemary from Nicaragua; Swiss chard from Peru; Belgian endive, chicory, and endive from Panama; pineapple from South Africa; cantaloupe, honeydew melon, and watermelon from Brazil and Venezuela; and peppers from Spain.

Before entering the United States, all of these fruits and vegetables are subject to inspection and disinfection at their port of first arrival to ensure that no plant pests are inadvertently brought into the United States. These precautions, along with other requirements, ensure that these items can be imported into the United States with minimal risk of introducing exotic plant pests such as fruit flies.

Allowing these fruits and vegetables to be imported requires the use of certain information collection activities, including the completion of import permits, phytosanitary inspection certificates, and fruit fly monitoring records.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.73227 hours per response.

Respondents: U.S. importers of fruits and vegetables and plant health officials of exporting countries.

Estimated annual number of respondents: 822.

Estimated annual number of responses per respondent: 2.2311.

Estimated annual number of responses: 1,834.

Estimated total annual burden on respondents: 1,343 hours. (Due to

averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 29th day of November 2001.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 01–30107 Filed 12–4–01; 8:45 am]

BILLING CODE 3410–34–P

Animal and Plant Health Inspection Service

[Docket No. 01–104–1]

Notice of Request for Reinstatement of an Information Collection

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Reinstatement of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a reinstatement of an information collection in support of activities to prevent the introduction and spread of diseases and parasites harmful to honeybees.

DATES: We invite you to comment on this docket. We will consider all comments we receive that are postmarked, delivered, or e-mailed by February 4, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comment (an original and three copies) to: Docket No. 01–104–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 01–104–1. If you use e-mail, address your comment to regulations@aphis.usda.gov. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 01–104–1" on the subject line.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at http://www.aphis.usda.gov/ppd/rad/webrepor.html.

FOR FURTHER INFORMATION CONTACT: For information regarding exotic bee diseases and parasites, honeybees, and honeybee semen, contact Ms. Anissa Craghead, Regulatory Coordination Specialist, Regulatory Coordination Staff, PPQ, APHIS, 4700 River Road Unit 141, Riverdale, MD 20737, (301) 734–5311. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

SUPPLEMENTARY INFORMATION:

Title: Exotic Bee Diseases and Parasites; Honeybees and Honeybee Semen.

OMB Number: 0579–0072.

Type of Request: Reinstatement of an information collection.

Abstract: The United States Department of Agriculture is responsible for preventing the introduction and spread of diseases and parasites harmful to honeybees, the introduction of genetically undesirable germ plasm of honeybees, and the introduction and spread of undesirable species or subspecies of honeybees.

The introduction and establishment of new honeybee diseases, parasites, and undesirable honeybee strains into the United States could cause multimillion dollar losses to American agriculture. Diseases or parasites can weaken or kill honeybees, causing substantial reductions in the production of honey and other honeybee products, as well as a reduction in pollination activity. Pollination is necessary for the production of many important crops, including forage, fruits, vegetables, and vegetable oils.

To protect the health of the U.S. honeybee population, we engage in a number of information collection activities designed to allow us to determine whether shipments of honeybees, honeybee semen, or bee-related items (such as beekeeping equipment) represent a possible risk of introducing exotic bee diseases, parasites, or undesirable honeybee strains into the United States.

Our primary means of obtaining this vital information is requiring importers to apply to us for an import permit. The permit application provides us with information such as the amount of bee semen to be imported and the species or subspecies of honeybee from which the semen was collected; the country or locality of origin; and the intended port of entry in the United States.

We also require importers and shippers to adhere to a number of marking and shipping requirements that enable us to easily identify and process shipments of honeybees, honeybee semen, and other restricted articles when they arrive at U.S. ports of entry.

These information-gathering procedures help us prevent the entry of shipments that pose a potential health risk to the U.S. honeybee population.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 4.0625 hours per response.

Respondents: Importers and shippers of honeybees, honeybee semen, and other regulated articles.

Estimated annual number of respondents: 13.

Estimated annual number of responses per respondent: 1.23.

Estimated annual number of responses: 16.

Estimated total annual burden on respondents: 65 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual

number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 29th day of November 2001.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 01–039–2]

Availability of an Environmental Assessment and Finding of No Significant Impact

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that an environmental assessment and finding of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to a demonstration project to eradicate and prevent the spread of the aquatic weed giant salvinia in the Toledo Bend Reservoir and surrounding areas in Louisiana and eastern Texas. The environmental assessment provides a basis for our conclusion that the implementation of the demonstration project will not have a significant impact on the quality of the human environment. Based on its finding of no significant impact, the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

ADDRESSES: Copies of the environmental assessment and finding of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect theses documents are requested to call (202) 690–2817 before coming.

FOR FURTHER INFORMATION CONTACT: Dr. Alan V. Tasker, National Weed Program Coordinator, Invasive Species and Pest Management, PPQ, APHIS, 4700 River Road Unit 134, Riverdale, MD 20737–1236; (301) 734–5225.

SUPPLEMENTARY INFORMATION:

Background

Giant salvinia (*Salvinia molesta*) is a free-floating aquatic fern, native to South America, with a tremendous growth rate and the potential to significantly affect water-reliant agricultural industries, recreation, and the ecology of freshwater habitats throughout much of the United States.

The Animal and Plant Health Inspection Service (APHIS) listed giant salvinia as a noxious weed in 1983. Under APHIS' regulations, no person may move giant salvinia into or through the United States, or interstate, unless he or she obtains a permit for the movement from APHIS.

In the past several years, giant salvinia has been detected in the United States, mostly in association with the nursery trade in aquatic plants. Generally, detections have been in small, confined sites and are currently contained or have been eradicated. Such detections have occurred in Alabama, Arizona, Florida, Hawaii, Indiana, Louisiana, Maryland, Missouri, North Carolina, South Carolina, Texas, and Virginia. Of more serious and immediate concern is the current infestation in the Toledo Bend Reservoir and the surrounding areas in Louisiana and eastern Texas. The Toledo Bend Reservoir infestation is a major one in a large body of water.

Because current efforts to eradicate giant salvinia in the Toledo Bend Reservoir and the surrounding areas in Louisiana and eastern Texas have been unsuccessful, APHIS has evaluated additional control methods available to help eradicate this noxious weed. These control methods include:

- An integrated control approach utilizing herbicides and mechanical, biological, and regulatory controls.
- A biological control program that requires no herbicide application.

On July 24, 2001, we published in the **Federal Register** (66 FR 38414–38415, Docket No. 01–039–1) a notice in which we announced the availability, for public review and comment, of an environmental assessment that examines the potential environmental effects of the giant salvinia control methods described above on the Toledo Bend Reservoir and surrounding areas in Louisiana and eastern Texas. We solicited comments on the environmental assessment for 30 days ending on August 23, 2001. We received no comments by that date.

In this document, we are advising the public of APHIS' record of decision and finding of no significant impact regarding the use of the methods described above to control giant salvinia in the Toledo Bend Reservoir and surrounding areas in Louisiana and eastern Texas. This decision, which is based on the findings of the environmental assessment, will allow APHIS to begin giant salvinia control activities in the Toledo Bend Reservoir and surrounding areas.

The environmental assessment and finding of no significant impact may be viewed on the Internet at http://www.aphis.usda.gov/ppd/es/ppqdocs.html. You may request paper copies of the environmental assessment and finding of no significant impact by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the title of the environmental assessment when requesting copies. The environmental assessment and finding of no significant impact are also available for review in our reading room (information on the location and hours of the reading room is listed under the heading **ADDRESSES** at the beginning of this notice).

The environmental assessment and finding of no significant impact have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 29th day of November 2001.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 01–099–1]

Draft Guidelines on Pharmacovigilance of Veterinary Medicinal Products: Management of Periodic Summary Update Reports (PSUs) (VICH Topic GL29) and Pharmacovigilance of Veterinary Medicinal Products: Controlled List of Terms (VICH Topic GL30)

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of availability and request for comments.

SUMMARY: The International Cooperation on Harmonization of Technical Requirements for the Registration of Veterinary Medicinal Products (VICH) has developed two draft guidelines titled "Pharmacovigilance of Veterinary Medicinal Products: Management of Periodic Summary Update Reports (PSUs)" and "Pharmacovigilance of Veterinary Medicinal Products: Controlled List of Terms." These draft guidelines provide, respectively, recommendations for the management of the detection and investigation of the clinical effects of marketed veterinary medicinal products and the terminology used to describe veterinary medicinal products, animals, clinical signs, and associated body systems and organs in adverse event reports. Because the draft guidelines apply to pharmacovigilance and adverse event reporting on veterinary vaccines regulated by the Animal and Plant Health Inspection Service under the Virus-Serum-Toxin Act, we are requesting comments on the scope of each guideline and its provisions so that we may include any relevant public input on the drafts in the Agency's comments to the VICH Steering Committee.

DATES: We invite you to comment on this docket. We will consider all comments we receive that are postmarked, delivered, or e-mailed by February 4, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comment (an original and three copies) to: Docket No. 01–099–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 01–099–1. If you use e-mail, address your comment to regulations@aphis.usda.gov. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 01–099–1" on the subject line.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at http://www.aphis.usda.gov/ppd/rad/webrepor.html.

You may request copies of the draft guidelines "Pharmacovigilance of Veterinary Medicinal Products: Management of Periodic Update Summary Reports (PSUs)" and "Pharmacovigilance of Veterinary Medicinal Products: Controlled List of Terms" by contacting the person listed under **FOR FURTHER INFORMATION CONTACT.**

FOR FURTHER INFORMATION CONTACT: Dr. Albert P. Morgan, Center for Veterinary Biologics-Licensing and Policy Development, VS, APHIS, 4700 River Road Unit 148, Riverdale, MD 20737–1231; (301) 734–8245.

SUPPLEMENTARY INFORMATION: The International Cooperation on Harmonization of Technical Requirements for the Registration of Veterinary Medicinal Products (VICH) is a unique project conducted under the auspices of the Office International des Epizooties that brings together the regulatory authorities of the European Union, Japan, and the United States and representatives from the animal health industry in the three regions. The purpose of VICH is to harmonize technical requirements for veterinary products (both drugs and biologics). Regulatory authorities and industry experts from Australia and New Zealand participate in an observer capacity. The World Federation of the Animal Health Industry (COMISA, the Confederation Mondiale de L'Industrie de la Sante Animale) provides the secretarial and administrative support for VICH activities.

The United States Government is represented in VICH by the Food and Drug Administration (FDA) and the Animal and Plant Health Inspection Service (APHIS). The FDA provides expertise on veterinary drugs, while APHIS fills a corresponding role for veterinary biological products. As VICH members, APHIS and FDA participate in efforts to enhance harmonization and have expressed their commitment to seeking scientifically based harmonized technical requirements for the development of veterinary drugs and biological products. One of the goals of harmonization is to identify and reduce the differences in technical requirements for veterinary drugs and biologics among regulatory agencies in different countries.

Two draft guidelines have been made available by the VICH Steering Committee for comments by interested parties. The first draft guideline, "Pharmacovigilance of Veterinary Medicinal Products: Management of Periodic Summary Update Reports (PSUs)" (VICH Topic GL29), is intended to provide general recommendations for the management of the detection and investigation of the clinical effects of marketed veterinary medicinal products. Because the draft guideline applies to some veterinary biological products regulated by APHIS under the Virus-Serum-Toxin Act—particularly with regard to adverse event reporting—we are requesting comments on its provisions so that we may include any relevant public input on the draft in the Agency's comments to the VICH Steering Committee.

The second draft guideline, "Pharmacovigilance of Veterinary Medicinal Products: Controlled List of Terms" (VICH Topic GL30), is intended to provide a controlled list of terminology for describing clinical signs and associated body systems and organs for reporting an adverse event associated with the use of veterinary medicinal products. Again, because the draft guideline applies to some veterinary biological products regulated by APHIS under the Virus-Serum-Toxin Act—particularly with regard to ensuring that consistent terminology is used to describe an adverse event associated with the use of a veterinary medicinal product—we are requesting comments on its provisions so that we may include any relevant public input on the draft in the Agency's comments to the VICH Steering Committee.

The two draft guidelines reflect, respectively, current APHIS thinking on the management of PSUs and the appropriate terminology for use in describing an adverse event concerning the use of veterinary biological products. In accordance with the VICH process, once a final draft of each document has been approved, the guideline will be recommended for adoption by the regulatory bodies of the European Union, Japan, and the United States. As with all VICH documents, each final guideline will not create or confer any rights for or on any person and will not operate to bind APHIS or the public. Further, the VICH guidelines specifically provide for the use of alternative approaches if those approaches satisfy applicable regulatory requirements.

Ultimately, APHIS intends to consider the VICH Steering Committee's final guidelines for use by U.S. veterinary biologics licensees, permittees, and applicants. In addition, we may consider the use of each final guideline as the basis for proposed amendments to

the regulations in 9 CFR chapter I, subchapter E (Viruses, Serums, Toxins, and Analogous Products: Organisms and Vectors). Because we anticipate that applicable provisions of the final versions of "Pharmacovigilance of Veterinary Medicinal Products: Management of Periodic Summary Update Reports (PSUs)" and "Pharmacovigilance of Veterinary Medicinal Products: Controlled List of Terms" may be introduced into APHIS' veterinary biologics regulatory program in the future, we encourage your comments on the draft guidelines.

Authority: 21 U.S.C. 151 *et seq.*

Done in Washington, DC, this 29th day of November 2001.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Forest Service

Newspapers To Be Used for Publication of Legal Notice of Appealable Decisions and Corrections for the Southern Region; Alabama, Kentucky, Georgia, Tennessee, Florida, Louisiana, Mississippi, Virginia, West Virginia, Arkansas, Oklahoma, North Carolina, South Carolina, Texas, Puerto Rico

AGENCY: Forest Service, USDA.

ACTION: Notice and correction.

SUMMARY: Deciding Officers in the Southern Region will publish notice of decisions subject to administrative appeal under 36 CFR part 217 in the legal notice section of the newspapers listed in the Supplementary Information section of this notice. As provided in 36 CFR part 217.5(d), the public shall be advised through **Federal Register** notice, of the principal newspaper to be utilized for publishing legal notice of decisions. Newspaper publication of notice of decisions is in addition to direct notice of decisions to those known to be interested in or affected by a specific decision. The Responsible Official under 36 CFR part 215 gave annual notice in the **Federal Register** published on May 9, 2001, of principal newspapers to be utilized for publishing notice of proposed actions and of decisions subject to appeal under 36 CFR part 215. The list of newspapers to be used for 215 notice and decision is corrected.

DATES: Use of these newspapers for purposes of publishing legal notice of decisions subject to appeal under 36 CFR part 217 and the use of the corrected newspaper listed under 36 CFR part 215 shall begin on or after the date of this publication.

FOR FURTHER INFORMATION CONTACT: Norm Heintz, Acting Regional Appeals Coordinator, Southern Region, Planning, 1720 Peachtree Road, NW., Atlanta, Georgia 30309, Phone: 404–347–5235.

SUPPLEMENTARY INFORMATION: Deciding Officers in the Southern Region will give legal notice of decisions subject to appeal under 36 CFR part 217 in the following newspapers which are listed by Forest Service Administrative unit. Where more than one newspaper is listed for any unit, the first newspaper listed is the principal newspaper that will be utilized for publishing the legal notice of decisions. Additional newspapers listed for a particular unit are those newspapers the Deciding Officer expects to use for purposes of providing additional notice. The timeframe for appeal shall be based on the date of publication of the legal notice of the decision in the principal newspaper. The following newspapers will be used to provide notice.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No.1202]

Grant of Authority for Subzone Status, United Chemi-Con, Inc. (Aluminum Electrolytic Capacitors), Lansing, North Carolina

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones Act provides for ". . . the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," and authorizes the Foreign-Trade Zones Board (the Board) to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs ports of entry;

Whereas, the Board's regulations (15 CFR part 400) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and when the activity results in a significant public benefit and is in the public interest;

Whereas, the Piedmont Triad Partnership, grantee of Foreign-Trade Zone 230 (Greensboro, North Carolina), has made application for authority to establish special-purpose subzone status at the aluminum electrolytic capacitor manufacturing plant of United Chemi-Con, Inc., located in Lansing, North Carolina (FTZ Docket 25–2001, filed 6–18–2001);

Whereas, notice inviting public comment was given in the **Federal Register** (66 FR 33948, 6–26–2001); and,

Whereas, the Board adopts the findings and recommendations of the examiner's report, and finds that the requirements of the FTZ Act and Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby grants authority for subzone status at the aluminum electrolytic capacitor manufacturing plant of United Chemi-Con, Inc., located in Lansing, North Carolina (Subzone 230A), at the location described in the application, subject to the FTZ Act and the Board's regulations, including section 400.28.

Signed at Washington, DC, this 21st day of November 2001.

Faryar Shirzad,

Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–866]

Notice of Amended Final Determination of Sales at Less Than Fair Value: Certain Folding Gift Boxes From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of amended final determination of sales at less than fair value.

EFFECTIVE DATE: December 5, 2001.

SUMMARY: We published in the **Federal Register** our final determination for the investigation of certain folding gift boxes from the People's Republic of China on November 20, 2001. See *Notice of Final Determination of Sales at Less Than Fair Value: Certain Certain Folding Gift Boxes from the People's Republic of China*, 66 FR 50408 (November 20, 2001). We are amending our final determination to correct ministerial errors discovered by Red Point Paper Products, Ltd.

FOR FURTHER INFORMATION CONTACT: Thomas Schauer or George Callen, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–0410 or (202) 482–0180, respectively.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Tariff Act) by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations refer to 19 CFR part 351 (2000).

Background

On November 13, 2001, the Department determined that certain folding gift boxes from the People's Republic of China are being, or are likely to be, sold in the United States at less than fair value (LTFV), as provided in section 735(a) of the Tariff Act. See *Notice of Final Determination of Sales at Less Than Fair Value: Certain Certain Folding Gift Boxes from the People's Republic of China*, 66 FR 50408 (November 20, 2001) (*Final Determination*). On November 19, 2001, respondent Red Point Paper Products Ltd. (Red Point) timely filed an

allegation that the Department had made two ministerial errors in its final determination.

Red Point's submission alleges the following errors: (1) The Department inadvertently used the value of labor for 1998 rather than 1999 as published on the Department's web site, and (2) the Department inadvertently deducted movement expenses incurred by Red Point's unaffiliated customer from the export price.

On November 26, 2001, Harvard Folding Box Company and Field Container Company, LP (collectively, the petitioners), submitted comments rebutting Red Point's ministerial-error allegations. The petitioners argue that Red Point's allegations are untimely arguments for methodological changes rather than ministerial-error allegations. With regard to labor valuation, the petitioners argue that Red Point's allegation is an untimely argument as to which surrogate value the Department should use to value labor inputs. With regard to movement expenses, the petitioners contend that the Department used the same methodology in the *Final Determination* as it used in the *Preliminary Determination* and that Red Point did not comment upon the Department's deduction of these movement expenses in its case brief. The petitioners contend that Red Point is asking the Department, under the guise of correcting a ministerial error, to change a clearly articulated methodology and argue that the Department should not do so because the alleged errors were methodological choices, not ministerial errors.

No other party alleged that there were ministerial errors in the *Final Determination* or commented about Red Point's allegations.

Scope of the Investigation

The products covered by this investigation are certain folding gift boxes. Certain folding gift boxes are a type of folding or knock-down carton manufactured from paper or paperboard. Certain folding gift boxes are produced from a variety of recycled and virgin paper or paperboard materials, including, but not limited to, clay-coated paper or paperboard and kraft (bleached or unbleached) paper or paperboard. The scope of the investigation excludes gift boxes manufactured from paper or paperboard of a thickness of more than 0.8 millimeters, corrugated paperboard, or paper mache. The scope of the investigation also excludes those gift boxes for which no side of the box, when assembled, is at least nine inches in length.

Certain folding gift boxes are typically decorated with a holiday motif using various processes, including printing, embossing, debossing, and foil stamping, but may also be plain white or printed with a single color. The subject merchandise includes certain folding gift boxes, with or without handles, whether finished or unfinished, and whether in one-piece or multi-piece configuration. One-piece gift boxes are die-cut or otherwise formed so that the top, bottom, and sides form a single, contiguous unit. Two-piece gift boxes are those with a folded bottom and a folded top as separate pieces. Certain folding gift boxes are generally packaged in shrink-wrap, cellophane, or other packaging materials, in single or multi-box packs for sale to the retail customer. The scope of the investigation excludes folding gift boxes that have a retailer's name, logo, trademark or similar company information printed prominently on the box's top exterior (such folding gift boxes are often known as "not-for-resale" gift boxes or "give-away" gift boxes and may be provided by department and specialty stores at no charge to their retail customers). The scope of the investigation also excludes folding gift boxes where both the outside of the box is a single color and the box is not packaged in shrink-wrap, cellophane, other resin-based packaging films, or paperboard.

Imports of the subject merchandise are currently classified under *Harmonized Tariff Schedule of the United States* (HTSUS) subheadings 4819.20.00.40 and 4819.50.40.60. These subheadings also cover products that are outside the scope of this investigation. Furthermore, although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

Ministerial Error

The Department's regulations define a ministerial error as one involving "addition, subtraction, or other arithmetic function, clerical error resulting from inaccurate copying, duplication or the like, and any other similar type of unintentional error which the Secretary considers ministerial." See 19 CFR 351.224(f).

After reviewing Red Point's allegations we have determined, in accordance with 19 CFR 351.224, that the *Final Determination* includes ministerial errors. We agree with Red Point that we should not have deducted the movement expenses incurred by Red Point's unaffiliated customer. These expenses, which include international freight, marine insurance, U.S. inland freight, U.S. brokerage & handling expenses, and U.S. Customs duties, were incurred by Lindy Bowman, not Red Point. See Red Point verification report dated September 13, 2001, at page 7 and Lindy Bowman verification report dated September 17, 2001, at page 4. We should have only deducted those movement expenses incurred by Red Point, not those incurred by its U.S. customer. Contrary to the petitioners' assertion, this constitutes an unintentional error on our part. Accordingly, we have corrected this ministerial error.

We also agree with Red Point that we inadvertently used the labor value for 1998 in the *Final Determination*. The labor value for 1999 to which Red Point refers was published on the Department's website in September 2001 and, therefore, was available for our use in the *Final Determination*. See *http://ia.ita.doc.gov/wages/*. Furthermore, we disagree with the petitioners' characterization that Red Point's allegation is an untimely argument as to which surrogate value the Department should use for labor. The Department develops the surrogate value for the applicable labor calculations; it is not submitted by interested parties (as are most surrogate values). Finally, the revised labor rate corresponds more closely in time with the period of investigation than the surrogate value we used in the *Preliminary Determination*. Thus, we should have used the revised surrogate value for labor in the *Final Determination*. Our use of the same labor rate we used in the *Preliminary Determination* was unintentional. Accordingly, we have corrected this ministerial error.

Amended Final Determination

In accordance with 19 CFR 351.224(e), we are amending the final determination of the antidumping duty investigation of certain folding gift boxes from the People's Republic of China. For this amended final determination, we did not deduct the aforementioned movement expenses incurred by Lindy Bowman from the U.S. price and we have used the revised surrogate value for labor. The revised final weighted-average dumping margins for Red Point is 8.90 percent. The weighted-average dumping margins for all other companies remain unchanged.

Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Tariff Act, we are directing the United States Customs

Service (Customs) to continue suspending liquidation on all imports of the subject merchandise from the People's Republic of China. Customs shall require a cash deposit or the posting of a bond equal to the weighted-average amount by which normal value exceeds the export price as indicated in the chart above. These suspension-of-liquidation instructions will remain in effect until further notice.

International Trade Commission Notification

In accordance with section 735(d) of the Tariff Act, we have notified the International Trade Commission of our amended final determination.

This determination is issued and published in accordance with section 735(d) and 777(i)(1) of the Tariff Act of 1930, as amended.

Dated: November 29, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

[FR Doc. 01–30169 Filed 12–4–01; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–489–807]

Certain Steel Concrete Reinforcing Bars from Turkey; Notice of Extension of Time Limit for Preliminary Results in Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 5, 2001.

SUMMARY: The Department of Commerce is extending the time limit for completion of the preliminary results of the administrative review of the antidumping duty order on certain steel concrete reinforcing bars from Turkey. The period of review is April 1, 2000, through March 31, 2001.

FOR FURTHER INFORMATION CONTACT: Irina Itkin or Elizabeth Eastwood at (202) 482–0656 or (202) 482–3874, respectively, Office of AD/CVD Enforcement, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are to 19 CFR part 351 (2001).

SUPPLEMENTARY INFORMATION: On May 23, 2001, the Department published a notice of initiation of administrative review of the antidumping duty order on certain steel concrete reinforcing bars from Turkey. The period of review is April 1, 2000, through March 31, 2001. The review covers three producers/exporters of the subject merchandise to the United States.

Pursuant to section 751(a)(3)(A) of the Act, the Department shall make a preliminary determination in an administrative review of an antidumping order within 245 days after the last day of the anniversary month of the date of publication of the order. The Act further provides, however, that the Department may extend the 245-day period to 365 days if it determines it is not practicable to complete the review within the foregoing time period. Because it is not practicable to complete this administrative review within the time limit mandated by section 751(a)(3)(A) of the Act, the Department is extending the time limit for completion of the preliminary results. This review involves a number of complicated issues including high inflation in Turkey during the period of review. Because we need additional time for our analysis, we have extended the deadline until April 30, 2002.

This extension is in accordance with section 751(a)(3)(A) of the Act (19 U.S.C. 1675(a)(3)(A)) and 19 CFR 351.213(h)(2).

Dated: November 29, 2001.

Richard W. Moreland,

Deputy Assistant Secretary for Import Administration.

University of Connecticut, et al.; Notice of Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in Suite 4100W, Franklin Court Building, U.S. Department of Commerce, 1099 14th Street NW., Washington, DC.

Docket Number: 01–017. *Applicant:* University of Connecticut, Storrs, CT 06269–3136. *Instrument:* Electron Microscope, Model JEM–2010. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* See notice at 66 FR 55913, November 5, 2001. *Order Date:* December 8, 2001.

Docket Number: 01–019. *Applicant:* University of California, Berkeley, CA 94720. *Instrument:* Electron Microscope, Model CM200 FEG. *Manufacturer:* FEI Company, The Netherlands. *Intended Use:* See notice at 66 FR 55913, November 5, 2001. *Order Date:* May 23, 2001.

Docket Number: 01–021. *Applicant:* Baylor College of Medicine, Houston, TX 77030. *Instrument:* Electron Microscope, Model JEM–2010F and Accessories. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* See notice at 66 FR 55914, November 5, 2001. *Order Date:* September 20, 2001.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered. Reasons: Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States at the time of order of each instrument.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Deep Seabed Mining: Proposed Extension and Revision of Exploration License

AGENCY: National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Notice of Receipt of Application to Extend Deep Seabed Mining Exploration License USA–1 and Revise Exploration Plan.

SUMMARY: On September 20, 2001, Ocean Minerals Company (OMCO) submitted to the National Oceanic and Atmospheric Administration (NOAA) an application for a five-year extension of Deep Seabed Mining Exploration License USA–1, pursuant to sections 105(c)(2) and 107(a) of the Deep Seabed Hard Mineral Resources (DSHMRA, 30 U.S.C. 1401 *et seq.*) and 15 CFR 970.515. OMCO has also proposed related exploration plan revisions.

NOAA has determined that this proposal constitutes an application for a major but not a significant revision to the exploration plan and to the terms, conditions, and restrictions (TCRs) of the license under 15 CFR 970.513, and is commencing public review procedures as prescribed in 15 CFR 970.514(b). Pursuant to the DSHMRA and 15 CFR part 970, on August 29, 1984, NOAA issued a license to OMCO to engage in deep seabed mining exploration in the Clarion-Clipperton Fracture Zone area of the Northeastern Equatorial Pacific Ocean. Since that time, the licensee, subject to the TCRs of the license and the regulatory requirements, has diligently pursued the activities approved in the exploration plan of the license, directed toward application for a commercial permit.

In 1991, NOAA approved a revision to the exploration plan for USA–I and extended the original license for an additional five years. This exploration plan is a two-phased plan. During Phase I, OMCO's activities are designed to monitor legal, technical and political developments pertaining to deep seabed mining; analyze environmental and nodule resource data; and, reevaluate the potential for commercial mining. During Phase II OMCO's activities are directed toward survey operations, upgrading the exploration ship and equipment, and delineation of the ore body.

OMCO is applying for a five-year extension of the license based on significantly changed market conditions, pursuant to 15 CFR 970.515. Section 107(a) of the DSHMRA provides that the Administration shall extend a license, on terms consistent with the Act and NOAA's regulations, if the licensee has complied with the license and associated exploration plan. Section 105(c)(2) of the DSHMRA authorizes NOAA to approve a license revision upon a finding that the revision will comply with the requirements of the Act and implementing regulations. A revision to the exploration plan is being requested to reflect accomplishment of objectives in Phase I of OMCO's current plan. For example, the substantial amounts of data received as a result of the exchange of exploration data between consortia during settlement of overlapping sites is sufficient to determine if and at which locations attractive mine sites occur in USA–I. This allows survey operations and upgrading of the mine ship and equipment to be delayed until Phase II when detailed ore body delineation occurs in conjunctions with the initiation of scale-up pilot plant operations.

This revision requests an extension of the term of the license until 2005 and proposes to extend Phase I for five years and to delay the initiation of the survey operations, ore body delineation and upgrade ship and equipment activities of Phase II. During the five-year extension. OMCO will monitor domestic and international activities in the scientific, engineering, and financial fields that are important to the future development of ocean mining. This will help to maintain industry viability and provide information necessary to assess the timeliness for inauguration of Phase II. OMCO will also continue to monitor new environmental studies and data collection.

Subject to 15 CFR 971.802, interested persons will be permitted to examine the application for extension at the below listed address.

DATES: Individuals or organizations wishing to submit comments on the application should do so by February 4, 2002.

ADDRESSES: Comments should be made to John King, Acting Chief, Coastal Programs Division (N/ORM3), Office of Ocean and Coastal Resource Management, NOS, NOAA, 1305 East-West Highway, Silver Spring, Maryland, tel. 301–713–3155 extension 195, e-mail *john.king@noaa.gov*.

FOR FURTHER INFORMATION CONTACT: Joseph Flanagan, Coastal Programs Division (NORM/3), Office of Ocean and Coastal Resource Management, NOS, NOAA, 1305 East-West Highway, Silver Spring, Maryland 20910, tel. (301) 713–3155, x201, e-mail *joseph.flanagan@noaa.gov*.

BILLING CODE 3510–08–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Hong Kong

November 29, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits.

EFFECTIVE DATE: January 1, 2002.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.gov. For information on embargoes and quota re-openings, refer to the Office of Textiles and Apparel website at http://otexa.ita.doc.gov.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The import restraint limits for textile products, produced or manufactured in Hong Kong and exported during the period January 1, 2002 through December 31, 2002 are based on limits notified to the Textiles Monitoring Body pursuant to the Uruguay Round Agreement on Textiles and Clothing (ATC).

Pursuant to the provisions of the ATC, the third stage of the integration of textile and apparel products into the General Agreement on Tariffs and Trade 1994 will take place on January 1, 2002 (see 60 FR 21075, published on May 1, 1995). Accordingly, certain previously restrained categories have been modified or eliminated and certain limits have been revised. Integrated products will no longer be subject to quota.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish the 2002 limits. These limits have been increased, variously, for adjustments permitted under the flexibility provisions of the ATC.

A description of the textile and apparel categories in terms of HTS

numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 65 FR 82328, published on December 28, 2000). Information regarding the 2002 CORRELATION will be published in the Federal Register.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 29, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 2002, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Hong Kong and exported during the twelve-month period beginning on January 1, 2002 and extending through December 31, 2002, in excess of the following levels of restraint:

Category	Twelve-month restraint limit
Group I	
200–220, 224–227, 300–326, 360–363, 369(1)[1], 369pt.[2], 400–414, 469pt.[3], 603, 604, 611–620, 624–629 and 666pt.[4], as a group.	172,957,184 square meters equivalent.
Sublevels in Group I	
219	49,169,630 square meters.
218/225/317/326	81,007,688 square meters of which not more than 4,461,587 square meters shall be in Category 218(1)[5] (yarn dyed fabric other than denim and jacquard).
611	7,752,255 square meters.
617	4,891,128 square meters.
Group I subgroup	
200, 226/313, 314, 315, 369(1) and 604, as a group.	132,355,033 square meters equivalent.
Within Group I subgroup	
200	423,920 kilograms.
226/313	88,199,757 square meters.
314	23,786,416 square meters
315	11,760,084 square meters.
369(1) (shoptowels)	966,440 kilograms.
604	290,994 kilograms.
Group II	
237, 239pt.[6], 332–348, 351, 352, 359(1)[7], 359(2)[8], 359pt.[9], 433–438, 440–448, 459pt.[10], 633–648, 651, 652, 659(1)[11], 659(2)[12], 659pt.[13], and 443/444/643/644(1), as a group.	894,539,952 square meters equivalent.
Sublevels in Group II	
237	1,421,853 dozen.
331pt.[14]	1,596,885 dozen pairs.
333/334	335,135 dozen.
335	355,572 dozen.
338/339[15] (shirts and blouses other than tank tops and tops, knit).	3,022,255 dozen.
338/339(1)[16] (tank tops and knit tops).	2,270,635 dozen.
340	2,894,127 dozen.
345	509,794 dozen.
347/348	7,007,815 dozen of which not more than 6,917,815 dozen shall be in Categories 347–W/348–W[17]; and not more than 5,242,583 dozen shall be in Category 348–W.
352	8,363,147 dozen.
359(1) (coveralls, overalls and jumpsuits).	712,967 kilograms.
359(2) (vests)	1,485,971 kilograms.
433	11,176 dozen.
434	11,996 dozen.
435	79,563 dozen.
436	103,627 dozen.
438	851,068 dozen.
442	99,127 dozen.
443	65,381 numbers.
444	44,887 numbers.
445/446	1,406,700 dozen.
447/448	70,743 dozen.
631pt.[18]	145,526 dozen pairs.
633/634/635	1,503,252 dozen of which not more than 562,250 dozen shall be in Categories 633/634; and not more than 1,154,327 dozen shall be in Category 635.
638/639	5,073,739 dozen.
641	876,720 dozen.
644	53,524 numbers.
645/646	1,390,617 dozen.
647	656,465 dozen.
648	1,249,850 dozen of which not more than 1,235,060 dozen shall be in Category 648–W[19]
652	5,737,511 dozen.
659(1) (coveralls, overalls and jumpsuits).	788,016 kilograms.
659(2) (swimsuits)	333,759 kilograms.
443/444/643/644(1) (made-to-measure suits).	62,109 numbers.
Group II subgroup	
336, 341, 342, 351, 636, 640, 642 and 651, as a group.	165,774,989 square meters equivalent.
Within Group II subgroup	
336	274,617 dozen.
341	2,929,522 dozen.
342	623,158 dozen.
351	1,237,298 dozen.
636	369,586 dozen.
640	1,110,296 dozen.
642	293,909 dozen.
651	400,253 dozen.
Group III–only 852	10,686,085 square meters equivalent.
Limits not in a group	
845(1)[20] (sweaters made in Hong Kong).	1,136,476 dozen.
845(2)[21] (sweaters assembled in Hong Kong from knit-to-shape components, knit elsewhere).	2,720,291 dozen.
846(1)[22] (sweaters made in Hong Kong).	183,779 dozen.
846(2)[23] (sweaters assembled in Hong Kong from knit-to-shape components, knit elsewhere).	442,838 dozen.

[1] Category 369(1): only HTS number 6307.10.2005.

[2] Category 369pt.: all HTS numbers except 4202.12.4000, 4202.12.8020, 4202.12.8060, 4202.22.4020, 4202.22.4500, 4202.22.8030, 4202.32.4000, 4202.32.9530, 4202.92.1500, 4202.92.3016, 4202.92.6091, 5601.10.1000, 5601.21.0090, 5701.90.1020, 5701.90.2020, 5702.10.9020, 5702.39.2010, 5702.49.1020, 5702.49.1080, 5702.59.1000, 5702.99.1010, 5702.99.1090, 5705.00.2020, 5805.00.3000, 5807.10.0510, 5807.90.0510, 6301.30.0010, 6301.30.0020, 6302.51.1000, 6302.51.2000, 6302.51.3000, 6302.51.4000, 6302.60.0010, 6302.60.0030, 6302.91.0005, 6302.91.0025, 6302.91.0045, 6302.91.0050, 6302.91.0060, 6303.11.0000, 6303.91.0010, 6303.91.0020, 6304.91.0020, 6304.92.0000, 6305.20.0000, 6306.11.0000, 6307.10.1020, 6307.10.1090, 6307.90.3010, 6307.90.4010, 6307.90.5010, 6307.90.8910, 6307.90.8945, 6307.90.9905, 6307.90.9982, 6406.10.7700, 9404.90.1000, 9404.90.8040, 9404.90.9505 and HTS number in 369(1).

[3] Category 469pt.: all HTS numbers except 5601.29.0020, 5603.94.1010, 6304.19.3040, 6304.91.0050, 6304.99.1500, 6304.99.6010, 6308.00.0010 and 6406.10.9020.

[4] Category 666pt.: all HTS numbers except 5805.00.4010, 6301.10.0000, 6301.40.0010, 6301.40.0020, 6301.90.0010, 6302.53.0010, 6302.53.0020, 6302.53.0030, 6302.93.1000, 6302.93.2000, 6303.12.0000, 6303.19.0010, 6303.92.1000, 6303.92.2010, 6303.92.2020, 6303.99.0010, 6304.11.2000, 6304.19.1500, 6304.19.2000, 6304.91.0040, 6304.93.0000, 6304.99.6020, 6307.90.9984, 9404.90.8522 and 9404.90.9522.

[5] Category 218(1): all HTS numbers except 5209.42.0060, 5209.42.0080, 5211.42.0060, 5211.42.0080, 5514.32.0015 and 5516.43.0015.

[6] Category 239pt.: only HTS number 6209.20.5040 (diapers).

[7] Category 359(1): only HTS numbers 6103.42.2025, 6103.49.8034, 6104.62.1020, 6104.69.8010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025 and 6211.42.0010.

[8] Category 359(2): only HTS numbers 6103.19.2030, 6103.19.9030, 6104.12.0040, 6104.19.8040, 6110.20.1022, 6110.20.1024, 6110.20.2030, 6110.20.2035, 6110.90.9044, 6110.90.9046, 6201.92.2010, 6202.92.2020, 6203.19.1030, 6203.19.9030, 6204.12.0040, 6204.19.8040, 6211.32.0070 and 6211.42.0070.

[9] Category 359pt.: all HTS numbers except 6115.19.8010, 6117.10.6010, 6117.20.9010, 6203.22.1000, 6204.22.1000, 6212.90.0010, 6214.90.0010, 6406.99.1550, 6505.90.1525, 6505.90.1540, 6505.90.2060, 6505.90.2545 and HTS numbers in 359(1) and 359(2).

[10] Category 459pt.: all HTS numbers except 6115.19.8020, 6117.10.1000, 6117.10.2010, 6117.20.9020, 6212.90.0020, 6214.20.0000, 6405.20.6030, 6405.20.6060, 6405.20.6090, 6406.99.1505, 6406.99.1560.

[11] Category 659(1): only HTS numbers 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.8038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.8014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.9010, 6211.33.0010, 6211.33.0017 and 6211.43.0010.

[12] Category 659(2): only HTS numbers 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020.

[13] Category 659pt.: all HTS numbers except 6115.11.0010, 6115.12.2000, 6117.10.2030, 6117.20.9030, 6212.90.0030, 6214.30.0000, 6214.40.0000, 6406.99.1510, 6406.99.1540 and HTS numbers in 659(1) and 659(2).

[14] Category 331pt.: all HTS numbers except 6116.10.1720, 6116.10.4810, 6116.10.5510, 6116.10.7510, 6116.92.6410, 6116.92.6420, 6116.92.6430, 6116.92.6440, 6116.92.7450, 6116.92.7460, 6116.92.7470, 6116.92.8800, 6116.92.9400 and 6116.99.9510.

[15] Categories 338/339: all HTS numbers except 6109.10.0018, 6109.10.0023, 6109.10.0060, 6109.10.0065, 6114.20.0005 and 6114.20.0010.

[16] Category 338/339(1): only HTS numbers 6109.10.0018, 6109.10.0023, 6109.10.0060, 6109.10.0065, 6114.20.0005 and 6114.20.0010.

[17] Category 347–W: only HTS numbers 6203.19.1020, 6203.19.9020, 6203.22.3020, 6203.22.3030, 6203.42.4005, 6203.42.4010, 6203.42.4015, 6203.42.4025, 6203.42.4035, 6203.42.4045, 6203.42.4050, 6203.42.4060, 6203.49.8020, 6210.40.9033, 6211.20.1520, 6211.20.3810 and 6211.32.0040; Category 348–W: only HTS numbers 6204.12.0030, 6204.19.8030, 6204.22.3040, 6204.22.3050, 6204.29.4034, 6204.62.3000, 6204.62.4005, 6204.62.4010, 6204.62.4020, 6204.62.4030, 6204.62.4040, 6204.62.4050, 6204.62.4055, 6204.62.4065, 6204.69.6010, 6204.69.9010, 6210.50.9060, 6211.20.1550, 6211.20.6810, 6211.42.0030 and 6217.90.9050.

[18] Category 631pt.: all HTS numbers except 6116.10.1730, 6116.10.4820, 6116.10.5520, 6116.10.7520, 6116.93.8800, 6116.93.9400, 6116.99.4800, 6116.99.5400 and 6116.99.9530.

[19] Category 648–W: only HTS numbers 6204.23.0040, 6204.23.0045, 6204.29.2020, 6204.29.2025, 6204.29.4038, 6204.63.2000, 6204.63.3000, 6204.63.3510, 6204.63.3530, 6204.63.3532, 6204.63.3540, 6204.69.2510, 6204.69.2530, 6204.69.2540, 6204.69.2560, 6204.69.6030, 6204.69.9030, 6210.50.5035, 6211.20.1555, 6211.20.6820, 6211.43.0040 and 6217.90.9060.

[20] Category 845(1): only HTS numbers 6103.29.2074, 6104.29.2079, 6110.90.9024, 6110.90.9042 and 6117.90.9015.

[21] Category 845(2): only HTS numbers 6103.29.2070, 6104.29.2077, 6110.90.9022 and 6110.90.9040.

[22] Category 846(1): only HTS numbers 6103.29.2068, 6104.29.2075, 6110.90.9020 and 6110.90.9038.

[23] Category 846(2): only HTS numbers 6103.29.2066, 6104.29.2073, 6110.90.9018 and 6110.90.9036.

The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 2001 shall be charged to the applicable category limits for that year (see directive dated November 28, 2000) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

Products to be integrated into the General Agreement on Tariffs and Trade 1994 on January 1, 2002 (listed in the Federal Register notice published on May 1, 1995, 60 FR 21075) which are exported during 2001 shall be charged to the applicable 2001 limits to the extent of any unfilled balances. After January 1, 2002, should those 2001 limits be filled, such products shall no longer be charged to any limit.

The conversion factors for merged Categories 333/334, 633/634/635 and 638/639 are 33, 33.90 and 13, respectively. The conversion factor for Category 239pt. is 8.79.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 01–30045 Filed 12–4–01; 8:45 am]

BILLING CODE 3510–DR–S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textiles and Textile Products and Silk Blend and Other Vegetable Fiber Apparel Produced or Manufactured in the Philippines

November 29, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 5, 2001.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.ustreas.gov. For information on embargoes and quota re-openings, refer to the Office of Textiles and Apparel website at http://otexa.ita.doc.gov.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The current limit for Category 335 is being increased for special swing from Group II, reducing the limit for Group II to account for the special swing being applied to Category 335.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 65 FR 82328, published on December 28, 2000). Also

see 65 FR 69742, published on November 20, 2000.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 29, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on November 14, 2000, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man–made fiber textiles and textile products and silk blend and other vegetable fiber apparel, produced or manufactured in the Philippines and exported during the twelve-month period which began on January 1, 2001 and extends through December 31, 2001.

Effective on December 5, 2001, you are directed to adjust the limits for the following categories, as provided for under the Uruguay Round Agreement on Textiles and Clothing:

Category	Adjusted twelve-month limit [1]
Level in Group I	
335	161,362 dozen.
Group II	
200–227, 300–326, 332, 359–O [2], 360, 362, 363, 369–O [3], 400–414, 434–438, 440, 442, 444, 448, 459pt. [4], 464, 469pt. [5], 600–607, 613–629, 644, 659–O [6], 666, 669–O [7], 670–O [8], 831, 833–838, 840–846, 850–858 and 859pt. [9], as a group.	253,535,513 square meters equivalent.

[1] The limits have not been adjusted to account for any imports exported after December 31, 2000.

[2] Category 359–O: all HTS numbers except 6103.42.2025, 6103.49.8034, 6104.62.1020, 6104.69.8010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025, 6211.42.0010 (Category 359–C); and 6406.99.1550 (359pt.).

[3] Category 369–O: all HTS numbers except 6307.10.2005 (Category 369–S); 5601.10.1000, 5601.21.0090, 5701.90.1020, 5701.90.2020, 5702.10.9020, 5702.39.2010, 5702.49.1020, 5702.49.1080, 5702.59.1000, 5702.99.1010, 5702.99.1090, 5705.00.2020 and 6406.10.7700 (Category 369pt.).

[4] Category 459pt.: all HTS numbers except 6405.20.6030, 6405.20.6060, 6405.20.6090, 6406.99.1505 and 6406.99.1560.

[5] Category 469pt.: all HTS numbers except 5601.29.0020, 5603.94.1010 and 6406.10.9020.

[6] Category 659–O: all HTS numbers except 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.8038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.8014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.9010, 6211.33.0010, 6211.33.0017, 6211.43.0010 (Category 659–C); 6502.00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5090, 6505.90.6090, 6505.90.7090, 6505.90.8090 (Category 659–H); 6406.99.1510 and 6406.99.1540 (Category 659pt.).

[7] Category 669–O: all HTS numbers except 6305.32.0010, 6305.32.0020, 6305.33.0010, 6305.33.0020, 6305.39.0000 (Category 669–P); 5601.10.2000, 5601.22.0090, 5607.49.3000, 5607.50.4000 and 6406.10.9040 (Category 669pt.).

[8] Category 670–O: all HTS numbers except 4202.12.8030, 4202.12.8070, 4202.92.3020, 4202.92.3031, 4202.92.9026 and 6307.90.9907 (Category 670–L).

[9] Category 859pt.: only HTS numbers 6115.19.8040, 6117.10.6020, 6212.10.5030, 6212.10.9040, 6212.20.0030, 6212.30.0030, 6212.90.0090, 6214.10.2000 and 6214.90.0090.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,
D. Michael Hutchinson,
Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Poland

November 29, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits.

EFFECTIVE DATE: January 1, 2002.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.gov. For information on embargoes and quota re-openings, refer to the Office of Textiles and Apparel website at http://otexa.ita.doc.gov.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The import restraint limits for textile products, produced or manufactured in Poland and exported during the period January 1, 2002 through December 31, 2002 are based on the limits notified to the Textiles Monitoring Body pursuant to the Uruguay Round Agreement on Textiles and Clothing (ATC).

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish the limits for the 2002 period.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 65 FR 82328, published on December 28, 2000). Information regarding the 2002 CORRELATION will be published in the **Federal Register** at a later date.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 29, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 2002, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Poland and exported during the twelve-month period beginning on January 1, 2002 and extending through December 31, 2002, in excess of the following levels of restraint:

Category	Twelve-month restraint limit
335	292,701 dozen.
338/339	3,152,180 dozen.
410	2,876,059 square meters.
433	20,310 dozen.
434	11,078 dozen.
435	14,496 dozen.
443	241,589 numbers.
611	9,009,609 square meters.
645/646	461,570 dozen.

The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 2001 shall be charged to the applicable category limits for that year (see directive dated October 26, 2000) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Wool Textile Products Produced or Manufactured in the Slovak Republic

November 29, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits.

EFFECTIVE DATE: January 1, 2002.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.gov. For information on embargoes and quota re-openings, refer to the Office of Textiles and Apparel website at http://otexa.ita.doc.gov.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The import restraint limits for textile products, produced or manufactured in the Slovak Republic and exported during the period January 1, 2002 through December 31, 2002 are based on limits notified to the Textiles Monitoring Body pursuant to the Uruguay Round Agreement on Textiles and Clothing (ATC).

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish the 2002 limits.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 65 FR 82328, published on December 28, 2000). Information regarding the availability of the 2002 CORRELATION will be published in the **Federal Register** at a later date.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 29, 2001.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 2002, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in the following categories, produced or manufactured in the Slovak Republic and exported during the twelve-month period beginning on January 1, 2002 and extending through December 31, 2002 in excess of the following limits:

Category	Twelve-month restraint limit
410	444,338 square meters.
433	12,410 dozen.
435	18,745 dozen.
443	103,679 numbers.

The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 2001 shall be charged to the applicable category limits for that year (see directive dated October 27, 2000) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Taiwan

November 29, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 5, 2001.

FOR FURTHER INFORMATION CONTACT: Roy Unger, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.gov. For information on embargoes and quota re-openings, refer to the Office of Textiles and Apparel website at http://otexa.ita.doc.gov.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The current limits for certain categories are being adjusted for carryforward, special shift and the partial undoing of special shift.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 65 FR 82328, published on December 28, 2000). Also

see 66 FR 11003, published on February 21, 2001.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 29, 2001.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on February 15, 2001, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Taiwan and exported during the twelve-month period which began on January 1, 2001 and extends through December 31, 2001.

Effective on December 5, 2001, you are directed to adjust the current limits for the following categories, as provided for under the terms of the current bilateral textile agreement:

Category	Twelve-month limit [1]
Group I	
200–224, 225/317/326, 226, 227, 229, 300/301/607, 313–315, 360–363, 369–L/670–L/870 [2], 369–S [3], 369–O [4], 400–414, 464–469, 600–606, 611, 613/614/615/617, 618, 619/620, 621, 623, 624, 625/626/627/628/629, 665, 666, 669–P [5], 669–T [6], 669–O [7], 670–H [8] and 670–O [9], as a group.	637,647,295 square meters equivalent.
Sublevels in Group I	
225/317/326	44,029,602 square meters.
619/620	16,298,603 square meters.
625/626/627/628/629	21,206,333 square meters.
Group II	
237, 239, 330–332, 333/334/335, 336, 338/339, 340–345, 347/348, 349, 350/650, 351, 352/652, 353, 354, 359–C/659–C [10], 359–H/659–H [11], 359–O [12], 431–444, 445/446, 447/448, 459, 630–632, 633/634/635, 636, 638/639, 640, 641–644, 645/646, 647/648, 649, 651, 653, 654, 659–S [13], 659–O [14], 831–844 and 846–859, as a group	748,129,292 square meters equivalent.
Sublevels in Group II	
331	452,617 dozen pairs.
338/339	1,048,319 dozen.
345	138,156 dozen.
347/348	1,368,978 dozen of which not more than 1,164,527 dozen shall be in Categories 347–W/348–W [15]
435	27,683 dozen.
438	30,823 dozen.
445/446	147,084 dozen.
631	5,615,350 dozen pairs.
647/648	5,602,291 dozen of which not more than 5,339,114 dozen shall be in Categories 647–W/648–W [16].
Within Group II Subgroup	
351	333,765 dozen.
447/448	22,728 dozen.
651	526,834 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 2000.

[2] Category 870; Category 369–L: only HTS numbers 4202.12.4000, 4202.12.8020, 4202.12.8060, 4202.92.1500, 4202.92.3016, 4202.92.6091 and 6307.90.9905; Category 670–L: only HTS numbers 4202.12.8030, 4202.12.8070, 4202.92.3020, 4202.92.3031, 4202.92.9026 and 6307.90.9907.

[3] Category 369–S: only HTS number 6307.10.2005.

[4] Category 369–O: all HTS numbers except 4202.12.4000, 4202.12.8020, 4202.12.8060, 4202.92.1500, 4202.92.3016, 4202.92.6091, 6307.90.9905 (Category 369–L); and 6307.10.2005 (Category 369–S).

[5] Category 669–P: only HTS numbers 6305.32.0010, 6305.32.0020, 6305.33.0010, 6305.33.0020 and 6305.39.0000.

[6] Category 669–T: only HTS numbers 6306.12.0000, 6306.19.0010 and 6306.22.9030.

[7] Category 669–O: all HTS numbers except 6305.32.0010, 6305.32.0020, 6305.33.0010, 6305.33.0020, 6305.39.0000 (Category 669–P); 6306.12.0000, 6306.19.0010 and 6306.22.9030 (Category 669–T).

[8] Category 670–H: only HTS numbers 4202.22.4030 and 4202.22.8050.

[9] Category 670–O: all HTS numbers except 4202.22.4030, 4202.22.8050 (Category 670–H); 4202.12.8030, 4202.12.8070, 4202.92.3020, 4202.92.3031, 4202.92.9026 and 6307.90.9907 (Category 670–L).

[10] Category 359–C: only HTS numbers 6103.42.2025, 6103.49.8034, 6104.62.1020, 6104.69.8010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025 and 6211.42.0010; Category 659–C: only HTS numbers 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.8038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.8014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.9010, 6211.33.0010, 6211.33.0017 and 6211.43.0010.

[11] Category 359–H: only HTS numbers 6505.90.1540 and 6505.90.2060; Category 659–H: only HTS numbers 6502.00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5090, 6505.90.6090, 6505.90.7090 and 6505.90.8090.

[12] Category 359–O: all HTS numbers except 6103.42.2025, 6103.49.8034, 6104.62.1020, 6104.69.8010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025 and 6211.42.0010 (Category 359–C); 6505.90.1540 and 6505.90.2060 (Category 359–H).

[13] Category 659–S: only HTS numbers 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020.

[14] Category 659–O: all HTS numbers except 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.8038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.8014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.9010, 6211.33.0010, 6211.33.0017 and 6211.43.0010 (Category 659–C); 6502.00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5090, 6505.90.6090, 6505.90.7090, 6505.90.8090 (Category 659–H); 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020 (Category 659–S).

[15] Category 347–W: only HTS numbers 6203.19.1020, 6203.19.9020, 6203.22.3020, 6203.22.3030, 6203.42.4005, 6203.42.4010, 6203.42.4015, 6203.42.4025, 6203.42.4035, 6203.42.4045, 6203.42.4050, 6203.42.4060, 6203.49.8020, 6210.40.9033, 6211.20.1520, 6211.20.3810 and 6211.32.0040; Category 348–W: only HTS numbers 6204.12.0030, 6204.19.8030, 6204.22.3040, 6204.22.3050, 6204.29.4034, 6204.62.3000, 6204.62.4005, 6204.62.4010, 6204.62.4020, 6204.62.4030, 6204.62.4040, 6204.62.4050, 6204.62.4055, 6204.62.4065, 6204.69.6010, 6204.69.9010, 6210.50.9060, 6211.20.1550, 6211.20.6810, 6211.42.0030 and 6217.90.9050.

[16] Category 647–W: only HTS numbers 6203.23.0060, 6203.23.0070, 6203.29.2030, 6203.29.2035, 6203.43.2500, 6203.43.3500, 6203.43.4010, 6203.43.4020, 6203.43.4030, 6203.43.4040, 6203.49.1500, 6203.49.2015, 6203.49.2030, 6203.49.2045, 6203.49.2060, 6203.49.8030, 6210.40.5030, 6211.20.1525, 6211.20.3820 and 6211.33.0030; Category 648–W: only HTS numbers 6204.23.0040, 6204.23.0045, 6204.29.2020, 6204.29.2025, 6204.29.4038, 6204.63.2000, 6204.63.3000, 6204.63.3510, 6204.63.3530, 6204.63.3532, 6204.63.3540, 6204.69.2510, 6204.69.2530, 6204.69.2540, 6204.69.2560, 6204.69.6030, 6204.69.9030, 6210.50.5035, 6211.20.1555, 6211.20.6820, 6211.43.0040 and 6217.90.9060.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Wool Textile Products Produced or Manufactured in Ukraine

November 29, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits.

EFFECTIVE DATE: January 1, 2002.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.gov. For information on embargoes and quota re-openings, refer to the Office of Textiles and Apparel website at http://otexa.ita.doc.gov.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The Bilateral Textile Agreement of July 22, 1998, as amended and extended by exchange of notes on September 19, 2000 and January 15, 2001, between the Governments of the United States and Ukraine establishes limits for certain wool textile products, produced or manufactured in Ukraine and exported during the period beginning on January 1, 2002 and extending through December 31, 2002.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish the 2002 limits.

These limits may be revised if Ukraine becomes a member of the World Trade Organization (WTO) and the United States applies the WTO agreement to Ukraine.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 65 FR 82328, published on December 28, 2000). Information regarding the availability of the 2002 CORRELATION will be published in the **Federal Register** at a later date.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 29, 2001.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Bilateral Textile Agreement of July 22, 1998, as amended and extended by exchange of notes on September 19, 2000 and January 15, 2001, between the Governments of the United States and Ukraine, you are directed to prohibit, effective on January 1, 2001, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in the following categories, produced or manufactured in Ukraine and exported during the twelve-month period beginning on January 1, 2002 and extending through December 31, 2002, in excess of the following levels of restraint:

Category	Twelve-month limit
435	97,527 dozen.
442	16,236 dozen.
444	70,359 numbers.
448	70,359 dozen.

The limits set forth above are subject to adjustment pursuant to the current bilateral agreement between the Governments of the United States and Ukraine.

These limits may be revised if Ukraine becomes a member of the World Trade Organization (WTO) and the United States applies the WTO agreement to Ukraine.

Products in the above categories exported during 2001 shall be charged to the applicable category limits for that year (see directive dated January 30, 2001) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

FR Doc. 01–30050 Filed 12–4–01; 8:45 am]

BILLING CODE 3510–DR–S

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amendment of Export Visa Requirements for Textiles and Textile Products Integrated into GATT 1994 in the Third Stage

November 29, 2001.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a Directive to the Commissioner of Customs amending export visa requirements.

EFFECTIVE DATE: January 1, 2002

FOR FURTHER INFORMATION CONTACT: Lori Mennitt, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–3400.

SUPPLEMENTARY INFORMATION: The World Trade Organization (WTO) Agreement on Textiles and Clothing provides for the staged integration of textiles and textile products into the General Agreement on Tariffs and Trade (GATT) 1994. The third stage of the integration will take place on January 1, 2002. The products to be integrated on January 1, 2002 were announced on April 26, 1995 (see 60 FR 21075, published on May 1, 1995).

This directive does not affect textile visas that may be required under the African Growth and Opportunity Act (AGOA).

The United States will not maintain visa requirements on textiles and textile products integrated on January 1, 2002 that are produced or manufactured in a WTO Member country. In the letter

published below, the Chairman of CITA directs the Commissioner of Customs to eliminate existing visa requirements for textiles and textile products integrated on January 1, 2002 and exported on or after that date, produced or manufactured in a WTO Member country. Existing visa requirements will be maintained for goods exported prior to January 1, 2002 and for goods that are not produced or manufactured in a WTO Member country.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 65 FR 82328, published on December 28, 2000). Information regarding the availability of the 2002 CORRELATION will be published in the **Federal Register** at a later date.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 29, 2001.

Commissioner of Customs
Department of the Treasury, Washington, DC 20229

Dear Commissioner: Pursuant to Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the World Trade Organization (WTO) Agreement on Textiles and Clothing, you are directed to amend the current visa requirements for certain textiles and textile products produced or manufactured in WTO Member countries and exported on or after January 1, 2002.

Effective on January 1, 2002, for goods exported on and after that date, export visas will not be required for textiles and textile products produced or manufactured in a WTO Member country and integrated into the General Agreement on Tariffs and Trade (GATT) 1994 on January 1, 2002.

The following entire textile categories will be integrated on January 1, 2002: 222, 223, 350, 431, 464, 600, 606, 607, 621, 622, 649, 650, 670, 800, 810, 831, 833, 834, 835, 836, 838, 840, 842, 843, 844, 847, 850, 851, 858, 870, and 871.

The following partial textile categories will be integrated on January 1, 2002: 331, 359, 369, 459, 469, 631, 659, 666, 669, and 859. A complete list of products in the partially integrated categories is attached to this letter. This listing is based on the 2001 Harmonized Tariff Schedule of the United States.

Export visas will continue to be required for non-integrated products, for products integrated on January 1, 2002 produced or manufactured in a country that is not a Member of the World Trade Organization, and for products integrated on January 1, 2002 that were exported prior to that date.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC01–561–001 FERC Form 561]

Information Collection Submitted for Review and Request for Comments

November 29, 2001.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of submission for review by the Office of Management and Budget (OMB) and request for comments.

SUMMARY: The Federal Energy Regulatory Commission (Commission) has submitted the energy information collection listed in this notice to the Office of Management and Budget (OMB) for review under provisions of Section 3507 of the Paperwork Reduction Act of 1995 (Pub. L. No. 104–13). Any interested person may file comments on the collection of information directly with OMB and should address a copy of those comments to the Commission as explained below. The Commission received no comments in response to an earlier **Federal Register** notice of May 8, 2001 (66 FR. 23240). The Commission has noted this fact in its submission to OMB.

DATES: Comments regarding this collection of information are best assured of having their full effect if received on or before January 4, 2002.

ADDRESSES: Address comments to Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Federal Energy Regulatory Commission, Desk Officer, 725 17th Street, NW., Washington, DC 20503. A copy of the comments should also be sent to Federal Energy Regulatory Commission, Office of the Chief Information Officer, Attention: Mr. Michael Miller, 888 First Street NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Michael Miller may be reached by telephone at (202)208–1415, by fax at (202)273–0873, and by e-mail: mike.miller@fer.fed.us.

SUPPLEMENTARY INFORMATION:

Description

The energy information collection submitted to OMB for review contains:

1. *Collection of Information:* FERC Form 561 "Annual Report of Interlocking Positions".

2. *Sponsor:* Federal Energy Regulatory Commission.

3. *Control No.:* OMB No. 1902–0099. The Commission is now requesting that OMB approve a three-year extension of the current expiration date, with no changes to the existing collection. This is a mandatory information collection requirement.

4. *Necessity of Collection of Information:* Submission of the information is necessary to fulfill the requirements of Section 305 of the Federal Power Act (FPA), as amended by Title II, Section 211 of the Public Utility Regulatory Policies Act of 1978 (PURPA). Submission of FERC Form 561 satisfies the FPA section 305(b) and (c) annual reporting requirements for public utility officers and directors to report officer and director positions they hold with financial institutions, insurance companies, utility equipment providers, utility fuel providers, and a utility's top twenty customers of electric energy. FPA Section 305(c)(3)(A) defines the public utilities who are required to file. FPA section 305(c)(2) requires that the filed information be made available to the public. FPA Section 305(c)(1) requires an annual filing deadline of April 30th. The necessary filing information, the required filers, the requirement to make the information available to the public and the filing deadline are all mandated by the FPA. The Commission is not empowered to amend or waive these statutory requirements. Requirements the Commission has the authority to amend, such as format of the filing itself and the number of required copies are found at 18 46.1 and 131.31.

The Commission has used the information filed in FERC Form 561 for the identification of: (1) Possible interlocking positions where the relationship is employed for the director's own benefit or profit, or for the benefit or profit of any other person or persons and to the detriment of the utility's, or the public interest; (2) the possible existence of control over a large number and geographically widespread public utilities by a small group of individuals; (3) the lack of arm's length dealings between public utilities and organizations furnishing financial services to consumers; and (4) the evasion by means of common control of competition resulting in higher costs and poorer services to consumers.

6. *Estimated Burden:* 400 total burden hours, 1,600 respondents, 1 response annually, .25 hours per response (average).

7. *Estimated Cost Burden to Respondents:* 400 hours ÷ 2,080 hours per year × $117,041 per year = $22,507, average cost per respondent = $14.

Statutory Authority: Sections 211 of the Public Utility Regulatory Policies Act of 1978 (PURPA) (16 U.S.C. 825d as amended and 16 U.S.C. 2601) and Section 305 of the Federal Power Act (16 U.S.C. 825d).

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP99–301–033]

ANR Pipeline Company; Notice of Negotiated Rate

November 29, 2001.

Take notice that on November 26, 2001, ANR Pipeline Company (ANR) tendered for filing three negotiated rate agreements between ANR and Chevron U.S.A. Inc. (Chevron) and three negotiate rate agreements between ANR and BHP Billiton Petroleum (Deepwater) Inc. (BHP) pursuant to ANR's Rate Schedules PTS–2, ITS, and ITS (Liquifiables). ANR tenders these agreements pursuant to its authority to enter into negotiated rate agreements. ANR requests that the Commission accept and approve the agreements to be effective December 1, 2001.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at http://www.ferc.gov using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for

assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02–25–000; Docket No. CP02–29–000; Docket No. CP02–30–000]

Copiah County Storage Company; Notice of Application

November 29, 2001.

Take notice that on November 14, 2001, Copiah County Storage Company (Copiah), 5400 Westheimer Court, Houston, Texas 77056–5310, filed in the captioned docket an application for a certificate of public convenience and necessity and related authorizations pursuant to section 7 of the Natural Gas Act, as amended, and the Commission's Rules and Regulations thereunder. Copiah requests authorization for the following:

(i) A certificate of public convenience and necessity pursuant to subpart A of part 157 authorizing Copiah to construct, own, operate, and maintain natural gas storage facilities capable of delivering 300,000 dekatherms per day, consisting of a storage cavern and other associated and appurtenant facilities;

(ii) A blanket construction certificate pursuant to subpart F of part 157 to permit Copiah to construct, acquire and operate additional facilities following construction of the facilities for which authorization under subpart A of part 157 is sought;

(iii) Authorization to provide storage services at market based rates; and

(iv) A blanket certificate pursuant to subpart G of part 284 authorizing Copiah to provide storage and hub services on behalf of others, and approval of the FERC Gas Tariff contained in Exhibit P, pursuant to which Copiah will provide such services consistent with Order Nos. 636 and 637, *et seq.*,

all as more thoroughly described in the application on file with the Commission and open to public inspection. This filing may be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (please call (202)208–2222 for assistance).

Copiah further requests that the Commission grant waivers of the following: (i) The requirement pursuant to § 284.7(e) that rates must be designed using a straight-fixed variable rate design methodology; (ii) the requirement pursuant to § 157.6(b)(8) to provide cost of service information necessary for determination of rate treatment; (iii) the requirement pursuant to § 157.14 to include in the application Exhibits K, L, N, and O; (iv) the accounting and reporting requirements under parts 201 and 260.2; (v) the requirement pursuant to § 157.14(a)(10) to provide total gas supply information; and (vi) all other regulations to the extent such waivers may be necessary in order to grant each of the authorizations requested in this application.

Copiah asks the Commission to issue a preliminary determination on non-environmental issues by February 20, 2002, and a final certificate order by July 24, 2002, so that Copiah will be able to commence storage service in February 2004 in order to provide its customers with storage services at the end of the 2003–2004 heating season.

The name, address, and telephone number of the person to whom correspondence and communications concerning this Application should be addressed is: Steven E. Tillman, Director of Regulatory Affairs, Copiah County Storage Company, P.O. Box 1642, Houston, Texas 77251–1642, Phone: (713) 627–5113, Fax: (713) 627–5947.

Copiah proposes to build and operate a natural gas storage facility, the Copiah Storage Project, in Copiah County, Mississippi, collectively referred to as the "Copiah Storage Project." In this application, Copiah requests authorization to develop the first of two possible caverns on the Copiah site. The proposed project will include the installation of approximately 13,350 horsepower of compression, development of an underground storage cavern, and as many as five common well sites.

The compressor site will provide compression for injection and withdrawal of natural gas to and from storage. The site of the compressor has been proposed to be as close to the cavern and fresh water/brine disposal wells as practical given the existing topography of the site. The compressor building will house three 4,450 HP turbocharged gas engine-driven Ariel reciprocating compressors along with ancillary support and control equipment, to provide a total of approximately 13,350 HP of compression.

The cavern will be created by solution mining using groundwater and will extend approximately 5,500 feet below the ground surface. The cavern that Copiah is seeking authorization to develop in this application, the Primary Cavern, will have an initial working storage capacity of approximately 3.3 billion cubic feet (Bcf), with approximately 300,000 Dekatherms per day (Dth/d) of deliverability capability and approximately 150,000 Dth/d of injection capability. Although Copiah is currently only seeking approval for development of one cavern at this time, Copiah identifies two cavern site locations in its application to allow for an alternative site in the event irreversible drilling problems are encountered at the primary site either due to geology or other complications.

The project also will include a series of wells, piping, valves, instruments, and controls to operate the solution mining and brine disposal activities associated with development of the gas storage cavern. Each well site will contain brine injection and/or freshwater withdrawal wells, along with associated ancillary facilities and service roadways.

The Copiah Storage Project has been designed as a natural gas storage and ultimately a hub services facility for injection, storage, and withdrawal of natural gas. Copiah's request for authorization is based on anticipated demand for its storage and hub services as well as market studies that project substantial growth in natural gas demand in the markets served by Copiah's customers. Due to Copiah's analysis of current and expected growth in demand for storage and hub services in the Gulf Coast region, Copiah anticipates that the Copiah Storage Project will become subscribed as capacity becomes available for service. Copiah states that the interest of the market in these services is reflected in the results of the Copiah open season during which Copiah received non-binding nominations from five potential customers for a total of approximately 6.5 Bcf of natural gas storage. The potential customers indicated an interest in signing contracts with an initial contract term of 5–10 years at the time that the Copiah facilities are close to being placed into service.

Copiah proposes to provide firm and interruptible services, which will enhance shipper options for the transportation and storage of natural gas. Copiah further proposes and requests Commission authorization to charge market-based rates for such services, which Copiah avers is appropriate as demonstrated by the

market power study included with the application.

Copiah has identified a pipeline lateral and a meter station that will be owned by a company other than Copiah and constructed in association with the Copiah Storage Project. Texas Eastern will construct, own and maintain an approximately 1.5 miles of 24-inch diameter pipeline lateral connecting Texas Eastern's 30-inch Line 14 in Copiah County, Mississippi to the Copiah Storage Project. In addition, Texas Eastern will construct, own and maintain a bi-directional meter station within the Copiah Storage Project property at a location directly adjacent to the compressor site at the terminus of the interconnection between the Copiah Storage Project and Texas Eastern's proposed 1.5-mile pipeline lateral. Texas Eastern is responsible for all appropriate federal and state filings and permits required for construction and operation of the proposed meter station and pipeline lateral. Texas Eastern has indicated to Copiah that the Texas Eastern meter station and lateral will be constructed pursuant to its blanket authority granted by the Commission in Docket No. CP82–535. Neither Texas Eastern nor Copiah are requesting authority to construct these facilities in the instant Copiah application.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before December 19, 2001, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission may issue a preliminary determination on non-environmental issues prior to the completion of its review of the environmental aspects of the project. This preliminary determination typically considers such issues as the need for the project and its economic effect on existing customers of the applicant, on other pipelines in the area, and on landowners and communities. For example, the Commission considers the extent to which the applicant may need to exercise eminent domain to obtain rights-of-way for the proposed project and balances that against the non-environmental benefits to be provided by the project. Therefore, if a person has comments on community and landowner impacts from this proposal, it is important either to file comments or to intervene as early in the process as possible.

Comments, protests, and interventions may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of the Commission's review process, a final Commission order approving or denying a certificate will be issued.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 184–065 California]

El Dorado Irrigation District; Notice of Public Meeting

November 29, 2001.

The Federal Energy Regulatory Commission (Commission) is reviewing the application for a new license for the El Dorado Project (FERC No. 184), which was filed on February 22, 2000. The El Dorado Project, licensed to the El Dorado Irrigation District (EID), is located on the South Fork American River, in El Dorado, Alpine, and Amador Counties, California. The project occupies lands of the Eldorado National Forest.

The EID, several state and federal agencies, and several non-governmental agencies have agreed to ask the Commission for time to work collaboratively with a facilitator to resolve certain issues relevant to this proceeding. The purpose of this meeting is to discuss the interests of the parties. We invite the participation of all interested governmental agencies, non-governmental organizations, and the general public in this meeting.

The meeting will be held on Monday, December 10 and Tuesday, December 11, 2001, from 9am until 4pm in the Sacramento Marriott, located at 11211 Point East Drive, Rancho Cordova, California.

For further information, please contact Elizabeth Molloy at (202) 208–0771 or John Mudre at (202) 219–1208.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP02–31–000]

Iroquois Gas Transmission System, L.P.; Notice of Application

November 29, 2001.

Take notice that on November 20, 2001, Iroquois Gas Transmission System, L.P. (Iroquois), One Corporate Drive, Suite 600, Shelton, Connecticut 06484, filed an application in the above-referenced docket number pursuant to Section 7(c) of the Natural Gas Act and Parts 157 of the Commission's Rules and Regulations, for a certificate of public convenience and necessity authorizing Iroquois to construct and operate its Brookfield Expansion Project (Brookfield Project). The application is on file with the Commission and open to public inspection. This filing may be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (please call (202) 208–2222 for assistance).

In order to implement the Brookfield Project, Iroquois requests authorization to construct and operate a new compressor unit, with 10,000 (nominal) horsepower, at a proposed compressor station to be located in Brookfield, Connecticut. Iroquois has conducted non-binding open seasons for additional firm transportation capacity on its system. In addition, from September 5, 2001 through September 19, 2001, Iroquois solicited its existing customers for permanently released capacity that could be used by the expansion shippers. Because no shipper released capacity, Iroquois has executed Precedent Agreements with Astoria Energy Company, L.P. (Astoria Energy) and PPL EnergyPlus, LLC (PPL Energy) for firm transportation service commencing September 1, 2003. The proposed facilities are designed to provide up to 60,000 dekatherms per day of firm transportation capacity to Astoria Energy and up to 25,000 dekatherms per day of firm transportation capacity to PPL Energy. SCS Energy, LLC (SCS), an affiliate of Astoria Energy, is developing a 1,000 MW electric generation facility in Astoria, Queens, New York with a proposed in-service date of November 1, 2003. PPL Energy is a marketing company seeking firm natural gas service to South Commack, New York.

Iroquois states that the construction and operation of the Brookfield Project will have minimal impact on landowners and the environment. Iroquois indicates that minimal tree clearing will take place at the compressor station site, which will provide an additional barrier to minimize potential visual and/or noise impacts of the new compressor unit.

The total cost of the Brookfield Project is estimated to be approximately $24,637,000. Iroquois proposes to charge its Part 284 open-access RTS rates for the new service and to roll the costs of the project into its first Section 4 rate proceeding which becomes effective after the in-service date of the proposed facilities.

Any questions regarding the application be directed to Jeffrey A. Bruner, Vice President, General Counsel and Secretary for Iroquois, One Corporate Drive, Suite 600, Shelton, Connecticut 06484, at (203) 925–7200, or Donald F. Sanata, Jr., attorney for Iroquois, Troutman Saunders, LLP, 401 Ninth Street, NW., Suite 1000, Washington, DC 20004, at (202) 274–2815.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before December 20, 2001, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission may issue a preliminary determination on non-environmental issues prior to the completion of its review of the environmental aspects of the project. This preliminary determination typically considers such issues as the need for the project and its economic effect on existing customers of the applicant, on other pipelines in the area, and on landowners and communities. For example, the Commission considers the extent to which the applicant may need to exercise eminent domain to obtain rights-of-way for the proposed project and balances that against the non-environmental benefits to be provided by the project. Therefore, if a person has comments on community and landowner impacts from this proposal, it is important either to file comments or to intervene as early in the process as possible.

Comments, protests, and interventions may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

If the Commission decides to set the application for a formal hearing before an Administrative Law Judge, the Commission will issue another notice describing that process. At the end of the Commission's review process, a final Commission order approving or denying a certificate will be issued.

[Docket No. RP00–157–006]

Kern River Gas Transmission Company; Notice of Compliance Filing

November 29, 2001.

Take notice that on November 16, 2001, Kern River Gas Transmission Company submitted a clarification in compliance with the Commission's letter order dated November 7, 2001 in this docket number.

Kern River states that it has served a copy of this filing upon each person designated on the official service list compiled by the Secretary in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP02–55–000]

KO Transmission Company; Notice of Tariff Filing

November 29, 2001.

Take notice that on November 23, 2001, KO Transmission Company (KOT) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, Eleventh Revised Sheet No. 10, bearing a proposed effective date of December 1, 2001.

KO Transmission states that the purpose of the filing is to revise its fuel retainage percentage consistent with section 24 of the General Terms and Conditions of its Tariff. According to KOT, Columbia Gas Transmission Corporation (Columbia) operates and maintains a portion of KOT facilities pursuant to the Operating Agreement referenced in its Tariff at Original Sheet No. 7. Pursuant to that Operating Agreement, Columbia retains certain volumes associated with gas transported on behalf of KOT. On March 5, 2001, Columbia notified KOT that under terms of the Operating Agreement, KOT will be subject to a 1.39% retainage. By its October 31, 2001 report to the Commission, in Docket No. RP01–262–002, Columbia has notified the Commission of its intention to reduce its transportation retainage adjustment from 2.776% to 2.447%. Accordingly, KOT seeks to track this decrease in its fuel retainage, pursuant to GT&C section 24 of its Tariff. KOT thus files for a 1.07% fuel retainage effective December 1, 2001.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's rules and regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). [Docket No. RP00–399–007]

National Fuel Gas Supply Corporation; Notice of Compliance Filing

November 29, 2001.

Take notice that on November 26, 2001, National Fuel Gas Supply Corporation (National Fuel) tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1, the tariff sheets listed on Appendix A to its filing.

National Fuel states that the purpose of the instant filing is to comply with the Commission's order issued October 26, 2001, in Docket No. RP00–399–000, et al., (the October 26 Order) and Order No. 637. The October 26 Order directed National Fuel to file actual tariff sheets implementing (1) the Commission's current rebuttable presumption policy along with a procedure for processing requests to retain discounts within two hours of submission of a request, (2) Rate Schedule IAS's rate for the Transportation Balancing Fee's negative imbalances, and (3) storage and transportation settlement period equality.

National Fuel states that copies of this filing were served upon its customers, interested state commissions and the parties on the official service list compiled by the Secretary in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with section 154.210 of the Commission's Regulations. Portland General Electric Company, Lake Benton Power Partners, LLC, Storm Lake Power Partners I, LLC, Enron Energy Services, Inc., Enron Power Marketing, Inc., Clinton Energy Management Services, Inc., Enron Energy Marketing Corp., the New Power Company, Enron Sandhill Limited Partnership, Green Power Partners I LLC; Notice of Filing

November 29, 2001.

Take notice that on November 16, 2001, Portland General Electric Company (PGE) on behalf of itself and the above-noted PGE affiliates (PGE Affiliates) filed a notice of status change with the Federal Energy Regulatory Commission (Commission) in connection with the pending merger between Enron Corp. and Dynegy Inc. (Dynegy). The Notice provides that each of the PGE Affiliates will treat Illinois Power Company, an affiliate of Dynegy as an affiliate under its FERC market rate tariff.

Copies of the filing were served upon all parties on the official service lists in these proceedings.

Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before December 10, 2001. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Linwood A. Watson, Jr.,

Acting Secretary.

PSEG Energy Resources & Trade LLC; Notice of Filing

November 29, 2001.

Take notice that on November 19, 2001, PSEG Energy Resources & Trade LLC (PSEG) tendered for filing with the Federal Energy Regulatory Commission (Commission) a Cover Page to the Service Agreement covering the sale of capacity and energy to MEICO Inc. (MEICO) pursuant to the PSEG Wholesale Power Market-Base Sales Tariff now on file with the Commission (Docket No. ER99–3151–000, approved on October 1, 1999). This Cover Page replaces the cover page that was filed on September 14, 2001.

Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before December 10, 2001. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. Southern Indiana Gas and Electric Company; Notice of Filing

November 29, 2001.

Take notice that on November 16, 2001, Southern Indiana Gas and Electric Company (SIGECO) tendered for filing with the Federal Energy Regulatory Commission (Commission) a copy of the Agreement for Firm Point-to-Point Transmission Service which was inadvertently left out of the Agreements that were filed by SIGECO on November 12, 2001.

Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before December 10, 2001. Protests will be considered by the Commission to determine the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. [Docket No. PR02–4–000]

Transok, LLC; Notice of Petition for Rate Approval

November 29, 2001.

Take notice that on November 15, 2001, Transok, LLC (Transok) submitted for filing a revised fuel factor for its Oklahoma Transmission System for Fuel Year 2002 as calculated under the terms of Transok's filed fuel tracker. Transok seeks an effective date of January 1, 2002.

Transok states that it is serving notice of the filing and the revised fuel percentage on all current shippers and on the Oklahoma Corporation Commission.

Pursuant to section 284.123(b)(2), if the Commission does not act within 150 days of the filing date, this rate will be deemed to be fair and equitable and not in excess of an amount which interstate pipelines would be permitted to charge for providing similar transportation service. The Commission may, prior to the expiration of the 150-day period, extend the time for action or institute a proceeding to afford interested parties an opportunity for written comments and for the oral presentations of views, data and arguments.

Any person desiring to participate in this rate proceeding must file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All motions must be filed with the Secretary of the Commission on or before December 14, 2001. This petition for rate approval is on file with the Commission and is available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EC02–29–000, et al.]

Allegheny Energy Supply Company, LLC, et al.; Electric Rate and Corporate Regulation Filings

November 28, 2001.

Take notice that the following filings have been made with the Commission:

1. Allegheny Energy Supply Company, LLC, and Allegheny Energy Global Markets, LLC New Allegheny Energy Supply Company

[Docket No. EC02–29–000]

Take notice that on November 21, 2001, Allegheny Energy Supply Company, LLC (AE Supply), Allegheny Energy Global Markets, LLC (Global Markets), and New Allegheny Energy Supply Company (New AE Supply) filed with the Federal Energy Regulatory Commission an application pursuant to section 203 of the Federal Power Act for authorization of an intra-corporate reorganization whereby the membership interests in Global Markets will be transferred to AE Supply, its parent, or New AE Supply in a merger transaction. New AE Supply will be organized as a Maryland company. Also on November 26, 2001, AE Supply filed original executed affidavits to the above-mentioned filing.

Comment date: December 12, 2001, in accordance with Standard Paragraph E at the end of this notice.

2. Conectiv Bethlehem, Inc.

[Docket No. EG01–278–000]

Take notice that on November 21, 2001, Conectiv Bethlehem, Inc. (CBI) filed, pursuant to section 365.8 of the Commission's regulations, Notice of Intent to No Longer Maintain Exempt Wholesale Generator Status.

Comment date: December 18, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

3. PJM Interconnection, L.L.C.

[Docket No. ER01–3014–001]

Take notice that on November 23, 2001, PJM Interconnection, L.L.C. (PJM), submitted a compliance filing pursuant to PJM Interconnection, L.L.C. 97 FERC ¶61,068 (2001) to provide additional information regarding the ownership of the generating facility located in Rock Springs Maryland.

Copies of this compliance filing were served upon all persons designated on the official service list compiled by the Secretary in Docket No. ER01–3014.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

4. Midwest Independent Transmission System Operator, Inc.

[Docket No. ER01–3142–000]

Take notice that on November 26, 2001, Midwest Independent Transmission System Operator, Inc. (the Midwest ISO) tendered for filing

proposed revisions to the Midwest ISO Open Access Transmission Tariff (OATT), FERC Electric Tariff, First Revised Volume No. 1. In its filing, the Midwest ISO requested to withdraw incentive portions of Attachments N and N–1, which were previously submitted on October 15, 2001 in this proceeding.

The Midwest ISO has electronically served copies of its filing, with attachments, upon all Midwest ISO Members, Member representatives of Transmission Owners and Non-Transmission Owners, the Midwest ISO Advisory Committee participants, Policy Subcommittee participants, as well as all state commissions within the region. In addition, the filing has been electronically posted on the Midwest ISO's website at www.midwestiso.org under the heading "Filings to FERC" for other interested parties in this matter.

Comment date: December 7, 2001, in accordance with Standard Paragraph E at the end of this notice.

5. New England Power Pool

[Docket No. ER02–02–001]

Take notice that on November 23, 2001, the New England Power Pool (NEPOOL) Participants Committee submitted a report of compliance in response to requirements of the Commission's unpublished letter order issued October 25, 2001 in Docket No. ER02–02–000.

The NEPOOL Participants Committee states that copies of these materials were sent to all persons identified on the service list in the captioned proceeding, as well as the Participants which were accepted for, or terminated from, membership in NEPOOL by the October 25 letter order.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

6. Xcel Energy Services, Inc.

[Docket No. ER02–8–001]

Take notice that on November 23, 2001, Xcel Energy Services, Inc. (XES), on behalf of Public Service Company of Colorado (Public Service), submitted an Order 614 compliant version of a Second Amendment to the Power Purchase Agreement between Public Service Company of Colorado and Holy Cross Energy.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

7. Florida Power Corporation

[Docket No. ER02–187–001]

Take notice that on November 23, 2001, Florida Power Corporation (FPC) filed a revised Service Agreement with The City of Homestead under FPC's Cost-Based Rates Tariff (CR–1), FERC Electric Tariff No. 9.

FPC is requesting an effective date of October 2, 2001 for this revised Agreement.

A copy of this filing was served upon the Florida Public Service Commission and the North Carolina Utilities Commission.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

8. MidAmerican Energy Company

[Docket No. ER02–397–000]

Take notice that on November 23, 2001, MidAmerican Energy Company (MidAmerican), 401 Douglas Street, Sioux City, Iowa 51102, filed with the Federal Energy Regulatory Commission (Commission) Revised Rate Schedule 72, Western Area Power Administration, Pick-Sloan Missouri Basin Program, Contract for Firm Transmission Service from Iowa Public Service Company (n/k/a MidAmerican Energy Company), dated January 18, 1989, modified by way of Revised Exhibit "A."

MidAmerican requests an effective date of September 1, 2001 for the Agreement.

MidAmerican has served a copy of the filing on Western Area Power Administration, the Iowa Utilities Board, the Illinois Commerce Commission, and the South Dakota Public Utilities Commission.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

9. Illinois Power Company

[Docket No. ER02–398–000]

Take notice that on November 23, 2001, Illinois Power Company (Illinois Power), 500 South 27th Street, Decatur, Illinois 65251–2200, filed an Interconnection and Operating Agreement entered into with Aquila Piatt County Power, LLC (Aquila) and subject to Illinois Power's Open Access Transmission Tariff.

Illinois Power requests an effective date of November 13, 2001 for the Interconnection Agreement and seeks a waiver of the Commission's notice requirement. Illinois Power has served a copy of the filing on Aquila.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

10. Illinois Power Company

[Docket No. ER02–399–000]

Take notice that on November 23, 2001, Illinois Power Company (Illinois Power), 500 South 27th Street, Decatur, Illinois 65251–2200, filed with the Commission an Emergency Energy Tariff (Tariff). Illinois Power states that it will offer emergency energy under the Tariff for the purpose of complying with its obligations under Guide No. 5B of the Mid-America Interconnected Network, Inc. (MAIN).

Illinois Power requests an effective date of February 2, 2001 for the Emergency Energy Tariff.

Illinois Power states that a copy of this filing has been mailed to each MAIN member currently participating in the Callable Reserves Emergency Energy Procedure under MAIN Guide No. 5B.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

11. Carolina Power & Light Company

[Docket No. ER02–400–000]

Take notice that on November 23, 2001, Carolina Power & Light Company (CP&L) tendered for filing an executed Service Agreement between CP&L and the following eligible buyer, Exelon Generation Company, LLC. Service to this eligible buyer will be in accordance with the terms and conditions of CP&L's Market-Based Rates Tariff, FERC Electric Tariff No. 5.

CP&L requests an effective date of November 1, 2001 for this Service Agreement.

Copies of the filing were served upon the North Carolina Utilities Commission and the South Carolina Public Service Commission.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

12. Xcel Energy Services Inc.

[Docket No. ER02–401–000]

Take notice that on November 23, 2001, Northern States Power Company and Northern States Power Company (Wisconsin) (jointly NSP), wholly-owned utility operating company subsidiaries of Xcel Energy Inc., tendered for filing a Short-Term Firm Point-to-Point Transmission Service Agreement between NSP and enXco. NSP proposes the Agreement be included in the Xcel Energy Operating Companies FERC Joint Open Access Transmission Tariff, First Revised Volume No. 1, as Service Agreement 194-NSP, pursuant to Order No. 614.

NSP requests that the Commission accept the agreement effective November 1, 2001.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

13. Xcel Energy Services, Inc.; Northern States Power Company

[Docket No. ER02–402–000]

Take notice that on November 23, 2001, Xcel Energy Services, Inc. (XES), on behalf of Northern States Power Company (NSP) submitted for filing with the Federal Energy Regulatory Commission (Commission) Supplement No. 6 to the Transmission Services Agreement dated September 20, 1977, as amended between NSP and the State of South Dakota.

NSP requests the letter agreements be accepted for filing effective September 1, 2001.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 6132–006]

Facilitators Improving Salmonid Habitat (FISH); Notice of Extension of Time to Comment on Environmental Assessment

November 29, 2001.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, the Office of Energy Projects has reviewed the application dated July 11, 2001, requesting the Commission's approval to surrender the Exemption from licensing and removal of a dam at the John C. Jones Project, located on the Marsh Stream, a tributary of the Penobscot River, near the towns of Winterport and Frankfort, in Waldo County, Maine, and has prepared an Environmental Assessment (EA) for the proposed and alternative actions. A notice issued October 5, 2001, established November 5, 2001, as the deadline for comments on the EA.

In response to our notice, several requests were made to extend our November 5, 2001, comment deadline by six months to prepare and present new information on recreational, public safety and environmental concerns and projected reduction of property values. The parties cite the need to gather additional information, which should be adequately done in 60 days; this is in addition to the several months that have passed since the August 7, 2001, application public notice issuance date. Accordingly, we are granting an extension of 60 days from the date of this notice to file additional information on our EA.

Comments should be addressed to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC, 20426. Please affix "John C. Jones Project No. 6132–006" to the first page of your comments. All timely filed comments will be considered in the Commission order addressing the proposed surrender of exemption and dam removal. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 11428–000 Michigan]

City of St. Louis, Michigan; Notice of Availability of Final Environmental Assessment

November 29, 2001.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for license for the Municipal Dam Hydroelectric Project, located on the Pine River in Gratiot County, Michigan, and has prepared a Final Environmental Assessment (FEA) for the project.

The FEA contains the staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the FEA is on file with the Commission and is available for public inspection. The FEA may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link—select "Docket#" and follow the instructions (call 202–208–2222 for assistance).

Notice of Transfer of License and Soliciting Comments, Motions To Intervene, and Protests

November 29, 2001.

Take notice that the following application has been filed with the

Commission and is available for public inspection:

a. Application Type: Transfer of License.

b. Project No: 3820–007.

c. Date Filed: November 16, 2001.

d. Applicants: General Electric Company (Transferor) and Southern New Hampshire Hydro-Electric Development Corp (Transferee).

e. Name and Location of Project: The Somersworth Hydroelectric Project is located on the Salmon Falls River in Stafford County, New Hampshire and York County, Maine.

f. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

g. Applicant Contacts: Mr. Mark E. Beliveau, Esquire, Sanders & McDermott, P.L.L.C., 234 Lafayette Road, Hampton, NH 03843–5070 (603) 926–8926/(fax) 603–926–0564, *mbeliveau@samlaw.com* (General Electric Company); John N. Webster, President, Southern New Hampshire Hydro-Electric Development Corp, 293 Main Street, P.O. Box 178, South Berwick, ME 03908, (207) 384–5334.

h. FERC Contact: Any questions on this notice should be addressed to Mr. Lynn R. Miles at (202) 219–2671.

i. Deadline for filing comments and or motions: January 7, 2002.

All documents (original and eight copies) should be filed with: David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington DC 20426. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Please include the project number (P–3820–007) on any comments or motions filed.

j. Description of Proposal: Applicants propose a transfer of the license for 3820–000 from General Electric Company to Southern New Hampshire Hydro-Electric Development Corp. Substitution of Southern New Hampshire Hydro-Electric Development Corp for General Electric Company as licensee for this project is being sought in connection with Southern New Hampshire Hydro-Electric Development Corp's intended acquisition of project resources from General Electric Company.

k. Locations of the application: A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE, Room 2A, Washington, DC 20426, or by calling (202) 208–1371. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). A copy is also available for inspection and reproduction at the address in item g above.

l. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of rules of practice and procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. An additional copy must be sent to the Director, Division of Hydropower Administration and Compliance, Federal Energy Regulatory Commission, at the above-mentioned address. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

David P. Boergers,

Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7112–7]

Announcement of a Federal Operating Permits Program Consistent With 40 CFR Part 71; Maryland; Delegation of the Title V Permitting Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Informational notice.

SUMMARY: The purpose of this notice is to announce that on December 1, 2001, a Federal operating permits program consistent with the requirements of the Clean Air Act (the Act) and the applicable Federal regulations will be effective in the State of Maryland. Furthermore, effective December 1, 2001, EPA is granting the Maryland Department of the Environment's (MDE's) request for full delegation of authority to implement and enforce the Act's Federal operating permits program. Under this delegation, EPA retains its authority to object to the issuance of any permit, act upon petitions submitted by the public, and collect fees from all owners or operators of sources subject to the permitting program if it is demonstrated that MDE is not adequately implementing the program in accordance with the Delegation of Authority Agreement, the applicable Federal regulations, and/or the Act. The procedures for full delegation are specified in a Delegation of Authority Agreement between EPA Region III and MDE signed and dated on November 27, 2001.

EFFECTIVE DATES: The Federal operating permits program, 40 CFR part 71, will be effective in the State of Maryland on December 1, 2001. The effective date for the Delegation of Authority Agreement between EPA and MDE is December 1, 2001.

ADDRESSES: Copies of the letter that requests delegation of the federal operating permits program and the Delegation of Authority Agreement between EPA and MDE are available for public inspection at EPA's Region III Office, 1650 Arch Street, Philadelphia, PA 19103 and MDE, 2500 Broening Highway, Baltimore, MD 21224. Effective December 1, 2001, all notifications, requests, applications, reports and other correspondence required under 40 CFR part 71 for all Part 71 sources, shall be submitted to MDE's Air Quality Permits Program at the following address:

MDE Office—Air Quality Permits Program, Air and Radiation Management, Maryland Department of the Environment, 2500 Broening Highway, Baltimore, MD 21224. Attn: Permits Program Chief.

All reports, notifications, requests, petitions pursuant to the Federal permitting program, 40 CFR part 71, and the Delegation of Authority Agreement from all part 71 sources or the public should be submitted to EPA at the following address:

EPA Office: Permit and Technical Assessment Branch (3AP11), Air Protection Division, EPA Region III, 1650 Arch Street, Philadelphia, PA 19103. Attn: Chief, Permit and Technical Assessment Branch.

FOR FURTHER INFORMATION CONTACT: Helene Drago, Permit and Technical Assessment Section (3AP11), Air Protection Division, EPA Region III, 1650 Arch Street, Philadelphia, PA 19103, Telephone: 215–814–5796, email: *drago.helene@epa.gov*.

SUPPLEMENTARY INFORMATION: The purpose of this notice is to announce that on December 1, 2001, the Federal operating permits program consistent with the requirements of Title V of the Clean Air Act (the Act) as set forth under 40 CFR part 71 (part 71 program) will be effective in the State of Maryland. Furthermore, effective December 1, 2001, EPA is granting the Maryland Department of the Environment's (MDE's) request for full delegation of authority to implement and enforce the part 71 Federal operating permits program. Under this delegation, EPA retains its authority to (1) object to the issuance of any part 71 permit, (2) act upon petitions submitted by the public, and (3) collect fees from all owners or operators of sources subject to 40 CFR part 71 if it is demonstrated that MDE is not adequately implementing the part 71 program in accordance with the Delegation of Authority Agreement, 40 CFR part 71, and/or the Act. The procedures for full delegation are specified in a Delegation of Authority Agreement between EPA Region III and MDE signed and dated on November 27, 2001.

On October 30, 1995 (60 FR 55231), the EPA published a proposed rule to grant interim approval of Maryland's operating permits program, submitted to EPA pursuant to Title V of the Act and 40 CFR part 70 (part 70 program). On July 3, 1996 (61 FR 34733), EPA published a final rule granting interim approval of Maryland's part 70 operating permits program. Please see these proposed and final rules for a full explanation of the reasons why Maryland did not receive full approval of its part 70 program. Under the Act, Maryland had two years after receiving interim approval in which to correct the identified deficiencies of its part 70 program. In recognition of States' efforts to implement the Title V permitting program and EPA's own efforts to revise its implementing regulations, EPA granted several extensions to the interim approval period. A lawsuit was filed against EPA on June 21, 2000 by the EarthJustice Legal Defense Fund on behalf of the Sierra Club and the New York Public Interest Research Group, regarding these extensions. In settlement of that litigation, EPA entered into a settlement agreement which provides that no further extensions of the interim approval period will be granted for any part 70 operating permit programs, including the State of Maryland's, beyond December 1, 2001. MDE will not be able to address all interim approval deficiencies by December 1, 2001. In particular, Maryland will not have enacted legislation to provide, unambiguously, standing for judicial review of its permits consistent with section 502(b)(6) of the Act and 40 CFR 70.4(b)(3)(x) and which meets the minimum threshold requirements of Article III of the U.S. Constitution for organizations and individuals. Therefore, on December 1, 2001, Maryland will lose its interim approval status of its part 70 permitting program. Pursuant to the Act, Maryland will be required to implement a part 71 Federal operating permit program effective December 1, 2001.

The Act and its implementing regulations under the part 71 authorize EPA to delegate authority to any state agency that submits adequate regulatory procedures for implementation and enforcement of the part 71 operating permits program. On September 24, 2001, MDE requested full delegation of authority to implement and enforce the federal operating permits program consistent with the requirements of Title V of the Act and part 71. MDE provided all necessary documentation that the State of Maryland has adequate authority and adequate resources to implement and enforce the part 71 Federal permitting program.

Pursuant to 40 CFR 71.10(b), EPA hereby notifies the public that effective December 1, 2001, it has granted MDE's request and is fully delegating the authority to implement and enforce the Federal operating permits program as set forth under 40 CFR part 71. Under this delegation, MDE has authority to implement and enforce the Federal operating permits program consistent with the requirements of Title V as set forth under the part 71 program. As previously stated, EPA retains its authority to (1) object to the issuance of any part 71 permit, (2) act upon petitions submitted by the public and (3) collect fees from all owners or operators of part 71 sources if it is demonstrated that MDE is not adequately implementing the part 71 program in accordance with the Delegation of Authority Agreement, part 71, and/or the Act. The full delegation is set forth in a Delegation of Authority Agreement between EPA Region III and MDE signed and dated on November 27, 2001. If, at any time, EPA determines that MDE is not or cannot adequately implement or enforce the requirements of part 71, this delegation may be revoked, in whole or in part, pursuant to 40 CFR 71.10(c).

Dated: November 27, 2001.

Donald S. Welsh,

Regional Administrator, Region III.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[OPP–34203K; FRL–6811–4]

Chlorpyrifos; Receipt of Requests for End-Use Product Cancellations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Companies that hold the pesticide registrations of end-use pesticide products containing chlorpyrifos [*O,O*-diethyl *O*-(3,5,6-

trichloro-2-pyridinyl)phosphorothioate] have asked EPA to cancel their registrations. Pursuant to section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is announcing the Agency's receipt of these requests from the registrants. These requests for voluntary cancellation are the result of a Memorandum of Agreement signed by EPA and the basic manufacturers of the active ingredient chlorpyrifos on June 7, 2000. Registrants identified in this notice requesting voluntary cancellation are in large part the customer of these basic manufacturers. Given the potential risks, both dietary and non-dietary, that chlorpyrifos use poses, to children, EPA intends to grant the requested cancellations. EPA also plans to issue a cancellation order for the canceled registrations at the close of the comment period for this announcement. Upon the issuance of the cancellation order, any distribution, sale, or use of these chlorpyrifos products will only be permitted if such distribution, sale, or use is consistent with the terms of that order.

DATES: Comments, identified by docket control number OPP–34203K, must be received on or before January 4, 2002. Comments on the requested registration cancellations must be submitted to the address provided below and identified by docket control number OPP–34203K.

ADDRESSES: Comments may be submitted by mail, electronically, or in person. Please follow the detailed instructions for each method as provided in Unit I. of the **SUPPLEMENTARY INFORMATION**. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP–34203K in the subject line on the first page of your response.

FOR FURTHER INFORMATION CONTACT: Tom Myers, Special Review and Reregistration Division (7508C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460, telephone number: 703–308–8589; fax number: 703–308–8041; e-mail address: myers.tom@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. You may be potentially affected by this action if you manufacture, sell, distribute, or use chlorpyrifos products. The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, does not apply because this action is not a rule, for purposes of 5 U.S.C. 804(3). Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Additional Information, Including Copies of this Document and Other Related Documents?

1. *Electronically.* You may obtain electronic copies of this document, and certain other related documents that might be available electronically, from the EPA Internet Home Page at http://www.epa.gov/. To access this document, on the Home Page select "Laws and Regulations," "Regulations and Proposed Rules," and then look up the entry for this document under the "**Federal Register**--Environmental Documents." You can also go directly to the **Federal Register** listings at http://www.epa.gov/fedrgstr/. To access information about the risk assessment for chlorpyrifos, go to the Home Page for the Office of Pesticide Programs or go directly http://www.epa.gov/pesticides/op/chlorpyrifos.htm.

2. *In person.* The Agency has established an official record for this action under docket control number OPP–34203K. The official record consists of the documents specifically referenced in this action, any public comments received during an applicable comment period, and other information related to this action, including any information claimed as Confidential Business Information (CBI). This official record includes the documents that are physically located in the docket, as well as the documents that are referenced in those documents. The public version of the official record does not include any information claimed as CBI. The public version of the official record, which includes printed, paper versions of any electronic comments submitted during an applicable comment period, is available for inspection in the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

C. How and to Whom Do I Submit Comments?

You may submit comments through the mail, in person, or electronically. To ensure proper receipt by EPA, it is imperative that you identify docket control number OPP–34203K in the subject line on the first page of your response.

1. *By mail.* Submit your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

2. *In person or by courier.* Deliver your comments to: Public Information and Records Integrity Branch (PIRIB), Information Resources and Services Division (7502C), Office of Pesticide Programs (OPP), Environmental Protection Agency, Rm. 119, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA. The PIRIB is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The PIRIB telephone number is (703) 305–5805.

3. *Electronically.* You may submit your comments electronically by e-mail to: opp-docket@epa.gov, or you can submit a computer disk as described above. Do not submit any information electronically that you consider to be CBI. Avoid the use of special characters and any form of encryption. Electronic submissions will be accepted in WordPerfect 6.1/8.0 or ASCII file format. All comments in electronic form must be identified by docket control number OPP–34203K. Electronic comments may also be filed online at many Federal Depository Libraries.

D. How Should I Handle CBI that I Want to Submit to the Agency?

Do not submit any information electronically that you consider to be CBI. You may claim information that you submit to EPA in response to this document as CBI by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public version of the official record. Information not marked confidential will be included in the public version of the official record without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Offer alternative ways to improve the notice or collection activity.
7. Make sure to submit your comments by the deadline in this notice.
8. To ensure proper receipt by EPA, be sure to identify the docket control number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. Receipt of Requests to Cancel Registrations

A. Background

In a memorandum of agreement ("Agreement") effective June 7, 2000, EPA and the basic manufacturers of the active ingredient chlorpyrifos agreed to several voluntary measures that will reduce the potential exposure to children associated with chlorpyrifos containing products. EPA initiated the negotiations with registrants after finding chlorpyrifos, as currently registered, was an exposure risk especially to children. As a result of the Agreement, registrants that hold the pesticide registrations of end-use products containing chlorpyrifos (who are in large part the customer of these basic manufacturers) have asked EPA to cancel their registrations for these products. Pursuant to section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is announcing the Agency's receipt of these cancellation requests from the registrants.

In the **Federal Register** of September 20, 2000 (65 FR 56886) (FRL–6743–7), EPA published a notice of the Agency's receipt of amendments and cancellations for manufacturing use products and associated end-use products for signatories of the Memorandum of Agreement signed on June 7, 2000, and subsequent ancillary agreements. These requests were submitted as a result of the Memorandum of Agreement that was signed on June 7, 2000, between EPA and the basic manufacturers of chlorpyrifos. A copy of the Memorandum of Agreement that was signed on June 7, 2000, is located in OPP docket control number 34203D.

B. Requests for Voluntary Cancellation of End-Use Products

Pursuant to the Agreement and FIFRA section 6(f)(1)(A), several registrants have submitted requests for voluntary cancellation of registrations for their end-use products. The registrations for which cancellations were requested are identified in the following Table.

TABLE — END-USE PRODUCT REGISTRATION CANCELLATION REQUESTS

Company	Reg. No.	Product
Dragon Chemical Corporation	16–101	Dursban 1/2 Granular Insecticide
	16–123	Dragon Home Pest Control
	16–139	Dragon Home Pest Killer
	16–146	Dragon Termite and Soil Insect Killer
	16–163	Dragon Crawling Insect Killer
	16–172	Dragon Dursban 1% Granular Insecticide
The Scotts Company	239–2423	Ortho Lawn Insect Spray
	239–2490	Ortho Home Pest Insect Control
	239–2513	Ortho-Klor Soil Insect and Termite Killer
	239–2517	Ortho-Klor Indoor & Outdoor Insect Killer
	239–2520	Ortho Mole Cricket Bait Formula II
	239–2521	Ortho Mole Cricket Bait Formula III
	239–2570	Ortho-Klor 1% Dursban Lawn & Soil Granules
	239–2633	Ortho Dursban Lawn Insect Formula II
	239–2635	Ortho Multipurpose Borer & Insect Spray
Amvac Chemical Corporation	5481–68	Alco Chlorpyrifos 1E Emulsifiable Insecticide
	5481–121	Chlorpyrifos Granules 1
	5481–216	Dursban-DDVP 2.50 Pest Control
	5481–217	Dursban-DDVP 1.25
	5481–221	Dursban 2E Insecticide
	5481–222	Bilco Dursban 4E Insecticide
	5481–240	Alco Bug Spray Flea, Ant and Roach Killer

TABLE — END-USE PRODUCT REGISTRATION CANCELLATION REQUESTS—Continued

Company	Reg. No.	Product
Contact Industries, a Division of Safeguard Chemical Corporation	10806–52	Contact Roach & Ant Killer II
	10806–99	Contact Ant and Roach Killer IV
	10806–100	Contact Ant and Roach Killer XV
	10806–101	Contact Liquid Ant & Roach Killer V
	10806–102	Contact Roach and Ant Killer XVI
Amrep, Incorporated	10807–116	Misty Ant, Roach, & Spider Residual Insecticide with Dursban
	10807–187	Misty Aqueous Residual Spray
Drexel Chemical Company	19713–229	Drexel Chlorpyrifos 0.5G
	19713–341	Leisur and Lawn Insect Control

Under section 6(f)(1)(A) of FIFRA, registrants may request at any time, that EPA cancel any of their pesticide registrations. Section 6(f)(1)(B) of FIFRA requires that EPA provide a 30–day period in which the public may comment before the Agency may act on the request for voluntary cancellation. Given the potential risks, both dietary and non-dietary, that chlorpyrifos use poses, to children, EPA intends to grant the requested cancellations at the close of the comment period for this announcement.

III. Proposed Existing Stocks Provisions

The registrants have requested voluntary cancellation of the chlorpyrifos registrations identified in the Table. Pursuant to section 6(f) of FIFRA, EPA intends to grant the requests for voluntary cancellations. For purposes of the cancellation order that the Agency intends to issue at the close of the comment period for this announcement, the term "existing stocks" will be defined pursuant to EPA's existing stocks policy at June 26, 1991 (56 FR 29362) (FRL–3846–4) as those stocks of a registered pesticide product, which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation. Any distribution, sale, or use of existing stocks after the effective date of the cancellation order that the Agency intends to issue that is not consistent with the terms of that order will be considered a violation of section 12(a)(2)(K) and/or 12(a)(1)(A) of FIFRA.

1. *Distribution or sale by registrants*—i. *Restricted use and package size limitations.* Except for the purposes of returns for relabeling consistent with the June 7, 2000, Memorandum of Agreement, shipping for export consistent with the requirements of section 17 of FIFRA, or proper disposal:

(a) The distribution or sale by registrants of existing stocks of any EC formulation product listed in the Table will not be lawful under FIFRA, as of the date of publication of the cancellation order in the **Federal Register**, unless the product is labeled as restricted use.

(b) The distribution or sale by registrants of existing stocks of any product listed in the Table (other than containerized baits in child resistant packaging (CRP)) that is not an EC, will not be lawful under FIFRA as of the date of the cancellation notice, unless the product is either labeled for restricted use or packaged in containers no smaller than 15 gallons of a liquid formulation or 25 pounds of a dry formulation.

ii. *Prohibited uses.* Except for the purposes of returns for relabeling consistent with the June 7, 2000 Memorandum of Agreement, shipping for export consistent with the requirements of section 17 of FIFRA, or proper disposal, the distribution or sale of existing stocks by registrants of any product identified in the Table that bears instructions for any of the following uses will not be lawful under FIFRA as of the date of publication of the cancellation order in the **Federal Register**:

(a) Termite control, unless the product bears directions for use of a maximum 0.5% active ingredient (a.i.) chlorpyrifos end-use dilution.

(b) Post-construction termite control, except for spot and local termite treatment, provided the label of the product states that the product may not be used for spot and local treatment after December 31, 2002.

(c) Indoor residential except for containerized baits in CRP.

(d) Indoor non-residential except for containerized baits in CRP and products with formulations other than EC that bear labeling solely for one or more of the following uses: Warehouses, ship holds, railroad boxcars, industrial plants, manufacturing plants, food processing plants, or processed wood products treated during the manufacturing process at the manufacturing site or at the mill.

(e) Outdoor residential except for products bearing labeling solely for one or more of the following public health uses: Individual fire ant mound treatment by licensed applicators or mosquito control by public health Agencies.

(f) Outdoor non-residential, non-agricultural except for products that bear labeling solely for one or more of the following uses: Golf courses, road medians, and industrial plant sites, provided the maximum label application rate does not exceed 1 lb a.i./per acre; mosquito control for public health purposes by public health Agencies; individual fire ant mound treatment for public health purposes by licensed applicators; and fence posts, utility poles, railroad ties, landscape timbers, logs, pallets, wooden containers, poles, posts, processed wood products, manhole covers, and underground utility cable and conduits.

2. *Retail and other distribution or sale.* The retail sale of existing stocks of products listed in the Table bearing instructions for the prohibited uses set forth above in Units III.1.(ii) (a)-(f) of this document will not be lawful under FIFRA after December 31, 2001. Except as otherwise provided in this order, any other distribution or sale (for example, return to the manufacturer for relabeling) is permitted until stocks are exhausted.

3. *Final distribution, sale and use date for pre-construction termite control.* The distribution, sale or use of any product listed in the Table bearing instructions for pre-construction termiticide use will not be lawful under FIFRA after December 31, 2005, unless prior to that date, EPA has issued a written determination that such use may continue consistent with the requirements of FIFRA.

4. *Use of existing stocks.* Except for products bearing those uses identified above in Unit III.3. of this document, EPA intends to permit the use of existing stocks of products listed in the Table until such stocks are exhausted, provided such use is in accordance with the existing labeling of that product.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission

November 20, 2001.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before January 4, 2002. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments to Judy Boley, Federal Communications Commission, Room 1–C804, 445 12th Street, SW., DC 20554 or via the Internet to *jboley@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s), contact Judy Boley at 202–418–0214 or via the Internet at *jboley@fcc.gov.*

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–0262.

Title: Section 90.179, Shared Use of Radio Stations.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, state, local or tribal government.

Number of Respondents: 41,000.

Estimated Time Per Response: .75 hours.

Frequency of Response: Recordkeeping requirement.

Total Annual Burden: 30,750 hours.

Total Annual Cost: N/A.

Needs and Uses: The Commission has been directed by the United States Congress, in the Balanced Budget Act of 1997, to dedicate 2.4 megahertz of electromagnetic spectrum in the 746–806 MHz band for public safety services. The *First Report and Order* and *Third Notice of Proposed Rulemaking* in WT Docket No. 96–86 amended service rules to allow entities applying to the Commission for license to share the radio station on a non-profit cost sharing basis. Section 90.179 requires that Part 90 licensees that share use of their private land mobile radio facility on a non-profit, cost-shared basis keep a written sharing agreement as part of the station records. Regardless of the method of sharing, an up-to-date list of persons who are sharing the station and the basis of their eligibility under Part 90 must be maintained. This requirement is necessary to identify users of the systems should interference problems develop. This information is used by the Commission to investigate interference complaints and resolve interference and operational complaints that may occur among the users.

OMB Control No.: 3060–0986.

Title: Federal-State Joint Board on Universal Service—Plan for Reforming the Rural Universal Service Support Mechanism, CC Docket No. 96–45.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, state, local or tribal government.

Number of Respondents: 1,300 respondents; 5,770 responses.

Estimated Time Per Response: .81 hours per response (avg.).

Frequency of Response: On occasion, quarterly, annual, and one-time reporting requirements; third party disclosure requirement.

Total Annual Burden: 5,770 hours.

Total Annual Cost: N/A.

Needs and Uses: On May 23, 2001, the Commission adopted rules for determining high-cost universal service support for rural telephone companies for the next five years based upon proposals made by the Rural Task Force. The Commission also addressed certain proposals made by the Multi-Association Group (MAG) for reforming universal services applicable to rural carriers. The information will be used to determine whether and to what extent rural telecommunications carriers providing the data are eligible to receive universal service support.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

[FR Doc. 01–30087 Filed 12–4–01; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Notice and request for comment.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the Board, the Federal Deposit Insurance Corporation (FDIC), and the Office of the Comptroller of the Currency (OCC) (the "agencies") may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The agencies, under the auspices of the Federal Financial Institutions Examination Council (FFIEC), propose to extend, without

revision, the following currently approved information collections: Report of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks (FFIEC 002) and Report of Assets and Liabilities of Non–U.S. Branches that are Managed or Controlled by a U.S. Branch or Agency of a Foreign Bank (FFIEC 002s). The Board, which collects and processes these reports for the three agencies, is publishing this notice on behalf of the agencies. At the end of the comment period, the comments and recommendations received will be analyzed to determine whether the FFIEC should modify the reports. The Board will then submit the reports to OMB for review and approval.

DATES: Comments must be submitted on or before February 4, 2002.

ADDRESSES: Interested parties are invited to submit written comments to the agency listed below. All comments, which should refer to the OMB control number, will be shared among the agencies.Written comments should be addressed to Jennifer J. Johnson, Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, N.W., Washington, D.C. 20551, submitted by electronic mail to regs.comments&federalreserve.gov, or delivered to the Board's mailroom between 8:45 a.m. and 5:15 p.m., and to the security control room outside of those hours. Both the mailroom and the security control room are accessible from the courtyard entrance on 20th Street between Constitution Avenue and C Street, N.W. Comments received may be inspected in room M–P–500 between 9:00 a.m. and 5:00 p.m., except as provided in section 261.12 of the Board's Rules Regarding Availability of Information, 12 CFR 261.12(a).

A copy of the comments may also be submitted to the OMB desk officer for the Board: Alexander T. Hunt, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: A copy of the FFIEC 002 and FFIEC 002s reporting forms may be obtained at the FFIEC's web site (www.ffiec.gov). Additional information or a copy of the reporting forms may also be requested from Mary M. West, Federal Reserve Board Clearance Officer, (202) 452–3829, Division of Research and Statistics, Board of Governors of the Federal Reserve System, 20th and C Streets, N.W., Washington, D.C. 20551. Telecommunications Device for the Deaf (TDD) users may contact Capria Mitchell (202) 872–4984, Board of Governors of the Federal Reserve System, 20th and C Streets, N.W., Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION:

Proposal to extend, without revision, the following currently approved collections of information:

1. Report Title: Report of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks.
Form Number: FFIEC 002.
OMB Number: 7100–0032.
Frequency of Response: Quarterly.
Affected Public: U.S. branches and agencies of foreign banks.
Estimated Number of Respondents: 354.
Estimated Total Annual Responses: 1,416.
Estimated Time per Response: 22.50 burden hours.
Estimated Total Annual Burden: 31,860 burden hours.

General Description of Report

This information collection is mandatory: 12 U.S.C. 3105(b)(2), 1817(a)(1) and (3), and 3102(b). Except for select sensitive items, this information collection is not given confidential treatment (5 U.S.C. 552(b)(8)). Small businesses (that is, small U.S. branches and agencies of foreign banks) are affected.

Abstract

On a quarterly basis, all U.S. branches and agencies of foreign banks (U.S. branches) are required to file a detailed schedule on their assets and liabilities in the form of a condition report and a variety of supporting schedules. This information is used to fulfill the supervisory and regulatory requirements of the International Banking Act of 1978. The data are also used to augment the bank credit, loan, and deposit information needed for monetary policy and other public policy purposes. The Federal Reserve System collects and processes this report on behalf of all three agencies.

2. Report Title: Report of Assets and Liabilities of a Non–U.S. Branch that is Managed or Controlled by a U.S. Branch or Agency of a Foreign (Non–U.S.) Bank.
Form Number: FFIEC 002s.
OMB Number: 7100–0273.
Frequency of Response: Quarterly.
Affected Public: U.S. branches and agencies of foreign banks.
Estimated Number of Respondents: 114.
Estimated Total Annual Responses: 456.
Estimated Time per Response: 6 burden hours.
Estimated Total Annual Burden: 2,736 burden hours.

General Description of Report

This information collection is mandatory: 12 U.S.C. 3105(b)(2), 1817(a)(1) and (3), and 3102(b) and is given confidential treatment (5 U.S.C. 552(b)(8)). Small businesses (that is, small U.S. branches and agencies of foreign banks) are affected.

Abstract

On a quarterly basis, all U.S. branches and agencies of foreign banks are required to file detailed schedules on their assets and liabilities in the form FFIEC 002. The FFIEC 002s is a separate supplement to the FFIEC 002 that collects information on assets and liabilities of any non–U.S. branch that is "managed or controlled" by a U.S. branch or agency of the foreign bank. Managed or controlled means that a majority of the responsibility for business decisions, including but not limited to decisions with regard to lending or asset management or funding or liability management, or the responsibility for recordkeeping in respect of assets or liabilities for that foreign branch resides at the U.S. branch or agency. A separate FFIEC 002s must be completed for each managed or controlled non–U.S. branch. The FFIEC 002s must be filed quarterly along with the U.S. branch's or agency's FFIEC 002.

The data are used: (1) to monitor deposit and credit transactions of U.S. residents; (2) for monitoring the impact of policy changes; (3) for analyzing structural issues concerning foreign bank activity in U.S. markets; (4) for understanding flows of banking funds and indebtedness of developing countries in connection with data collected by the International Monetary Fund (IMF) and the Bank for International Settlements (BIS) that are used in economic analysis; and (5) to provide information to assist in the supervision of U.S. offices of foreign banks, which often are managed jointly with these branches.

Request for Comment

Comments submitted in response to this Notice will be shared among the agencies and will be summarized or included in the Board's request for OMB approval. All comments will become a matter of public record. Written comments should address the accuracy of the burden estimates and ways to minimize burden as well as other relevant aspects of the information collection requests. Comments are invited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the agencies' functions, including whether the information has practical utility;

(b) The accuracy of the agencies' estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start up costs and costs of operation, maintenance, and purchase of services to provide information.

Board of Governors of the Federal Reserve System, November 29, 2001.

Jennifer J. Johnson,

Secretary of the Board.

BILLING CODE 3510–22–S

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than December 19, 2001.

A. Federal Reserve Bank of Chicago (Phillip Jackson, Applications Officer) 230 South LaSalle Street, Chicago, Illinois 60690–1414:

1. Merrill G. Norton, and Suellyn Norton, both of Danville, Illinois; to retain voting shares of Vermilion Bancorp, Inc., Danville, Illinois, and thereby indirectly retain voting shares of American Savings Bank of Danville, Danville, Illinois.

Board of Governors of the Federal Reserve System, November 29, 2001.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Committee on Vital and Health Statistics: Meeting

Pursuant to the Federal Advisory Committee Act, the Department of Health and Human Services announces the following advisory committee meeting.

Name: National Committee on Vital and Health Statistics (NCVHS), Subcommittee on Populations—Working Group on Quality.

Time and Date: 1:30 p.m.–4:30 p.m, December 12, 2001.

Place: Room 705A, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

Status: Open.

Purpose: The purpose of the meeting is to hear testimony on public and private sector data collection and reporting activities in the area of patient safety. The presenters will be asked to address limitations in the current data infrastructure for identifying and reporting on medical errors and other safety-related measures of the quality of health care in the U.S.

Notice: In the interest of security, the Department has instituted stringent procedures for entrance to the Hubert H. Humphrey Building by non-government employees. Thus, persons without a government identification card will need to have the guard call for an escort to the meeting.

Contact Person for More Information: Substantive program information as well as summaries of meetings and a roster of Committee members may be obtained from Stanley Edinger Ph.D., Lead Staff Person for the HCVHS Subcommittee on Special Populations, Working Group on Quality, Agency for Healthcare Research and Quality, 6011 East Jefferson Street, Suite 200, #106, Rockville, MD 20852, telephone (301) 594–1598; or Marjorie S. Greenberg, Executive Secretary, NCVHS, NCHS, CDC, Room 1100, Presidential Building, 6525 Belcrest Road, Hyattsville, Maryland 20782, telephone (301) 458–4245. Information also is available on the NCVHS home page of the HHS website: *http://aspe.os.dhhs.gov/ncvhs*, where an agenda for the meeting will be posted when available.

Dated: November 27, 2001.

James Scanlon,

Director, Division of Data Policy, Office of the Assistant Secretary for Planning and Evaluation.

BILLING CODE 4151–05–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Committee on Vital and Health Statistics; Meeting

Pursuant to the Federal Advisory Committee Act, the Department of Health and Human Services announces the following advisory committee meeting.

Name: National Committee on Vital and Health Statistics (NCVHS), Subcommittee on Standards and Security.

Time and Date: 9 a.m. to 5 p.m., December 13, 2001, 8:30 a.m. to 3 p.m., December 14, 2001.

Place: Hubert H. Humphrey Building, Room 705A, 200 Independence Avenue, SW., Washington, DC.

Status: Open.

Purpose: On the first day, the Subcommittee will focus on the patient medical record initiative. The Subcommittee will participate in a question and answer session with Standards Developing Organizations working in the area of message formats, and will discuss the letter conveying recommendations on this topic to the Secretary. The topic for the second day will be Health Insurance Portability and Accountability Act of 1996 (HIPAA) administrative simplification standards. The Subcommittee will hear testimony on industry readiness, and will discuss the 2001 report to Congress on the status of HIPAA administrative simplification implementation.

Notice: In the interest of security, HHS has instituted stringent procedures for entrance to the Hubert H. Humphrey building by non-government employees. Persons without a government identification card may need to have the guard call for an escort to the meeting.

Contact Person for More Information: Substantive program information as well as summaries of meetings and a roster of committee members may be obtained from J. Michael Fitzmaurice, Ph.D., Senior Science Advisor for Information Technology, Agency for Health Care Research and Quality, 2101 East Jefferson Street, #600, Rockville, MD 20852, phone: (301) 594–3938; or Marjorie S. Greenberg, Executive Secretary, NCVHS, National Center for Health Statistics, Centers for Disease Control and Prevention, Room 1100, Presidential Building, 6525 Belcrest Road, Hyattsville, Maryland 20782, telephone (301) 458–4245. Information also is available on the NCVHS home page of the HHS web site: *http://www.ncvhs.hhs.gov/* where an agenda for the meeting will be posted when available.

Dated: November 27, 2001.

James Scanlon,

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30 DAY–08–02]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639–7090. Send written comments to CDC, Desk Officer, Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503. Written comments should be received within 30 days of this notice.

Proposed Project: Evaluating Toolbox Training Safety Program for Construction and Mining—NEW—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC) proposes to evaluate the effectiveness of various educational approaches utilizing "toolbox" safety training materials targeted to construction and mining industries. The mission of the National Institute for Occupational Safety and Health is to promote safety and health at work for all people through research and prevention.

In comparison to other industries, construction and mining, workers continue to have the highest rates of occupational fatalities and injuries. The Bureau of Labor Statistics estimated for 1999 that while the construction industry comprises only 6% of the workforce, they account for 20% of the fatal occupational injuries across all industry types (BLS, 1999). Similarly, though the mining industry comprises less than .5% of the workforce, this industry reflects 2% of all fatal occupational injuries (BLS, 1999).

Research on the effectiveness of safety and health training programs has revealed that training can lead to increases in worker knowledge and awareness of workplace safety practices. However, fewer evaluations of safety training effectiveness have investigated the relationship between various instructional approaches and the actual transfer of safety training information into workplace practices. Preliminary input from employees, managers, and union leaders representing construction and mining concerns revealed a desire in these industries for affordable safety training materials that can be effectively administered in short sessions on the job. Representatives from these industries reported that safety training sessions need to establish a closer connection between the safety recommendations and the background experiences and knowledge of the workers.

An instructional approach that may address these needs is often called "toolbox" or "tailgate" training. This type of training is characterized by brief (15 minute) workplace safety lessons. Despite the popularity of toolbox safety talks, research is needed to identify the most effective format for this medium. NIOSH will investigate the impact of using a narrative, case-study instructional approach versus a more typical, didactic learn the facts' approach. Comparative analyses will examine differences in knowledge gain, safety attitudes and beliefs, and workplace behaviors. Findings from this research will help identify the conditions critical to effective toolbox safety training for mining and construction. The materials developed and evaluated during this study will be made available to the public at the conclusion of the evaluation.

Construction and mining companies who participate in the study will be randomly assigned to receive eight weekly toolbox safety training sessions that use either a case-study narrative or conventional instructional approach. The training sessions are designed to last fifteen minutes. The impact of these materials will be evaluated through the examination of changes in employee knowledge gains, attitudes toward safety practices, and the use of safety behaviors prior to and following their participation in the safety training program. Trainers will complete brief response cards each week. A sample of trainers will participate in structured interviews.

Findings of the study will be reported to participants and in the literature. The total annual burden for this data collection is 363 hours.

Respondents	Number of respondents	Number of responses per respondent	Avg. burden per response (in hrs.)
Worker Knowledge-Attitude Survey (Before Training)	640	1	15/60
Worker Knowledge-Attitude Survey (After Training)	640	1	15/60

Respondents	Number of respondents	Number of responses per respondent	Avg. burden per response (in hrs.)
Instructor Feedback Cards	64	8	5/60

Dated: November 28, 2001.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning, and Evaluation, Centers for Disease Control and Prevention.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4650–N–85]

Notice of Submission of Proposed Information Collection to OMB; Section 5(h) Homeownership Program for Public Housing: Submission of Plan and Reporting

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: *Comments Due Date:* January 4, 2002.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval number (2577–0201) and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Wayne Eddins, Reports Management Officer, Q, Department of Housing and Urban Development, 451 Seventh Street, Southwest, Washington, DC 20410; e-mail *Wayne_Eddins@HUD.gov;* telephone (202) 708–2374. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Eddins.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35). The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (10) the name and telephone number of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

This Notice Also List the Following Information

Title of Proposal: Section 5(h) Homeownership Program for Public Housing: Submission of Plan and Reporting.

OMB Approval Number: 2577–0201.

Form Numbers: None.

Description of the Need for the Information and its Proposed Use: Public Housing Agencies (PHAs) are required to submit to HUD a plan to sell public housing to residents. PHAs consult with residents in developing the plan. Residents who desire to purchase under the homeownership plan submit an application to the PHA. PHAs prepare the detailed plan including description of the property, terms and conditions of sales to the residents, budget estimate, counseling, training and technical assistance provided.

Respondents: Individuals or households, Not-for-profit institutions, State, Local or Tribal Government.

Frequency of Submission: Annually.

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Reporting Burden	73		1		74		5,421

Total Estimated Burden Hours: 5,421.

Status: Reinstatement, without change.

Authority: Sec. 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: November 27, 2001.

Statutorily Mandated Designation of Difficult Development Areas and Qualified Census Tracts for Section 42 of the Internal Revenue Code of 1986; Correction

AGENCY: Office of the Assistant Secretary for Policy Development and Research, HUD.

ACTION: Notice; correction.

SUMMARY: This notice corrects the designation of 2002 Qualified Census Tracts for Guam, published in the **Federal Register** on September 11, 2001.

FOR FURTHER INFORMATION CONTACT: For questions on how areas are designated and on geographic definitions: Steven Ehrlich, Economist, Division of Economic Development and Public Finance, Office of Policy Development and Research, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708–0426, e-mail *Steven_R._Ehrlich@hud.gov*. For specific legal questions pertaining to section 42 and this notice: Harold J. Gross, Senior Tax Attorney, Office of the General Counsel, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708–3260, e-mail *JERRY_GROSS@hud.gov*. For questions about the "HUBZones" program: Michael P. McHale, Assistant Administrator for Procurement Policy, Office of Government Contracting, Suite 8800, Small Business Administration, 409 Third Street, SW, Washington, DC 20416, telephone (202) 205–6731, fax (202) 205–7324, e-mail *michael.mchale@sba.gov*. A text telephone is available for persons with hearing or speech impairments at (202) 708–9300. (These are not toll-free telephone numbers.) Additional copies of this notice are available through HUD User at (800) 245–2691 for a small fee to cover duplication and mailing costs.

Copies Available Electronically: This notice and additional information about Difficult Development Areas and Qualified Census Tracts are available electronically on the Internet (World Wide Web) at *http://www.huduser.org/datasets/qct.html*.

SUPPLEMENTARY INFORMATION: On September 11, 2001 (66 FR 47266), the Department published a list of Statutorily Mandated Difficult Development Areas (DDAs) and Qualified Census Tracts (QCTs) for Section 42 of the Internal Revenue Code of 1986. Designations were made for all U.S. states and territories. An error affecting the Guam QCT designations was recently found. Five additional census tracts in Guam should have been designated as QCTs. No QCTs outside of Guam were affected by the error. No DDAs were affected by the error.

Accordingly, FR Doc 01–22566, a notice published in the **Federal Register** on September 11, 2001 (66 FR 47266), is corrected as follows:

On page 47370, the table under Nonmetropolitan Part of State: Guam, the entries are corrected to read as follows:

	Tract	Tract	Tract	Tract	Tract	Tract	Tract	Tract
Guam	9502.00	9512.00	9513.00	9526.00	9530.00	9539.98	9548.00	9555.00

Dated: November 21, 2001.

Lawrence L. Thompson,

General Deputy, Assistant Secretary for Policy Development and Research.

Public Housing Assessment System (PHAS) Financial Condition and Physical Condition Interim Scoring Notices Correction; Location for Submission of Public Comments

AGENCY: Office of the General Counsel, HUD.

ACTION: Notice; correction.

SUMMARY: On November 26, 2001, HUD published two notices that advised of interim scoring processes under HUD's Public Housing Assessment System (PHAS) for the PHAS Physical Condition Indicator and for the PHAS Financial Condition Indicator. The notices also solicited public comment but omitted the location where public comments could be submitted. This notice provides that information.

FOR FURTHER INFORMATION CONTACT: For further information contact the Real Estate Assessment Center (REAC), Attention: Wanda Funk, U.S. Department of Housing and Urban Development, 1280 Maryland Avenue, SW, Suite 800, Washington, DC 20024, telephone REAC's Customer Service Center at (888) 245–4860 (this is a toll free number) or the Office of Public and Indian Housing, Attention: Judy Wojciechowski, Director of PHAS Operations, U.S. Department of Housing and Urban Development, 1280 Maryland Avenue, SW, Suite 800, Washington, DC 20024, telephone (202) 708–4932 extension 3464. Persons with hearing or speech impairments may access these telephone numbers via TTY by calling the Federal Information Relay Service at (800) 877–8339. Additional information is available from the REAC web site at *http://www.hud.gov/reac/.*

SUPPLEMENTARY INFORMATION: On November 26, 2001, HUD published two notices that advised of interim scoring processes under HUD's Public Housing Assessment System (PHAS) for the PHAS Physical Condition Indicator (66 FR 59084) and for the PHAS Financial Condition Indicator (66 FR 59126). A third notice, the introductory notice to the two interim scoring processes (66 FR 59080) provided background information on the PHAS and also the basis for proposing interim scoring processes. All three notices solicited public comment but inadvertently omitted the location where public comments could be sent.

This notice published today provides that information. The address for submitted public comments on these notices is as follows:

ADDRESSES: Interested persons are invited to submit comments regarding this rule to the Rules Docket Clerk, Regulations Division, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays at the above address.

Dated: November 29, 2001.

Aaron Santa Anna,

Assistant General Counsel for Regulations.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered Species Permit Applications

AGENCY: Fish and Wildlife Service.

ACTION: Notice of receipt of permit applications.

SUMMARY: The following applicants have applied for a scientific research permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 USC 1531 *et seq.*).

Permit No. TE–049668

Applicant: California Department of Fish and Game, Bishop, California.

The applicant requests a permit to take (capture, collect, sacrifice, and remove genetic samples) the Owens tui chub (*Gila bicolor snyderi*) in conjunction with physiological investigations in Inyo, Mono, and Madera Counties, California for the purpose of enhancing its survival.

Permit No. TE–050122

Applicant: California Department of Fish and Game, Bishop, California.

The applicant requests a permit to take (capture, mark with radio collars, tag, translocate, and collect biological samples) the bighorn sheep (*Ovis canadensis*) in conjunction with ecological research in Inyo and Mono Counties, California for the purpose of enhancing its survival.

Permit No. TE–802450

Applicant: Arthur E. Davenport, El Cajon, California.

The permittee requests a permit amendment to take (survey by pursuit) the Quino checkerspot butterfly (*Euphydryas editha quino*) and take (capture and tag) the San Bernardino kangaroo rat (*Dipodomys merriami parvus*) in conjunction with demographic studies on the San Diego National Wildlife Refuge, California for the purpose of enhancing their survival.

Permit No. TE–840622

Applicant: Coralie Hull Cobb, San Diego, California.

The permittee requests a permit amendment to take (harass by survey, collect, and sacrifice) the Conservancy fairy shrimp (*Branchinecta conservatio*), longhorn fairy shrimp (*Branchinecta longiantenna*), San Diego fairy shrimp (*Branchinecta sandiegonensis*), vernal pool tadpole shrimp (*Lepidurus packardi*), and Riverside fairy shrimp (*Streptocephalus wootoni*) throughout each species' range in conjunction with surveys for the purpose of enhancing their survival.

DATES: Written comments on these permit applications must be received on or before January 4, 2002.

ADDRESSES: Written data or comments should be submitted to the Chief, Endangered Species, Ecological Services, Fish and Wildlife Service, 911 NE. 11th Avenue, Portland, Oregon 97232–4181; Fax: (503) 231–6243. Please refer to the respective permit number for each application when submitting comments. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 20 days of the date of publication of this notice to the address above; telephone: (503) 231–2063. Please refer to the respective permit number for each application when requesting copies of documents.

Dated: November 19, 2001.

Rowan W. Gould,

Acting Regional Director, Region 1, Portland, Oregon.

Endangered and Threatened Species Permit Applications

ACTION: Notice of receipt of applications.

SUMMARY: The following applicants have applied for a scientific research permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*).

Permit No. TE–814933

Applicant: Texas Parks & Wildlife Department, Austin, Texas.

Applicant requests a permit to collect plant materials for research and recovery purposes from the following plant species within Texas: Ashy dogweed (Thymophylla tephroleuca), Black lace cactus (Echinocereus reichenbachii var. albertii), Bunched cory cactus (Coryphantha ramillosa), American chaffseed (Schwalbea americana), Chisos Mountains hedgehog cactus (Echinocereus chisoensis var. chisoensis), Davis'green pitaya (Echinocereus viridiflorus var. davisii), Hinckley Oak (Quercus hinckleyi), Johnston's frankenia (Frankenia johnstonii), Large-fruited sand-verbena (Abronia macrocarpa), Little Aguja pondweed (Potamogeton clystocarpus), Navasota ladies' tresses (Spiranthes parksii), Nellie cory cactus (Coryphantha minima), Pima pineapple cactus (Coryphantha scheeri var. robustispina), Slender rush-pea (Hoffmannseggia tenella), Sneed pincushion cactus (Coryphantha sneedii var. sneedii), South Texas ambrosia (Ambrosia cheiranthifolia), Star cactus (Astrophytum asterias), Terlingua Creek cat's eye (Cryptantha crassipes), Texas trailing phlox (Phlox nivalis ssp. Texensis), Texas ayenia (Ayenia limitaris), Texas poppy-mallow (Callirhoe scabriuscula), Texas prairie dawn-flower (Hymenoxys texana), Texas snowbells (Styrax texana), Tobusch fishhook cactus (Ancistrocactus tobuschii), Walker's manioc (Manihot walkerae), White bladderpod (Lesquerella pallida), and Zapata bladderpod (Lesquerella thamnophila). Applicant also requests authorization to conduct presence/absence surveys for the Ocelot (Felis pardalis), Southwestern willow flycatcher (Empidonax traillii extimus), Red-cockaded woodpecker (Picoides borealis), Northern aplomado falcon (Falco femoralis septentrionalis), Whooping Crane (Grus americana) and Interior least tern (Sterna antillarum) within Texas.

Permit No. TE–049001

Applicant: Plateau Integrated Land and Wildlife Management, Dripping Springs, Texas.

Applicant requests a permit to conduct presence/absence surveys and nest monitoring for the Golden-cheeked warbler (Dendroica chrysoparia) and Black-capped vireo (Viero atricapillus) within Texas.

Permit No. TE–050021

Applicant: Greg Clark, Chandler, Arizona.

Applicant requests a permit for recovery purposes to conduct presence/absence surveys for the Cactus Ferruginous Pygmy Owl (Glaucidium brasilianum) in Pima County, Arizona.

Permit No. TE–050241

Applicant: Carothers Environmental, LLC, Sedona, Arizona.

Applicant requests a permit for recovery purposes to conduct presence/absence surveys for the following species: Cactus ferruginous pygmy-owl (Glaucidium brasilianum cactorum), Southwestern willow flycatcher (Empidonax traillii extimus), Hualapai Mexican Vole (Microtus mexicanus hualpaiensis), Humpback chub (Gila cypha), Razorback sucker (Xyrauchen texanus), and Kanab ambersnail (Oxyloma haydeni kanabensis) within Arizona, New Mexico, Oklahoma and Texas.

DATES: Written comments on these permit applications must be received on or before January 4, 2002.

ADDRESSES: Written data or comments should be submitted to the Chief, Endangered Species Division, Ecological Services, P.O. Box 1306, Room 4102, Albuquerque, New Mexico 87103; (505) 248–6649; Fax (505) 248–6788. Documents will be available for public inspection by written request, by appointment only, during normal business hours (8 to 4:30) at the U.S. Fish and Wildlife Service, Albuquerque, New Mexico. Please refer to the respective permit number for each application when submitting comments. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: Chief, Endangered Species Division, Albuquerque, New Mexico, at the above address. Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice, to the address above.

Susan MacMullin,

Assistant Regional Director, Ecological Services, Region 2, Albuquerque, New Mexico.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of the Karner Blue Butterfly (*Lycaeides melissa samuelis*) Technical/Agency Draft Recovery Plan for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces availability for public review of a technical/agency draft recovery plan for the endangered Karner blue butterfly (*Lycaeides melissa samuelis*). The Karner blue butterfly is known to presently occur in seven states: Minnesota, Wisconsin, Michigan, Indiana, New Hampshire, New York, and Ohio, where it was recently reintroduced. The Service solicits review and comments from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before April 4, 2002 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Field Supervisor of the Green Bay Ecological Services Field Office, U.S. Fish and Wildlife Service, 1015 Challenger Court, Green Bay, Wisconsin 54311 or by accessing the website: *http//midwest.fws.gov/endangered*. Written comments and materials regarding the plan should be addressed to the Field Supervisor at the above address. Comments and materials received will be available, by appointment, for public inspection during normal business hours, at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Catherine Carnes, (at the above address) Telephone: (920) 465–7415. TTY users may contact Ms. Carnes through the Federal Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for reclassification and delisting, and an estimate of time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et. seq.*), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and opportunity for public review and comment to be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The document submitted for review is the Karner Blue Butterfly (*Lycaeides melissa samuelis*) Technical/Agency Draft Recovery Plan. Historically, the butterfly occurred in 12 states and the Province of Ontario. Its current range has been reduced to seven states: Minnesota, Wisconsin, Michigan, Indiana, New Hampshire, New York, and Ohio, where it was recently reintroduced. Three of these states (Ohio, New Hampshire, and Minnesota) have only one extant Karner blue butterfly population. Wisconsin and Michigan support the majority of populations throughout the range.

The Karner blue butterfly was listed as endangered on January 21, 1992. The butterfly depends on savanna and barrens habitats that support wild lupine (*Lupinus perennis*), the only plant Karner blue larvae (or caterpillars) are known to feed on. Threats to the butterfly include continued loss and alteration of habitat due to commercial, residential, and agricultural development, fragmentation, and degradation through succession. Today, the butterfly inhabits remnant savanna and barrens habitats, as well as other more disturbed habitat sites including younger forest stands, military bases, utility and roadway rights-of-way, and airports.

The primary objective of the draft recovery plan is to restore and protect an adequate number of Karner blue butterfly populations throughout its range to ensure long-term viability of the species in the wild. The plan proposes a total of 13 recovery units throughout a six state recovery area (Minnesota, Wisconsin, Michigan, Indiana, New York, and New Hampshire). In order to reclassify the butterfly from endangered to threatened status, the plan proposes the establishment of at least 28 metapopulations within the recovery units. In order to remove the butterfly from the Federal list of "Threatened and Endangered Species," the plan recommends a minimum of 29 metapopulations be established throughout the recovery units.

The draft recovery plan presents a blueprint for action by Federal and state agencies, as well as other organizations, and private landowners interested in helping in the recovery of this endangered species. Recovery actions include restoration and protection of Karner blue butterfly habitat, population monitoring, continued refinement of habitat management guidelines, research to guide habitat management and captive propagation efforts, and education and outreach efforts. Working with Federal, state and private landowners on a voluntary basis will be necessary to reduce the threats, and conserve, protect, and manage key habitat areas for the Karner blue butterfly.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified will be considered prior to approval of the plan. Comments should be sent to the Field Supervisor, Ecological Services Field Office, at the above address.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: November 9, 2001

T.J. Miller,

Acting Assistant Regional Director, Ecological Services.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[OR–027–1220–DG; G 2–0019]

Steens Mountain Advisory Council; Meetings

AGENCY: Bureau of Land Management (BLM), Burns District, Interior.

ACTION: Meetings notice for the Steens Mountain Advisory Council.

SUMMARY: The Steens Mountain Advisory Council (SMAC) will meet at the Bureau of Land Management (BLM), Burns District Office, 28910 Hwy 20 West, Hines, Oregon 97738, on December 17 and 18, 2001; January 24 and 25, 2002; February 28 and March 1, 2002; April 4 and 5, 2002; June 13 and 14, 2002; October 21 and 22, 2002; and December 2 and 3, 2002; and will meet in Frenchglen, Oregon 97736 on August 15 and 16, 2002. All meeting sessions will begin the first day at 8 a.m., local time, and will end at 5 p.m., local time. The second day of each session will begin at 8 a.m., local time, and will end at approximately 3 p.m., local time. The April 4 and 5, 2002; June 13 and 14, 2002; and August 15 and 16, 2002, meeting sessions will consist of meetings on April 4, June 13, and August 15, followed by tours of the Steens Mountain Cooperative Management and Protection Area (CMPA) on April 5, June 14, and August 16, 2002, weather dependent. Topics to be discussed by the SMAC at the December 17 and 18, 2001, meeting include selection of a chairperson; facilitation needs; Subbasins, Analysis of the Management Situation, Interim Management Policy, and Special Recreation Permit Policy review; Federal Advisory Committee Act; cooperative agreements/incentives; winter recreation; signs; and other matters as may reasonably come before the SMAC. Future meetings will cover categories such as education; transportation; recreation/public use; special designated areas; cultural resources; watersheds; projects; wildlife; partnerships/programs; volunteer-based information; adaptive management; planning process; science committee/consultants; and socioeconomics. All meetings and tours are open to the public in their entirety. Information to be distributed to the SMAC is requested 10 days prior to the start of each SMAC meeting. Public comment is scheduled for 11 a.m. to 11:30 a.m., local time, the first day of each meeting session. The amount of time scheduled for public presentations and meeting times may be extended when the authorized

representative considers it necessary to accommodate all who seek to be heard regarding matters on the agenda.

The SMAC was appointed by the Secretary of the Interior on August 14, 2001, pursuant to the Steens Mountain Cooperative Management and Protection Act of 2000 (Act). The SMAC's purpose is to provide representative counsel and advice to the BLM regarding (1) new and unique approaches to management of the land within the bounds of the Steens Mountain CMPA, (2) cooperative programs and incentives for landscape management that meet human needs, maintain and improve the ecological and economic integrity of the area, and (3) preparation and implementation of a management plan for the Steens CMPA.

Under the Federal Advisory Committee Act management regulations (41 CFR 102–3.15(b)), in exceptional circumstances an agency may give less than 15 days notice of committee meeting notices published in the **Federal Register**. In this case, this notice is being published less than 15 days prior to the meeting due to the urgent need to meet legislative deadlines to complete the Steens CMPA management plan and to avoid additional delays.

FOR FURTHER INFORMATION CONTACT: Additional information concerning the SMAC may be obtained from Rhonda Karges, Management Support Specialist, Burns District Office, 28910 Hwy 20 West, Hines, Oregon 97738, (541) 573–4433, or *Rhonda_Karges@or.blm.gov* or from the following Web site *http://www.or.blm.gov/Steens.*

Dated: October 25, 2001.

Thomas H. Dyer,

Burns District Manager.

BILLING CODE 4310–33–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Office of Planning and Performance Management; Agency Information Collection Activities: Submitted for Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Department of the Interior.

ACTION: Notice of new information collection survey.

SUMMARY: To comply with the requirements of the Paper Reduction Act (PRA) of 1995, we are submitting to OMB for review and approval an information collection request (ICR) for the Department of the Interior (DOI) to conduct voluntary customer satisfaction surveys to gather input and feedback from the public. The ICR is entitled "DOI Programmatic Clearance for Customer Satisfaction Surveys." We are also soliciting comments from the public on this ICR.

DATES: Please submit written comments by January 4, 2002.

ADDRESSES: You may submit comments directly to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for the Department of the Interior (OMB Control Number 1040–NEW), 725 17th Street, NW., Washington, DC 20503. Mail or handcarry a copy of your comments to the Department of the Interior; Office of Planning and Performance Management; Mail Stop 5258–MIB; 1849 C Street, NW., Washington, DC 20240. If you wish to email comments, the email address is: *Norma_Campbell@os.doi.gov*. Reference "DOI Programmatic Clearance for Customer Satisfaction Surveys" in your email subject line. Include your name and return address in your email message and mark your message for return receipt.

FOR FURTHER INFORMATION CONTACT: Norma Campbell, Office of Planning and Performance Management, telephone (202) 208–1818. You also may contact this office to obtain at no cost a copy of the collection of information that will be submitted to OMB.

SUPPLEMENTARY INFORMATION:

Title: DOI Programmatic Clearance for Customer Satisfaction Surveys.

OMB Control Number: 1040–NEW.

Abstract: The mission of DOI is to protect and provide access to our Nation's natural and cultural heritage and honor our trust responsibilities to Indian Tribes and our commitments to island communities. DOI's Strategic Plan Overview (FY 2000–2005) lays out five goals as a framework for this work: (1) Protect the environment and preserve our Nation's natural and cultural resources; (2) provide recreation for America; (3) manage natural resources for a healthy environment and our strong economy; (4) provide science for a changing world; and (5) meet our trust responsibilities to Indian Tribes and our commitments to island communities. Each bureau' s plan also contains goals requiring collaboration with the public—our partners and customers. Part of this communication occurs through occasional surveys of the different users and stakeholders of DOI's products and services.

In the spirit of the PRA, DOI is consolidating its ICRs related to customer surveys for all participating offices and bureaus into one programmatic ICR. This single ICR will ease the public burden by submitting a generic format and set of standards that all customer survey-related collections would follow in DOI. Because the participating bureaus and offices have differing customer and stakeholder groups, there will not be one "boiler-plate" approach to customer research. The ICR will describe those differences, where apparent. Although, where applicable, similar questions will be asked in the surveys of the bureaus and offices to allow better benchmarking throughout DOI.

Background

The Government Performance and Results Act (GPRA) of 1993 (Pub.L. No. 103–62) sets out to "improve Federal program effectiveness and public accountability by promoting a new focus on results, service quality, and customer satisfaction" (Section 2.b.3). In order to fulfill this responsibility, DOI's bureaus and offices must collect data from their respective user groups to (1) better understand the needs and desires of the public and (2) respond to those needs and desires accordingly.

This course of action is fortified by Executive Order (E.O.) 12862 (September 11, 1993) aimed at "ensuring the Federal Government provides the highest quality service possible to the American people." The E.O. discusses surveys as a means for determining the kinds and qualities of service desired by the Federal Government's customers and for determining satisfaction levels for existing service. These voluntary customer surveys will be used to ascertain customer satisfaction with DOI's bureaus and offices in terms of services and products. Previous customer surveys have provided useful information to DOI's bureaus and offices for assessing how well we deliver our services and products, making improvements, and reporting on annual performance goals as set out in GPRA-related documents. The results are used internally, and summaries are provided to OMB on an annual basis and are used to satisfy the requirements and spirit of E.O. 12862.

Furthermore, E.O. 12862 requires agencies to provide a "means to address customer complaints." To that end, bureaus and offices may use customer comment cards as an opportunity for customers to provide feedback to the agencies on the service they have received.

More recently, President Bush's Management Agenda for 2001 calls for citizen-centered government. The

Secretary of the Interior's August 3, 2001 memorandum, "Management Excellence and Citizen-Centered Service," directs bureaus and offices to focus on citizen-centered governance. The proposed OMB Guideline for Ensuring and Maximizing the Quality, Objectivity, Utility, and Integrity of Information Disseminated by Federal Agencies would require agencies to submit annual reports "detailing the number and nature of complaints received by the agency regarding agency compliance with these OMB guidelines." Comment cards and other survey methods facilitated by this programmatic clearance would provide valuable information to assist DOI's bureaus and offices in following the Administration's guidance.

In addition to GPRA and E.O. 12862, the statutes, regulations, and Secretarial Orders that created each of the bureaus and offices further enhance the need to engage the public and deliver quality products and services to our customers.

The participating DOI bureaus and offices anticipate performing their customer surveys under one ICR. Under this proposal, DOI would request that OMB review the procedures and question areas for these surveys as a program, rather than reviewing each survey individually. Under the procedures proposed here, DOI would conduct the necessary quality control (through a "secondary office of control" within DOI), including assurances that the individual survey comports with the guidelines in this proposed programmatic ICR, and submit the particular survey instruments and methodologies for expedited review to OMB.

Participating Bureaus and Offices

The proposed ICR covers most of the organizational agencies in DOI. However, the National Park Service, which has one of the most mature customer survey programs in the Federal Government, will continue under its own separate clearance given the complexity and specificity of its program. The participating bureaus and offices covered under the proposed ICR include:

- Bureau of Indian Affairs
- Bureau of Land Management (BLM)
- Bureau of Reclamation
- US Fish & Wildlife Service
- Office of Insular Affairs
- Minerals Management Service
- Office of the Secretary
- Office of Surface Mining
- US Geological Survey (USGS)

Current Actions

The request to OMB will be for a 3-year clearance to conduct customer satisfaction surveys in the participating DOI bureaus and offices. USGS and BLM, who have developed customer research programs, are currently operating under 3-year programmatic clearances. Other participating bureaus and offices have handled their ICRs on a case-by-case basis.

For example, under existing approvals, USGS in 2000 surveyed users of the on-line National Atlas, State and Federal land managing and natural resource agencies, customers of Eros Data Center (digital data and maps), and customers of Earth Science Information Centers (topographic maps, USGS publications). Over the last 3 years, BLM has surveyed users of recreation areas, grazing permittees, oil and gas permittees, stakeholders and partners, and public room users, as well as conducted focus groups with various customer groups. These collections occur through one of six methodologies: (1) Intercept (a customer interacting in person with one conducting the survey); (2) telephone interviews; (3) mail surveys; (4) web-based surveys; (5) focus groups; and (6) voluntary use of comment cards.

Examples of previously conducted customer surveys are available upon request. Our planned activities in the next 3 fiscal years reflect our increased emphasis on and expansion of these activities throughout DOI.

Methodology

In all customer research, the goal of DOI is to employ the best statistical models that, in turn, will lead to the best data from which sound management decisions can be made. Therefore, an 80 percent response rate has been set for all customer surveys, with a 70 percent response rate as base threshold.

Different user and stakeholder groups function and interact with the respective bureaus and offices in different ways. In order to meet the response rate goal, six different methodologies will be available for use. The methodology will be chosen based on achieving statistical accuracy while keeping the cost as low as possible. The six methodologies that DOI's bureaus and offices will employ are: (1) Intercept, (2) telephone interviews, (3) mail surveys, (4) web-based surveys, (5) focus groups, and (6) comment cards. In all cases, the goal is to achieve the 95 percent confidence level with a sampling error no greater than ±5 percent. The total number of respondents sought for each survey will be based on achieving this level. In most cases, the respondent base will be pulled from a randomized sample of the user population, and where necessary, a stratified sample will be used to achieve accurate statistical measures at the appropriate National, State, or regional level. In some cases where the user population is small, the entire population will need to be surveyed.

Intercept: In a face-to-face situation, the survey instrument is provided to a respondent who completes it while on site and then returns it. The survey proctor is prepared to answer any questions the respondent may have about how to fill out the instrument but does not interfere or influence how the respondents answer the questions. This methodology provides the highest response rate—typically between 80–85 percent.

Telephone: Using existing databases, an interviewer will contact customers who have had a specific experience with the agency. The interviewer will dial back until the customer has been reached. Once contacted, the survey respondent is given a brief introduction to the survey, including its importance and use. The interviewer will then expeditiously move through the survey questions. When this methodology is employed, the typical response rate is between 70 and 85 percent, depending on the customer group.

Mail: Using existing lists of customer addresses, a three contact-approach based on Dillman's "Tailored Design Method" will be employed. The first contact is a cover letter explaining that a survey is coming to them and why it is important to the agency. The second contact will be the survey instrument itself along with a postage-paid addressed envelope to return the survey. The third contact will be a reminder postcard sent 10 days after the survey was sent. Finally, the respondents will receive a letter thanking them for the willingness to participate in the survey and reminding them to return it if they have not already done so. At each juncture, the respondents will be given multiple ways to contact someone with questions regarding the survey (including phone, FAX, web, and email). If the survey has been lost, the respondent can request that another be sent to them. Electronic mail is sometimes used instead of postal mail to communicate with customers. Although this is a cost-effective mode to survey a large group of people, it does not usually generate the best response rate. Telephone calls to non-respondents can be used to increase response rates.

Web-based: For products or services that are provided through electronic means, whether e-commerce or web-based information, a web or email survey may be most appropriate. During

the course of their web interaction, users can volunteer to add their name to a list of future surveys. From this list, a respondent pool will be selected in accordance with the sampling procedures outlined above. An email will be sent to them explaining the need and importance of the survey with a web link to the survey. Within 5 days, a follow-up email will be sent to the respondents reminding them to complete the survey. Finally, the respondents will receive an email thanking them for the willingness to participate in the survey and reminding them to complete it if they have not already. The respondent will always have the option to submit the survey in paper form, should they elect to do so.

Focus Groups: Some data and information are best collected through more subjective, conversational means. A focus group is an informal, small-group discussion designed to obtain in-depth qualitative information. Individuals are specifically invited to participate in the discussion, whether in person or through technologically enhanced means (i.e., video conferencing, on-line sessions). Participants are encouraged to talk with each other about their experiences, preferences, needs, observations, or perceptions. A moderator whose role is to foster interaction leads the conversation. The moderator makes sure that all participants are encouraged to contribute and that no individual dominates the conversation. Furthermore, the moderator manages the discussion to make sure it does not stray too far from the topic of interest. Focus groups are most useful in an exploratory stage or when the bureaus and offices want to develop a deeper understanding of a program or service.

Using the best in focus group research practices, groups will be constructed to include a cross-section of a given customer group. The questions and additional probes used during the focus groups will be consistent with the "guideline menu" discussed below.

Comment Cards: As discussed in the Background section above, agencies have been instructed to provide a means to address customer complaints. To facilitate this, comment cards may be employed. Comment cards, when provided to a customer at the time a product or service is provided, offer an excellent means to give the bureaus and offices feedback. A comment card should have a limited number of questions and an opportunity to comment. These comment cards provide managers and service providers with direct, specific, and timely information from their customers about new service problems as they crop up, or extraordinary performance, that could not be obtained through any other means.

Electronic users may be offered the opportunity to complete a comment card via a "pop-up" window (or other web-enabled means that may be available). The "pop-up" window will not appear for every user; rather, the users will be randomly selected to receive the survey. This practice is widely used in private industry. In other instances, the electronic user may be offered the option to self-select in answering the electronic comment card.

Whether using paper or electronic comment cards, the intent is to provide a feedback mechanism. The data are not intended to be statistically significant. Although questions may include numeric scales. those data should be considered only in an anecdotal fashion and not reported as a significant measure.

Remuneration/Incentives: A great deal of the literature related to customer satisfaction research recommends that incentives, monetary and non-monetary, be used to increase response rates (see D. Dillman publications, specifically Mail and Internet Surveys, 2000). Although bureaus and offices acting in wholly a regulatory role would not seek to provide remuneration to their permittees, bureaus and offices that operate in a more service-related mode may find incentives to be both helpful and appropriate. Therefore, DOI proposes to handle remuneration/incentives on a case-by-case basis as part of the expedited OMB review (i.e., the 10-day expedited OMB review). An agency may propose non-monetary incentives; such as a discount at an on-site book store, a small souvenir, or complimentary access to a facility/site.

Topic Areas: The participating bureaus and offices propose to survey customers in the following general categories:

- Authorized public land uses (i.e., rights-of-way, land management transactions, mining, recreation, oil and gas, grazing, wildlife photographers, hunters, and fishers)
- Coal operators
- Contractors/venders
- Disabled persons and groups representing disabled persons
- Educators/researchers
- Environmental groups
- Governments representatives (State, local, and foreign)
- Grant recipients
- Indian Tribes/Alaskan Natives/Native Americans
- Industry groups (i.e., mining, oil and gas)
- Insular governments
- Interested publics/special interest groups (i.e., Friends groups for wildlife refuges)
- Law enforcement authorities, custom brokers, and brokers' associations
- Local communities
- Private and public land stakeholders (i.e., hunting, fishing, farming, banking, legal, real estate representatives, and land trust operators)
- Public information center users
- Scientific data users and technical assistance recipients
- State wildlife agencies' representatives
- Taxidermists and falconers
- Technical training recipients
- Trade organizations
- Utilities' representatives
- Visitors/Recreation
- Volunteers (past, present, prospective)
- Zoo, aquarium, and botanical garden stakeholders

There are 11 topic areas that the participating bureaus and offices are proposing to voluntarily obtain information from their customers and stakeholders. No one survey will cover all the topic areas; rather, this serves as a "guideline menu" from which the agencies would develop their questions. Example(s) of the types of questions that would be asked under each topic are provided. Under the proposed ICR, the agencies could use these specific questions or develop questions that fit within the generally understood confines of the topic area. Questions may be asked in languages other than English, i.e., Spanish, where appropriate.

The surveys could be designed using one of two generally accepted modes: (a) A statement for which the respondent uses a scaled answer (i.e., strongly agree, strongly disagree, not applicable, etc., based on a Lichert Scale) or (b) a question that asks for a specific response (i.e., yes/no, demographics, open-ended improvement question, etc.). For questions that use the Lichert scale and a preset list of options, the data will be reported in a numeric fashion, including average response and percent favorable. Open-ended questions will be subjected to a content analysis and be reported on accordingly.

1. Communication/information/education:

a. Providing consistent and timely information to the public.

b. Where did you obtain your information about this site?

c. Making it easy for people to find out about proposed changes.

d. Educating people about particular processes.
e. Providing accurate, detailed and affordable maps and brochures.
f. Providing useful web site, signs, publications, and exhibits.
g. Charging an appropriate fee for the information/material provided.
h. The information provided was effective and helpful.
i. Providing quality web-based information.
j. Engaging the public in the planning process.
2. Disability accessibility:
a. Do you or does someone in your party have a disability?
b. If yes, how well does the agency make buildings, facilities, and trails accessible to people with disabilities?
c. Accessibility to the programs and activities that address my needs.
3. Facilities:
a. Maintaining roads and trails.
b. Maintaining a clean recreation site.
c. Providing entrance/directional signs to sites and facilities.
d. Providing a facility that is conducive to meeting specific user needs.
4. Management practices:
a. Responding to issues and problems in a timely manner.
b. Providing access to a supervisor to resolve the problem.
c. Understanding my needs.
d. If you could make one improvement to XXX service, what would it be?
5. Resource management:
a. Providing reasonable access to resources.
b. The extent to which the natural and cultural resources are protected.
c. Getting public input when identifying critical areas for conservation.
d. Preserving water resources and habitat for fish, wildlife, and plants.
6. Rules, regulations, policies:
a. Ensuring public awareness of rules and regulations.
b. Ensuring fair and consistent policies for all users.
c. The rules, regulations, and policies are clear and in plain language.
d. Providing adequate protest and appeal policies to resolve issues and disputes.
e. Adequately enforcing rules and regulations for all users.
7. Service delivery:
a. Providing a single point of contact.
b. The staff I interacted with were courteous and friendly.
c. The staff I interacted with were knowledgeable about the rules and regulations.
d. The staff I interacted with were able to answer my questions about natural, historic, and cultural resources.
e. The staff listened to and considered my ideas.
f. The training I received provided the information I needed.
g. The response was timely.
8.Technical assistance:
a. Provides unbiased scientific and technical.support products and services.
b. Reflects reasonable pricing.
c. Quality of the execution of the analysis and interpretation.
d. Considered alternative interpretations.
e. Provides useful information.
9. Program-specific: These questions will reflect the specific details of a program that pertain to their customer respondents. The questions will be developed to address very specific and/or technical issues related to the program. The questions will be geared toward gaining a better understanding about how to provide specific products and services as well as the priority the public would give to specific program objectives; they will not ask the respondents for their opinions about policies.
10. Overall satisfaction:
a. Everything considered, how would you rate your overall satisfaction with the delivery of XXX program or service?
b. Values my relationship as a customer.
c. I will contact or visit again for information or services.
d. I trust XXX agency to do a good job performing XXX mission.
11. General demographics:
a. What is your zip code?
b. How many times have you used this service in the previous 12 months?
c. How many people are in your group?
d. What activities did you participate in?
e. As part of your recreation in this site/area, approximately how much money did you spend in the local community/area (e.g. lodging, equipment, food, fuel, maps/books, tours, guides)?
f. What was your total household income (before taxes) in 2000 (less than $20,000; $20,000 to $39,999; $40,000 to $59,999; $60,000 to $79,999; $80,000 to $99,999; $100,000 to $119,999; $120,000 or more)?
g. What is the highest level of education you have completed (some high school or less; high school graduate or GED; business school, trade school, or some college; college graduate; some graduate school; masters, Ph.D., or professional degree)?
h. What is the primary language spoken at home? (i.e., English, Spanish)
i. In what ethnic group would you place yourself (Hispanic/Latino or non-Hispanic/Latino)?
j. In what race would you place yourself (American Indian, Eskimo, Aleut; Asian or Pacific Islander; Black or African America; White; Native Hawaiian)? Select one or more.

Uses of Data: Chiefly, these data are being collected to improve the service and products that the participating bureaus and offices provide to the public. Managers and program specialists use these data to identify:

- Service needs of customers
- Strengths and weaknesses of services
- Ideas or suggestions for improvement of services from our customers
- Barriers to achieving customer service standards
- Changes to customer service standards
- Baselines to measure change in improving service delivery over time
- Improving public trust in government

They also use this information to support all aspects of planning, from buildings, roads, and interpretive exhibits, to technical systems. In conducting their management, planning, and monitoring activities, managers also use the information to effectively allocate their limited personnel and financial resources to the highest priority elements.

While the information will not be used for regulatory development, DOI anticipates that the information obtained could lead to reallocation of resources, revisions in certain agency processes and policies, and development of guidance related to the agency's customer services. Ultimately, these changes should result in improvement in services DOI provides to the public and, in turn, the public perception of DOI.

In fulfilling the requirements of GPRA, DOI and all of its bureaus and offices have created a Strategic Plan in coordination with their respective publics. GPRA requires DOI to annually report on its progress toward achieving the goals outlined in the Annual Performance Plan. Some of the data collected may be used as the basis or in support of specific performance measures.

Frequency: The frequency varies by survey.

Estimated Number and Description of Respondents: See attached "Table: Customer Types by Participating Bureau/Office" for list of respondents. This table shows the likely groups that would be surveyed by each bureau and office but is not intended to limit the bureaus and offices to such groups.

Estimated Annual Reporting and Recordkeeping "Hour" Burden: We estimate that there are approximately 120,000 respondents submitting 120,000 responses (surveys and comment cards) annually. The average public reporting burden for a customer survey is estimated to be 15 minutes per respondent. For comment cards, the average public reporting burden is estimated to be 3 minutes per response. Given these estimates, DOI anticipates a budget of 18,000 hours per year for these proposed collections. We estimate, base on a $15 per hour valuation of volunteer time and the projected budget hours, an approximate aggregate cost to respondents of $270,000. Burden includes the total time, effort, or financial resources expended to generate, maintain, retain, or disclose or provide the information, including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for purposes of collecting, validating, verifying, processing, maintaining, disclosing, and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting or otherwise disclosing information. Please comment on the accuracy of our estimates and how DOI's bureaus and offices could minimize the burden of the collection information, including the use of automated techniques.

Estimated Annual Reporting and Recordkeeping "Non-Hour cost" Burden: We have identified no "non-hour costs" burdens.

Public Disclosure Statement: The PRA provides that a Federal agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. Until OMB approves a collection of information, you are not obligated to respond.

Comments: Section 3506(c)(2)(A) requires each agency "* * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *" Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology. Furthermore, we are interested in your comments regarding the need for and appropriateness of remuneration/incentives, or other suggestions you may have to increase response rates.

To comply with the public consultation process, on August 8, 2001, we published a **Federal Register** Notice (66 FR 41600) announcing that we would submit this ICR to OMB for approval. The notice provided the required 60-day comment period. No public comments were received.

If you wish to comment in response to this notice, send your comments directly to the offices listed under the **ADDRESSES** section of this notice. OMB has up to 60 days to approve or disapprove the information collection but may respond after 30 days. Therefore, to ensure maximum consideration, OMB should receive public comments by January 4, 2002.

Public Comment Policy: Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home address from the record, which we will honor to the extent allowable by law. There may be circumstances in which we would withhold from the record a respondent's identity, as allowable by law. If you, as a commenter, wish us to withhold your name and/or address, you must state this prominently as the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives of organizations or businesses, available for public inspection in their entirety.

DOI Information Collection Contact: Office of Planning and Performance Management (202) 208–1818.

Dated: November 13, 2001.

Norma J. Campbell,

Director, Office of Planning and Performance Management.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

American River Pump Station Project, Placer County, California

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of extension of time for review of draft environmental impact statement/environmental impact report (EIS/EIR).

SUMMARY: The Bureau of Reclamation (Reclamation) is extending the public review period for the Draft EIS/EIR for the PCWA American River Pump Station Project to December 13, 2001. The notice of availability for the Draft EIS/EIR was published in the **Federal Register** on September 13, 2001 (66 FR 47685–47686). The public review period was originally to end on November 13, 2001.

DATES: Public comments on the Draft EIS/EIR should be submitted on or before December 13, 2001.

ADDRESSES: Written comments on the Draft EIS/EIR should be addressed to Ms. Carol Brown, Surface Water Resources, Inc., 2031 Howe Avenue, Suite 110, Sacramento, California 95825. Requests for a printed copy of the Draft Programmatic EIS/EIR should also be addressed to Ms. Carol Brown.

FOR FURTHER INFORMATION CONTACT: For additional information, contact Mr. Roderick Hall, Reclamation, at (916) 989–7279, TDD (916) 980–7285, or e-mail *rhall@mp.usbr.gov;* or Mr. Brent Smith, PCWA, at (530) 823–4889, or e-mail at *bsmith@pcwa.net.*

Dated: November 16, 2001.

Frank Michny,

Regional Environmental Officer.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–267 and 268 (Review) (Remand)]

Top-of-Stove Stainless Steel Cooking Ware From Korea and Taiwan; Notice and Scheduling of Remand Proceedings

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The U.S. International Trade Commission (the Commission) hereby gives notice of the court-ordered remand of its final antidumping investigation in Top-of-Stove Stainless Steel Cooking Ware from Korea and Taiwan No. 731–TA–267 and 268 (Review).

EFFECTIVE DATE: November 29, 2001.

FOR FURTHER INFORMATION CONTACT: George Deyman, Office of Investigations, telephone 202–205–3197 or Laurent de Winter, Office of General Counsel, telephone 202–708–5452, U.S. International Trade Commission. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*).

SUPPLEMENTARY INFORMATION

Reopening of the Record

For purposes of its determination on remand, the Commission is reopening the record in this investigation for the limited purpose of (1) seeking basic information regarding subject product from Taiwan and (2) seeking to cure the possible inclusion of non-subject products in official import data. The Commission will provide the parties an opportunity to file comments on any new information received pertaining to these subjects. A schedule for the submission of such comments will be published shortly.

Participation in the Proceedings

Only those persons who were interested parties to the original administrative proceedings (i.e., persons listed on the Commission Secretary's service list) may participate in these remand proceedings.

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and BPI Service List

Information obtained during the remand investigation will be released to parties under the administrative protective order ("APO") in effect in the original investigation. Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make business proprietary information gathered in the final investigation and this remand investigation available to additional authorized applicants, that are not covered under the original APO, provided that the application is made not later than seven (7) days after publication of the Commission's notice of reopening the record on remand in the **Federal Register**. Applications must be filed for persons on the Judicial Protective Order in the related CIT case, but not covered under the original APO. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO in this remand investigation.

Authority: This action is taken under the authority of the Tariff Act of 1930, title VII.

Issued: November 29, 2001.

By order of the Commission.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, notice is hereby given that on November 14, 2001, a proposed consent decree in the case captioned *Dow Chemical Co., et al.* v. *Acme Wrecking Co., Inc., et al.*, Civil Action Nos. C–1–97–0307, C–1–97–0308, and C–1–01–439 (S.D. Ohio), was lodged with the United States District Court for the Southern District of Ohio. The proposed

de minimis consent decree relates to the Skinner Landfill Superfund Site ("Site") in West Chester, Ohio. The proposed consent decree would resolve civil claims of the United States for response actions and for the recovery of response costs at the Site under Sections 106 and 107(a) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended, 42 U.S.C. 9606, 9607(a), against Sealy, Inc., and Sealy Mattress Co. (collectively "Sealy"), Acme Wrecking Co., Inc. ("Acme Wrecking"), and the David Hirschberg Co. ("Hirschberg"). Under the proposed consent decree: (1) Sealy would pay the United States $23,695, and would pay the parties that are performing the work at the Site (the "Skinner Landfill Site Group") $94,780; (2) Acme Wrecking would pay the United States $14,000 and would pay the Skinner Landfill Site Group $56,000; and (3) Hirschberg would pay the United States $3,800, and would pay the Skinner Landfill Site Group $15,200.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resource Division, Department of Justice, Washington, D.C. 20530, and should refer to *Dow Chemical Co. et al.* v. *Acme Wrecking Co., Inc. et al.*, Civil Action Nos. C–1–97–0308, and C–1–01–439 (S.D. Ohio), and DOJ Reference No. 90–11–3–1620/2.

The proposed consent decree may be examined at: (1) the Office of the United States Attorney for the Southern District of Ohio, 220 U.S.P.O. & Courthouse, 100 E. 5th St., Cincinnati, OH 45202; and (2) the United States Environment Protection Agency (Region 5), 77 West Jackson Boulevard, Chicago, Illinois 60604–3590. Copies of the proposed consent decrees may be obtained by mail from the Department of Justice Consent Decree Library, P.O. Box 7611, Washington, D.C. 20044. In requesting copies, please refer to the above-referenced case and DOJ Reference Number and enclose a check for $10.50 (42 pages at 25 cents per page reproduction cost) made payable to the Consent Decree Library.

William D. Brighton,

Assistant Section Chief, Environment Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 01–30156 Filed 12–4–01; 8:45 am]

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decrees Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Department of Justice policy codified at 28 CFR 50.7 and Section 122 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended ("CERCLA"), 42 U.S.C. 9622, 42 U.S.C. 9622, notice is hereby given that on November 14, 2001, two proposed consent decrees in *United States* v. *American Allied Additives, Inc., et al.*, No. 00–01014, were lodged with the United States District Court for the Northern District of Ohio. The proposed consent decrees would settle the United States' claims against defendants Richard Henry and Rauh Rubber, Inc. under CERCLA §§ 106 and 107, 42 U.S.C. 9606 and 9607, in connection with the American Allied Additives Superfund Site ("Site") in Cleveland, Ohio. The proposed consent decree with Mr. Henry would also resolve his counterclaim against the United States for attorney fees and other expenses pursuant to 5 U.S.C. 504.

The U.S. Environmental Protection Agency ("EPA") incurred unreimbursed costs of approximately $148,000 in responding to the release or threatened release of hazardous substances at the Site. Mr. Henry and Rauh Rubber, Inc. are liable for response costs at the Site as generators of waste disposed there and are subject to civil penalties for noncompliance with a Unilateral Administrative Order issued by EPA for the performance of an emergency removal at the site.

Under the proposed consent decrees, Mr. Henry agrees to pay a total of $2,500 ($500 for the claim under CERCLA Section 106, and $2,000 for the claim under CERCLA Section 107), and Rauh Rubber, Inc. agrees to pay a total of $10,000 ($3,000 for the claim under CERCLA Section 106, and $7,000 for the claim under CERCLA Section 107). Payment is due within thirty (30) days of entry of the respective consent decree. Mr. Henry also agrees to dismiss with prejudice his counterclaim against the United States. Further, Mr. Henry and Rauh Rubber, Inc. will receive a covenant not to sue and contribution protèction for Site response costs, as well as a covenant not to sue for civil penalties for the violations alleged in the complaint.

For a period of thirty (30) days from the date of this publication, the Department of Justice will receive comments related to the proposed consent decrees. Comments may be submitted on one or both consent decrees. Comments should be addressed to the Acting Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, 950 Pennsylvania Avenue, NW., Washington, DC 20530, and should refer to *United States* v. *American Allied Additives, Inc., et al.*, Civil Action No. 00–01014; D.J. Ref. No. 90–11–2–1318.

The consent decrees may be examined at the Office of the United States Attorney, 1800 Bank One Center, 600 Superior Avenue, Cleveland, Ohio 44114, and at the U.S. Environmental Protection Agency, Region V, 77 West Jackson Boulevard, Chicago, Illinois 60604. Copies of the consent decrees may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044. In requesting a copy, please enclose a check in the amount of $5.00 for one consent decree (20 pages at 25 cents per page reproduction cost), or $10.00 for both consent decrees (40 pages at 25 cents per page reproduction cost).

William Brighton,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 01–30155 Filed 12–4–01; 8:45 am]

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Oil Pollution Act of 1990

In accordance with Departmental policy, notice is hereby given that a proposed Consent Decree in *United States* v. *Equilon Pipeline Company, LLC, et al.*, ("Settling Defendants"), Civil Action No. H– 01 3171, was lodged on September 17, 2001, with the United States District Court for the Southern District of Texas.

In this action the United States and the State of Texas, pursuant to Section 1002 of the Oil Pollution Act of 1990, ("OPA"), 33 U.S.C. 2702, seek natural resource damages, including assessment costs, arising out of the discharge of oil and gasoline into the navigable waters of the United States and the State of Texas in the vicinity of the San Jacinto River on or about October 20, 1994.

The proposed Consent Decree provides for the Defendant's purchase of about 100 acres of replacement property and payment of $250,000, to be used to construct estuarine and freshwater habitat. That payment will also produce about $30,000 for management by the

Trustees of a mixed forest habitat preservation site to be acquired by the Defendants.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, P.O. Box 7611, United States Department of Justice, Washington, D.C. 20044–7611, and should refer to *United States* v. *Equilon Pipeline Company, LLC, et al.*, DOJ Ref. 90–5–1–1–4376/1.

The proposed Consent Decree may be examined at the office of the United States Attorney, Southern District of Texas, 911 Travis Street, Suite 1500, Houston, Texas 77208. A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, United States Department of Justice, Washington, D.C. 20044–7611. In requesting a copy please refer to the referenced case and enclose a check in the amount of $6.50 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Tom Mariani,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging Proposed Consent Decree

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Gallo Glass Company*, Civil Action No. C 01 3350 JL, (N.D. Cal.), was lodged with the United States District Court for the Northern District of California on November 8, 2001. This proposed Consent Decree concerns a complaint filed by the United States against Gallo Glass Company and Jack Neal and Son, Inc., pursuant to sections 301(a) and 404 of the Clean Water Act, 33 U.S.C. 1311(a) and 1344 and imposes civil penalties against the Defendants for the excavation and deep ripping of 260 acres of wetlands and depositing fill material into approximately 12.5 acres of drainage, swales, and creeks in wetlands adjacent to Washoe Creek, a tributary to the Laguna de Santa Rosa Creek and Russian River, located on Stoney Point, near Cotati, Sonoma County, California. Defendants also cleared vegetation, woody debris, and placed large boulders/rip-rap on approximately 1000 linear feet of Porter Creek in Twin Valley, near Windsor, in Sonoma County.

The proposed Consent Decree requires the payment of civil penalties in the amount of $95,000 and prohibits the discharge of pollutants into the waters of the United States. In addition to the civil penalty, the Consent Decree requires Defendants, at their own expense and subject to approval by the Corps, to provide compensatory mitigation for the filled drainage, swales and creeks in accordance with the approved Mitigation Plan.

The Department of Justice will accept written comments relating to this proposed Consent Decree for thirty (30) days from the date of publication of this notice. Please address comments to Charles O'Connor, United States Attorney's Office, 450 Golden Gate Ave., 16th Floor, San Francisco, CA 94102 and refer to *United States* v. *Gallo Glass Co.*

The proposed Consent Decree may be examined at the Clerk's Office, United States District Court for the Northern District of California, 450 Golden Gate Ave., 16th Floor, San Francisco, CA 94102.

Stephen Samuels,

Assistant Section Chief, Environmental Defense Section, Environment and Natural Resources Division.

[FR Doc. 01–30154 Filed 12–4–01; 8:45 am]

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree

Notice is hereby given that a proposed Consent Decree with C & A Diary in *United States* v. *Calvin and Annette VanDerVeen*, No. 00–1159–KI, was lodged on November 15, 2001, with the United States District Court for the District of Oregon.

The proposed Consent Decree would resolve a lawsuit filed by the United States against Defendants in the United States District Court for the District of Oregon on August 22, 2000. The complaint alleged that Defendants had discharged manure from the C & A Dairy, in McMinnville, Oregon, into a creek on at least four occasions between March 1998 and April 2000, in violation of sections 309(b) and (d) of the Clean Water Act, 33 U.S.C. 1319(b) & (d); the complaint also alleged that Defendants had failed to comply with a 1998 EPA administrative order to cease discharging and to prepare a corrective action plan. The proposed Consent Decree provides for the payment of a $1,000 civil penalty and contains a prohibition against future discharges.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Calvin and Annette VanDerVeen*, DOJ Ref. #90–5–1–1–06963.

The proposed Consent Decree may be examined at the office of the United States Attorney, 1000 SW. 3rd Avenue, Suite 600, U.S. Courthouse, Portland, Oregon 97204; the Region 10 office of the Environmental Protection Agency, 1200 Sixth Avenue, Seattle, WA 98101. A copy of the consent decree can be obtained by mail from the Department of Justice Consent Decree Library, P.O. Box 7611, Washington, DC 20044. In requesting a copy refer to the referenced case and enclose a check in the amount of $3.25 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Robert Maher,

Assistant Section Chief, Environmental Enforcement Section.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

[AAG/A Order No. 251–2001]

Privacy Act of 1974; Notice of the Removal of a System of Records

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), the Office of Intelligence Policy and Review (OIPR), Department of Justice is removing a published Privacy Act system of records entitled "Domestic Security/Terrorism Investigations Records System (JUSTICE/OIPR–004)." This system notice was last published in the **Federal Register** on January 26, 1984 (49 CFR 3285).

JUSTICE/OIPR–004 is being removed because the records are not (nor have they ever been) retrieved by individual names or other personal identifiers. The records were filed and retrieved by entity/organization. Accordingly, there is no statutory requirement to publish a system notice, and the Domestic Security/Terrorism Investigations Records System notice is removed from the Department's compilation of Privacy Act systems. The Domestic Security/Terrorism Investigation function was transferred from OIPR to the Criminal

Division in 1995. The OIPR's remaining records have been sent to the National Archives and Records Administration.

Dated: November 13, 2001.

Janis A. Sposato,

Acting Assistant Attorney General for Administration.

United States et al. v. Waste Management, Inc. et al.; Joint Motion To Modify Final Judgment

Notice is hereby given that a Joint Motion to Modify the Final Judgment was filed with the United States District Court for the Eastern District of New York in United States et al. v. Waste Management, Inc. et al., Civil No. 98 CV 7168 on October 23, 2001. The Complaint alleged that Waste Management's proposed acquisition Eastern Environmental Services, Inc. would violate Section 7 of the Clayton Act, 15 U.S.C. 18, by substantially lessening competition in waste collection and/or disposal in nine markets around the country. The Final Judgment in the case required, among other things, that Waste Management divest Eastern's Kelly Run landfill located in Elizabeth, Pennsylvania.

A Competitive Impact Statement filed by the United States describes the Complaint, the Final Judgment, the industry, and remedies to be implemented by Waste Management. The Joint Motion to Modify the Final Judgment seeks an Order from the Court that Waste Management shall have no obligation under the Final Judgment to divest the Kelly Run landfill. Copies of the Complaint, Hold Separate Stipulation and Order, Final Judgment, Competitive Impact Statement, and the Joint Motion to Modify the Final Judgment are available for inspection in Room 215 of the U.S. Department of Justice, Antitrust Division, 325 7th Street, NW, Washington, DC, and at the office of the Clerk of the United States District Court for the Eastern District of New York, Brooklyn, New York. Copies of any of these materials may be obtained upon request and payment of a copying fee.

Public comment is invited within the statutory 60-day comment period. Such comments and response thereto will be published in the **Federal Register** and filed with the Court. Comments should be directed to J. Robert Kramer II, Chief, Litigation II Section, Antitrust Division, United States Department of Justice, 1401 H Street, NW, Suite 3000, Washington, DC 20530 (telephone: 202–307–0924).

Notice Pursuant to the National Cooperative Research and Production Act of 1993—IMS Global Learning Consortium, Inc.

Notice is hereby given that, on October 11, 2001, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), IMS Global Learning Consortium, Inc. has filed written notifications

simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership status. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, Advanced Distributed Learning Co-Laboratories, Alexandria, VA; British Educational Communications and Technology Agency (Becta), Coventry, England, United Kingdom; Can Studios Ltd., Sheffield, England, United Kingdom; Docent, Inc., Mountain View, CA; Epic Group Plc, Brighton, England, United Kingdom; Learning Objects Networks, Inc., Waitsfield, VT; University of Wisconsin System, Madison, WI; NYUOnline, Inc., New York, NY; and Scottish Ufl Ltd., Glasgow, Scotland, United Kingdom have been added as parties to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and IMS Global Learning Consortium, Inc. intends to file additional written notification disclosing all changes in membership.

On April 7, 2000, IMS Global Learning Consortium, Inc. filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on September 13, 2000 (65 FR 55283).

The last notification was filed with the Department on July 18, 2001. A notice was published in the **Federal Register** pursuant to Section 6(b) of the Act on August 15, 2001 (66 FR 42877).

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of November, 2001.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or sub-division have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–39,242; Osram Sylvania Products, Inc., Glass Technologies Div., Wellsboro, PA

TA–W–39,609; Valeo Engine Cooling, Inc., Jamestown, NY

TA–W–39,711; L & N Metallurgical Products Co., Ellwood City, PA

TA–W–39,762; Edinboro Molding, Inc., Edinboro, PA

TA–W–40,179; Ruppe Hosiery, Inc., Kings Mountain, NC

TA–W–40,113; Kings Mountain Hosiery Mill, Inc., Kings Mountain, NC

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–40,055; GFC Fabricating, LLC, Berwick, PA

TA–W–39,273; United States Steel LLC, Fairless Hills, PA

All workers of United States Steel LLC, Fairless Hills, PA engaged in employment related to the production of tin mill products are denied.

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued; the date following the company name and location of each determination references the impact date for all workers of such determination.

TA–W–39,071; H.H. Fessler Knitting Co., Crown-Globe Div., Shoemakersville, PA: April 6, 2000.

TA–W–39,633; Gamco Manufacturing Co., Inc., Jamestown, TN: June 29, 2000.

TA–W–39,902; Suncook Trim Corp., Allenstown, NH: August 16, 2000.

TA–W–40,203; Hamrick's, Inc., St. Matthews Plant, St. Matthews, SC: September 27, 2000.

TA–W–40,231; Weiser Lock, Tucson, AZ: December 29, 2001.

TA–W–40,189; Philadelphia Glass Bending Co., Philadelphia, PA: September 10, 2001

TA–W–39,788; Lancer Partnership, Ltd., Screw Machine Department, San Antonio, TX: July 31, 2000.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub. L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with section 250(a), subchapter D, chapter 2, title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of November, 2001.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of section 250 of the Trade Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, (including workers in any agricultural firm or appropriate subdivision thereof) have become totally or partially separated from employment and either—

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) That imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(4) That there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations. There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

NAFTA–TAA–05183; Cognis Corp., Lock Haven, PA
NAFTA–TAA–05448; Kings Mountain Hosiery Mills, Inc., Kings Mountain, NC
NAFTA–TAA–05102; General Mills, Carlisle, PA
NAFTA–TAA–05316; GFC Fabricating, LLC, Berwick, PA
NAFTA–TAA–05202; General Cable Corp., Montoursville, PA
NAFTA–TAA–05229; Edinboro Molding, Inc., Edinboro, PA
NAFTA–TAA–05161; Greenbrier Leasing Corp., Gunderson, Inc., Lake Oswego, OR
NAFTA–TAA–05106; L.E. Smith Glass Co., Mount Pleasant, PA
NAFTA–TAA–04684; Crane Pumps and Systems, Piqua, OH
NAFTA–TAA–05158; Valeo Engine Cooling, Inc., Jamestown, NY
NAFTA–TAA–04750; H.H. Fessler Knitting Co., Crown-Globe Div., Shoemakersville, PA

Affirmative Determinations NAFTA–TAA

NAFTA–TAA–05296; Parker Hannifin Corp., Integrated Hydraulics Div., Lincolnshire, IL: August 17, 2000.
NAFTA–TAA–04840; Osram Sylvania Products, Inc., Glass Technologies Div., Wellsboro, PA: May 1, 2000.
NAFTA–TAA–05057; Gamco Manufacturing Co., Inc., Jamestown, TN: July 9, 2000.
NAFTA–TAA–05447; VF Imagewear (West), Inc., Mathiston, MS: October 16, 2000.
NAFTA–TAA–04636; Freightliner LLC, Truck Manufacturing Plant, Portland, OR: March 9, 2000.
NAFTA–TAA–05383; Hamrick's, Inc., St. Matthews Plant, St. Matthews, SC: September 27, 2000.
NAFTA–TAA–05329; Emerson Process Management, Regulator Div., McKinney, TX: September 11, 2000.
NAFTA–TAA–05442; Weiser Lock, Tucson, AZ: December 29, 2001.

I hereby certify that the aforementioned determinations were issued during the month of November, 2001. Copies of these determinations are available for inspection in Room C–5311, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: November 26, 2001.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–39,029]

Atofina Chemicals, Inc. Including Contract Workers of Washore Mechanical and Blessing Electric, Portland, Oregon; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on June 19, 2001, applicable to workers of Atofina Chemicals, Inc., Portland, Oregon. The notice was published in the **Federal Register** on July 5, 2001 (66 FR 35463).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. Information provided by the State and the company shows that employees of Washore Mechanical and Blessing Electric were employed by Atofina Chemicals, Inc. to repair chlorine and chlorate cells, perform pipe maintenance and installation duties and maintain and install high voltage electric systems necessary to produce chloralkali chemicals at the Portland, Oregon location of the subject firm.

Worker separations occurred at Washore Mechanical and Blessing Electric as a result of worker separations at Atofina Chemicals, Inc., Portland, Oregon.

Based on these findings, the Department is amending the certification to include workers of Washore Mechanical and Blessing Electric employed at Atofina Chemicals, Inc., Portland, Oregon.

The intent of the Department's certification is to include all workers of Atofina Chemicals, Inc., Portland, Oregon who were adversely affected by increased imports.

The amended notice applicable to TA–W–39–029 is hereby issued as follows:

All workers of Atofina Chemicals, Inc., Portland, Oregon and all workers of Washore Mechanical and Blessing Electric, Portland, Oregon engaged in activities related to the production of chloralkali chemicals at Atofina Chemicals, Inc., Portland, Oregon, who became totally or partially separated from employment on or after April 4, 2000, through June 19, 2003, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 13th day of November, 2001.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–38,900]

Borg Warner Air/Fluid Systems Corporation, Water Quality Valley, MS; Notice of Negative Determination on Reconsideration

On October 29, 2001, the Department issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of the subject firm. The notice will soon be published in the **Federal Register**.

The Department initially denied TAA to workers of Borg Warner Air/Fluid Systems Corporation, Water Valley, Mississippi based on criterion (2) of the group eligibility requirements of section 222 of the Trade Act of 1974, as amended, not being met. The workers at the subject firm were engaged in employment related to the production of transmission control solenoids, transmission control modules, throttle bodies, and air suspension control solenoids.

The petitioner indicated that the Department of Labor reviewed the wrong sales and production period. The petitioner also indicated that the layoffs pertaining to the original investigation were the direct result of anticipated reduced orders from the subject firm's major customer. The petitioner further indicated that increased imports of automobiles reduced the demand for the customers' products and in turn the customer reduced their purchases from the subject plant.

The Department, upon the request of the petitioner, acquired additional subject plant sales and production data for an additional portion of the relevant period. That data were not available during the initial investigation. The additional data obtained from the

company depict increases in plant sales and production.

The petitioner's statement regarding reduced orders by their major customer is not relevant unless declines in sales and production occur during the period of the investigation. Since plant sales and production increased during the scope of the initial investigation, criterion 2 of the group eligibility requirement was not met. If these conditions changed since the initial decision, the petitioners are encouraged to reapply for TAA group eligibility.

The petitioner's statements that increased import competition of automobiles may have impacted the customer of the subject firm is not a relevant factor to the petition that was filed on behalf of workers producing components for automobiles at the subject plant. The products imported must be like and directly competitive with those products produced at the subject firm to meet the "contributed importantly" criterion.

Conclusion

After reconsideration, I affirm the original notice of negative determination of eligibility to apply for worker adjustment assistance for workers and former workers of Borg Warner Air/Fluid Systems Corporation, Water Valley, Mississippi.

Signed at Washington, DC this 13th day of November 2001.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

Chiquola Fabrics, LLC, Kingsport, Tennessee; Notice of Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on May 29, 2001 in response to a petition filed by a company official on the same date on behalf of workers at Chiquola Fabrics, LLC, Kingsport, Tennessee. Chiquola Fabrics, LLC purchased JPS Converter and Industrial Corporation, Borden Plant, Kingsport, Tennessee, whose workers were certified eligible to apply for Trade Adjustment Assistance (TA–W36,891). That certification has been amended to encompass workers at the same facility employed by Chiquola Fabrics, LLC, Kingsport, Tennessee.

The petitioner in this case has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, DC this 26th day of November, 2001.

Edward A. Tomchick,

Certifying Officer, Division of Trade Adjustment Assistance.

Elizabeth Webbing, Inc., Central Falls, Rhode Island; Notice of Affirmative Determination Regarding Application for Reconsideration

By letter of August 1, 2001, the workers requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance, petition TA–W–39,068. The denial notice was signed on June 25, 2001 and published in the **Federal Register** on July 11, 2001 (66 FR 36329).

The Department has reviewed the request for reconsideration and has determined that further survey of major declining customers of the subject firm would be appropriate.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC this 13th day of November, 2001.

ISB Fashion, Inc., New York, New York; Amended Certification Regarded Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273), the Department of Labor issued a Notice of Certification Regarding Eligibility to Apply for Worker Adjustment Assistance on August 29, 2001, applicable to workers of ISB Fashion, Inc., New York, New York. The notice was published in the **Federal Register** on September 11, 2001 (66 FR 47241).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. The workers were engaged in the production of women's dresses. Findings show that the Department incorrectly set the worker certification impact date at June 21, 2001. The impact date should be June 21, 2000, one year prior to the date of the petition.

Accordingly, the Department is amending the certification to properly reflect this matter.

The amended notice applicable to TA–W–39,560 is hereby issued as follows:

All workers of ISB Fashion, Inc., New York, New York who became totally or partially separated from employment on or after June 21, 2000, through August 29, 2003, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 5th day of November, 2001.

JPS Converter and Industrial Corp., a Subsidiary of JPS Textile, Inc., Borden Plant, Now Known as Chiquola Fabrics, LLC, Kingsport, Tennessee; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on October 28, 1999, applicable to workers of JPS Converter and Industrial Corp., a Subsidiary of JPS Textile Group, Inc., Borden Plant, Kingsport, Tennessee. The notice was published in the **Federal Register** on December 2, 1999 (64 FR 67594).

At the request of the petitioners, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of cotton and some cotton/polyester blend fabrics, primarily for book bindings.

The company reports that in August, 1999, Chiquola Fabrics, LLC purchased the Borden Plant, Kingsport, Tennessee of JPS Converter and Industrial Corp. and is now known as Chiquola Fabrics, LLC.

Information also shows that workers separated from employment at the subject firm, had their wages reported under a separate unemployment insurance (UI) tax account for Chiquola Fabrics, LLC.

Accordingly, the Department is amending the certification determination to properly reflect this matter.

The intent of the Department's certification is to include all workers of JPS Converter and Industrial Corp., a Subsidiary of JPS Textile Group, Inc., Borden Plant, now known as Chiquola Fabrics, LLC who were adversely affected by increased imports.

The amended notice applicable to TA–W–36,891 is hereby issued as follows:

All workers of JPS Converter and Industrial Corp., a Subsidiary of JPS Textile Group, Inc., Borden Plant, now known as Chiquola Fabrics, LLC, Kingsport, Tennessee who become totally or partially separated from employment on or after September 22, 1998, through October 28, 2001, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 26th day of November, 2001.

[TA–W–39,450]

Northwestern Steel and Wire Company Sterling, Illinois; Notice of Revised Determination on Reconsideration

On September 26, 2001, the Department issued an Affirmative Determination Regarding Application on Reconsideration applicable to workers and former workers of the subject firm. The notice was published in the **Federal Register** on November 9, 2001 (66 FR 56713).

The Department initially denied TAA to workers of Northwestern Steel and Wire Company, Sterling, Illinois, producing structural steel and steel rod because the "contributes importantly" group eligibility requirement of section 222(3) of the Trade Act of 1974, as amended, was not met.

On reconsideration, the Department conducted further survey analysis of major customers of Northwestern Steel and Wire Company, Sterling, Illinois. The survey revealed that various customers increased their reliance on imported structural steel and wire rod during the relevant period.

All workers at Northwestern Steel were previously certified eligible to apply for TAA, TA–W–35, 174, which expired December 1, 2000.

Conclusion

After careful review of the additional facts obtained on reconsideration, I conclude that increased imports of articles like or directly competitive with structural steel and wire rod, contributed importantly to the declines in sales or production and to the total or partial separation of workers of Northwestern Steel and Wire Company, Sterling, Illinois. In accordance with the provisions of the Act, I make the following certification:

All workers of Northwestern Steel and Wire Company, Sterling, Illinois, who became totally or partially separated from employment on or after December 2, 2000, through two years from date of certification are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC this 26th day of November 2001.

Outboard Marine Corp. (OMC), Waukegan, Illinois, Outboard Marine Corp. (OMC), The Ralph Evinrude Test Center, Stuart, Florida; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Notice of Certification Regarding Eligibility to Apply for Worker Adjustment Assistance on April 30, 2001, applicable to workers of Outboard Marine Corp. (OMC), Waukegan, Illinois. The notice was published in the **Federal Register** on May 18, 2001 (66 FR 27690).

At the request of the petitioners, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of marine products, primarily outboard motors and parts.

New information shows that worker separations occurred at The Ralph Evinrude Test Center, Stuart, Florida facility of Outboard Marine Corp. (OMC). Workers of Stuart, Florida provided research, development and quality control support services to Outboard Marine Corp.'s production facilities, including Waukegan, Illinois.

Accordingly, the Department is amending the certification to include the workers of The Ralph Evinrude Test Center, Stuart, Florida facility of Outboard Marine Corp. (OMC).

The intent of the Department's certification is to include all workers of Outboard Marine Corp. (OMC), Waukegan, Illinois who were adversely affected by increased imports.

The amended notice applicable to TA–W–38,565 is hereby issued as follows:

All workers of Outboard Marine Corp. (OMC), Waukegan, Illinois (TA–W–38,565) and outboard Marine Corp. (OMC), The Ralph Evinrude Test Center, Stuart Florida (TA–W–38,565A), who became totally or partially separated from employment on or after January 5, 2000, through April 30, 2003, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 16th day of November, 2001.

[TA–W–39,416 and TA–W–39,416C]

Pillowtech Corporation, Fieldcrest Cannon—Plant 4, Kannapolis, North Carolina, and Fieldcrest Cannon—Eagle & Phenix, Columbus, Georgia; Notice of Revised Determination on Reconsideration

By letter of October 8, 2001, the company requested administrative reconsideration of the Department's denial of eligibility to apply for trade adjustment assistance applicable to workers and former workers of Pillowtex Corporation, Fieldcrest Cannon—Plant 4, Kannapolis, North Carolina (TA–W–39, 416) and Pillowtex Corporation, Fieldcrest Cannon—Eagle & Phenix, Columbus, Georgia (TA–W–39, 416C).

The initial investigations resulted in negative determinations issued on August 14, 2001, and published in the **Federal Register** on August 23, 2001 (66 FR 44379). The investigation findings for Pillowtex Corporation, Fieldcrest Cannon—Plant 4, Kannapolis, North Carolina (TA–W–39, 416) and Pillowtex Corporation, Fieldcrest Cannon—Eagle & Phenix, Columbus, Georgia (TA–W–39, 416C) showed that increased imports did not contribute importantly to worker separations at the respective plants.

The company in their request for reconsideration provided additional documentation pertaining to the product produced at Fieldcrest Cannon-Plant 4. The new data supplied by the company indicated that the company increased their reliance on imported sheeting fabric during the relevant period, contributing to the layoffs at the subject plant.

The company also provided clarification concerning the yarn produced at the Fieldcrest Cannon—Eagle and Phenix plant. The initial decision was based on the subject plant producing yarn. The new information provided by the company shows that the yarn produced at the subject facility was further processed into terry bath towels, hand towels and washcloths at the subject plant and then sold to outside sources. A sister facility (Pillowtex Corporation, Fieldcrest Cannon—Plant 1, Kannapolis, North Carolina (TA–W–39, 416B) producing the same products (terry bath towels, hand towels and washcloths) was certified on August 14, 2001. The certification was based on aggregate U.S. imports of terry cloth towels and washcloths increasing significantly during the relevant period, combined with the import to shipment ratio exceeding 170 percent.

Conclusion

After careful review of the additional facts obtained on reconsideration, I conclude that increased imports of articles like or directly competitive with sheeting fabric and terry cloth towels and washcloths, respectively contributed importantly to the declines in sales or production and to the total or partial separation of workers of Pillowtex Corporation, Fieldcrest Cannon—Plant 4, Kannapolis, North Carolina (TA–W–39, 416) and Pillowtex Corporation, Fieldcrest Cannon—Eagle & Phenix, Columbus, Georgia (TA–W–39, 416C). In accordance with the provisions of the Act, I make the following certification:

All workers of Pillowtex Corporation, Fieldcrest Cannon—Plant 4, Kannapolis, North Carolina (TA–W–39, 416) and Pillowtex Corporation, Fieldcrest Cannon—Eagle & Phenix, Columbus, Georgia (TA–W–39, 416C), who became totally or partially separated from employment on or after August 14, 2000, through two years from the date of this certification are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC this 13th day of November, 2001.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

Tridelta Industries, Inc. Mentor, Ohio; Notice of Revised Determination on Reconsideration

By letter of July 19, 2001, the company requested administrative reconsideration regarding the Department's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance, applicable to the workers of the subject firm.

The initial investigation resulted in a negative determination issued on June 8, 2001, based on the finding that imports of pneumatic controls did not contribute importantly to worker separations at the Mentor plant. The denial notice was published in the **Federal Register** on June 27, 2001 (66 FR 34254).

To support the request for reconsideration, the company official provide additional information, which was not provided during the initial investigation. The official indicated that the company that acquired the subject plant began importing pneumatic controls shortly before the investigation was instituted and continued to increase their imports of pneumatic controls to compensate for the pneumatic controls once produced at the subject plant.

Conclusion

After careful review of the additional facts obtained on reconsideration, I conclude that increased imports of articles like or directly competitive with those produced at Tridelta Industries, Inc., Mentor, Ohio, contributed importantly to the declines in sales or production and to the total or partial separation of workers at the subject firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Tridelta Industries, Inc., Mentor, Ohio, who became totally or partially separated from employment on or after May 18, 2000 through two years from the date of this certification, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC this 5th day of November 2001.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Employment and Training Administration

[NAFTA–04275]

Autoliv, ASP, Inc. Cushion Manufacturing Facility Including Leased Workers of Adecco, Ogden, Utah; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 250(A), Subchapter D, Chapter 2, Title II of the Trade Act of 1974 (19 U.S.C. 2273), the Department of Labor issued a Certification Regarding Eligibility to Apply for NAFTA Transitional Adjustment Assistance on March 8, 2001, applicable to workers of Autoliv, ASP, Inc., Cushion Manufacturing Facility, Ogden, Utah. The Notice was published in the **Federal Register** on April 5, 2001 (66 FR 18119).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. Information provided by the State and the company shows that leased employees of Adecco were employed at Autoliv, ASP, Inc., Cushion Manufacturing Facility to produce cushions for airbags at the Ogden Utah location of the subject firm.

Workers separations occurred at Adecco as a result of worker separations at Autoliv, ASP, Inc., Cushion Manufacturing Facility, Ogden, Utah.

Based on these findings, the Department is amending the certification to include workers of Adecco employed at Autoliv, ASP, Inc., Cushion Manufacturing Facility, Ogden, Utah.

The intent of the Department's certification is to include all workers of Autoliv, ASP, Inc., Cushion Manufacturing Facility, Ogden, Utah adversely affected by a shift in production of airbag cushions to Mexico.

The amended notice applicable to NAFTA—4275 is hereby issued as follows:

All workers of Autoliv, ASP, Inc., Cushion Manufacturing Facility, Ogden, Utah including leased workers of Adecco, Ogden, Utah engaged in the production of cushions for airbags at Autoliv, ASP, Inc., Cushion Manufacturing Facility, Ogden, Utah, who became totally or partially separated from employment on or after November 6, 1999, through March 8, 2003, are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974.

Signed at Washington, DC this 5th day of November, 2001.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Employment and Training Administration

[NAFTA–4550]

Freightliner LLC, Mt. Holly Manufacturing, Mt. Holly, North Carolina; Notice of Revised Determination on Reconsideration

By application of May 31, 2001, the International Union, United Automobile, Aerospace & Agricultural Implement Workers of America (UAW), UAW Region 8 and Local Union 5285, requested administrative reconsideration of the Departments denial Regarding Eligibility to Apply for North American Free Trade Agreement-Transitional Adjustment Assistance (NAFTA–TAA), applicable to workers and former workers of the subject firm. The denial notice was issued on April 13, 2001 and published in the **Federal Register** on May 2, 2001 (66 FR 22007).

The workers produced medium and heavy duty trucks. The workers were denied NAFTA–TAA on the basis that there was no shift in production (except for a temporary shift) to Mexico or Canada, nor did imports from Canada or Mexico contribute importantly to workers' separations.

The union provided additional information indicating that a shift in plant production occurred during the relevant period. Information provided by the company verified that there was a shift in business class truck production (cargo and cab-in-white for extended and crew cab) to Mexico during the relevant period. The shift in production to Mexico was the primary factor contributing to the layoffs at the subject plant. The workers were separately identifiable.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that there was a shift in production from the workers' firm to Mexico of articles like or directly competitive with those produced by the subject firm. In accordance with the provisions of the Trade Act, I make the following certification:

All workers of Freightliner LLC, Mt. Holly Truck Manufacturing Plant, Mt. Holly, North Carolina, engaged in activities related to the production of business class trucks (cargo and cab-in-white for extended and crew cab), who became totally or partially separated from employment on or after October 10, 1999, through two years from the date of certification, are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974.

Signed at Washington, DC this 13th day of November 2001.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Employment and Training Administration

[NAFTA–4523]

York International Corporation Portland, Oregon; Notice of Negative Determination Regarding Application for Reconsideration

By application dated June 26, 2001, the Sheet Metal Workers' International Association, Local Union No. 16, requested administrative reconsideration of the Department's negative determination regarding eligibility to apply for North American Free Trade Agreement-Transitional Adjustment Assistance (NAFTA–TAA), applicable to workers and former workers of the subject firm. The denial notice was signed on June 7, 2001, and was published in the **Federal Register** on June 27, 2001 (66 FR 34257).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) if it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) if in the opinion of the Certifying Officer, a misinterpretation of facts or the law justified reconsideration of the decision.

The denial of NAFTA–TAA for workers engaged in activities related to the production of custom air handling systems at York International Corporation, Portland, Oregon, was based on the finding that criteria (3) and (4) of the group eligibility requirements of paragraph (a)(1) of section 250 of the Trade Act, as amended, were not met. There were no company imports of custom air handling systems from Mexico or Canada, nor did York International Corporation shift production from Portland, Oregon to Mexico or Canada. Major customers did not reduce their purchases from the subject firm.

The petitioner alleges that competitors of the subject plant import products like and directly with what the subject plant produced from Canada and Mexico. The Department normally analyzes the impact of imports on the subject firm workers through a survey of declining customers to examine if the firm's domestic customers switched purchases from the subject firm in favor of foreign produced products during the relevant period. There were no subject firm customers' sales declines during the relevant period. Therefore, any imports from Canada or Mexico are not a major contributing factor to the worker separations at the subject plant.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC this 6th day of November 2001.

Edward A. Tomchick,

Director, Division of Trade Adjustment Assistance.

LIBRARY OF CONGRESS

Copyright Office

[Docket No. RM 2001–7A]

Disruption or Suspension of Postal or Other Transportation or Communications Services

AGENCY: Copyright Office, Library of Congress.

ACTION: Determination of general disruption of postal services.

SUMMARY: Pursuant to newly promulgated 37 CFR 201.8, the Register of Copyrights announces her determination that there has been a general disruption or suspension of postal services that has delayed the receipt by the Copyright Office of deposits, applications, fees, and other materials submitted to the Office by means of the United States Postal Service.

DATES: The disruption of postal services commenced on October 18, 2001 and continues to the present.

FOR FURTHER INFORMATION CONTACT: David O. Carson, General Counsel, or Patricia Sinn, Seniof Attorney, Office of the General Counsel, Copyright GC/I&R, P.O. Box 70400, Southwest Station, Washington, D.C. 20024–0400. Telephone: (202) 707–8380. Telefax: (202) 707–8366.

SUPPLEMENTARY INFORMATION: On December 4, 2001, the Copyright Office published in the **Federal Register** an interim regulation, to be codified at 37 CFR 201.8, addressing general disruptions or suspensions of postal or other transportation or communications services. The regulation implements 17 U.S.C. 709 and governs the circumstances under which the Register may assign, as the date of receipt for deposits, applications, fees and other materials submitted to the Office, the date on which the materials would have been received but for a general disruption or suspension of postal or other transportation or communications services.

The Register now publishes her determination that commencing on October 18, 2001, there has been a general disruption of postal services that has affected the delivery of deposits,

applications, fees and other materials submitted to the Office. Persons who believe that they have been adversely affected by the disruption of postal services should comply with the provisions of 37 CFR 201.8.

When the disruption of postal services has ended, the Register shall publish a determination to that effect.

In the meantime, persons desiring to ensure prompt receipt of materials by the Copyright Office are encouraged to use alternative means such as delivery by private carriers or personal delivery rather than the United States Postal Service.

Dated: December 3, 2001.

MEDICARE PAYMENT ADVISORY COMMISSION

Commission Meeting

AGENCY: Medicare Payment Advisory Commission.

ACTION: Notice of meeting.

SUMMARY: The Commission will hold its next public meeting on Thursday, December 13, 2001, and Friday, December 14, 2001, at the Ronald Reagan Building, International Trade Center, 1300 Pennsylvania Avenue, NW., Washington, DC. The meeting is tentatively scheduled to begin at 10 a.m. on December 13, and at 9 a.m. on December 14.

Topics for discussion include: Quality improvement for health plans and providers; pass-through payments under the prospective payment system for hospital outpatient department services; Medicare+Choice; measuring changes in input prices in traditional Medicare; adjusting local differences in resident training costs; paying for services in traditional Medicare; and assessing payment adequacy and updating Medicare payments.

Agendas will be mailed on December 4, 2001. The final agenda will be available on the Commission's web site (*www.MedPAC.gov*)

ADDRESSES: MedPAC's address is: 1730 K Street, NW., Suite 800, Washington, DC 20006. The telephone number is (202) 653–7220.

FOR FURTHER INFORMATION CONTACT: Diane Ellison, Office Manager, (202) 653–7220.

Murray N. Ross,

Executive Director.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–331]

Nuclear Management Company, LLC; Correction

The November 14, 2001 (66 FR 57115), **Federal Register** contained a "Notice of Issuance of Amendment to Facility Operating License." On page 57116, the date of September 24, 2001, should have been included in the list of supplemental letters to the application dated November 16, 2000.

Dated at Rockville, Maryland, this 29th day of November, 2001.

Brenda L. Mozafari,

Project Manager, Section 1, Project Directorate III–1, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–348 and 50–364]

Southern Nuclear Operating Company, Inc., et al.; Joseph M. Farley Nuclear Plant, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of amendments to Facility Operating License Nos. NPF–2 and NPF–8, issued to Southern Nuclear Operating Company Inc., et al. (the licensee), for operation of the Joseph M. Farley Nuclear Plant, Units 1 and 2, located in Houston County, Alabama.

Environmental Assessment

Identification of Proposed Action

The proposed action would amend the Facility Operating Licenses (FOLs) for Joseph M. Farley Nuclear Plant, Units 1 and 2, and to delete license conditions that have been completed or are otherwise no longer in effect. These activities have now been completed and the license conditions are either obsolete or are no longer needed.

The proposed action is in response to the licensee's application dated December 8, 2000.

The Need for the Proposed Action

When the FOLs, NPF–2 and NPF–8, were issued to the licensee, the NRC staff deemed certain issues essential to safety and/or essential to meeting certain regulatory interests. These issues were imposed as license conditions in the FOLs, with deadlines for their implementation. Since the units were licensed to operate in the late 1970s and early 1980s, most of these license conditions have been fulfilled. For the license conditions that have been fulfilled, the licensee proposed to have them deleted from the FOLs.

The licensee also proposed to make changes to correct administrative errors such as words inadvertently omitted, documents erroneously cited, etc.

The proposed amendments involve administrative changes to the FOLs only. No actual plant equipment, regulatory requirements, operating practices, or analyses are affected by these proposed amendments.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that there is no significant environmental impact if the amendments are granted. No changes will be made to the design and licensing bases, and applicable procedures at the two units at the Joseph M. Farley Nuclear Plant, Units 1 and 2, will remain the same. Other than the administrative changes, no other changes will be made to the FOLs, including the Technical Specifications.

The changes will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not involve any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the Commission concludes that there are no significant

nonradiological environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

Since the Commission has concluded there is no measurable environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement related to the McGuire Nuclear Station.

Agencies and Persons Contacted

In accordance with its stated policy, on January 10, 2001, the staff consulted with the Alabama State official, Kirk Whatley of the Office of Radiation Control, Alabama Department of Public Health, regarding the environmental impact of the proposed amendments. The State official had no comments.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, the Commission concludes that the proposed amendments will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed amendments.

For further details with respect to the proposed action, see the licensee's letter dated December 8, 2000. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the Internet at the NRC web site, *http://www.nrc.gov/NRC/ADAMS/index.html*. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1–800–397–4209, 301–415–4737 or by email to *pdr@nrc.gov*.

Dated at Rockville, Maryland, this 29th day of November, 2001.

For the Nuclear Regulatory Commission.

Frank Rinaldi,

Project Manager, Section 1, Project Directorate II, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45115; File No. SR–CHX–2001–17]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by The Chicago Stock Exchange, Incorporated, Relating to Eligibility of Limit Orders for Trade Through Protection

November 28, 2001.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("the Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby is given that on August 6, 2001, the Chicago Stock Exchange, Incorporated ("CHX" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend CHX Article XX, Rule 37(b)(6), which governs execution of limit orders in the specialist's book in the event of a trade through in the primary market. The proposed rule change would require that a limit order be resident in the specialist's book for a time period of 0–15 seconds (as designated by the specialist) before it would be eligible for limit order protection. The text of the proposed rule change is available from the Office of the Secretary, the CHX and the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received regarding the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Article XX, Rule 37(b)(6) of its rules, which governs execution of limit orders in the specialist's book in the event of a trade through in the primary market. The proposed rule change would require that a limit order be resident in the specialist's book for a time period of 0–15 seconds (as designated by the specialist) before it would be eligible for limit order protection.

Under current CHX rules, limit orders resting in a specialists's book are afforded trade through protection, which requires execution of the limit orders in the event of a price penetration in the primary market. The limit orders are entitled to price protection in their entirety regardless of their size. The Exchange represents that, at present, an order sender is able to take advantage of the time latency between a primary market execution and the reporting of the execution to the tape to gain these liquidity guarantees. The Exchange believes that an order sender will do so by placing a large limit order in a CHX specialist's book between the time of the primary market execution and the tape print. The limit order will typically be priced at a penny or two superior to the primary market trade price. According to the Exchange, the print of the inferior priced primary market trade will cause an automatic execution of the limit order in its entirety on the CHX at the limit price, thus giving the order sender inexpensive access to large amounts of liquidity.

In the example above, the Exchange explains that the limit order would not be due an execution because it was not "resting" on the specialist's book at the time the trade through occurred in the primary market. Rather, it was resting at the time the trade through execution was reported to the tape. The Exchange believes that this practice exploits a limitation in the trade reporting system that equates "trade time" with "report time." The Exchange believes that this practice has grown more prevalent with

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

the transition to a decimal pricing environment because the premium needed to secure the increased liquidity (the minimum price variation) has been reduced to a penny.

The proposed rule change would provide that before a limit order in the specialist's book is automatically executed following a price penetration in the primary market, the limit order must have resided in the specialist's book for a time period of 0–15 seconds (as designed by the specialist).[3] This requirement is intended to preclude order-senders from taking advantage of the time latency between a primary market execution and the reporting of the execution to the tape.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of section 6(b).[4] In particular, the proposed rule is consistent with section 6(b)(5) of the Act[5] in that it is designed to promote just and equitable principles of trade, to remove impediments to and to perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose my inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–CHX–2001–17 and should be submitted by December 26, 2001.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45117; File No. SR–CHX–2001–08]

Self-Regulatory Organizations; Order Granting Approval of Proposed Rule Change by the Chicago Stock Exchange, Incorporated, Amending its Minor Rule Violation Plan

November 29, 2001.

On April 23, 2001, the Chicago Stock Exchange, Incorporated ("CHX" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change that would amend CHX Article XII, Rule 9(h), Minor Rule Violations, to include CHX Article XX, Rule 43(d), Trading in Nasdaq/NM Securities/Manual Executions, in the Exchange's Minor Rule Violation Plan ("Plan"). Specifically, a member who fails to manually execute a Nasdaq/NM market or marketable limit order at the national best bid or offer or better at the time of its receipt or at the best price available in another market place may be fined under the Plan. Notice of the proposed rule change was published for comment in the **Federal Register** on October 10, 2001.[3] The Commission received no comments on the proposal. This order grants approval of the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange[4] and, in particular, the requirements of section 6 of the Act[5] and the rules and regulations thereunder. The Commission finds specifically that the proposed rule change is consistent with section 6(b)(5) of the Act[6] because it will help prevent fraudulent and manipulative acts and practices, as well as promote just and equitable principles of trade. The Commission finds the proposal is consistent with section 6(b)(6) of the Act,[7] because the proposal provides a mechanism for the appropriate discipline for violations of certain rules and regulations.

In addition, the Commission finds the proposal is consistent with section 6(b)(7) of the Act[8] because the proposal provides a fair procedure for the disciplining of members and persons associated with members. Finally, the Commission finds the proposal is consistent with Securities Exchange Act Rule 19d–1(c)(2)[9] that governs minor rule violation plans.

In approving this proposal, the Commission in no way minimizes the importance of compliance with this rule, and all other rules subject to the imposition of fines under the Plan. The Commission believes that the violation

[9] 17 CFR 240.19d–1(c)(2).

of any self-regulatory organization's rules, as well as Commission rules, is a serious matter. However, in an effort to provide the Exchange with greater flexibility in addressing certain violations, the Plan provides a reasonable means to address rule violations that do not rise to the level of requiring formal disciplinary proceedings. The Commission expects that the CHX will continue to conduct surveillance with due diligence, and make a determination based on its findings whether fines of more or less than the recommended amount are appropriate for violations of rules under the Plan, on a case by case basis, or if a violation requires formal disciplinary action.

It is therefore ordered, pursuant to section 19(b)(2) of the Act[10], that the proposed rule change (SR–CHX–2001–08), be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45109; File No. SR–NASD–2001–19]

Self-Regulataory Organizations; Order Approving a Proposed Rule Change and Amendment Nos. 1 and 2 Thereto by the National Association of Securities Dealers, Inc., Relating to Reporting Requirements for Clearing Members

November 27, 2001.

On March 21, 2001, the National Association of Securities Dealers, Inc. ("NASD" or "Association"), through its wholly owned subsidiary, NASD Regulation, Inc. ("NASD Regulation") filed with the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change relating to reporting requirements for members that are clearing firms. The proposed rule change was published for comment in the **Federal Register** on May 9, 2001.[3] The Commission received five comment letters on the proposed rule change.[4] On June 6, 2001, NASD Regulation filed Amendment No. 1 to the proposed rule change.[5] On November 1, 2001, NASD Regulation filed Amendment No. 2 to the proposed rule change.[6] This order approves the proposed rule change as amended.

I. Description of the Proposed Rule Change

NASD Regulation is developing a new business model regarding the surveillance and examination of NASD members. The new program's official title is Integrated National Surveillance and Information Technology Enhancements (commonly referred to as "INSITE"). INSITE will allow NASD Regulation to concentrate its examinations on the higher-risk segments of the industry; focus the content of each examination on higher-risk topics; streamline the examination process for the examiners and members; better coordinate regulatory findings with other NASD Regulation departments; and provide specialized training to enhance and maintain examiner's competency levels.

According to NASD Regulation, the surveillance component of the INSITE program will produce reports that identify member "exceptions" based on historical and current comparisons of member data. Further, the exceptions will trigger follow-up reviews and possible member examinations. To facilitate the surveillance component of INSITE, NASD Regulation proposed to adopt Rule 3150 to require all members that are clearing firms (both those that are self-clearing and those that clear for other firms) to report certain data (*i.e.*, data elements) to the NASD Regulation Department of Member regulation ("Member Regulation").[7] Under the NASD's proposal, a clearing firm member may enter into an agreement with a third party pursuant to which the third party agrees to fulfill the clearing firm's obligations under proposed Rule 3150. Notwithstanding the existence of such an agreement, NASD Regulation proposed that each member that is a clearing firm would be responsible for complying with the requirements of the proposed rule change.

The text of proposed Rule 3150 does not specify the data that must be reported to NASD Regulation. Initially, the data elements that NASD Regulation will require its members that are clearing firms to submit to the Association pursuant to proposed Rule 3150 included items such as trade cancellations (T+1 forward) and as-of trades, aggregate net liquidating equity in each firm's correspondents' proprietary accounts, and unsecured customer debits. NASD Regulation represented that it would continue to work its clearing firm members and the SEC staff in identifying the data that is needed in order to operate the surveillance component of INSITE. NASD Regulation would also provide its clearing firm members with advance notice through the NASD Notice to Members process (or similar guidance) of any changes to the required data

[3] *See* Securities Exchange Act Release No. 44251 (May 3, 2001), 66 FR 23750 (SR–NASD–2001–19)

[4] *See* Letters to Jonathan G. Katz, Secretary, Commission, from D. Stuart Bowers, Senior Vice President, Legg Mason Wood Walker, Inc., John H. Haynie, Managing Director, Wachovia Securities, Inc., Thomas F. Grabowski, Vice President, BNY Clearing Services, LLC, Douglas W. Noll, First Vice President, Stifel, Nicolaus & Company, Incorporated, Michael D. Duffy, Director of Operations, U.S. Bancorp Piper Jaffray, and Ken Cameranesi, Senior Vice President, Wells Fargo Investments, dated May 17, 2001 ("The Firms' Letter"); Harry D. Frisch, Esq., Senior Vice President, iClearing LLC, dated June 7, 2001 ("iClearing Letter"); Gregory P. Vitt, Senior Vice President, A.G. Edwards & Sons, Inc., dated June 28, 2001 ("A.G. Edwards Letter"); and W. Leo McBlain, Chairman and Cindy Foster, Chair, FIF Service Bureau Committee, Financial Information Forum, dated June 28, 2001 ("FIF Letter").

[5] *See* Letter from Shirely H. Weiss, Office of General Counsel, NASD Regulation, Inc., to Jonathan G. Katz, Secretary, Commission (June 4, 2001) ("Amendment No. 1"). Amendment No. 1 responds to the Firms' letter by reiterating the commitment of NASD Regulation to work with its member firms to facilitate reporting requirements under proposed Rule 3150. Further, NASD Regulation represented that it conducted and would continue to conduct a series of meetings with the service bureaus and member clearing firms to explain and modify data element requirements. Moreover, NASD Regulation amended the proposed rule text to include both clearing and self-clearing member firms.

[6] *See* Letter from Patrice M. Gliniecki, Vice President and Deputy General Counsel, NASD Regulation, Inc., to Jonathan G. Katz, Secretary, Commission (November 1, 2001) ("Amendment No. 2"). Amendment No. 2 responds to comment letters received by the Commission, as well as comment letters received by NASD Regulation from Harris Schwartz, Nordea Securities, Inc., dated June 8, 2001 ("Nordea Letter"); Bonnie K. Wachtel, CEO and Wendie L. Wachtel, COO, Wachtel & Co., Inc., dated June 29, 2001 ("Wachtel Letter"); and Michael Viviano, Chairman, Operations Committee, Christopher R. Franke, Chairman, Self-Regulatory and Supervisory Practices Committee, and Gerard McGraw, Chairman, Clearing Firms Committee, Securities Industry Association, dated July 19, 2001 ("SIA Letter"). In particular, Amendment No. 2 clarifies that only clearing and self-clearing firms that are members (not non-members) will be required to report the prescribed data. Amendment No. 2 provides additional information on the data element requirements, and proposes a phase-in schedule for the implementation of reporting requirements. Last, Amendment No. 2 amends the rule text to include an exemptive provision from the reporting requirements, pursuant to the Rule 9600 Series.

[7] The Association anticipates requesting members that are clearing firms to submit data electronically. Telephone conversation between Shirley W. Weiss, Office of General Counsel, NASD Regulation, and Heidi Pilpel, Special Counsel, and Lisa Jones, Attorney, Division of Market Regulation, Commission (May 2, 2001).

elements. Moreover, NASD Regulation would advise its clearing firm members of the format to be used in transmitting information pursuant to proposed Rule 3150, and the methodology by which NASD Regulation will require its clearing firm members to submit the information to the Association.

II. Summary of Comments

The Commission received five comment letters on the proposal.[8] In addition, NASD Regulation received three comment letters regarding the proposal.[9] There were several issues raised by commenters.

First, commenters requested that NASD Regulation give further details on the data elements that were to be collected.[10] Further, commenters questioned the usefulness of the required data elements, since the requirements tend to duplicate information already provided by clearing and self-clearing firms through Financial and Operational Combined Uniform Single ("FOCUS") Reports, the NASD's Automated Confirmation Transaction Service ("ACT") and Order Audit Trail System ("OATS").[11]

In response to the commenters' request for clarification of the required data elements, the NASD Regulation has created an INSITE Web site from which firms may obtain information.[12] Members may review the proposed Firm Data Filing Technical Specifications that will be required under Rule 3150 and a bullet point presentation of the INSITE Exam Program, which describes the INSITE program in detail. The Web site will also feature questions asked by clearing and self-clearing firms and NASD Regulation's answers to their questions. NASD Regulation has also represented that it will continue to report modifications or clarifications of the reporting requirements on the INSITE Web site.[13]

In addition, starting in June 2001, NASD Regulation conducted a series of workshops with clearing and self-clearing firms around the country. According to NASD Regulation, the purpose of these workshops was, among other things, to explain the data elements that firms would be required to report under proposed Rule 3150, to answer the firms' questions about the reporting process, and to gather additional information about the firms' capability to report required information.[14] NASD Regulation stated that it would continue to modify the reporting requirements as necessary based on the information it has received, and continues to receive, from its member firms and service bureaus.[15] Moreover, as suggested by the SIA,[16] NASD Regulation is currently meeting with a specially formed committee ("SIA Committee") comprised of technology, compliance, operations, and legal professionals to discuss such issues as the data elements, the implementation schedule for firm filings, and reports to member firms. NASD Regulation staff expects to have an on-going relationship with the Committee as a means of obtaining industry input.[17]

In response to the commenters' concerns of the duplication of reporting information through FOCUS reports, ACT, and OATS, NASD Regulation has represented that data reported through OATS will not be duplicated, since that data pertains to orders, and the INSITE data would pertain to transaction and account data. Similarly, information reported through ACT does not provide the detail required by the INSITE program regarding cancellations and rebills.[18]

In addition, NASD Regulation noted that some of the required data duplicates information required to be reported in FOCUS Reports.[19] According to NASD Regulation, the difference is the frequency with which INSITE information would be reported. INSITE information, which can change very rapidly and which can have a significant impact on a firm's capital, would be reported on a daily basis,[20] giving NASD Regulation the opportunity to discover capital problems almost as they occur, whereas FOCUS Reports are filed on a monthly and quarterly basis.[21] Furthermore, NASD Regulation believes that the data elements also provide valuable insights into potential sales practice issues as they arise.

Second, commenters were concerned that they would not be able to submit the data elements requested in the suggested format due to technical flaws and inconsistencies.[22] In addition, commenters wanted more details and results of the testing completed by the three pilot member firms.[23]

In response to the commenters' concerns, NASD Regulation represented that it is in the process of conducting a pilot program with three clearing firms (Bear, Stearns & Co. Inc., Pershing, a division of Donaldson, Lufkin & Jenrette Securities Corporation, and Wexford Clearing Services Incorporated, a division of Prudential Securities Incorporated). These pilot firms are electronically reporting on a daily basis a portion of the firm data elements, and the pilot firms have not reported any significant problems in collecting and reporting this data. According to NASD Regulation, the pilot program has helped NASD Regulation to identify and resolve any technical problems experienced by these firms.[24] NASD Regulation expects, as with any new program or technology, that systems failures may arise. When that happens, firms will be expected to report these failures to NASD Regulation, correct them as expeditiously as possible, and restart the reporting process.[25] Generally, NASD Regulation represents that a system failure that has happened in the normal course of doing business, and which a firm is attempting to correct, will not be viewed as a disciplinary matter.[26]

The proposed reporting program has been designed to require firms to provide summaries of information that they already collect, including, among other things, aggregate net liquidating equity, exchange and non-exchange transactions, options transactions, debt transactions, customer accounts, short interest, unsecured customer debits, trade cancellations and as-of trades summaries and detail. NASD Regulation is specifying the file formats. Firms may report this data via NASD Regulation's Form Filing Web site or, for firms with connectivity to the NASD OATS private network, through that file transfer protocol.[27] NASD Regulation recognizes that firms may have to make some

[12] Currently, NASD members may review the Firm Data Elements on NASD Regulation's Web site, *http://www.nasdr.com/insite.htm*, at ages 16–18. In the initial implementation of the INSITE program, NASD Regulation represents that no new data elements will be added, and some data elements may be eliminated. NASD Regulation does not anticipate materially expanding the data element requirements.

[26] *Id.*

[27] *Id.*

programming changes in order to create the daily summaries required by the INSITE program. The information required to establish these programs is currently being made available on the INSITE Web site, and firms subject to proposed Rule 3150 should have ample time to prepare for their participation in the program.[28] Further, members are advised on the INSITE Web site that NASD Business and Technology Support Services is the primary source of information about INSITE, and that it can be used as a source for answers to questions about reporting responsibilities, technical specifications for reporting to the NASD, deadlines, and more.[29]

Moreover, as suggested by the SIA, NASD Regulation has represented that it is committed to developing a system on its Web site that will permit members to review the information that has been reported by firms, directly or on their behalf by clearing firms or service bureaus. NASD Regulation will work with its member firms to develop a useful format. NASD Regulation expects this system to be fully functional in the latter part of 2002.[30]

Third, commenters were concerned that the time frame of implementing proposed Rule 3150 would be unrealistic.[31] In response to the commenters concerns, NASD Regulation has stated that its goal is to implement reporting requirements under proposed Rule 3150 in as reasonable a manner as possible in order to give clearing firms, self-clearing firms, and service bureaus sufficient time to prepare. NASD Regulation plans to begin requiring reporting under proposed Rule 3150 as of December 10, 2001. The three member firms that have been participating in the pilot program will be phased in first. All three firms will be reporting the published Firm Data Elements under proposed Rule 3150 by mid-January 2002.

NASD Regulation represents that it will phase in all other members in several stages. NASD Regulation is currently working with the SIA Committee and FIF to establish these dates. NASD Regulation will publish the schedule of phase-ins as soon as it has been established, but in no event will NASD Regulation give member firms less than six-months notice of their start-up date. NASD Regulation also represents that it will take into account broker-dealers' relationships with service bureaus in establishing the phase-in schedules. NASD Regulation expects Rule 3150 to be fully implemented by the end of 2002.[32]

NASD Regulation also proposed to amend proposed Rule 3150 to eliminate the requirement that all data be reported on a daily basis, in order to give NASD Regulation the flexibility it needs to require that certain data elements be reported less frequently.[33] As with the current data elements, NASD Regulation would announce any change in the reporting requirements well in advance of their implementation.[34]

Fourth, commenters suggested that the Association include a provision for exemptive relief from the reporting requirements of proposed Rule 3150.[35] These commenters suggested that such relief might be based on the nature of a firm's activities, its risk factors, and the size of its capital reserves.[36]

In response to these commenters, NASD Regulation has decided to include a provision in proposed Rule 3150 that would permit broker-dealers to request an exemption from the reporting requirements of proposed Rule 3150 pursuant to the Rule 9600 Series.[37] As stated in proposed Rule 3150(b), exemptions from any or all of the Rule 3150 reporting requirements will be granted only under exceptional and unusual circumstances. According to NASD Regulation, the size of a firm will not be the determinative factor in deciding whether to grant such exemptions, since wholesale exemptions based solely on the size of a firm could jeopardize the strength of the INSITE program.

NASD Regulation also proposed additional clarifications to proposed Rule 3150.[38] NASD Regulation proposed to amend the rule language to explicitly refer to both clearing firms and self-clearing firms.[39] In addition, NASD Regulation proposed to amend the rule language to clarify that the Association will only require its *member* clearing and self-clearing firms to report prescribed data pertaining to the member and any member broker-dealer for which it clears.[40] This should exclude from the parameters of proposed Rule 3150 any broker-dealer that is not registered with the NASD.

III. Discussion

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities association.[41] In particular, the Commission finds the proposal is consistent with section 15A(b)(6) of the Act,[42] which requires, among other things, that the Association's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

The Commission believes that the Association's proposal to enhance the surveillance and examination of NASD members via the INSITE program should help to prevent fraudulent and manipulative acts and practices and promote just and equitable principles of trade because it authorizes the Association to require clearing and self-clearing members to report certain data to be analyzed for indications of sales practice violations. In addition, the data elements reported pursuant to NASD Rule 3150 and NYSE Rule 416[43] will assist regulators in addressing concerns about microcap fraud.[44]

[35] *See* Nordea Letter; Wachtel Letter.

[36] *Id.*

[37] NASD Regulation is also proposing a rule change to Rule 9610 that will add Rule 3150 to the rules under which members can seek exemptive relief.

[38] *See* Amendment No. 2, p. 6.

[39] *Id.*

[40] When a clearing firm files data for its own business, NASD Regulation will treat it as a self-clearing firm for purposes of INSITE reporting requirements. In any event, a clearing firm (or a self-clearing firm) is not required to report is own aggregate net liquidating equity; instead, a clearing firm must report the aggregate net liquidating equity of its correspondent firms. (*See* page 16 of the INSITE Firm Data Technical Specifications, which states that a self-clearing firm may report its aggregate net liquidating equity as NULL, or no value.)

[41] In approving this rule, the Commission has considered its impact on efficiency, competition, and capital formation. 15 U.S.C. 78*o*–3(b)(9). The Commission finds that Rule 3150 appropriately balances the need of NASD Regulation for regulatory information with the need to provide clearing firms flexibility in reporting such information in a manner that is not unduly burdensome. For example, NASD Regulation has tailored the data elements, committed to provide six-months of notice of implementation, worked closely with the industry on implementation of Rule 3150, and provided alternative methods for reporting, such as service bureaus.

[42] 15 U.S.C. 78*o*–3(b)(6).

[43] *See* Securities Exchange Act Release No. 44135 (March 30, 2001), 66 FR 18334 (April 6, 2001) (order approving SR–NYSE–00–60).

[44] NASD Regulation reiterates its commitment that it is collecting the data pursuant to Rule 3150 solely for regulatory purposes. Telephone conversation between Shirley H. Weiss, Office of General Counsel, NASD Regulation and Florence Harmon, Senior Special Counsel, Division of Market Regulation, Commission (Nov. 26, 2001).

The Commission finds that the data elements that NASD Regulation initially will require its clearing and self-clearing members to provide pursuant to proposed Rule 3150, including items such as trade cancellations (T+1 forward) and as-of trades, aggregate net liquidating equity in each firm's proprietary accounts, and unsecured customer debits, have been sufficiently identified by NASD Regulation as core data that is needed in order to operate the surveillance component of INSITE.[45] Further, the Association has represented that in the initial implementation of the INSITE program, no new data elements will be added, and some data elements may be eliminated. Moreover, the Association noted that it does not anticipate materially expanding the data element requirements.

After careful consideration of the commenters' concerns about the intricacies and usefulness of the data elements required pursuant to proposed Rule 3150, the Commission believes that NASD Regulation's INSITE Web site should help to keep NASD members informed of all modifications and clarifications of the reporting requirements. In addition, the Commission finds that NASD Regulation has been and will continue to be committed towards modifying the reporting requirements as necessary based on the information that it receives from member firms and service bureaus, thus promoting just and equitable principles of trade consistent with the Act.

The Commission has also carefully considered the commenters' concerns about the duplication of reporting information through FOCUS reports, ACT and OATS. The Commission finds that although some of the required data duplicates information required to be reported in FOCUS reports, the required data pursuant to proposed Rule 3150 will be reported on a daily basis, at least initially, which would give NASD Regulation the opportunity to discover capital problems almost as they occur. Further, NASD Regulation has represented that INSITE data would pertain to transaction and account data. Therefore, the Commission believes that the data elements should provide valuable insights into potential sales practice issues as they arise, consistent with section 15A(b)(6) of the Act.

The Commission finds that NASD Regulation has sufficiently addressed commenters' concerns about any possible technical flaws and inconsistencies of the INSITE program. The Commission believes that NASD Regulation's pilot program with three clearing firms should help to identify any significant programs in collecting and reporting this data, and any technical problems experienced by member firms. The Association notes that should a system failure happen in the normal course of doing business, and a firm is attempting to correct it, the Association would not view the violation of Rule 3150 as a disciplinary matter.[46] Further, NASD Regulation represents that the reporting program is designed to require member firms to provide summaries of information that it already collects. Moreover, NASD Regulation is specifying the file formats and providing information on the INSITE Web site on how to establish the reporting program should some firms need to make some programming changes. Therefore, the Commission believes that the Association will work with its member firms to develop a useful format.

After careful consideration of the commenters' concerns about the ambiguous time frame of implementing reporting requirements pursuant to proposed Rule 3150, the Commission finds that the Association's proposal to begin requiring reporting under proposed Rule 3150 as of December 10, 2001, phase in the three pilot member firms first, and thereafter phase in other member firms in several stages should reasonably help the Association to implement the reporting requirements of proposed Rule 3150 by giving clearing and self-clearing firms, and service bureaus sufficient time to prepare. The Commission believes that the representation by NASD Regulation that it would give member firms no less than six-months notice of their start-up date should provide clearing and self-clearing member firms adequate notice to prepare for the reporting requirements. Further, NASD Regulation has represented that it would take into account broker-dealer relationships with service bureaus in establishing the phase-in schedules.

The Commission also finds that the Association's proposal to include a provision for exemptive relief from the reporting requirements of proposed Rule 3150 should alleviate commenters concerns that members under certain circumstances should be exempted from the reporting requirements. The Commission notes, in particular, that the size of a firm will not be the determinative factor in deciding to grant such exemption in order not to jeopardize the strength of the INSITE program.

IV. Amendments No. 1 and No. 2

The Commission finds good cause for approving Amendments No. 1 and 2 prior to the thirtieth day after notice of the publication in the **Federal Register**. In addition to making minor technical changes to the proposed rule language, these amendments (1) explicitly refer to both clearing firms and self-clearing firms, and clarify that only *member* clearing and self-clearing firms are required to report the prescribed data; (2) eliminate the requirement that all data be reported on a daily basis; and (3) provide an exemption process from Rule 3150. Additionally, these amendments address commenters' concerns about duplicative data reporting and the proposed implementation date, and provide the assurance of NASD Regulation that it will work in close coordination with its member firms in implementing the reporting requirements under rule 3150. Accordingly, the Commission finds that by providing Amendments Nos. 1 and 2 to proposed Rule 3150 the Rule should enable the Association to detect unusual trading patterns at an early stage and thereby better protect investors and the public interest from abusive sales practices. The Commission believes that it is not necessary to separately solicit comment on Amendment Nos. 1 and 2 prior to approving this proposal because it finds that these changes to the proposed rule language respond to and incorporate suggestions made by commenters to the original proposal. The Commission therefore finds that acceleration of Amendments No. 1 and 2 is appropriate.

V. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning Amendment Nos. 1 and 2, including whether the proposed amendments are consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed amendments that are filed with the Commission, and all written communications relating to the amendments between the Commission and any person, other than those that

[45] *See* Firm Data Filing Technical Specifications under Rule 3150, available at pp. 16–18 at *www.nasdr.com/insite.htm*.

[46] The Commission notes, however, that a series of systems failures raises issues as to a broker-dealer's fulfillment of its regulatory responsibilities. *See* Lowell H. Listrom, 50 S.E.C. 883, 887 note 7 (1992).

may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing also will be available for inspection and copying at the principal office of the NASD.

All submissions should refer to File No. SR–NASD–2001–19 and should be submitted by December 26, 2001.

VI. Conclusion

It is Therefore Ordered, pursuant to Section 19(b)(2) of the Act,[47] that the proposed rule change (SR–NASD–2001–19), as amended, is approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[48]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45116; File No. SR–NASD–2001–84]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by National Association of Securities Dealers, Inc. To Change the Description of the Market Capitalization Listing Standard to Market Value of Listed Securities

November 28, 2001.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 14, 2001, the National Association of Securities Dealers, Inc. ("NASD" or "Association") through its subsidiary, The Nasdaq Stock Market, Inc. ("Nasdaq"), filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by Nasdaq. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Nasdaq has filed with the Commission a proposed rule change to change the description of the market capitalization listing standard to market value of listed securities. Nasdaq is also proposing to provide a definition of the term "listed securities" in Nasdaq's Marketplace Rules. Proposed new language is in italics; proposed deletions are in brackets.

* * * * *

Rule 4200. Definitions

(a) For purposes of the Rule 4000 Series, unless the context requires otherwise:

(1)–(18) No change

(19) "Listed securities" means securities quoted on Nasdaq or listed on a national securities exchange.

Former (19)–(36) renumbered as (20)–(37)

(b) No change

Rule 4310. Qualification Requirements for Domestic and Canadian Securities

To qualify for inclusion in Nasdaq, a security of a domestic or Canadian issuer shall satisfy all applicable requirements contained in paragraphs (a) or (b), and (c) hereof.

(a)–(b) No change

(c) In addition to the requirements contained in paragraph (a) or (b) above, and unless otherwise indicated, a security shall satisfy the following criteria for inclusion in Nasdaq:

(1) No change

(2)(A) For initial inclusion, the issuer shall have:

(i) No change

(ii) *market value of listed securities* [market capitalization] of $50 million (currently traded issuers must meet this requirement and the bid price requirement under Rule 4310(c)(4) for 90 consecutive trading days prior to applying for listing); or

(iii) No change

(B) For continued inclusion, the issuer shall maintain:

(i) No change

(ii) *market value of listed securities* [market capitalization] of $35 million; or

(iii) No change

(3) For initial inclusion, the issuer shall have an operating history of at least one year or *a market value of listed securities* [market capitalization] of $50 million.

(4)–(7) No change

(8)(A) No change

(B) No change

(C) A failure to meet the continued inclusion requirements for *market value of listed securities* [market capitalization] shall be determined to exist only if the deficiency continues for a period of 10 consecutive business days. Upon such failure, the issuers shall be notified promptly and shall have a period of 30 calendar days from such notification to achieve compliance with the applicable continued inclusion standard. Compliance can be achieved by meeting the applicable standard for a minimum of 10 consecutive business days during the 30 day compliance period.

(9)–(29) No change

(d) No change

Rule 4320. Qualification Requirements for Non-Canadian Foreign Securities and American Depositary Receipts

To qualify for inclusion in Nasdaq, a security of a non-Canadian foreign issuer, an American Depositary Receipt (ADR) or similar security issued in respect of a security of a foreign issuer shall satisfy the requirements of paragraphs (a), (b) or (c), and (d) and (e) of this Rule.

(a)–(d) No change

(e) In addition to the requirements contained in paragraphs (a), (b) or (c), and (d), the security shall satisfy the following criteria for inclusion in Nasdaq:

(1) No change

(2)(A) For initial inclusion, the issuer shall have:

(i) No change

(ii) *market value of listed securities* [market capitalization] of U.S. $50 million (currently traded issuers must meet this requirement for 90 consecutive trading days prior to applying for listing); or

(iii) No change

(B) For continued inclusion, the issuer shall maintain:

(i) No change

(ii) *market value of listed securities* [market capitalization] of U.S. $35 million; or

(iii) No change

(C) No change

(D) A failure to meet the continued inclusion requirements for *market value of listed securities* [market capitalization] shall be determined to exist only if the deficiency continues for a period of 10 consecutive business days. Upon such failure, the issuer shall be notified promptly and shall have a period of 30 calendar days from such notification to achieve compliance with the applicable continued inclusion standard. Compliance can be achieved by meeting the applicable standard for a minimum of 10 consecutive business days during the 30 day compliance period.

(E) No change

(3)–(25) No change

(f) No change

Rule 4420. Quantitative Designation Criteria

In order to be designated for the Nasdaq National Market, an issuer shall

---

[47] 15 U.S.C. 78s(b)(2).

[48] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

be required to substantially meet the criteria set forth in paragraphs (a), (b), (c), (d), (e), (f), or (g) below. Initial Public Offerings substantially meeting such criteria are eligible for immediate inclusion in the Nasdaq National Market upon prior application and with the written consent of the managing underwriter that immediate inclusion is desired. All other qualifying issues, excepting special situations, are included on the next inclusion date established by Nasdaq.

(a)–(b) No change

(c) Entry Standard 3

An issuer designated under this paragraph does not also need to be in compliance with the quantitative criteria for initial inclusion in the Rule 4300 series.

(1)–(5) No change

(6) The issuer has:

(A) a *market value of listed securities* [market capitalization] of $75 million (currently traded issuers must meet this requirement and the bid price requirement under Rule 4420(c)(3) for 90 consecutive trading days prior to applying for listing); or

(B) No change

(d)—(f) No change

(g) Nasdaq will consider designating as Nasdaq National Market securities Selected Equity-linked Debt Securities (SEEDS) that generally meet the criteria of this paragraph (g). SEEDS are limited-term, non-convertible debt securities of an issuer where the value of the debt is based, at least in part, on the value of another issuer's common stock or non-convertible preferred stock (or sponsored American Depositary Receipts (ADPs) overlying such equity securities).

(1)–(2) No change

(3) Minimum Standards Applicable to the Linked Security

An equity security on which the value of the SEEDS is based must:

(A)(i) have a *market value of listed securities* [market capitalization] of at least $3 billion and a trading volume in the United States of at least 2.5 million shares in the one-year period preceding the listing of the SEEDs;

(ii) have a *market value of listed securities* [market capitalization] of at least $1.5 billion and trading volume in the United States of at least 10 million shares in the one-year period preceding the listing of the SEEDS; or

(iii) have a *market value of listed securities* [market capitalization] of at least $500 million and a trading volume in the United States of at least 15 million shares in the one-year period preceding the listing of the SEEDS.

(B)–(C) No change

(4)–(5) No change

(h) No change

Rule 4450. Quantitative Maintenance Criteria

After designation as a Nasdaq National Market security, a security must substantially meet the criteria set forth in paragraphs (a) or (b), and (c), (d), (e), and (f) below to continue to be designated as a national market system security. A security maintaining its designation under paragraph (b) need not also be in compliance with the quantitative maintenance criteria in the Rule 4300 series.

(a) No change

(b) Maintenance Standard 2—Common stock, Preferred Stock, Shares or Certificates of Beneficial Interest of Trusts and Limited Partnership Interests in Foreign or Domestic Issues

(1) The issuer has:

(A) a *market value of listed securities* [market capitalization] of $50 million; or

(B) No change

(2)–(6) No change

(c)–(g) No change

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Nasdaq included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. Nasdaq has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the description of the market capitalization listing standard to market value of listed securities. One of the standards under which issuers can qualify for listing on The Nasdaq National Market ("National Market") is to have a market capitalization of at least $75,000,000. Issuers may also qualify for continued inclusion on the National market with at least $50,000,000 in market capitalization. The minimum market capitalization standards for initial and continued inclusion on The Nasdaq SmallCap Market are $50,000,000 and $35,000,000, respectively.

For purposes of initial listing eligibility, Nasdaq has historically interpreted the term market capitalization to include only the value of listed securities. In connection with continued listing eligibility, however, Nasdaq has also considered market capitalization to include classes of non-redeemable convertible preferred stock, provided that the conversion price was "in the money." This approach has created uncertainty among issuers and investors as to the definition and application of the market capitalization listing standard. Furthermore, Nasdaq's Marketplace Rules do not define market capitalization and this term may be thought to include more than just the value of listed securities or non-redeemable convertible preferred stock that is in the money. For example, issuers and investors may believe that all unlisted convertible preferred stock or non-convertible preferred stock may be included in the definition of market capitalization.

As such, Nasdaq proposes to change the description of the market capitalization listing standard to market value of listed securities. In conjunction with this change, Nasdaq also proposes to add to Nasdaq's Marketplace Rules a definition of the term "listed securities." Nasdaq believes that these modifications will clarify for issuers and investors that initial and continued listing eligibility will be based only upon the value of an issuer's securities that are quoted on Nasdaq or listed on a national securities exchange.

2. Statutory Basis

Nasdaq believes that the proposed rule change is consistent with the provisions of section 15A(b)(6) of the Act[3] in that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices, and to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

Nasdaq does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

[3] 15 U.S.C. 78o(b)(6).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. by order approve such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to File No. SR–NASD–2001–84 and should be submitted by December 26, 2001.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[4]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45114; File No. SR–Phlx–2001–38]

Self-Regulatory Organizations; Order Granting Approval to Proposed Rule Change, and Amendment No. 1 Thereto, by the Philadelphia Stock Exchange, Inc. Relating to the Definition of a Controlled Account

November 28, 2001.

I. Introduction

On March 12, 2001, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change related to the definition of a controlled account. On August 16, 2001, the Exchange filed Amendment No. 1 to the proposed rule change.[3] The proposed rule change was published for comment in the **Federal Register** on September 18, 2001.[4] This order approves the proposed rule change, as amended.

II. Description of the Proposed Rule Change

The Phlx proposes to amend the definition of controlled accounts under Phlx Rule 1014(g)(i) and Option Floor Procedure Advice ("Advice") B–6. The proposed rule change would also make corresponding amendments to Phlx Rule 1014(g)(i) and Advice B–6 pertaining to the requirements to circle the "yield" field on order tickets. This proposed rule change has been filed in response to the Ordering Instituting Public Administrative Proceeding Pursuant to section 19(h)(1) of the Securities Exchange Act Release No. 43268 (September 11, 2000) and Administrative Proceeding File 3–10282 (the "Order"). Under Section IV.B.j of the Order, the Exchange is required to codify market maker practices pertaining to the allocation of orders.

Currently, Phlx Rule 1014(g) defines the term controlled account to include "any account controlled by or under common control with a member broker-dealer." Phlx Option Specialists, Registered Options Traders ("ROTs") and other "firm proprietary" accounts (if for the account of a member broker-dealer) are included in this definition. Under the rule, if an account is not a controlled account, it is considered a customer account. Thus all other accounts, including non-member broker-dealer accounts, are considered customer accounts. Except for specialists and ROTs closing in-person, controlled accounts must yield priority to customer accounts. Presently, member broker-dealers are required to yield priority to non-member broker-dealer accounts because such accounts are considered customer accounts under the rule language. However, Phlx Rule 1014(g) has been interpreted to yield the priority of non-member broker-dealer orders to "true" customer orders, and treat non-member broker-dealer orders on par with member broker-dealer orders on the floor of the Exchange. This proposed rule change would codify the floor's interpretation of the term "controlled account."

Specifically, the proposed rule change would amend the controlled account definition to include a non-member broker-dealer account. Thus, non-member broker-dealers would be required to yield priority to public customer orders, and be treated on par with orders for accounts of member broker-dealers. For instance, currently, where both a customer and a non-member broker-dealer order bid for 100 contracts at the same time and at the same price, the customer and the non-member broker-dealer would each be entitled to 50 contracts of an incoming order to sell 100 contracts under the rule. However, under the proposed rule change, the customer's bid would have priority over the non-member broker-dealer and would receive the entire execution of an incoming sell order for 100 contracts at that price. In addition, under the proposed rule change, where a non-member broker-dealer and a ROT both bid for 100 contracts at the same time and at the same price, the ROT and the non-member broker-dealer would each be entitled to 50 contracts as opposed to the result under the current rule in which the non-member broker-dealer would have priority and be entitled to the entire execution of the incoming sell order for 100 contracts.

In addition, the proposed rule change would amend Advice B–6 to clarify that there is no requirement to circle the "yield" field on market maker order tickets because unlike customer order tickets, the tickets used for orders by ROTs and other exchanges' market makers (due to the processing needs of clearing firms), do not have such a category. This amendment would make

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Letter from Richard S. Rudolph, Counsel, Phlx, to Nancy J. Sanow, Senior Special Counsel, Division of Market Regulation, Commission, dated August 15, 2001 ("Amendment No. 1").

[4] *See* Securities Exchange Act Release No. 44809 (September 18, 2001), 66 FR 49056 (September 25, 2001).

Advice B–6 consistent with the expanded definition of controlled account under the proposed rule change. Currently, specialists and ROTs closing-in person are not required to circle the yield field; this requirement would not change. Other controlled accounts would still be required to circle the yield field.

III. Discussion

After careful review, the Commission finds that the proposed rule change is consistent with the Act and the rules and regulations under the Act applicable to a national securities exchange.[5] In particular, the proposed rule change is consistent with sections 6(b)(5) and 6(b)(8) of the Act.[6] The Commission finds that proposed rule change is consistent with the requirements of section 6(b)(5) of the Act[7] because the proposed rule change is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and to remove impediments to and perfect the mechanism of a free and open market, and, in general, to protect investors and the public interest. The Commission also finds that the proposed rule change is consistent with section 6(b)(5) of the Act because the proposed rule change is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. Further, the Commission finds that the proposed rule change is consistent with section 6(b)(8) of the Act[8] because the proposed rule change does not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In particular, the Commission finds that it is consistent with sections 6(b)(5) and 6(b)(8) of the Act[9] to treat non-member broker-dealers and member broker-dealers similarly by generally requiring that orders for such accounts yield to customer orders. In this regard, this rule is similar to protections offered to customer orders in other contexts. Further, the Commission finds that parity between orders for non-member broker-dealers and member broker-dealers, except for members (*i.e.*, specialists and ROTs) that close in-person, is appropriate and consistent with the Act.

[5] In approving this proposed rule change, the Commission has considered its impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[6] 15 U.S.C. 78f(b)(5) and 78f(b)(8).

[7] 15 U.S.C. 78f(b)(5).

[8] 15 U.S.C. 78f(b)(8).

[9] 15 U.S.C. 78f(b)(5) and 78f(b)(8).

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[10] that the proposed rule change (SR–Phlx–2001–38), as amended, is approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[11]

Margaret H. McFarland,

Deputy Secretary.

SOCIAL SECURITY ADMINISTRATION

President's Commission To Strengthen Social Security

AGENCY: Social Security Administration (SSA).

ACTION: Announcement of meeting location.

DATES: December 11, 2001 10:00 a.m.–6:00 p.m.

ADDRESSES: Park Hyatt Ballroom, Park Hyatt Washington, 24th at M Street NW., Washington, DC 20037, (202) 789–1234.

SUPPLEMENTARY INFORMATION: The **Federal Register** notice announcing the December 11 meeting of the President's Commission to Strengthen Social Security did not include a meeting location. The purpose of this announcement is to provide the meeting location.

The Commission will meet commencing Tuesday, December 11, at 10:00 a.m. and ending at 6:00 p.m., with a break for lunch between 12:30 p.m. and 1:30 p.m. The Commission will be discussing its draft Final Report.

Dated: November 30, 2001.

Michael A. Anzick,

Designated Federal Officer.

DEPARTMENT OF STATE

Bureau of Consular Affairs

[Public Notice 3850]

Designation of Certain Posts for Special Fee Payment Procedures

This public notice adds additional posts, located in India and Vietnam, to those already designated by the Deputy Assistant Secretary for Visa Services for two purposes related to the payment of immigrant visa fees. The first purpose relates to the revised procedure for payment of the fee for the processing of the application for an immigrant visa set forth in the **Federal Register** on September 8, 2000, (65 FR 54598). The effective date of that notice was stayed until January 1, 2001 by a public notice in the **Federal Register** of December 14, 2000, (65 FR 78243).

The second purpose is to identify the posts for which a fee pursuant to Item 61 of the Schedule of Fees for Consular Services (22 CFR 22.1) will be assessed for advance review of and assistance with the Affidavit of Support that is required in certain immigrant visa cases. Notice of this fee requirement was added to the visa regulation pertaining to the Affidavit of Support requirement in 22 CFR 40.41(b), and was effective January 1, 2001.

The Department will publish further public notices as additional designations are made.

The Deputy Assistant Secretary for Visa Services has designated the Foreign Service posts in the following cities for participation in the new immigrant visa application processing fee payment system and the fee for review of and assistance with the Affidavit of Support required under section 213A of the Immigration and Nationality Act. The effective date of this notice is October 1, 2001.

DEPARTMENT OF STATE

[Public Notice 3851]

Future Leaders Exchange (FLEX) Computer Training of Trainers Workshop; Request for Proposals

SUMMARY: The Office of Citizen Exchanges, Division of the NIS Secondary School Initiative of the United States Information Agency's Bureau of Educational and Cultural Affairs, announces an open competition for the Computer Training of Trainers Workshop for the Future Leaders Exchange (FLEX) program. The FLEX program brings secondary students from the New Independent States (NIS) of the former Soviet Union to the U.S. for an academic year. During their time in the U.S., FLEX students live with American host families and attend U.S. high schools.

The primary goal of the Computer Training of Trainers Workshop is to train the participants to educate others in basic computer skills and Internet access. Public and private non-profit organizations meeting the provisions described in Internal Revenue Code section 26 USC 501c(3) may submit proposals to conduct a one-week workshop in Spring, 2002 to train a minimum of 30 FLEX students.

Participants will be selected from among a group of 1200 students. We anticipate the maximum grant award to be approximately $75,000. Cost sharing to maximize the number of participants will be looked at very favorably.

Program Information

The recipient of the grant is responsible for developing and conducting the Computer Training of Trainers Workshop based on guidelines set forth by the Division. The grantee organization will also have responsibility for selecting participants. Additional responsibilities include coordinating travel arrangements for each participant from his/her host community to the training site and return, and for providing room and board for students during their time at the workshop.

Background

Academic year 2001/2002 is the ninth year of the FSA/FLEX program, which now includes over 10,000 alumni. This component of the NIS Secondary School Initiative was originally authorized under the FREEDOM Support Act of 1992 and is funded by annual allocations from the Foreign Operations and Department of State appropriations. The goals of the program are to promote mutual understanding and foster a relationship between the people of the NIS and the U.S.; assist the successor generation of the NIS to develop the qualities it will need to lead in the transformation of those countries in the 21st century; and to promote democratic values and civic responsibility by giving NIS youth the opportunity to live in American society for an academic year.

Other Components

Two organizations have already been awarded grants to perform functions that include recruitment, selection, international travel of all FLEX students, and ongoing follow-up with alumni upon their return to the NIS. Additionally, "placement organizations" have been awarded grants to place FSA/FLEX students in schools and homestays for the academic year. The organization selected for the Computer Training of Trainers Workshop will need to request that each placement organization disseminate information on the workshop to all its students and assist in coordinating travel of finalists to the workshop site, and return.

Overview

Workshop participants should be selected according to computer ability, interest, and teaching potential as well as motivation to help citizens of their countries. The workshop should provide an opportunity, first and foremost, for participants to learn about teaching methodologies that will enable them to instruct others. In addition, this can serve as a venue for them to improve their computer expertise so they will be well-prepared to teach these skills to others. Participants should learn about tools they can use to teach basic computer skills, keeping in mind that some of these tools may not be available in their home countries. They should also gain an awareness of how computers can enhance societal development through communication with appropriate organizations, distance learning projects, local language web sites, etc. Particular attention should be paid to those issues that will be especially significant to people from the former Soviet Union. The program should be arranged for seven days, including arrival and departure.

Selection of workshop participants will be completed by the recipient of the grant through a merit-based, equitable selection process. Finalists must represent all 12 NIS countries.

Guidelines

The workshop should be held in Spring 2002, preferably in March or April. Proposals must effectively describe the organization's ability to accomplish the following essential components of the program:

1. Provide a Computer Training of Trainers Workshop, as described above and, preferably, at the time period indicated.
2. Include a description of the student selection process.
3. Describe training that will be provided for organization staff on NIS society and culture.
4. Provide housing and meals for the students throughout the program.
5. Arrange travel for students from their U.S. host communities to the training site, and return, in coordination with FLEX placement organizations. (**Note:** Students will likely be coming from as many as 30 states.) Provide ground transportation for students in the training area, including to and from airports.
6. Provide opportunities to attend cultural events in the area during non-class hours.
7. Provide staff to assist in case of medical emergencies.
8. Incorporate a program component designed to facilitate students' transition from the computer workshop to their host communities.
9. Include a description of the ways in which students will be encouraged to share what they have learned in their U.S. host communities, and to teach others when they return to their home countries. Include a plan for how returning students will interface with FLEX alumni associations that exist throughout the NIS.
10. Provide a mechanism in which participants can continue to communicate with each other upon completion of the workshop.
11. Provide tools for evaluation of the program in terms of its impact on the students and its success in fulfilling objectives, particularly the component that involves their teaching others in their home countries. Plan for continued activity to build upon program

achievements without additional U.S. government support.

A competitive proposal will incorporate important elements of American/NIS culture in sessions that are largely interactive and designed to appeal to high school-age students. The program must be substantive and academic while, at the same time, paced realistically to meet the needs of young people. A strong proposal will reflect a clear, convincing agenda outlining exactly how the program will be carried out and how outcomes will be accomplished as a result of the grant. Knowledge of the current technological capacity (Internet connectivity, e-mail, hardware and software) of NIS countries is essential.

Please refer to the Program Objectives, Goals, and Implementation (POGI) section of the Solicitation Package for greater detail regarding the design of component parts as well as other program information.

Budget Guidelines

Organizations must submit proposals that arrange a program for a minimum of 30 students, but may increase the number of participants through cost sharing. Proposals that maximize the number of students will be favorably viewed. One grant will be awarded for this activity. It is estimated that the total costs of the Computer Training of Trainers Workshop will average $2,500 per NIS participant for a one-week program, including U.S. domestic travel.

Applicants must submit a comprehensive budget for the entire program. We anticipate awarding one grant for approximately $75,000. There must be a summary budget as well as breakdowns reflecting both administrative and program budgets. Please refer to the Solicitation Package for further details and for complete budget guidelines and formatting instructions.

Allowable costs for the program include the following:

(1) Transportation for participants from their host U.S. cities/towns to workshop site.

(2) Daily travel to/from workshop site location.

(3) Room and board during the time of the workshop.

(4) Rental of facilities and equipment.

(5) Fees for related activities/ excursions.

(6) Honoraria for speakers/trainers, as appropriate.

(7) Supplies.

(8) Security services.

Please refer to the Solicitation Package for complete budget guidelines and formatting instructions.

Announcement Title and Number

All correspondence with the Bureau concerning this RFGP should reference the above title and number *ECA/PE/C/PY–02–40.*

FOR FURTHER INFORMATION, CONTACT: The Youth Programs Division, Office of Citizen Exchanges, ECA/PE/C/PY, Room 568, U.S. Department of State, 301 4th Street, SW., Washington, DC 20547, phone: 202/619–6299, fax: 202/619–5311, e-mail: <*lbeach@pd.state.gov*> to request a Solicitation Package. The Solicitation Package contains detailed award criteria, required application forms, specific budget instructions, and standard guidelines for proposal preparation. Please specify Bureau Program Officer Anna Mussman on all other inquiries and correspondence.

Please read the complete **Federal Register** announcement before sending inquiries or submitting proposals. Once the RFGP deadline has passed, Bureau staff may not discuss this competition with applicants until the proposal review process has been completed.

To Download a Solicitation Package via Internet: The entire Solicitation Package may be downloaded from the Bureau's web site at *http://exchanges.state.gov/education/RFGPs.* Please read all information before downloading.

Deadline for Proposals

All proposal copies must be received at the Bureau of Educational and Cultural Affairs by 5 p.m. Washington, DC time on January 14, 2002. Faxed documents will not be accepted at any time. Documents postmarked the due date but received on a later date will not be accepted. It is the responsibility of each applicant to ensure that its proposal is received by the above deadline.

Applicants must follow all instructions in the Solicitation Package. The original and seven copies of the application should be sent to: U.S. Department of State, SA–44, Bureau of Educational and Cultural Affairs, Ref.: ECA/PE/C/PY–02–40, Program Management, ECA/EX/PM, Room 534, 301 4th Street, SW., Washington, DC 20547.

Diversity, Freedom and Democracy Guidelines

Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including, but not limited to ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle both in program administration and in program content. Please refer to the review criteria under the 'Support for Diversity' section for specific suggestions on incorporating diversity into the total proposal. Public Law 104–319 provides that "in carrying out programs of educational and cultural exchange in countries whose people do not fully enjoy freedom and democracy," the Bureau "shall take appropriate steps to provide opportunities for participation in such programs to human rights and democracy leaders of such countries." Public Law 106–113 requires that the governments of the countries described above do not have inappropriate influence in the selection process. Proposals should reflect advancement of these goals in their program contents, to the full extent deemed feasible.

Review Process

The Bureau will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein and in the Solicitation Package. All eligible proposals will be reviewed by the program office, as well as the Public Diplomacy section overseas, where appropriate. Eligible proposals will be forwarded to panels of Bureau officers for advisory review. Proposals may also be reviewed by the Office of the Legal Adviser or by other Department elements. Final funding decisions are at the discretion of the Department of State's Assistant Secretary for Educational and Cultural Affairs. Final technical authority for assistance awards (grants or cooperative agreements) resides with the Bureau's Grants Officer.

Review Criteria

Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered and all carry equal weight in the proposal evaluation:

1. *Quality of the program idea:* Proposals should exhibit originality, substance, precision, and relevance to the Bureau's mission.

2. *Program planning:* Detailed agenda and relevant work plan should demonstrate substantive undertakings and logistical capacity. Agenda and plan should adhere to the program overview and guidelines described above.

3. *Ability to achieve program objectives:* Objectives should be reasonable, feasible, and flexible. Proposals should clearly demonstrate how the organization will meet the program's objectives and plan.

4. *Support of Diversity:* Proposals should demonstrate substantive support of the Bureau's policy on diversity. Achievable and relevant features should be cited in both program administration (selection of participants, program venue and program evaluation) and program content (orientation and wrap-up sessions, program meetings, resource materials and follow-up activities).

5. *Institutional Capacity:* Proposed personnel and institutional resources should be adequate and appropriate to achieve the program or project's goals. Proposing organization should demonstrate it has experience with computer education, preferably with youth, as well as familiarity with the culture of the New Independent States (NIS) of the former Soviet Union.

6. *Track Record:* Proposals should demonstrate an institutional record of successful programs, including responsible fiscal management and full compliance with all reporting requirements for past Bureau grants as determined by Bureau Grant Staff. The Bureau will consider the past performance of prior recipients and the demonstrated potential of new applicants.

7. *Multiplier effect/impact:* Proposed programs should describe how workshop participants will be motivated and enabled to reach out to other individuals in their communities in the U.S. and in their home countries.

8. *Follow-on Activities:* Proposals should describe how the program will track participants to confirm that they share their knowledge and information with their U.S. communities and organize ways to teach others in their home countries.

9. *Project Evaluation:* Proposals should include a plan to evaluate the activity's success. A draft survey questionnaire or other technique plus description of a methodology to use to link outcomes to original project objectives are recommended. Successful applicants will be expected to submit a final report after the project has been completed.

10. *Cost-effectiveness/Cost Sharing:* The overhead and administrative components of the proposal, including salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. Proposals should maximize cost-sharing through other private sector support as well as institutional direct funding contributions.

Authority

Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries * * *; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world." The funding authority for the program above is provided through legislation of the Freedom Support Act.

Notice

The terms and conditions published in this RFGP are binding and may not be modified by any Bureau representative. Explanatory information provided by the Bureau that contradicts published language will not be binding. Issuance of the RFGP does not constitute an award commitment on the part of the Government. The Bureau reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements.

Notification

Final awards cannot be made until funds have been appropriated by Congress, allocated and committed through internal Bureau procedures.

Dated: November 26, 2001.

Patricia S. Harrison,

Assistant Secretary for Educational and Cultural Affairs, U.S. Department of State.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Request To Release Airport Land at the Safford Municipal Airport, Safford, Arizona From Certain Restrictions Contained in the Patent Dated April 3, 1956

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on request to release airport land from certain restrictions contained in the Patent No. 1158979 dated April 3, 1956.

SUMMARY: The FAA proposes to rule and invites public comment on the release of approximately 183.30 acres of land at the Safford Municipal Airport, Safford, Arizona, from certain restrictions contained in the Patent dated April 3, 1956. The purpose of the release is to permit the use of approximately 183.30 acres of airport property to be developed for non-aeronautical purposes, but remain dedicated airport land.

DATES: Comments must be received on or before January 4, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Federal Aviation Administration, Airports Division, P.O. Box 92007, Los Angeles, CA 90009. In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Ronald Jacobson, City

Manager, City of Safford, P.O. Box 272 Safford, AZ 85548–0272.

FOR FURTHER INFORMATION CONTACT: Mr. Kevin Flynn, Supervisor, Arizona Standards Section, Airports Division, AWP–623, P.O. Box 92007, Los Angeles, CA 90009, Telephone: (310) 725–3632. Arrangements may be made with Mr. Flynn to review the request to release the subject airport property from certain obligations in person at the FAA Western-Pacific Regional office, 15000 Aviation Blvd., Hawthorne, CA 90250.

SUPPLEMENTARY INFORMATION: On April 5, 2000, new authorizing legislation became effective. That bill, the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR 21), Public Law 10–181 (Apr. 5, 2000; 114 Stat. 61), requires that a 30-day public notice must be provided before the Secretary may waive any condition imposed on an interest in surplus property.

The following is a brief overview of the request:

On April 3, 1956, the United States Department of Interior, acting under the authority of section 16 of the Federal Airport Act of 1946, granted patent No. 1158979 to the Town of Safford, Arizona for 692.66 acres to be developed as a public use airport. The City of Safford has requested the release of approximately 183.30 acres of dedicated airport land at the Safford Municipal Airport, Safford Arizona from certain restrictions contained in the Patent dated April 3, 1956. The purpose of the release is to permit the use of dedicated airport property for non-aeronautical purposes. Net proceeds from the leasing and development of the subject land will be utilized by the city for capital improvements, operation, and maintenance at the Safford Municipal Airport.

Issued in Hawthorne, California, on November 15, 2001.

Herman C. Bliss,

Manager, Airports Division, Western-Pacific Region.

Assistant Chief Counsel for Regulations.

Disposition of Petitions

Docket No.: FAA–2001–10789 (previously Docket No. 29903).

Petitioner: Bain Aviation, Inc., dba Tavaero Jet Charter, Inc.

Section of 14 CFR Affected: 14 CFR 135.143(c)(2).

Description of Relief Sought/ Disposition: To permit TJC to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed in the aircraft.

Grant, 11/13/2001, Exemption No. 7146A.

Docket No.: FAA–2001–10793 (previously Docket No. 29116).

Petitioner: Taconite Aviation, Inc.

Section of 14 CFR Affected: 14 CFR 135.143(c)(2).

Description of Relief Sought/ Disposition: To permit TAI to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed in the aircraft.

Grant, 11/13/2001, Exemption No. 6735B.

Docket No.: FAA–2001–9618 (previously Docket No. 24165).

Petitioner: U.S. Air Force.

Section of 14 CFR Affected: 14 CFR 91.209(a) and (b).

Description of Relief Sought/ Disposition: To permit the USAF to conduct helicopter night-vision flight training operations without lighted aircraft position lights at or below 500 feet above ground level.

Grant, 11/13/2001, Exemption No. 5891B.

Docket No.: FAA–2001–10790 (previously Docket No. 27118).

Petitioner: Air Logistics, L.L.C.

Section of 14 CFR Affected: 14 CFR 135.143(c)(2).

Description of Relief Sought/ Disposition: To permit Air Logistics to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed in the aircraft.

Grant, 11/13/2001, Exemption No. 6736B.

Docket No.: FAA–2001–10920.

Petitioner: Yute Air Taxi, Inc.

Section of 14 CFR Affected: 14 CFR 135.143(c)(2).

Description of Relief Sought/ Disposition: To permit YAT to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed in the aircraft.

Grant, 11/13/2001, Exemption No. 7658.

Docket No.: FAA–2001–10838.

Petitioner: Frontline Aviation, Inc.

Section of 14 CFR Affected: 14 CFR 135.143(c)(2).

Description of Relief Sought/ Disposition: To permit FAI to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed in the aircraft.

Grant, 11/13/2001, Exemption No. 7660.

Docket No.: FAA–2001–10839.

Petitioner: Alaska Flying Tours.

Section of 14 CFR Affected: 14 CFR 135.143(c)(2).

Description of Relief Sought/ Disposition: To permit AFT to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed in the aircraft.

Grant, 11/13/2001, Exemption No. 7657.

Docket No.: FAA–2001–10927.

Petitioner: Miller Aero Services, Inc.

Section of 14 CFR Affected: 14 CFR 135.143(c)(2).

Description of Relief Sought/ Disposition: To permit MAS to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed in the aircraft.

Grant, 11/13/2001, Exemption No. 7659.

Docket No.: FAA–2001–10853. (previously Docket No. 29783).

Petitioner: Indiaanapolis Aviation, Inc.

Section of 14 CFR Affected: 14 CFR 135.143(c)(2).

Description of Relief Sought/ Disposition: To permit IAI to operate certain aircraft under part 135 without a TSO–C112 (Mode S) transponder installed in the aircraft.

Grant, 11/13/2001, Exemption No. 7082A.

[Summary Notice No. PE–2001–93]

Petitions for Exemption; Summary of Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption part 11 of Title 14, Code of Federal Regulations (14 CFR), this notice contains a summary of dispositions of certain petitions previously received. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

FOR FURTHER INFORMATION CONTACT: Forest Rawls (202) 267–8033, Sandy Buchanan-Sumter (202) 267–7271, or Vanessa Wilkins (202) 267–8029, Office of Rulemaking (ARM–1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85 and 11.91.

Issued in Washington, DC., on November 29, 2001.

Donald P. Byrne,

Assistant Chief Counsel for Regulations.

Dispositions of Petitions

Docket No.: FAA–2001–10384 (previously Docket No. 29137).

Petitioner: Weary Warriors Squadron.

Section of 14 CFR Affected: 14 CFR 91.315, 119.21(g), and 119.21(a).

Description of Relief Sought/ Disposition: To permit WWS to operate its North American B–25 aircraft, which is certificated in the limited category, for the purpose of carrying passengers for compensation or hire.

Grant, 11/01/2001, Exemption No. 6786B.

Docket No.: FAA–2001–10452 (previously Docket No. 29599).

Petitioner: Air Logistics, L.L.C.

Section of 14 CFR Affected: 14 CFR 145.45(f).

Description of Relief Sought/ Disposition: To permit Air Logistics to place and maintain its Inspection Procedures Manual (IPM) in a number of fixed locations within its facility in lieu of giving a copy of the IPM to each of its supervisory and inspection personnel.

Grant, 10/24/2001, Exemption No. 7097A.

Docket No.: FAA–2001–10876.

Petitioner: EAA Aviation Foundation, Inc., and Experimental Aircraft Association, Inc.

Section of 14 CFR Affected: 14 CFR 91.315, 119.5(g), and 119.21(a).

Description of Relief Sought/ Disposition: To permit EAA to operate its Boeing B–17 airplane, which is certificated in the limited category, for the purpose of carrying its members for compensation or hire in its former military vintage airplane on local flights for educational and historical purposes.

Grant, 10/30/2001, Exemption No. 6541C.

Docket No.: FAA–2001–9780.

Petitioner: Schwartz Engineering Company.

Section of 14 CFR Affected: 14 CFR 25.813(e).

Description of Relief Sought/ Disposition: To permit SEC to install interior "hinged/slab" doors between passenger compartments on one private-use Boeing Model 737–700 IGW airplane.

Denial, 11/02/2001, Exemption No. 7656.

Federal Aviation Administration

Notice of Intent To Rule on Application 02–05–C–00–BGM To Impose/Use the Revenue from a Passenger Facility Charge (PFC) at Binghamton Regional Airport, Binghamton, New York

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose/use the revenue from a PFC at Binghamton Regional Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before January 4, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Federal Aviation Administration, New York Airports District Office, 600 Old Country Road, Suite 446, Garden City, New York 11530.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Carl R. Beardsley, Jr., Deputy Commissioner of Aviation of the Broome County Department of Aviation at the following address: Broome County Department of Aviation, 2534 Airport Road, Box 16, Johnson City, NY 13790.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Broome County Department of Aviation under section 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Philip Brito, Manager, New York Airports District Office, 600 Old Country Road, Suite 446, Garden City, New York 11530, Telephone: (516) 227–3800. The application may be reviewed in person at the same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose/use the revenue from a PFC at Binghamton Regional Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On October 31, 2001, the FAA determined that the application to impose/use the revenue from a PFC submitted by the Broome County Department of Aviation was substantially complete within the requirements of section 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than February 19, 2001.

The following is a brief overview of the application.

PFC Application No.: 02–05–C–00–BGM.

Level of the proposed PFC: $3.00.

Proposed charge effective date: February 1, 2002.

Proposed charge expiration date: July 31, 2006.

Total estimated PFC revenue: $1,445,438.

Brief description of proposed project(s):
Impose Only:
—Airport Service Road Improvements—Phase I
—ARFF Facility Refurbishment
—Passenger Boarding Bridge Purchase
—Runway 16–34 Refurbishment Design/Construction
Impose and Use:
—Snow Removal Equipment Purchase
—Fire Rescue Equipment
—Runway 16–34 RSA EMAS Design/Construction
—Airport Master Plan Update
Use:
—Maintenance Building Construction—Construction Phase
Class of classes of air carriers which the public agency has requested not be required to collect PFCs: Non-Scheduled/On Demand Operators filing FAA Form 1800–31.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT** and at the FAA regional airports office located at: Federal Aviation Administration, Eastern Region, Airports Division, AEA–610, 1 Aviation Plaza, Jamaica, New York 11434–4809.

In addition, any person may, upon request, inspect the FAA application, notice and other documents germane to the application in person at the Broome County Department of Aviation.

Issued in Garden City, New York on November 27, 2001.

Philip Brito,

Manager, New York Airports District Office, Eastern Region.

Notice of Intent To Rule on Application To Impose a Passenger Facility Charge (PFC) at Dayton International Airport for Use at Dayton International Airport and Dayton-Wright Brothers Airport, Dayton, Ohio

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose a PFC at Dayton International Airport for use at Dayton International Airport and Dayton-Wright Brothers Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before January 4, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Federal Aviation Administration, Detroit Airports District Office, Willow Run Airport, East, 8820 Beck Road, Belleville, Michigan 48111. The application may be reviewed in person at this location.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Eugene B. Conrad, Jr., A.A.E., Dayton International Airport at the following address: Dayton International Airport, 3600 Terminal Drive, Suite 300, Vandalia, Ohio, 45377.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Dayton International Airport under section 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Ms. Arlene B. Draper, Program Manager, Federal Aviation Administration, Detroit Airports District Office, Willow Run Airport, East, 8820 Beck Road, Belleville, Michigan 48111 (734–487–7282). The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose a PFC at Dayton International Airport and to use the revenue at Dayton International Airport and Dayton-Wright Brothers Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On September 27, 2001, the FAA determined that the application to impose a PFC at Dayton International Airport and to use the revenue at Dayton International and Wright-Brothers Airports submitted by the City of Dayton was substantially complete within the requirements of section 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, not later than December 26, 2001.

The following is a brief overview of the application.

PFC application number: 01–03–C–00–DAY.

Level of the proposed PFC: $4.50.

Proposed charge effective date: March 1, 2004.

Proposed charge expiration date: August 1, 2014.

Total estimated PFC revenue: $64,670,915.00.

Brief description of proposed projects:

Dayton International: Runway Pavement Rehabilitation, Environmental Impact Study, Deicing System Improvements, Backup Generator-Airfield, Aircraft Rescue and Fire Fighting (ARFF) Station Renovation and Expansion, Taxiways A and Z Rehabilitation, Taxiway H, K, E, C, L and V Rehabilitation, Cargo and Terminal Aircraft Apron Rehabilitation, Land Acquisition-Approach and Runway Protection, Airfield Snow Removal Equipment, ARFF Vehicle Replacement (Rescue 22), Backup Generator-Terminal, Terminal Gate Expansion, Terminal Drive and Related Roads Rehabilitation, Southwest Terminal Apron, Northeast Deicing Apron, Computerized Airfield Lighting Control System, Perimeter Road, Far Part 150 Noise Study—Phase 1, 2, and Final, Airport Police Offices Renovation. Dayton-Wright Brothers Airport: Land Acquisition and Approach Protection for Runway End 20, Runway 2/20 and Other Pavement Rehabilitation. Class or classes of air carriers which the public agency has requested to be required to collect PFCs: air taxi/commercial operators.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT.**

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Dayton International Airport, 5300 Riverside Drive, Dayton, Ohio 44135.

Issued in Des Plaines, Illinois on November 27, 2001.

Mark McClardy,

Acting Manager, Planning and Programming Branch, Airports Division, Great Lakes Region.

Notice of Intent To Rule on Application to Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Duluth International Airport, Duluth Minnesota

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Duluth International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and part 158 of the Federal Aviation Regulations (14 part 158).

DATES: Comments must be received on or before January 4, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Federal Aviation Administration, Minneapolis Airports District office, 6020 28th Avenue South, Room 102, Minneapolis, Minnesota 55450–2706.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Raymond Klosowski, Executive Director, Duluth Airport Authority, at the following address: Duluth Airport Authority, Duluth International Airport, 4701 Grinder Drive, Duluth, MN 55811. Air carriers and foreign air carriers may submit copies of written comments previously provided to the Duluth Airport Authority under section 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Mr. Gordon Nelson, Program Manager, Federal Aviation Administration, Airports District Office, 6020 28th Avenue South, Room 102, Minneapolis, Minnesota 55450–2706, (612) 713–4358. The applicaiton may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Duluth International Airport Under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus budget Reconciliation Act of 1990) (Public Law 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On October 18, 2001, the FAA determined that the application to impose and use the revenue from a PFC submitted by the Duluth Airport authority was substantially complete within the requirements of section 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than January 16, 2002.

The following is a brief overview of the application.

PFC application number: 01–05–C–00–DLH.

Level of the proposed FPC: $4.50.

Proposed charge effective date: March 1, 2002.

Proposed charge expiration date: March 1, 2003.

Total estimated FPC revenue: $554,556.00.

Brief description of proposed projects: Prepare PFC application; upgrade surveillance camera system (Phase II); repair and replace concrete panels for Runway 9–27 and reconstruct a segment of Taxiway A; design Runway 9 Cat II Instrument Landing System (ILS) and midfield runway Visual Range (RVR); reconstruct passenger terminal apron; improve runway 9 safety area (west end); install runway 9 high intensity approach lighting system with sequenced flashing lights (ALSF–2); acquire 8.5 acres of wetland credits; improve runway safety area at the southwest end of runway 3–21; construct perimeter road around the southwest end of Runway 3–21; install 12,950 feet of 6-ft high security fence and 2,700 feet of ten-foot high deer fence. Class or classes of air carriers which the public agency has requested not be required to collect PFCs: non-scheduled part 135 Air Taxi/Commercial Operators (ATCO).

Any person may inspect the application in person at the FAA office listed above under "**FOR FURTHER INFORMATION CONTACT**".

In addition, any person may, upon request, inspect the application, notice and other documents germane to the applicaiton in person at the Duluth Airport Authority Office.

Issued in Des Plaines, Illinois, on November 27, 2001.

Mark McClardy,

Acting Manager, Planning/Programming Branch, Airports Division, Great Lakes Region.

Subject of Intent To Rule on Application To Impose and Use the Revenue From A Passenger Facility Charge (PFC) at Orlando International Airport, Orlando, Florida

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Orlando International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before January 4, 2002.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Orlando Airports District Office, 5950 Hazeltine National Dr., Suite 400, Orlando, FL 32822.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. C.W. Jennings, Executive Director of the Greater Orlando Aviation Authority at the following address: Mr. C.W. Jennings, Executive Director, Greater Orlando Aviation Authority, One Airport Boulevard, Orlando, FL 32827–4399.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Greater Orlando Aviation Authority under section 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Mr. Bud Jackman, Program Manager, Orlando Airports District Office, 5950 Hazeltine National Dr., Suite 400, Orlando, FL 32822, (407) 812–6331, x22. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Orlando International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconcilitation Act of 1990) (Public Law 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On November 21, 2001, the FAA determined that the application to impose and use the revenue from a PFC submitted by the Greater Orlando Aviation Authority was substantially complete within the requirements of section 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than March 14, 2002.

The following is a brief overview of the application.

PFC Application No.: 02–09–C–00–MCO.

Level of the proposed PFC: $3.00.

Proposed charge effective date: Februrary 1, 2014.

Proposed charge expiration date: February 1, 2017.

Total estimated net PFC revenue: $219,494,000.

Brief description of proposed projoect(s):

Landside Terminal Level 1 Modifications,

Six Bank Elevator Improvements,

Baggage Conveyor System—Landside Levels 1&2,

Central Plant Improvements Phase 3,

Fourth Runway (9,000 ft by 150 ft),

Drainage Improvements (Wildlife Attractants Mitigation),

Intermodal Transit System (ITS),

Replacement of 180,000 LF of Pavement Joints for Runway 17–35,

Satellite Aircraft Rescue and Fire Fighting (ARFF) Facility,

800 MHz Radio System—Digital Upgrade,

Baggage Sorting System Upgrade,

Taxiway Lighting Improvements,

Mobile Command Post,

Surface Movement Guidance Control System,

Automated Guide way Transit (AGT) Rehabilitation Program,

Emergency Operations Center,

Aircraft Rescue and Fire Fighting (ARFF) Vehicles.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: None.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT.**

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Greater Orlando Aviation Authority.

Dated: Issued in Orlando, Florida on November 28, 2001.

W. Dean Stringer,

Manager, Orlando Airports District Office, Southern Region.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Passenger Facility Charge (PFC) Approvals and Disapprovals

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Monthly Notice of PFC Approvals and Disapprovals. In October 2001, there were six applications approved. Additionally, 11 approved amendments to previously approved applications are listed.

SUMMARY: The FAA publishes a monthly notice, as appropriate, of PFC approvals and disapprovals under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158). This notice is published pursuant to paragraph d of 158.29.

PFC Applications Approved

Public Agency: Shenandoah Valley Regional Airport Commission, Weyers Cave, Virginia.

Application Number: 01–01–C–00–SHD.

Application Type: Impose and use a PFC.

PFC Level: $3.00.

Total PFC Revenue Approved in this Decision: $207,875.

Earliest Charge Effective Date: December 1, 2001.

Estimated Charge Expiration Date: December 1, 2006.

Classes of Air Carriers Not Required To Collect PFC's: (1) Unscheduled Part 135 air taxi/commercial operators for hire to the general public and (2) unscheduled Part 121 charter operators for hire to the general public.

Determination: Approved. Based on information contained in the public agency's application, the FAA has determined that each approved class accounts for less than 1 percent of the total annual enplanements at Shenandoah Valley Regional Airport.

Brief Description of Projects Approved for Collection and Use:

Develop PFC program and application.

Install medium intensity taxiway lights, airfield guidance signs, and precision approach path indicator.

Design and construct apron expansion.

Design and rehabilitate general aviation apron.

Design and construct runway safety area—runway 5.

Acquisition of snow removal and friction testing equipment.

Update airport layout plan.

Install stand-by emergency generator.

Decision Date: October 2, 2001.

FOR FURTHER INFORMATION CONTACT: Eleanor Schifflin, Eastern Region Airports Division, (718) 553–3354.

Public Agency: City of Bismarck, North Dakota.

Application Number: 01–03–C–00–BIS.

Application Type: Impose and use a PFC.

PFC Level: $4.50.

Total PFC Revenue Approved in this Decision: $925,522.

Earliest Charge Effective Date: May 1, 2002.

Estimated Charge Expiration Date: January 1, 2004.

Classes of Air Carriers Not Required To Collect PFC's: Air taxis filing FAA Form 1800–31, except commuter air carriers.

Determination: Approved. Based on information contained in the public agency's application, the FAA has determined that the approved class accounts for less than 1 percent of the total annual enplanements at Bismarck Municipal Airport.

Brief Description of Projects Approved for Collection and Use:

Remove taxiway A–4 and construct taxiway C–4.

Update security access system.

Extend taxiway C and reconfigure runway 13/31 exit taxiways.

Remove taxiways A, A–1, A–3, C–1, C–2, and associated electrical facilities.

Abandon and remove runway 17/35 and associated electrical facilities.

Replace general aviation apron.

Update airport master plan—terminal area study.

Replace airport beacon.

Terminal ramp rehabilitation.

Purchase broom truck.

PFC application preparation.

Decision Date: October 15, 2001.

FOR FURTHER INFORMATION CONTACT: Thomas T. Schauer, Bismarck Airports District Office, (701) 323–7380.

Public Agency: Port of Seattle, Washington.

Application Number: 01–06–U–00–SEA.

Application Type: Use PFC revenue.

PFC Level: $3.00.

Total PFC Revenue Approved in this Decision: $50,000,000.

Charge Effective Date: January 1, 2004.

Estimated Charge Expiration Date: September 1, 2021.

Class of Air Carriers Not Required To Collect PFC's: No change from previous decision.

Brief Description of Projects Approved for Collection and Use: Noise remedy program.

Decision Date: October 16, 2001.

FOR FURTHER INFORMATION CONTACT: Suzanne Lee-Pang, Seattle Airports District Office, (425) 227–2654.

Public Agency: County of Venture Department of Airports, Oxnard, California.

Application Number: 01–01–C–00–OXR.

Application Type: Impose and use a PFC.

PFC Level: $4.50.

Total PFC Revenue Approved in this Decision: $872,000.

Earliest Charge Effective Date: January 1, 2002.

Estimated Charge Expiration Date: June 1, 2007.

Class of Air Carriers Not Required To Collect PFC's: None.

Brief Description of Projects Approved for Collection and Use:

Revise/amend updates to airport master plan and Part 150 noise study.

Rehabilitate airport pavement, runway 7/25 and exit taxiways.

Rehabilitate terminal loop road.

Decision Date: October 19, 2001.

FOR FURTHER INFORMATION CONTACT: Dave Delshad, Western Pacific Region Airports Division, (310) 725–3627.

Public Agency: City of Harlingen, Texas.

Application Number: 01–02–C–00–HRL.

Application Type: Impose and use a PFC.

PFC Level: $3.00.

Total PFC Revenue Approved in this Decision: $5,032,330.

Earliest Charge Effective Date: January 1, 2002.

Estimated Charge Expiration Date: February 1, 2006.

Class of Air Carriers Not Required To Collect PFC's: Air taxi/commercial operators operating under Part 135 and filing FAA Form 1800–31.

Determination: Approved. Based on information contained in the public agency's application, the FAA has determined that the approved class accounts for less than 1 percent of the total annual enplanements at Valley International Airport.

Brief Description of Projects Approved for Collection and Use:

Construct air cargo apron.

Extend Bodenhamer Drive.

Install air cargo ramp lighting.

Acquire and install passenger loading bridge.

Overlay access roads.

Rehabilitate taxiway F.

Construct runway 17 blast pad.

Rehabilitate runways 17R/35L and 13/31 lighting.

Acquire 180 acres for runways 35L and 35R protection zones.

Construct taxiways L and M.

Improve runways 15L and 35R safety areas.

Rehabilitate and extend taxiway C.

Rehabilitate air carrier apron.

Convert runway 8/26 to a taxiway.

Reconstruct perimeter road.

Rehabilitate north general aviation apron.

Rehabilitate west cargo apron.

Rehabilitate taxiways J and K.

Rehabilitate terminal.

Rehabilitate terminal access road.

PFC administrative costs.

Decision Date: October 22, 2001.

FOR FURTHER INFORMATION CONTACT: G. Thomas Wade, Southwest Region Airports Division, (817) 222–5613.

Public Agency: County of Victoria, Texas.

Application Number: 01–03–C–00–VCT.

Application Type: Impose and use a PFC.

PFC Level: $4.50.

Total PFC Revenue Approved in this Decision: $182,356.

Earliest Charge Effective Date: January 1, 2002.

Estimated Charge Expiration Date: March 1, 2004.

Class of Air Carriers Not Required To Collect PFC's: None.

Brief Description of Projects Approved for Collection and Use:

Acquire aircraft rescue and firefighting vehicle.

Acquire airfield sweeper.

Update airport master plan.

Rehabilitate runways 12L/30R and 17/35.

Rehabilitate medium intensity taxiway lights on taxiways A and B.

Decision Date: October 30, 2001.

FOR FURTHER INFORMATION CONTACT: G. Thomas Wade, Southwest Region Airports Division, (817) 222–5613.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: King County Washington

AGENCY: Federal Highway Administration (FHWA), King County Department of Transportation, Washington.

ACTION: Notice of Intent to prepare a draft supplemental environmental impact statement (EIS).

SUMMARY: The FHWA, in cooperation with the Washington State Department of Transportation and King County Department of Transportation, is issuing this notice to advise the public that a supplemental to the final environmental impact statement (EIS) will be prepared on the proposal to replace the Elliott Bridge on 149th Avenue Southeast where it crosses the Cedar River

approximately three miles east of downtown Renton in King County, Washington.

FOR FURTHER INFORMATION CONTACT: Elizabeth Healy, Transportation and Environmental Engineer, Federal Highway Administration, 711 South Capital Way, Suite 501, Olympia, Washington, 98501–1284, Telephone: (360) 753–9480 or Tina Morehead, Senior Environmental Engineer, King County, Road Services Division, Department of Transportation, King Street Center M.S. KSC–0231, 201 South Jackson Street, Seattle, WA 98104–3856, Telephone: (206) 296–3733.

SUPPLEMENTARY INFORMATION: The Record of Decision for the original EIS for the improvements (FHWA–WA–EIS–92–4–F) was signed on November 21, 1995. In the original EIS, the proposed improvements to the Elliott Bridge provided a three-lane bridge (two travel lanes and one center lane) with pedestrian sidewalk and associated approach road realignment. Improvements to the bridge were and still are considered necessary to provide for traffic circulation, roadway safety, and structural stability.

After approval and subsequent appeal of the local shoreline substantial development permit, King County withdrew its shoreline permit application based on issues related to the federal Endangered Species Act. Since that withdrawal, the county has reevaluated the original purpose and need for the project, reviewed and expanded the alternatives considered, and determined that a supplemental EIS needs to be prepared.

Alternatives under consideration include four action alternatives in addition to the no-action alternative. The four action alternatives include: Alternative IS—replacing the existing bridge with a new bridge approximately 50 feet east of the existing bridge and constructing two offset tee-intersections to provide connections to Southeast Jones Place and Jones Road; Alternative 4S—replacing the existing bridge with a new bridge approximately 820 feet east of the existing bridge and constructing a new road alignment from the existing tee intersection of 152nd Avenue Southeast and SR 169 northeastly to tie into the existing 154th Place Southeast approximately 1,100 feet north of the new bridge, and constructing a new intersection with Jones Road; Alternative 5S—similar to 4S but the new bridge would be located approximately 180 feet further east; and Alternative 7Sb replacing the existing bridge with a new bridge approximately 65 feet west of the existing bridge and constructing a tee intersection to provide connection to Southeast Jones Place and a right turn lane from 154th Place Southeast to Jones Road.

No formal scoping period will be held. Letters describing the proposed action and soliciting comments will be sent to approximate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest in this proposal. Subsequent to distribution of the draft supplemental EIS, a public hearing will be held during the draft supplemental EIS comment period. The location and time of the public hearing will be announced in the local news media and through a public mailing when it is scheduled. The draft supplemental EIS will be available for public and agency review prior to the public hearing. Release of the draft supplemental EIS for public comment and the public hearing will also be announced in the local news media as these dates are established.

Comments or questions concerning this proposed action and the supplemental EIS should be directed to the FHWA or King County at the address provided above. (Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning, and Construction. The regulations implementing Executive Order 12372 regarding intergovernment consultation on Federal programs and activities apply to this program.)

Issued on: November 28, 2001.

Elizabeth Healy,

Transportation and Environmental Engineer.

BILLING CODE 4910–22–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Mercer and Middlesex Counties, NJ

AGENCY: Federal Highway Administration (FHWA), USDOT.

ACTION: Notice of scoping forum.

SUMMARY: Notice is hereby given that the Federal Highway Administration and the New Jersey Department of Transportation will be holding a Scoping Forum for the purpose of soliciting public comments on the scope of work to be performed for the Penns Neck Area Environmental Impact Statement (EIS).

The Scoping Forum will include brief presentations to introduce the overall study and the project team; describe the study's background and objectives; review the process that will be followed to evaluate all potential solutions; and introduce the technical studies, categories of possible actions, and range of impacts that the EIS will assess for all potential options. The remainder of the session will be a public comment period, wherein the public will be invited to offer statements of up to five minutes each, commenting on the study's scope of work and on the range of solutions to be considered in the EIS.

SCHEDULE FOR SCOPING FORUM

Date: Tuesday, December 4, 2001.

Time: Presentation, followed by continuous public comment period 11 a.m. to 7 p.m.; Repeat of presentation followed by continuation of public comment period, 7 p.m. to 11 p.m.

Place: West Windsor Township Municipal Building, 271 Clarksville Road, West Windsor, NJ.

If needed, a supplemental public comment period will be held on Thursday, December 6th at the West Windsor Municipal Complex, from 7 p.m. to 11 p.m., to accommodate additional speakers who could not be scheduled due to time limitations.

COMMENT DUE DATE: All comments made during the Scoping Forum public comment period will be recorded and become part of the official record of the proceedings. Written statements on the scope of work for the Penns Neck Area EIS may also be submitted, either at the Scoping Forum, or by forwarding them to Helen Neuhaus & Associates (see information below). All statements received by January 7, 2002, will be included in the official record.

AVAILABILITY OF INFORMATION: Documents related to the project and Scoping Forum can be reviewed on the project website at *www.pennsneckareaseis.org*. They are also available at any of the following project repositories (please call for hours):

West Windsor Township Public Library, 333 N. Post Road, West Windsor, NJ (609) 799–0462

Princeton Township Clerk's Office, 369 Witherspoon Street, Princeton Township, NJ (609) 924–5176

Princeton Borough Clerk's Office, Borough Hall, 1 Monument Drive, Princeton, NJ (609) 497–7622

Plainsboro Public Library, 641 Plainsboro Road, Plainsboro, NJ (609) 275–2898

Rutgers University Transportation Policy Institute, 33 Livingston Avenue, New Brunswick, NJ (732) 932–6812

Ext. 593, New Jersey Department of Transportation, 1035 Parkway Avenue, Ewing, NJ (609) 530–2824

[Ask for Andy Fekete]

AGENCY SCOPING MEETING: A scoping meeting for public agencies will be held at a later date.

PRE-REGISTRATION FOR SCOPING FORUM AND FURTHER INFORMATION: For further information regarding the Penns Neck Area EIS, please contact Randell Prescott, Program Operations Director or Amy Fox, Environmental Coordinator, Federal Highway Administration, 840 Bear Tavern Road, Suite 310, West Trenton, NJ 08628. To pre-register and reserve a speaking time during the public comment period, please contact Helen Neuhaus by phone: (212) 532–4175; mail: 432 Park Avenue South, New York, NY 10016; email: *hna1977@aol.com;* or fax: (212) 532–7479.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation of Federal programs and activities apply to this program)

Issued on: November 21, 2001.

Randell Prescott,

Program Operations Director, FHWA—New Jersey Division, Trenton.

BILLING CODE 4910–22–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Waukesha County, WI

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Supplemental notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for transportation improvements in the State Trunk Highway (STH) 83 corridor between County Trunk Highway (CTH) "NN" at the north limits of the Village of Mukwonago and STH 16, Waukesha County, Wisconsin. The north terminus was extended since the notice of intent was published in the **Federal Register** on March 26, 2001 (66 FR 16520).

FOR FURTHER INFORMATION CONTACT: Mr. Richard C. Madrzak, Field Operations Engineer, Federal Highway Administration, 567 D'Onofrio Drive, Madison, Wisconsin, 53719–2814; telephone: (608) 829–7510. You may also contact Ms. Carol Cutshall, Director, Bureau of Environment, Wisconsin Department of Transportation, P.O. Box 7965, Madison, Wisconsin, 53707–7965; telephone: (608) 266–9626.

SUPPLEMENTARY INFORMATION:

Electronic Access

An electronic copy of this document may be downloaded by using a computer, modem and suitable communications software from the Government Printing Offices' Electronic Bulletin Board Service at (202) 512–1661. Internet users may reach the Office of Federal Register's home page at: *http://www.nara.gov/fedreg* and the Government Printing Offices' database at: *http://www.access.gpo.gov/nara.*

Background

The FHWA, in cooperation with the Wisconsin Department of Transportation, will prepare a Draft Environmental Impact Statement (EIS) on a proposal to provide safety, operational and capacity improvements on an approximate 27 kilometer (17 mile) section of STH 83 between CTH "NN" at the north limits of the Village of Mukwonago and STH 16, Waukesha County.

This notice is supplementary to the notice of intent, which was published in the **Federal Register** on March 26, 2001 at 66 FR 16520. The purpose of the supplemental notice of intent is to extend the project limits about 6 kilometers (4 miles) at the north terminus. The previous north terminus was Interstate Highway 94. The revised north terminus is STH 16.

To ensure that the full range of issues related to this proposed action are addressed, and all substantive issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to FHWA or the Wisconsin Department of Transportation at the addresses provided in the caption **FOR FURTHER INFORMATION CONTACT.**

BILLING CODE 4910–22–M

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket Nos. FMCSA–99–5748 and FMCSA–99–5578 (formerly FHWA–99–5748 and FHWA–99–5578)]

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemption; request for comments.

SUMMARY: This notice announces the FMCSA's decision to renew the exemptions from the vision requirement in 49 CFR 391.41(b)(10) for 18 individuals.

DATES: This decision is effective November 30, 2001. Comments from interested persons should be submitted by January 4, 2002.

ADDRESSES: Mail or hand deliver comments to the U.S. Department of Transportation, Dockets Management Facility, Room PL–401, 400 Seventh Street, SW., Washington, DC 20590, or submit electronically at *http://dmses.dot.gov/submit.* All comments received will be available for examination and copying at the above address from 9 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard or you may print the acknowledgment page that appears after submitting comments electronically.

FOR FURTHER INFORMATION CONTACT: For information about the vision exemptions in this notice, Ms. Sandra Zywokarte, Office of Bus and Truck Standards and Operations, (202) 366–2987; for information about legal issues related to this notice, Mr. Joseph Solomey, Office of the Chief Counsel, (202) 366–1374, FMCSA, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

You may see all comments online through the Document Management System (DMS) at: *http://dmses.dot.gov/submit.*

Background

Eighteen individuals have requested renewal of their exemptions from the vision requirement in 49 CFR

391.41(b)(10) which applies to drivers of commercial motor vehicles (CMVs) in interstate commerce. They are Terry J. Aldridge, Jerry D. Bridges, Michael L. Brown, Roosevelt Bryant, Jr., Duane D. Burger, Ralph E. Eckels, Jerald C. Eyre, Gary R. Gutschow, Richard J. Hanna, James J. Hewitt, Albert E. Malley, Eldon Miles, Craig W. Miller, Rodney M. Mimbs, Walter Moniowczak, Thomas E. Walsh, Kevin P. Weinhold, and Thomas A. Wise. Under 49 U.S.C. 31315 and 31136(e), the FMCSA may grant an exemption for a renewable 2-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption." Accordingly, the FMCSA has evaluated the 18 petitions for renewal on their merits and decided to extend each exemption for a renewable 2-year period.

On November 30, 1999, the agency published a notice of final disposition announcing its decision to exempt 33 individuals, including 11 of these applicants for renewal, from the vision requirement in 49 CFR 391.41(b)(10) (64 FR 66962). The qualifications, experience, and medical condition of each applicant were stated and discussed in detail at 64 FR 40404 (July 26, 1999). Three comments were received, and their contents were carefully considered by the agency in reaching its final decision to grant the petitions (64 FR 66962). On September 23, 1999, the agency published a notice of final disposition announcing its decision to exempt 32 individuals, including 7 of these applicants for renewal, from the vision requirement in 49 CFR 391.41(b)(10) (64 FR 51568). The qualifications, experience, and medical condition of each applicant were stated and discussed in detail at 64 FR 27027 (May 18, 1999). Two comments were received, and their contents were carefully considered by the agency in reaching its final decision to grant the petitions (64 FR 51568). The agency determined that exempting the individuals from 49 CFR 391.41(b)(10) was likely to achieve a level of safety equal to, or greater than, the level that would be achieved without the exemption as long as the vision in each applicant's better eye continued to meet the standard specified in 49 CFR 391.41(b)(10). As a condition of the exemption, therefore, the agency imposed requirements on the individuals similar to the grandfathering provisions in 49 CFR 391.64(b) applied to drivers who participated in the agency's former vision waiver program.

These requirements are as follows: (1) That each individual be physically examined every year (a) by an ophthalmologist or optometrist who attests that vision in the better eye meets the standard in 49 CFR 391.41(b)(10), and (b) by a medical examiner who attests the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provide a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file and retain a copy of the certification on his/her person while driving for presentation to a duly authorized Federal, State, or local enforcement official.

Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than 2 years from its approval date and may be renewed upon application for an additional 2-year period. In accordance with 49 U.S.C. 31315 and 31136(e), each of the 18 applicants has satisfied the entry conditions for obtaining an exemption from the vision requirements (63 FR 30285; 63 FR 54519; 63 FR 66226; 64 FR 16517), and each has requested timely renewal of the exemption. These 18 applicants have submitted evidence showing that the vision in their better eye continues to meet the standard specified at 49 CFR 391.41(b)(10), and that the vision impairment is stable. In addition, a review of their records of safety while driving with their respective vision deficiencies over the past 2 years indicates each applicant continues to meet the vision exemption standards. These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, the FMCSA concludes that extending the exemption for a period of 2 years is likely to achieve a level of safety equal to that existing without the exemption for each renewal applicant.

Discussion of Comments

The Advocates for Highway and Auto Safety (AHAS) expresses continued opposition to the FMCSA's procedures for renewing exemptions from the vision requirement in 49 CFR 391.41(b)(10). Specifically, the AHAS objects to the agency's extension of the exemptions without any opportunity for public comment prior to the decision to renew and reliance on a summary statement of evidence to make its decision to extend the exemption of each driver.

The issues raised by the AHAS were addressed at length in 66 FR 17994 (April 4, 2001). We will not address these points again here, but refer interested parties to that earlier discussion.

Conclusion

In accordance with 49 U.S.C. 31315 and 31136(e), the FMCSA extends the exemptions from the vision requirement in 49 CFR 391.41(b)(10) granted to Terry J. Aldridge, Jerry D. Bridges, Michael L. Brown, Roosevelt Bryant, Jr., Duane D. Burger, Ralph E. Eckels, Jerald C. Eyre, Gary R. Gutschow, Richard J. Hanna, James J. Hewitt, Albert E. Malley, Eldon Miles, Craig W. Miller, Rodney M. Mimbs, Walter Moniowczak, Thomas E. Walsh, Kevin P. Weinhold, and Thomas A. Wise, subject to the following conditions: (1) That each individual be physically examined every year (a) by an ophthalmologist or optometrist who attests that the vision in the better eye continues to meet the standard in 49 CFR 391.41(b)(10), and (b) by a medical examiner who attests that the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provide a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file and retain a copy of the certification on his/her person while driving for presentation to a duly authorized Federal, State, or local enforcement official. Each exemption will be valid for 2 years unless rescinded earlier by the FMCSA. The exemption will be rescinded if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31315 and 31136(e).

Request for Comments

The FMCSA has evaluated the qualifications and driving performance of the 18 applicants here and extends their exemptions based on the evidence introduced. The agency will review any comments received concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31315 and 31136(e). While comments of this nature will be entertained at any time, the FMCSA requests that interested parties with information concerning the safety

records of these drivers submit comments by January 4, 2002. All comments will be considered and will be available for examination in the docket room at the above address. The FMCSA will also continue to file in the docket relevant information which becomes available. Interested persons should continue to examine the docket for new material.

Authority: 49 U.S.C. 322, 31136 and 31315; and 49 CFR 1.73.

Issued on: November 30, 2001.

Julie Anna Cirillo,

Assistant Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 34134]

Jackson County Port Authority Railroad—Operation Exemption—Jackson County Port Authority

Jackson County Port Authority Railroad (JCPARR), a noncarrier, has filed a verified notice of exemption under 49 CFR 1150.31 to operate approximately 2.9 miles of rail line owned by the Jackson County Port Authority (JCPA).[1] The lines to be operated include: (1) The Bayou Casotte trackage which extends approximately 1 mile from a connection with the Bayou Casotte Branch of CSX Transportation, Inc. (CSXT) to JCPA's Bayou Casotte Terminals where it serves two public cargo terminals, a distance (including side tracks) of approximately 1.4 miles; and (2) the Pascagoula River trackage which connects with the West Pascagoula Branch of CSXT and extends southward into JCPA's Pascagoula River Terminals where it serves four public cargo terminals and a grain elevator, a distance (including side tracks) of approximately 1.5 miles. JCPARR certifies that its projected revenues as a result of this transaction will not exceed those that would qualify it as a Class III rail carrier.

The transaction was expected to be consummated on or after November 24, 2001.

If the verified notice contains false or misleading information, the exemption is void *ab initio.* Petitions to reopen the proceeding to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

[1] JCPA is a public agency and political subdivision in the State of Mississippi.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 34134, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423–0001. In addition, one copy of each pleading must be served on John D. Heffner, 555 Twelfth Street, NW., Suite 950N, Washington, DC 20004.

Board decisions and notices are available on our web site at "*WWW.STB.DOT.GOV.*"

Decided: November 27, 2001.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Geriatrics and Gerontology, Notice of Meeting

The Department of Veterans Affairs gives notice that a meeting of the Geriatrics and Gerontology Advisory Committee (GGAC) will be held on December 19–20, 2001, in the Board Room of the Hotel Lombardy located at 2019 Pennsylvania Avenue, NW., Washington, DC. The Committee will meet from 8:30 a.m. until 5 p.m. (EST) on December 19 and from 8:30 a.m. until noon on December 20. On December 19, the topics to be presented/discussed include:

- Site visits to five new Geriatric Research, Education, and Clinical Centers (GRECCs)
- Update on current issues of the Millennium Act
- Geriatrics and Extended Care Initiatives
- Status of Geriatric Fellowship Program

On December 20, the Committee will discuss administrative matters and the general status of the program. The meeting will be open to the public. Individuals who wish to attend the meeting should contact Jacqueline Holmes, Staff Assistant, Geriatrics and Extended Care Strategic Healthcare Group at (202) 273–8539.

Dated: November 29, 2001.

By Direction of the Secretary.

Nora E. Egan,

Committee Management Officer.

BILLING CODE 8320–01–M

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Prosthetics and Special-Disabilities Programs; Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under Public Law 92–463 that a meeting of the Advisory Committee on Prosthetics and Special-Disabilities Programs (Committee) will be held Tuesday, December 11, 2001, at VA Headquarters, Room 742, 810 Vermont Avenue, NW., Washington, DC. The meeting will convene at 8 a.m. and adjourn at 4 p.m. The purpose of the Committee is to advise the Department on its prosthetic programs designed to provide state-of-the-art prosthetics and the associated rehabilitation research, development, and evaluation of such technology. The Committee also advises the Department on special disability programs which are defined as any program administered by the Secretary to serve veterans with spinal cord injury, blindness or vision impairment, loss of or loss of use of extremities, deafness or hearing impairment, or other serious incapacities in terms of daily life functions.

The Advisory Committee on Prosthetics and Special-Disabilities Programs will receive briefings by the National Program Directors of the Special-Disabilities Programs regarding the status of their activities over the last six months and present any critical issues requiring the Committee's consideration.

The meeting is open to the public. For those wishing to attend, contact Kathy Pessagno, Veterans Health Administration (113), phone (202) 273–8512, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, prior to the meeting.

Dated: November 29, 2001.

Nora E. Egan,

Committee Management Officer.

14 CFR Part 93

Modifications of the Dimensions of the Grand Canyon National Park Rules Areas and Free Flight Zone; Final Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 93

[Docket No. FAA–1999–5926]

RIN 2120–AG74

Modifications of the Dimensions of the Grand Canyon National Park Special Flight Rules Area and Flight Free Zones

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: On April 4, 2000, the FAA published two final rules regarding commercial air tour operations over Grand Canyon National Park (GCNP). The first rule, Commercial Air Tour Limitation in Grand Canyon National Park Special Flight Rules Area, limited the number of commercial air tour operations that may be flown in the GCNP Special Flight Rules Area (SFRA) on an annual basis. This rule became effective on May 4, 2000. The second rule, Modifications of the Dimensions of the Grand Canyon National Park Special Flight Rules Area and Flight Free Zones, modified the airspace in the SFRA to accommodate a new route system for commercial air tour operations and to expand the amount of airspace overall protected by flight free zones. This rule initially was scheduled to become effective December 1, 2000. After several delays, the new routes and airspace were adopted for the west end of the GCNP SFRA on April 19, 2001. The routes and airspace on the east end of the GCNP SFRA were stayed several times after adoption of the final rule. The east and routes and airspace are scheduled to be implemented December 1, 2001. This rule extends the implementation of the Airspace Modification Final Rule until February 20, 2003.

DATES: The effective date of 14 CFR 93.305(a) and (b), delayed until December 1, 2001 (66 FR 16582, March 26, 2001), is further delayed until February 20, 2003. This rule was originally published at 61 FR 69330 on December 31, 1996, April 4, 2000 (65 FR 17736).

The amendments to 14 CFR 93.305(a) and (b) originally published April 4, 2000 (65 FR 17736) and most recently delayed until December 1, 2001 (66 FR 16582, March 26, 2001) are further delayed until February 20, 2003.

ADDRESSES: You may view a copy of this final rule, Modification of the Dimensions of the Grand Canyon National Park Special Flight Rules Area and Flight Free Zones, through the Internet at: http://dms.dot.gov, by selecting docket numbers FAA–01–9218. You may also review the public dockets on this regulation in person in the Docket Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Friday holidays. The Docket Office is on the plaza level of the Nassif Building at the Department of Transportation, 400 7th St., SW., Room 401, Washington, DC, 20590.

As an alternative, you may search the **Federal Register's** Internet site at http://www.access.gpo.gov/su_docs for access to this final rule.

You may also request a paper copy of this final rule from the Office of Rulemaking, Federal Aviation Administration, 800 Independence Ave., SW., Washington, DC, 20591, or by calling (202) 267–9680.

FOR FURTHER INFORMATION CONTACT: Howard Hesbitt, Flight Standards Service, (AFS–200), or Ken McElroy, Airspace and Rules Division, ATA–400, Federal Aviation Administration, Seventh and Maryland Streets, SW., Washington, DC 20591; Telephone: (202) 493–4981.

SUPPLEMENTARY INFORMATION:

Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 requires FAA t comply with small entity requests for information or advice about compliance with statutes and regulations within its jurisdiction. Therefore, any small entity that has a question regarding this document may contact their local FAA official, or the person listed under **FOR FURTHER INFORMATION CONTACT.** You can find out more about SBRFA on the Internet at our site, *http://www.gov/avr/arm/sbrefa.htm.* For more information on SBREFA, e-mail us *9–AWA–SBREFA@faa.gov.*

Background

On April 4, 2000, the Federal Aviation Administration published two final rules, the Modification of the Dimensions of the Grand Canyon National Park Special Flight Rules Area and Flight Free Zones (Airspace Modification), and the Commercial Air Tour Limitation in the Grand Canyon National Park Special Flight Rules Area (Commercial Air Tour Limitation). See 65 FR 17736; 65 FR 17708; April 4, 2000. The FAA also published concurrently a notice of availability of Commercial Routes for the Grand Canyon National Park (Routes Notice). See 65 FR 17698, April 4, 2000. The Commercial Air Tour Limitations final rule was implemented, effective May 4, 2000. The Airspace Modification final rule and the routes set forth in the Notice of Availability were scheduled to become effective December 1, 2000. The Final Supplemental Environmental Assessment for Special Flight Rules in the Vicinity of Grand Canyon National Park (SEA) was completed on February 22, 2000, and the Finding of No Significant Impact was issued on February 25, 2000.

Following the publication of the final rules, the United States Air Tour Association and seven air tour operators petitioned the United States District Court of Appeals for the District of Columbia to review the rules. See USATA v. FAA, et al. (Docket No. 001201). During the course of litigation, the USATA raised new safety concerns regarding the new routes in the east end of the GCNP SFRA. AS a result, the FAA first delayed implementation of the routes until December 28, 2000 (November 20, 2000; 65 FR 69848) so that it could evaluate the new issues. During this evaluation, the FAA determined that modifications could be made to the routes to enhance safety. On December 13, 2000, the FAA published a second Notice of Availability seeking comment on proposed changes to routes in the east-end of the GCNP SFRA (65 FR 78071). Subsequently, the FAA delayed the implementation of the routes until April 1, 2001. (66 FR 2001, January 4, 2001).

During the comment period for the second Notice of Availability, additional safety concerns were raised regarding the proposed revisions to the east end routes. Consequently, the FAA decided to implement the modifications to the route structure of the GCNP SFRA in two phases. First, on April 19, 2001, the FAA implemented the routes and airspace in the west-end (defined as all areas of the SFRA west of the Dragon corridor) of the GCNP SFRA that originally were published on April 4, 2000. Also, on April 19, 2001, the SFRA boundary in the eastern part of the GCNP SFRA over the Navajo Nation lands was extended five miles to the east. Second, the route structure on the east-end (Dragon Corridor and all airspace east of that Corridor) in the GCNP SFRA was stayed until December 1, 2001 to enable the FAA and NPS to determine what changes should be made in the east end of GCNP. Accordingly, the routes now flown remain almost exactly as that shown under Special Federal Aviation Regulation (SFAR) 50–2, with only

slight modification to certain entry and exit points.

The FAA is working on proposed changes to the route structure and airspace modification in the east end of GCNP. This process involves printing maps depicting those changes, performing an environmental assessment of the proposed routes, publishing a proposal and notice of availability of the map in the **Federal Register**, and reviewing comments on the proposed changes. Because this process is not complete, it is necessary to gain extend the effective date of the April 2000 final rule airspace modifications. That date now is extended until February 20, 2003. Part of this delay results from the increased workload since the events of September 11, 2001. Additionally, the FAA has determined that any new routes should be implemented in the winter when tour activity is limited and operators are conducting new pilot training. Given all of these constraints, the FAA has found that it is necessary to delay the implementation of the east end airspace until February 20, 2003. In the meantime, the FAA and NPS will continue to move forward on a revised east end route structure.

The FAA notes that the changes to the routes and airspace in the West end of GCNP finalized in the April 2000 rule have been in effect since April 19, 2001. Those changes were implemented to further the goal of substantial restoration of natural quiet in GCNP.

Immediate Effective Date

The FAA finds that good cause exists under 5 U.S.C. 553(d) for this final rule to become final rule upon issuance. The FAA and NPS must propose and receive comments on new air tour routes in the east end of GCNP requiring the modification of the airspace in GCNP. Therefore, the FAA has determined that to address the safety concerns of operators, it is necessary to further delay the implementation date of the airspace changes codified in April 2000. The FAA notes that the delay only affects the east end of the GCNP SFRA; changes to the west end have been in effect since April 19, 2001.

Environmental Review

In March 2001, the FAA completed a written reevaluation (WR) of the February 22, 2000 Final Supplemental Environmental Assessment (FSEA) for Special flight rules in the Vicinity of Grand Canyon National Park (GCNP). The WR examined the potential environmental impacts associated with a phased implementation of the Airspace rule and the Commercial Air Tour Route Modifications described in the February 2000 FSEA. The phased approach involved implementation of the "preferred" alternative airspace and air tour route structure as described in the February 2000 FSEA for the GCNP SFRA west of Dragon Corridor. Since no changes to the western portion of the GCNP SFRA as described in the FSEA remained valid for the stage-one airspace and routes implementation at the west-end of the GCNP SFRA. The FAA also reviewed the planned implementation of the stage-one airspace, routes, and route modifications on the east-end and determined that they were not significant changes from the plans analyzed under the "no action" alternative in the February 2000 FSEA. Therefore, the FAA determined that the proposed route revisions to the SFAR 50–2 route structure conformed to the "no action" alternative analyzed in the FSEA. The FAA determined that the data and analyses contained in the February 2000 FSEA were still substantially valid and all pertinent conditions and requirements of the prior approval have or would be met in the April 2001 action.

While the delayed implementation of the east-end route and airspace structure lessened the percentage of the GCNP substantially restored to natural quiet, it was only a temporary delay. In addition, given that the majority of the revised routes and airspace for GCNP were implemented during phase one, the phased implementation process resulted in a gain of substantial restoration of natural quiet for GCNP as described in the February 2000 FSEA.

Therefore for the above reasons and pursuant to FAA Order 1050.1D, Paragraph 92, the FAA determined that the contents of the final Supplemental Environmental Assessment and its conclusions issued on February 22, 2000 were still valid. Additionally, the FAA found that the previous Section 106 Determination of No Adverse Effect to Traditional Cultural Properties identified by Native Americans issued for the FSEA was also still valid. Copies of the written reevaluation were placed in the public docket for the April 2001 rulemaking, were circulated to interested parties, and were available for inspection at the same time and location as the April 2001 final rule. The findings of the March 2001 WR remain valid for this final rule extending the April 2001 Airspace Rule.

Economic Analysis

The economic analysis completed for the final rule published April 4, 2000 evaluates the east-end and the west-end operations separately since these are distinct markets. This action does not affect the April 19, 2001 implementation of the west-end airspace structure, and the economic analysis from the April 4, 2000 final rule remains valid. At this time the FAA is delaying further the implementation of the east-end routes; however, it is not taking a final action. If the agency takes a final action that is different than that published on April 4, 2000, then it may be necessary to complete a revised economic evaluation.

Initial Regulatory Flexibility Determination and Assessment

The Regulatory Flexibility Act (RFA) of 1980 establishes "as a principle of regulatory issuance that agencies shall endeavor, consistent with the objective of the rule and of applicable statutues, to fit regulatory and informational requirements to the scale of the business, organization, and government jurisdictions subject to regulation." To achieve that principle, the RFA requires agencies to solicit and consider flexible regulatory proposals and to explain the rationale for their actions. The RFA covers a wide range of small entities, including small businesses, not-for-profit organizations and small governmental jurisdictions.

Agencies must perform a review to determine whether a proposed or final rule will have a significant economic impact on a substantial number of small entities. If the determination is that it will, the agency must prepare a regulatory flexibility analysis as described in the RFA. However, if an agency determines that a proposed or final rule is not expected to have a significant economic impact on a substantial number of small entities, section 605(b) of the RFA provides that the head of the agency may so certify and a regulatory flexibility analysis is not required. The certification must include a statement providing the factual basis for this determination, and the reasoning should be clear.

This final rule will have only a de minimus cost impact on the certificate holders. Accordingly, pursuant to the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Federal Aviation Administration certifies that this final rule will not have a significant impact on a substantial number of small entities.

International Trade Impact Assessment

The Trade Agreement Act (TAA) of 1979 prohibits Federal agencies from engaging in any standard or related activities that create unnecessary obstacles to the foreign commerce of the

UMI
VOL
66
ISS
234
DE
5
2001
UMI

United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The TAA also requires consideration of international standards and where appropriate, that they be the basis for U.S. standards. In addition, consistent with the Administration's belief in the general superiority and desirability of free trade, it is the policy of Administration to remove or diminish to the extent feasible, barriers to international trade, including both barriers affecting the export of American goods and services to foreign countries and barriers affecting the import of foreign goods and services into the United States. In accordance with the above Act and policy, the FAA has assessed the potential effect of this final rule and has determined that it will have only a domestic impact and therefore no effect on any trade-sensitive activity.

Federalism Implications

This amendment will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this amendment would not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (the Act), enacted as Public Law 104–4 on March 22, 1995, requires each Federal agency, to the extent permitted by law, to prepare a written assessment of the effects of any Federal mandate in a proposed or final agency rule that may result in the expenditure of $100 million or more (when adjusted annually for inflation) in any one year by State, local, and tribal governments in the aggregate, or by the private sector. Section 204(a) of the Act, 2 U.S.C. 1534(a), requires the Federal agency to develop an effective process to permit timely input by elected officers (or their designees) of State, local, and tribal governments on a proposed "significant intergovernmental mandate." A "significant intergovernmental mandate" under the Act is any provision in the Federal agency regulation that would impose an enforceable duty upon State, local, and tribal governments in the aggregate of $100 million (adjusted annually for inflation) in any one year. Section 203 of the Act, 2 U.S.C. 1533, which supplements section 204(a), provides that, before establishing any regulatory requirements that might significantly or uniquely affect small governments, the agency shall have developed a plan, which, among other things, must provide for notice to potentially affected small governments, if any, and for a meaningful and timely opportunity for these small governments to provide input in the development of regulatory proposals. The FAA has determined that this rule will not impose any unfunded mandates.

List of Subjects in 14 CFR Part 93

Air traffic control, Airports, Navigation (Air).

Adoption of Amendments

Accordingly, the Federal Aviation Administration (FAA) amends 14 CFR part 93 as follows:

PART 93—SPECIAL AIR TRAFFIC RULES AND AIRPORT TRAFFIC PATTERNS

1. The authority citation for part 93 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120, 44101, 44111, 44701, 44709, 44711, 44712, 44715, 44716, 44717, 44722, 46306, 46315, 46316, 46502, 46504, 46506–46507, 47122, 47508, 47528–47531.

§ 93.305 [Amended]

2. Section 93.305 (a) and (b) published on December 31, 1996 (61 FR 69330), and most recently delayed until December 1, 2001 (see 66 FR 16582, March 26, 2001) are further delayed until February 20, 2003.

3. The amendments to Section 93.305 published on April 4, 2000 (65 FR 17736), and most recently delayed until December 1, 2001 (see 66 FR 16582, March 26, 2001) are further delayed until February 20, 2003.

Issued in Washington, DC on November 29, 2001.

Jane F. Garvey,

Administrator.

20 CFR Part 655

Labor Condition Applications and Requirements for Employers Using Nonimmigrants on H–1b Visas; Implementation of Electronic Filing; Final Rule

VOL 66 ISS 234 DEC 5 2001 UMI

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 655

[RIN 1205–AB29]

Labor Condition Applications and Requirements for Employers Using Nonimmigrants on H–1B Visas; Implementation of Electronic Filing

AGENCIES: Employment and Training Administration and Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: The Department of Labor is amending its regulations governing the filing and processing of labor condition applications (LCAs) for the employment of nonimmigrant aliens on H–1B visas in specialty occupations and as fashion models. The amendments will allow employers to submit LCAs electronically, utilizing web based forms and instructions.

DATES: *Effective Date:* This Final Rule is effective on January 14, 2002.

Compliance Dates: Affected parties do not have to comply with the revised information collection requirements in this rule (i.e., provisions relating to the new Form ETA 9035–E), until the Department publishes in the **Federal Register** a notice approving the revision of the information collection provisions. For further information on collection information, see **SUPPLEMENTARY INFORMATION.**

FOR FURTHER INFORMATION CONTACT: Denis Gruskin, Senior Specialist, Division of Foreign Labor Certifications, Employment and Training Administration, 200 Constitution Avenue, NW, Room C–4318, Washington, DC 20210.

SUPPLEMENTARY INFORMATION:

I. What Is the H–1B Nonimmigrant Program?

On November 29, 1990, the Immigration and Nationality Act (INA) was amended by the Immigration Act of 1990 (IMMACT 90) (Pub. L. 101–649, 104 Stat. 4978) to create the "H–1B visa program" for the temporary employment in the United States (U.S.) of nonimmigrants in "specialty occupations" and as "fashion models of distinguished merit and ability." The H–1B provisions of the INA govern the temporary entry of foreign "professionals" to work in "specialty occupations" in the United States under H–1B visas. 8 U.S.C. 1101(a)(15)(H)(i)(b), 1182(n), and 1184(c). The H–1B category of specialty occupations consists of occupations requiring the theoretical and practical application of a body of highly specialized knowledge and the attainment of a Bachelor's or higher degree in the specific specialty as a minimum for entry into the occupation in the United States. 8 U.S.C. 1184(i)(1). In addition, an H–1B nonimmigrant in a specialty occupation must possess full State licensure to practice in the United States (if required), completion of the required degree, or experience equivalent to the degree and recognition of expertise in the specialty. 8 U.S.C. 1184(i)(2). The category of "fashion model" requires that the nonimmigrant be of distinguished merit and ability. 8 U.S.C. 1101(a)(15)(H)(i)(b).

The H–1B provisions of the INA have been amended several times since 1990. A detailed legislative history of the H–1B nonimmigrant program can be found in the preamble to the Interim Final Rule published on December 20, 2000, to implement changes made to the INA by the American Competitiveness and Workforce Improvement Act of 1998. See 65 FR at 80117.

II. Why Is the Department Implementing an Electronic Filing System?

The current regulations permit employers to submit labor condition applications (LCAs) by facsimile transmission (FAX) or by mail. Although submission of LCAs by FAX and processing of such applications have generally been more efficient than submission and processing of LCAs by mail, operational problems delayed the processing of some LCAs submitted by FAX for the first several months of its operation. To improve customer service, the Department will, through this Final Rule, provide employers the option to utilize an electronic filing system which will permit employers to fill out their LCAs on a Department of Labor website and submit them electronically to the Department's Employment and Training Administration (ETA). The electronic filing system will be convenient and less burdensome for employers, since, unlike a system based on filing applications by FAX or by mail, the new system will allow the filing of an application without the submission of a "hard copy," which is required for filing of an application by mail or by FAX. Electronic filing will permit more efficient ETA electronic processing of LCAs without the technical and administrative uncertainties inherent in the technology currently available to process applications that are submitted by FAX. Further, since the scope of the Department's review of LCAs under section 212(n)(1)(D) of the INA is limited to "completeness and obvious inaccuracies," the filing and processing of LCAs is particularly amenable to an electronic filing system. Because the electronic filing system includes guidance to the employers in filling out their LCAs "on line," the LCAs will have fewer incomplete or obviously inaccurate entries and will, therefore, ordinarily be acceptable for immediate electronic certification.

III. What Changes Are Being Made To Implement an Electronic Filing System?

The creation of an electronic filing and certification system requires changes in the current regulations, because the regulations explicitly permit only two types of submission: FAX transmission and hard copy by U.S. Mail. (20 CFR 655.720(a) and (b)). Therefore, in this Final Rule, the Department is amending the regulations at §§ 655.700, 655.705, 655.720, 655.730, 655.731, 655.732, 655.733, 655.734, 655.736, 655.740, 655.750, 655.760, and 655.805, to implement a new labor condition application form (Form ETA 9035E) and a new electronic submission and certification system. The new LCA form is identical in all respects to the existing LCA (Form ETA 9035), except that the new form contains additional "blocks" to be marked by the employer to acknowledge that the submission is being made electronically and that the employer will be bound by the LCA obligations through such submission. The Department has developed a customer-friendly website (www.lca.doleta.gov) which can be accessed by employers to electronically fill out and submit the Form ETA 9035E. The website includes detailed instructions, prompts and checks to help employers fill out the 9035E. This process is designed to help insure that employers enter the H–1B program based on accurate LCA information and with explicit, immediate notice of the obligations.

Additionally, the Department's website provides an option to permit employers that frequently file LCAs to set up secure files within the ETA electronic filing system containing information which is common to any LCA they may wish to file. Under this option, each time an employer files an LCA, the information common to all its LCAs would be entered automatically by the electronic filing system and the employer would only have to enter the data that was specific to the new LCA it wished to file in the instance at hand.

The electronic submission and certification system implemented by this Rule requires that the new LCA form be printed and signed by the employer immediately after ETA provides the electronic certification. The signed form must then be maintained in the employer's files and a copy of the signed form must be maintained in the public access file; another copy of the signed form must be submitted to the Immigration and Naturalization Service (INS) to support the Petition for Nonimmigrant Worker, INS Form I–129. This requirement is functionally equivalent to the current requirement that employers retain the signed original certified LCA in their files, and place a copy of this LCA in the public access file. This Rule also provides additional procedural guidance which clarifies the interrelationship between the Department's regulations and the INS regulations on the matter of the employer's acceptance of its H–1B obligations under the LCA.

Since the Department does not yet have the technology to satisfy the statutes that deal with electronic signatures on Government applications—Government Paperwork Elimination Act (44 U.S.C. 3504 n.) and/or the Electronic Records and Signatures in Global and National Commerce Act (E–SIGN) (15 U.S. C. 7001–7006)—we are not implementing either of these statutes in this Rule. We consider it to be essential that an electronic LCA filing and certification system be made available as soon as possible. In the event that such technology becomes available in the future, the Department will modify the electronic LCA system to comply with these statutes and will provide appropriate notice(s) and instructions to employers. We view it as inadvisable to delay the electronic LCA system while we develop this additional technology.

IV. Why Is a Final Rule Being Published Without Notice and Comment?

The Department is promulgating this Rule in final form. This Rule makes no substantive alteration in the regulations and does not alter the rights of any parties. The Rule makes changes which constitute a "rule of agency organization, procedure, or practice" which may be published in final form pursuant to section 553(b)(A) of the Administrative Procedure Act (5 U.S.C. 553(b)(A)).

V. Executive Order 12866

We have determined that this Rule is not an "economically significant regulatory action" within the meaning of Executive Order 12866, in that it will not have an economic effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities.

While the Rule is not economically significant, the Office of Management and Budget reviewed this Rule because of the extensive interest on the part of the regulated community in the matters addressed in this Rule.

VI. Small Business Regulatory Enforcement Fairness Act of 1996

This Rule is not a rule as defined by section 251 of the Small Business Regulatory Enforcement Act of 1996, 5 U.S.C. 804(3)(C). It is a rule of agency organization, procedure or practice that does not substantially affect the rights or obligations of parties other than the Department of Labor.

VII. Unfunded Mandates Reform Act of 1995

This Rule will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any 1 year, and it will not significantly or uniquely affect small governments. Therefore, no actions are deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

VIII. Regulatory Flexibility Act

Because no notice of proposed rulemaking is required for this Rule (5 U.S.C. 553(b)), the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601, et seq. pertaining to regulatory flexibility analysis, do not apply to this Final Rule. See 5 U.S.C. 603(a).

IX. Executive Order 13132

This Rule will not have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132, we have determined that this Rule does not have sufficient federalism implications to warrant the preparation of a summary impact statement.

X. Assessment of Federal Regulations and Policies on Families

This Rule does not affect family well-being.

XI. Paperwork Reduction Act

Summary: Sections 655.700, 655.705, 655.720, 655.730, 655.731, 655.732, 655.733, 655.734, 655.736, 655.740, 655.750, 655.760, and 655.805 have been amended to reflect the option of electronic submission of the Form ETA 9035–E. The amendments parallel the current provisions for submission, recordkeeping and posting requirements for hard copies prepared for submission by mail or by FAX. The new LCA form is the same as the existing LCA (Form ETA 9035), except that the new form contains additional "blocks" to be marked by the employer to acknowledge that the submission is being made electronically and that the employer will be bound by the LCA obligations through such submission. ETA estimates that the time to fill out and submit a Form ETA 9035–E electronically and to comply with recordkeeping and notice requirements under the regulations will be the same as for hard copies of Form ETA 9035 prepared for submission by mail or by FAX. It should be noted, however, that because of certain operational problems with the FAX system, applications submitted by FAX are submitted on average 1.1 times. Such duplication does not occur with respect to applications submitted by mail and the Department does not anticipate duplicate submissions of forms submitted electronically.

Need: The creation of an optional electronic filing and certification system requires changes in the current regulations because the regulations explicitly permit only two types of submission: FAX transmission and hard copy by U.S. mail (20 CFR 655.720(a) and (b)).

Respondents and frequency of response: Employers submit LCAs when they wish to employ an H–1B nonimmigrant worker. ETA estimates, based on its operating experience with the H–1B program, that in the upcoming year employers will file approximately 260,000 LCAs (including duplicate FAX submissions). Specifically, ETA estimates that it will receive 7,000 hard copies submitted by mail, 123,000 hard copies submitted by FAX (which includes 12,300 duplicate submissions), and 130,000 LCAs submitted electronically.

Estimated total annual burden: DOL estimates that the completion of LCAs, complying with recordkeeping requirements and providing a copy to each H–1B nonimmigrant will result in a total burden of 247,700 hours in the upcoming year (7,000 hard copies submitted by mail x 1 hour + 123,000

FAX submissions (which includes 12,300 duplicate submissions) x .90 hours + 130,000 electronic submissions x 1 hour = 247,700 hours, or about 57 minutes per application submitted).

Request for comments: The public is invited to provide comments on the revised information collection requirement so that the Department of Labor may:

(1) Evaluate whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimates of the burdens of the collections of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility and clarity of the information to be collected; and

(4) Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Written comments should be sent to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Desk Officer for Department of Labor, Employment and Training Administration, 725 17th Street, NW., Washington, DC 20503. Comments should be received by January 4, 2002.

The revised information collection requirements are not effective until they have been approved by OMB. A notice will be published in the **Federal Register** when approval is obtained of the revision to the information collection.

Copies of the information collection request submitted to OMB may be obtained by contacting Denis Gruskin, Senior Specialist, Division of Foreign Labor Certifications, Employment and Training Administration, 200 Constitution Avenue NW., Room N–4318, Washington, DC 20210; Telephone (202) 693–2953 (this is not a toll-free number).

XII. Catalog of Federal Domestic Assistance Number

This program is listed in the Catalog of Federal Domestic Assistance at 17.252.

List of Subjects in 20 CFR Part 655

Administrative practice and procedure, Agriculture, Aliens, Employment, Forest and forest products, Health professions, Immigration, Labor, Longshore work, Migrant labor, Penalties, Reporting requirements, Students, Wages.

Accordingly, subparts H and I of part 655 of title 20 of the Code of Federal Regulations are amended as follows:

Subpart H—Labor Condition Applications and Requirements for Employers Using Nonimmigrants on H–1B Visas

1. The authority citation for part 655 continues to read as follows:

Authority: Section 655.0 issued under 8 U.S.C. 1101(a)(15)(H)(i) and (ii), 1182(m) and (n), 1184, 1188, and 1288(c) and (d); 29 U.S.C. 49 et seq.; sec. 3(c)(1), Pub. L. 101–238, 103 Stat. 2099, 2102 (8 U.S.C. 1182 note); sec. 221(a), Pub. L. 101–649, 104 Stat. 4978, 5027 (8 U.S.C. 1184 note); sec. 323, Pub. L. 103–206, 107 Stat. 2149; Title IV, Pub. L. 105–277, 112 Stat. 2681; Pub. L. 106–95, 113 Stat. 1312 (8 U.S.C. 1182 note); and 8 CFR 213.2(h)(4)(i).

Section 655.00 issued under 8 U.S.C. 1101(a)(15)(H)(ii), 1184, and 1188; 29 U.S.C. 49 et seq.; and 8 CFR 214.2(h)(4)(i).

Subparts A and C issued under 8 U.S.C. 1101(a)(15)(H)(ii)(b) and 1184; 29 U.S.C. 49 et seq.; and 8 CFR 214.2(h)(4)(i).

Subpart B issued under 8 U.S.C. 1101(a)(15)(H)(ii)(a), 1184, and 1188; and 29 U.S.C. 49 et seq.

Subparts D and E issued under 8 U.S.C. 1101(a)(15)(H)(i)(a), 1182(m), and 1184; 29 U.S.C. 49 et seq. and sec. 3(c)(1), Pub. L. 101–238, 103 Stat. 2099, 2103 (8 U.S.C. 1182 note).

Subparts F and G issued under 8 U.S.C. 1184 and 1288(c); and 29 U.S.C. 49 et seq.

Subparts H and I issued under 8 U.S.C. 1101(a)(15)(H)(i)(b), 1182(n), and 1184; 29 U.S.C. 49 et seq.; sec 303(a)(8), Pub. L. 102–232, 105 Stat. 1733, 1748 (8 U.S.C. 1182 note); and Title IV, Pub. L. 105–277, 112 Stat. 2681.

Subparts J and K issued under 29 U.S.C. 49 et seq.; and sec 221(a), Pub. L. 101–649, 104 Stat. 4978, 5027 (8 U.S.C. 1184 note).

Subparts L and M issued under 8 U.S.C. 1101(a)(15)(H)(i)(c), 1182 (m) and 1184; and 29 U.S.C. 49 et seq.

2. Section 655.700 is amended by revising the third sentence of paragraph (b)(1) to read as follows:

§ 655.700 What statutory provisions govern the employment of H–1B nonimmigrants and how do employers apply for an H–1B visa?

* * * * *

(b) * * *

(1) * * * The LCA (Form ETA 9035 or ETA 9035E) and cover page (Form ETA 9035CP, containing the full attestation statements that are incorporated by reference in Form ETA 9035 and ETA 9035E) may be obtained from http://ows.doleta.gov, from DOL regional offices, and from the Employment and Training Administration (ETA) national office.

* * *

* * * * *

3. Section 655.705 is amended by revising paragraph (c) to read as follows:

§ 655.705 What federal agencies are involved in the H–1B program, and what are the responsibilities of those agencies and of employers?

* * * * *

(c) *Employer's responsibilities.* Each employer seeking an H–1B nonimmigrant in a specialty occupation or as a fashion model of distinguished merit and ability has several responsibilities, as described more fully in this subpart and subpart I of this part, including—

(1) The employer shall submit a completed labor condition application (LCA) on Form ETA 9035 or Form ETA 9035E in the manner prescribed in § 655:720. By completing and submitting the LCA, and in addition by signing the LCA, the employer makes certain representations and agrees to several attestations regarding an employer's responsibilities, including the wages, working conditions, and benefits to be provided to the H–1B nonimmigrants (8 U.S.C. 1182(n)(1)); these attestations are specifically identified and incorporated by reference in the LCA, as well as being set forth in full on Form ETA 9035CP. The LCA contains additional attestations for certain H–1B-dependent employers and employers found to have willfully violated the H–1B program requirements; these attestations impose certain obligations to recruit U.S. workers, to offer positions to U. S. workers who are equally or better qualified than the H–1B nonimmigrant(s), and to avoid the displacement of U.S. workers (either in the employer's workforce, or in the workforce of a second employer with whom the H–1B nonimmigrant(s) is placed, where there are indicia of employment with that second employer (8 U.S.C. 1182(n)(1)(E)–(G)). These additional attestations are specifically identified and incorporated by reference in the LCA, as well as being set forth in full on Form ETA 9035CP. If the LCA is certified by ETA, notice of the certification will be sent to the employer, either by return FAX (where the Form ETA 9035 was submitted by FAX), by hard copy (where the Form ETA 9035 was submitted by U.S. Mail), or by electronic certification (where the Form ETA 9035E was submitted electronically). The employer reaffirms its acceptance of all of the attestation

obligations by submitting the LCA to the Immigration and Naturalization Service in support of the Petition for Nonimmigrant Worker, INS Form I–129, for an H–1B nonimmigrant. See INS regulation 8 CFR 214.2(h)(4)(iii)(B)(*2*), which specifies that the employer will comply with the terms of the LCA for the duration of the H–1B nonimmigrant's authorized period of stay.

(2) The employer shall maintain the original signed and certified LCA in its files, and shall make a copy of the LCA, as well as necessary supporting documentation (as identified under this subpart), available for public examination in a public access file at the employer's principal place of business in the U.S. or at the place of employment within one working day after the date on which the LCA is filed with ETA.

(3) The employer then may submit a copy of the certified, signed LCA to INS with a completed petition (Form I–129) requesting H–1B classification.

(4) The employer shall not allow the nonimmigrant worker to begin work until INS grants the alien authorization to work in the United States for that employer or, in the case of a nonimmigrant previously afforded H–1B status who is undertaking employment with a new H–1B employer, until the new employer files a nonfrivolous petition (Form I–129) in accordance with INS requirements.

(5) The employer shall develop sufficient documentation to meet its burden of proof with respect to the validity of the statements made in its LCA and the accuracy of information provided, in the event that such statement or information is challenged. The employer shall also maintain such documentation at its principal place of business in the U.S. and shall make such documentation available to DOL for inspection and copying upon request.

4. Section 655.720 is revised to read as follows:

§ 655.720 Where are labor condition applications to be filed and processed?

(a) *Facsimile transmission (FAX).* If the employer submits the LCA (Form ETA 9035) by FAX, the transmission shall be made to 1–800–397–0478 (regardless of the intended place of employment for the H–1B nonimmigrant(s)). (Note: the employer submitting an LCA via FAX shall not use the FAX number assigned to an ETA regional office, but shall use only the 1–800–397–0478 number designated for this purpose.) The cover pages to Form ETA 9035 (i.e., Form ETA 9035CP) should not be FAXed with the Form ETA 9035.

(b) *U.S. Mail.* If the employer submits the LCA (Form ETA 9035) by U.S. Mail, the LCA shall be sent to the ETA service center at the following address: ETA Application Processing Center, P.O. Box 13640, Philadelphia PA 19101 (regardless of the intended place of employment for the H–1B nonimmigrant(s)).

(c) *Electronic submission.* If the employer submits the LCA (Form ETA 9035E) by electronic transmission, the submission shall be made on the Department of Labor WEB page at www.lca.doleta.gov (regardless of the intended place of employment for the H–1B nonimmigrant(s)). The employer shall follow the instructions in the electronic submission process, which include the requirement that the employer shall print out and sign the LCA immediately after ETA's certification, shall maintain the "signed original" in its files, shall place a copy of the "signed original" in the public access file, and shall submit a copy of the "signed original" to the Immigration and Naturalization Service in support of the Form I–129 petition for the H–1B nonimmigrant. In the event that ETA implements the Government Paperwork Elimination Act (44 U.S.C.A. 3504 n.) and/or the Electronic Records and Signatures in Global and National Commerce Act (E–SIGN) (15 U.S.C.7001–7006) for the submission and certification of the ETA 9035E, instructions will be provided (by public notice(s) and by instructions on the Department's WEB page) to employers as to how the requirements of these statutes will be met in the ETA–9035E procedures.

(d) All matters other than the processing of LCAs (e.g., prevailing wage challenges by employers) that are the responsibility of ETA are within the jurisdiction of the Regional Certifying Officers in the ETA regional offices identified in § 655.721.

5. Section 655.730 is amended by revising paragraphs (b) and paragraph (c)(1) introductory text to read as follows:

§ 655.730 What is the process for filing a labor condition application?

* * * * *

(b) *Where and when is an LCA to be submitted?* An LCA shall be submitted by the employer to ETA in accordance with the procedure prescribed in § 655.720 no earlier than six months before the beginning date of the period of intended employment shown on the LCA. It is the employer's responsibility to ensure that a complete and accurate LCA is received by ETA. Incomplete or obviously inaccurate LCAs will not be certified by ETA. ETA will process all LCAs sequentially upon receipt regardless of the method used by the employer to submit the LCA (i.e., FAX, or U.S. Mail, or electronic submission, as prescribed in § 655.720) and will make a determination to certify or not certify the LCA within seven working days of the date the LCA is received by ETA.

(c) *What is to be submitted?* Form ETA 9035 or ETA 9035E.

(1) *General.* One completed and dated Form ETA 9035 or ETA 9035E shall be submitted to ETA by the employer (or by the employer's authorized agent or representative) in accordance with the procedure prescribed in § 655.720. In submitting the Form ETA 9035 or the ETA 9035E, the employer, or its authorized agent or representative on behalf of the employer, attests that the statements in the Form are true and promises to comply with the attestation requirements set forth in full in the ETA 9035–CP. The Form ETA 9035 must be used if the employer uses FAX or U.S. Mail for submission; this Form must bear the original signature of the employer (or that of the employer's authorized agent or representative) when it is submitted to ETA. The Form ETA 9035E must be used for electronic submission; this Form must be printed out and signed by the employer immediately upon certification by ETA. The signed original of the Form ETA 9035 or the Form ETA 9035E must be maintained by the employer in its files, as set forth at § 655.720(c) and § 655.760(a)(1), if it is submitted by FAX or by electronic submission to ETA. A copy of the signed, certified Form ETA 9035 or ETA 9035E must be made available in the public access file, as set forth at § 655.760(a)(1). The signature of the employer or its authorized agent or representative on Form ETA 9035 or Form ETA 9035E constitutes the employer's representation of the truth of the statements on the Form and acknowledges the employer's agreement to the labor condition statements (attestations), which are specifically identified in Forms ETA 9035 and ETA 9035E, as well as set forth in the cover pages (Form ETA 9035CP) and incorporated by reference in Forms ETA 9035 and ETA 9035E. Another copy of the signed, certified Form ETA 9035 or ETA 9035E must be submitted to the Immigration and Naturalization Service in support of the Form I–129 petition, thereby reaffirming the employer's acceptance of all of the attestation obligations in accordance with 8 CFR 214.2(h)(4)(iii)(B)(*2*). The labor

condition statements (attestations) are described in detail in §§ 655.731 through 655.735, and 655.736 through 655.739 (if applicable). Copies of Form ETA 9035 and cover pages Form ETA 9035CP are available from ETA regional offices and on the ETA website at http://ows.doleta.gov. Form ETA 9035E is found on the DOL WEB page at www.lca.doleta.gov, where the electronic submission is made. Each Form ETA 9035 and ETA 9035E shall identify the occupational classification for which the LCA is being submitted and shall state:

* * * * *

§ 655.731 [Amended]

6. Section 655.731 is amended in the introductory text, the first sentence of paragraph (a), and the first sentence of paragraph (b)(1), by inserting the phrase "or 9035E" after the phrase "Form ETA 9035".

§ 655.732 [Amended]

7. Section 655.732 is amended in the introductory text by inserting the phrase "or 9035E" after the phrase "Form ETA 9035".

§ 655.733 [Amended]

8. Section 655.733 is amended in the introductory text by inserting the phrase "or 9035E" after the phrase "Form ETA 9035".

9. Section 655.734 is amended in the introductory text by revising the phrase "Form ETA 9035" to read "Form ETA 9035 or 9035 E" and by revising (a)(3) and the first sentence of paragraph (b) as follows:

§ 655.734 What is the fourth LCA requirement, regarding notice?

An employer seeking to employ H–1B nonimmigrants shall state on Form ETA 9035 or 9035E that the employer has provided notice of the filing * * *.

(a) * * *

(3) The employer shall, no later than the date the H–1B nonimmigrant reports to work at the place of employment, provide the H–1B nonimmigrant with a copy of the LCA (Form ETA 9035, or Form ETA 9035E) certified by ETA and signed by the employer (or by the employer's authorized agent or representative). Upon request, the employer shall provide the H–1B nonimmigrant with a copy of the cover pages, Form ETA 9035CP.

(b) * * * The employer shall develop and maintain documentation sufficient to meet its burden of proving the validity of the statement referenced in paragraph (a) of this section and attested to on Form ETA 9035 or 9035E. * * *

* * * * *

10. Section 655.736 is amended in the first sentence of paragraph (e) by inserting the phrase "or 9035E" after the phrase "Form ETA–9035".

11. Section 655.740 is amended by revising the first sentence of paragraph (a)(1), and paragraphs (a)(2)(i), and (a)(2)(ii) as follows:

§ 655.740 What actions are taken on labor condition applications?

(a) * * *

(1) *Certification on labor condition application.* Where all items on Form ETA 9035 or Form ETA 9035E have been completed, the form is not obviously inaccurate, and in the case of Form ETA 9035, it contains the signature of the employer or its authorized agent or representative, the regional Certifying Officer shall certify the labor condition application unless it falls within one of the categories set forth in paragraph (a)(2) of this section.

* * *

(2) * * *

(i) *When the Form ETA 9035 or 9035E is not properly completed.* Examples of a Form ETA 9035 or 9035E which is not properly completed include instances where the employer has failed to check all the necessary boxes; or where the employer has failed to state the occupational classification, number of nonimmigrants sought, wage rate, period of intended employment, place of intended employment, or prevailing wage and its source; or, in the case of Form ETA 9035, where the application does not contain the signature of the employer or the employer's authorized representative.

(ii) *When the Form ETA 9035 or ETA 9035E contains obvious inaccuracies.* An obvious inaccuracy will be found if the employer files an application in error—e.g., where the Administrator, Wage and Hour Division, after notice and opportunity for a hearing pursuant to subpart I of this part, has notified ETA in writing that the employer has been disqualified from employing H–1B nonimmigrants under section 212(n)(2) of the INA. Examples of other obvious inaccuracies include stating a wage rate below the FLSA minimum wage, submitting an LCA earlier than six months before the beginning date of the period of intended employment, identifying multiple occupations on a single LCA, identifying a wage which is below the prevailing wage listed on the LCA, or identifying a wage range where the bottom of such wage range is lower than the prevailing wage listed on the LCA.

* * * * *

12. Section 655.750 is amended by revising paragraph (a) to read as follows:

§ 655.750 What is the validity period of the labor condition application?

(a) *Validity of certified labor condition applications.* A labor condition application which has been certified pursuant to the provisions of § 655.740 shall be valid for the period of employment indicated on Form ETA 9035 or ETA 9035E by the authorized DOL official. The validity period of a labor condition application shall not begin before the application is certified (whether through the FAX submission or U.S. Mail submission of the Form ETA 9035, or the electronic submission of the Form ETA 9035E) or exceed three years. However, in the event employment pursuant to section 214(m) of the INA commences prior to certification of the labor condition application, the attestation requirements of the subsequently certified application shall apply back to the first date of employment. Where the labor condition application contains multiple periods of intended employment, the validity period shall extend to the latest date indicated or three years, whichever comes first.

* * * * *

13. Section 655.760 is amended by revising paragraph (a)(1) to read as follows:

§ 655.760 What records are to be made available to the public, and what records are to be retained?

(a) * * *

(1) A copy of the certified labor condition application (Form ETA 9035 or Form ETA 9035E) and cover pages (Form ETA 9035CP). If the Form ETA 9035 is submitted by facsimile transmission, the application containing the original signature shall be maintained by the employer in its files. If the Form ETA 9035E is submitted electronically, a printout of the certified application shall be signed by the employer and maintained in its files.

* * * * *

14. Section 655.805 is amended by revising paragraph (d) to read as follows:

§ 655.805 What violations may the Administrator investigate?

* * * * *

(d) The provisions of this part become applicable upon the date that the employer's LCA is certified pursuant to §§ 655.740 and 655.750, or upon the date employment commences pursuant to section 214(m) of the INA, whichever is earlier. The employer's submission and signature on the LCA (whether Form ETA 9035 or Form ETA 9035E) each constitutes the employer's representation that the statements on

the LCA are accurate and its acknowledgment and acceptance of the obligations of the program. The employer's acceptance of these obligations is re-affirmed by the employer's submission of the petition (Form I–129) to the INS, supported by the LCA. See 8 CFR 214.2(h)(4)(iii)(B)(*2*), which specifies that the employer will comply with the terms of the LCA for the duration of the H–1B nonimmigrant's authorized period of stay. If the period of employment specified in the LCA expires or the employer withdraws the application in accordance with § 655.750(b), the provisions of this part will no longer apply with respect to such application, except as provided in § 655.750(b)(3) and (4).

Signed at Washington, DC, this 29th day of November, 2001.

Emily Stover DeRocco,

Assistant Secretary for Employment and Training.

Annabelle T. Lockhart,

Acting Administrator Wage and Hour Division.

Part IV

Department of the Interior

Office of the Secretary
Bureau of Indian Affairs
Office of Special Trustee for American Indians
Office of Indian Trust Transition

Tribal Consultation on Indian Trust Asset Management; Notice

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Bureau of Indian Affairs

Office of Special Trustee for American Indians

Office of Indian Trust Transition

Tribal Consultation on Indian Trust Asset Management

AGENCIES: Office of the Secretary, Bureau of Indian Affairs, Office of the Special Trustee for American Indians, Office of Indian Trust Transition, Interior.

ACTION: Notice of tribal consultation meetings.

SUMMARY: The Office of the Secretary, along with the Bureau of Indian Affairs, the Office of Special Trustee for American Indians, and Office of Indian Trust Transition will conduct meetings on Indian trust asset management. The purpose is to discuss a proposed reorganization of the Department's trust responsibility functions to improve the management of Indian trust assets. Any Indian tribe, band, nation or individual is encouraged to attend the meeting and to submit written comments.

DATES: The second consultation meeting will be held in Minneapolis, Minnesota on December 20, 2002 at 9 a.m. The first consultation meeting is scheduled to be held in Albuquerque, New Mexico on December 13, 2001. The dates times and locations of additional meetings will be announced shortly. All written comments must be received by February 15, 2002.

ADDRESSES: The location of the Albuquerque consultation has changed. The Albuquerque meeting will be held on December 13, 2002 at the Hyatt Regency, 330 Tijeras Street NW, Albuquerque, New Mexico. The Minneapolis consultation will be held at the Doubletree Hotel, 7901 24th Avenue South, Minneapolis, Minnesota. Send written comments to the Office of the Secretary, Attn: Office of the executive Secretariat, 1849 C Street NW., MS7229–MIB, Washington, DC 20240. Send written comments by electronic mail to *www.doi.gov/oait*.

FOR FURTHER INFORMATION CONTACT: Wayne R. Smith, Deputy Assistant Secretary Indian Affairs, 1849 C Street NW., MS4140–MIB, Washington, DC 20240, (202) 208–7163, Fax (202) 208–5320.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to involve affected and interested parties in the process of organizing the Department's trust asset management responsibility functions. The Department has determined that there is a need for dramatic change in the management of Indian trust assets. This need has been made apparent in several ways. An independent consultant has analyzed important components of the Department's trust reform activities and made several recommendations, including the recommendation that the Department consolidate trust functions under a single entity. Concerns have also been raised in the *Cobell* v. *Norton* case, which is currently pending in the Federal District Court for the District of Columbia. Internal review has also supported reorganization. Additionally, a recent report commissioned by the Department of the Interior has supported reorganization. This report, developed by the EDS Corporation, should be available online at *www.doi.gov* by December 10, 2002. A new office in the Department, the Office of Indian Trust Transition, has been created to plan and support reorganization. While preliminary actions have been taken by the Department, the plan is still in the early stages of development. The meeting is the first in a series of public meetings. Future meetings have been tentatively scheduled in Oklahoma City, OK on January 3, 2002; Rapid City, SD on January 10, 2002; Palm Springs, CA on January 17, 2002; Anchorage, AK on January 23, 2002; and Washington, DC, on February 1, 2002. The dates and locations of these meetings will be announced in a future notice.

Written comments, including names, street addresses, and other contact information of persons submitting comments, will be available for public review at the address stated in the **ADDRESSES** section. Interested persons may examine the written comments during regular business hours (7:45 a.m. to 4:15 p.m. EST), Monday through Friday, except Federal holidays. Individuals who submit comments may request confidentiality. If you wish us to withhold your name, street address, and other contact information (such as fax or phone number) from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your comment. We will honor your request to the extent allowable by law. We will make available for public inspection in their entirety all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses.

This meeting supports administrative policy on tribal consultation by encouraging maximum direct participation of representatives of tribal governments, tribal organizations, and other interested persons in important processes.

Dated: December 3, 2001.

J. Steven Griles,

Deputy Secretary.

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance.

RULES GOING INTO EFFECT DECEMBER 5, 2001

AGRICULTURE DEPARTMENT
Animal and Plant Health Inspection Service
Plant-related quarantine, domestic:
Karnal bunt; published 12-5-01

ENVIRONMENTAL PROTECTION AGENCY
Hazardous waste:
Corrective Action Management Units; waste management standards during cleanup; published 11-20-01

HEALTH AND HUMAN SERVICES DEPARTMENT
Food and Drug Administration
Animal drugs, feeds, and related products:
Carprofen; published 12-5-01
Ivermectin pour-on; published 12-5-01
Sponsor name and address changes—
Merial Ltd.; published 12-5-01

COMMENTS DUE NEXT WEEK

AGRICULTURE DEPARTMENT
Animal and Plant Health Inspection Service
Plant pest regulations; comments due by 12-10-01; published 10-9-01 [FR 01-25229]

AGRICULTURE DEPARTMENT
Animal and Plant Health Inspection Service
Plant Protection and Quarantine Treatment Manual; incorporation by reference:
Limes; hot water treatment; comments due by 12-10-01; published 11-8-01 [FR 01-28065]

COMMERCE DEPARTMENT
National Oceanic and Atmospheric Administration
Fishery conservation and management:
Alaska; fisheries of Exclusive Economic Zone—
King and tanner crab; comments due by 12-10-01; published 11-30-01 [FR 01-29772]
Magnuson-Stevens Act provisions—
Domestic fisheries; exempted fishing permit applications; comments due by 12-14-01; published 11-29-01 [FR 01-29640]
Domestic fisheries; exempted fishing permit applications; comments due by 12-14-01; published 11-29-01 [FR 01-29641]
International fisheries regulations:
Fraser River sockeye and pink salmon; inseason orders; comments due by 12-12-01; published 11-27-01 [FR 01-29495]
Marine mammals:
Atlantic Large Whale Take Reduction Plan; comments due by 12-13-01; published 11-28-01 [FR 01-29601]

CONSUMER PRODUCT SAFETY COMMISSION
Flammable Fabrics Act:
Mattresses/bedding; open flame ignition; flammability standard; comments due by 12-10-01; published 10-11-01 [FR 01-25442]

DEFENSE NUCLEAR FACILITIES SAFETY BOARD
Testimony by employees and production of official records in legal proceedings; comments due by 12-14-01; published 11-14-01 [FR 01-28543]

EDUCATION DEPARTMENT
Postsecondary education:
Higher Education Act Title IV program issues; negotiated rulemaking committees; intent to establish; comments due by 12-14-01; published 12-5-01 [FR 01-30260]

ENVIRONMENTAL PROTECTION AGENCY
Air quality implementation plans; approval and promulgation; various States:
Wisconsin; comments due by 12-10-01; published 11-8-01 [FR 01-27829]

ENVIRONMENTAL PROTECTION AGENCY
Hazardous waste management system:
RCRA hazardous waste management facilities; standardized permit, corrective action, and financial responsibility; comments due by 12-11-01; published 10-12-01 [FR 01-24204]

ENVIRONMENTAL PROTECTION AGENCY
Pesticides; tolerances in food, animal feeds, and raw agricultural commodities:
Sethoxydim; comments due by 12-10-01; published 10-10-01 [FR 01-25021]

ENVIRONMENTAL PROTECTION AGENCY
Superfund program:
National oil and hazardous substances contingency plan—
National priorities list update; comments due by 12-10-01; published 11-8-01 [FR 01-27831]

ENVIRONMENTAL PROTECTION AGENCY
Superfund program:
National oil and hazardous substances contingency plan—
National priorities list update; comments due by 12-10-01; published 11-8-01 [FR 01-27832]
Water programs:
Pollutants analysis test procedures; guidelines—
Mecury; measurement method; comments due by 12-10-01; published 10-9-01 [FR 01-24886]
Water supply:
Underground injection control program—
Texas; Class I, III, IV, and V injection wells; comments due by 12-10-01; published 11-8-01 [FR 01-27835]
Texas; Class III brine mining injection wells; comments due by 12-10-01; published 11-8-01 [FR 01-27836]

FEDERAL COMMUNICATIONS COMMISSION
Digital television stations; table of assignments:
Mississippi; comments due by 12-14-01; published 10-26-01 [FR 01-26943]
Practice and procedure:
Satellite Digital Audio Radio Service; terrestrial repeater networks authorization; comments due by 12-14-01; published 11-23-01 [FR 01-29328]
Radio stations; table of assignments:
Florida; comments due by 12-10-01; published 11-9-01 [FR 01-28205]
Missouri; comments due by 12-10-01; published 10-31-01 [FR 01-27348]
Texas; comments due by 12-10-01; published 10-31-01 [FR 01-27347]

FEDERAL COMMUNICATIONS COMMISSION
Television stations; table of assignments:
Florida; comments due by 12-13-01; published 11-5-01 [FR 01-27639]

HEALTH AND HUMAN SERVICES DEPARTMENT
Food and Drug Administration
Animal drugs, feeds, and related products:
Imported food products of animal origin; drug residue tolerances; comments due by 12-10-01; published 8-10-01 [FR 01-20161]

HEALTH AND HUMAN SERVICES DEPARTMENT
Grants:
Substance Abuse and Mental Health Service Administration; mental health and substance abuse emergency response criteria; comments due by 12-10-01; published 10-11-01 [FR 01-25451]

Employment and Training Administration
Disaster unemployment assistance program; eligibility clarification due to September 11 terrorist attacks; comments due by 12-13-01; published 11-13-01 [FR 01-28412]

NUCLEAR REGULATORY COMMISSION
Spent nuclear fuel and high-level radioactive waste; independent storage; licensing requirements:
Approved spent fuel storage casks; list; comments due by 12-14-01; published 11-14-01 [FR 01-28511]

NUCLEAR REGULATORY COMMISSION
Spent nuclear fuel and high-level radioactive waste; independent storage; licensing requirements:
Approved spent fuel storage casks; list; comments due by 12-14-01; published 11-14-01 [FR 01-28512]

SMALL BUSINESS ADMINISTRATION
Business loans:
Loan guaranty and amounts, minimum guaranteed dollar amount of 7(a) loans, financing percentages, etc.; comments due by 12-14-01; published 11-14-01 [FR 01-28371]

TRANSPORTATION DEPARTMENT
Coast Guard
Drawbridge operations:
Pennsylvania; comments due by 12-10-01; published 10-10-01 [FR 01-25425]
Vessel documentation:
Coastwise trade vessels; foreign ownership; "sold foreign" interpretation; comments due by 12-11-01; published 9-12-01 [FR 01-22815]

TRANSPORTATION DEPARTMENT
Federal Aviation Administration
Airworthiness directives:
Airbus; comments due by 12-14-01; published 11-19-01 [FR 01-28794]
Bell; comments due by 12-11-01; published 10-12-01 [FR 01-25695]

TRANSPORTATION DEPARTMENT
Federal Aviation Administration
Airworthiness directives:
Bell; comments due by 12-14-01; published 10-15-01 [FR 01-25692]

TRANSPORTATION DEPARTMENT
Federal Aviation Administration
Airworthiness directives:
Boeing; comments due by 12-10-01; published 10-24-01 [FR 01-26713]
General Electric Co.; comments due by 12-10-01; published 10-10-01 [FR 01-25400]
Pilatus Britten-Norman Ltd.; comments due by 12-10-01; published 11-7-01 [FR 01-27653]
Sikorsky; comments due by 12-11-01; published 10-12-01 [FR 01-25696]
SOCATA-Groupe AEROSPATIALE; comments due by 12-12-01; published 11-14-01 [FR 01-28420]

TRANSPORTATION DEPARTMENT
National Highway Traffic Safety Administration
Motor vehicle safety standards:
Side impact protection and fuel system integrity—
Radial tires instead of bias ply tires used on moving barriers; comments due by 12-10-01; published 10-10-01 [FR 01-25428]
Transportation Recall Enhancement, Accountability, and Documentation (TREAD) Act; implementation:
Foreign safety recalls and campaigns related to potential defects; information reporting; comments due by 12-10-01; published 10-11-01 [FR 01-25429]

TREASURY DEPARTMENT
Thrift Supervision Office
Savings and loan holding companies:
Authority to engage in financial activities; comments due by 12-10-01; published 11-8-01 [FR 01-27889]

VETERANS AFFAIRS DEPARTMENT
Loan guaranty:
Prepurchase counseling requirements; comments due by 12-10-01; published 10-11-01 [FR 01-25459]

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at *http://www.nara.gov/fedreg/plawcurr.html*.

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at *http://www.access.gpo.gov/nara/nara005.html*. Some laws may not yet be available.

H.R. 768/P.L. 107–72
Need-Based Educational Aid Act of 2001 (Nov. 20, 2001; 115 Stat. 648)

H.R. 2620/P.L. 107–73
Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 2002 (Nov. 26, 2001; 115 Stat. 651)

H.R. 1042/P.L. 107–74
To prevent the elimination of certain reports. (Nov. 28, 2001; 115 Stat. 701)

H.R. 1552/P.L. 107–75
Internet Tax Nondiscrimination Act (Nov. 28, 2001; 115 Stat. 703)

H.R. 2330/P.L. 107–76
Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2002 (Nov. 28, 2001; 115 Stat. 704)

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example:*

A renewal notice will be sent approximately 90 days **before the shown date.**

```
                                    /
                                DEC97 R 1

Public Laws

107th Congress, 1st Session, 2001

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 107th Congress, 1st Session, 2001.

Individual laws also may be purchased from the Superintendent of Documents, U.S. Government Printing Office. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws or access the online database at http://www.access.gpo.gov/nara005.html

Federal Register

12–6–01 Thursday
Vol. 66 No. 235 Dec. 6, 2001
Pages 63307–63486

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 66 FR 12345.

Printed on recycled paper.

Rules and Regulations

Federal Register
Vol. 66, No. 235
Thursday, December 6, 2001

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2001–NM–347–AD; Amendment 39–12528; AD 2001–24–11]

RIN 2120–AA64

Airworthiness Directives; Raytheon Model Beech 400, 400A, and 400T Series Airplanes, Model Mitsubishi MU–300 Airplanes, and Model Beech MU–300–10 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to all Raytheon Model Beech 400, 400A, and 400T series airplanes, Model Mitsubishi MU–300 airplanes, and Model Beech MU–300–10 airplanes. This action requires revising the Emergency Procedures Section of the Airplane Flight Manual to ensure the flightcrew is advised of in-flight procedures in the event of loss of airspeed indication. Such loss of airspeed indication and the resulting adverse effects on certain connecting systems could result in reduced controllability of the airplane.

DATES: Effective December 11, 2001.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of December 11, 2001.

Comments for inclusion in the Rules Docket must be received on or before February 4, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2001–NM–347–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227–1232. Comments may also be sent via the Internet using the following address: *9-anm-iarcomment@faa.gov*. Comments sent via fax or the Internet must contain "Docket No. 2001–NM–347–AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in this AD may be obtained from Raytheon Aircraft Company, Department 62, P.O. Box 85, Wichita, Kansas 67201–0085. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Bennett Sorensen, Aerospace Engineer, Flight Test Branch, ACE–117W, FAA, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946–4165; fax (316) 946–4407.

SUPPLEMENTARY INFORMATION: The FAA has received several reports of loss of the pilot's and/or the co-pilot's Indicated Airspeed (IAS) display on certain Raytheon Model Beech 400A series airplanes. Such loss of IAS display may lead to loss of the altitude displays and up to 10 degrees of pitch error in the pilot's and/or co-pilot's attitude display. Loss of the Indicated Airspeed (IAS) display can also adversely affect the display for altitude and attitude (Attitude/Heading/Reference System (AHRS)), and can result in uncommanded autopilot or yaw damper disengagement. The reported incidents occurred between 38,000 and 41,000 feet of altitude while the airplanes were in cruise or during initial descent. In the reported incidents, the altitude indication returned to normal at an undetermined point in the descent, and the airplanes landed without further incident. Investigation of those reports indicates that the cause of the loss of airspeed indication display may be due to water freezing in the pitot systems.

Loss of airspeed indication and the resulting adverse effects on certain connecting systems could result in reduced controllability of the airplane.

Similar Models

The pitot systems installation on Raytheon Model Beech 400, and 400T series airplanes, Model Mitsubishi MU–300 airplanes, and Model Beech MU–300–10 airplanes are identical to those installed on the affected Model Beech 400A series airplanes. Therefore, all of these models may be subject to the same unsafe condition.

Explanation of Relevant Service Information

The FAA has reviewed and approved the following Raytheon Temporary Changes to the FAA-approved Airplane Flight Manual:

- Beechjet 400T Temporary Change, P/N 132–590002–5TC3, dated November 12, 2001;
- Beechjet 400T Temporary Change, P/N 134–590002–1TC3, dated November 12, 2001;
- Beechjet 400A Temporary Change, P/N 128–590001–91TC5, dated November 12, 2001;
- Beechjet 400A Temporary Change, P/N 128–590001–95TC5, dated November 12, 2001;
- Beechjet 400A Temporary Change, P/N 128–590001–107TC5, dated November 12, 2001;
- Beechjet 400A Temporary Change, P/N 128–590001–109TC5, dated November 12, 2001;
- Beechjet 400A Temporary Change, P/N 128–590001–167TC7, dated November 12, 2001;
- Beechjet 400A Temporary Change, P/N 128–590001–169TC3, dated November 12, 2001;
- Beechjet 400 Temporary Change, P/N 128–590001–13BTC1, dated November 12, 2001;
- Beechjet 400 Temporary Change P/N 128–590001–13BTC2, dated November 12, 2001;
- MU–300 Diamond I Temporary Change, P/N MR–0460TC1, dated November 12, 2001;
- MU–300 Diamond IA Temporary Change, P/N MR–0873TC1, dated November 12, 2001.

The documents specified above describe certain in-flight procedures in the event of loss of airspeed indication for the various models specified.

Explanation of the Requirements of the Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design, this AD is being issued to ensure the flightcrew is advised of in-flight procedures in the event of loss of airspeed indication. Such loss of airspeed indication and the resulting adverse effects of certain connecting systems could result in reduced controllability of the airplane. This AD requires accomplishment of the actions specified in the Temporary AFM's described previously, or insertion of this AD into the Airplane Flight Manual (AFM).

Interim Action

This is considered to be interim action until final action is identified, at which time the FAA may consider further rulemaking.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to change the compliance time and a request to change the service bulletin reference as two separate issues.
- For each issue, state what specific change to the AD is being requested.
- Include justification (*e.g.*, reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2001–NM–347–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2001–24–11 Raytheon Aircraft Company (Formerly Beech): Amendment 39–12528. Docket 2001–NM–347–AD.

Applicability: All Model Beech 400, 400A, and 400T series airplanes, Model Mitsubishi MU–300 airplanes, and Model Beech MU–300–10 airplanes; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced controllability of the airplane due to loss of airspeed indication by ensuring that the flightcrew is advised of in-flight procedures in the event of loss of airspeed indication, accomplish the following:

(a) Within five days after the effective date of this AD, revise the Emergency Procedures Section of the FAA-approved Airplane Flight Manual (AFM), as applicable, by inserting a copy of Raytheon Beechjet 400T Temporary Change, P/N 132–590002–5TC3, dated November 12, 2001; Beechjet 400T Temporary Change, P/N 134–590002–1TC3, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–91TC5, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–95TC5, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–107TC5, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–109TC5, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–167TC7, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–169TC3, dated November 12, 2001; Beechjet 400 Temporary Change, P/N 128–590001–13BTC1, dated November 12, 2001; Beechjet 400 Temporary Change P/N 128–590001–13BTC2, dated November 12, 2001; MU–300 Diamond I Temporary Change, P/N MR–0460TC1, dated November 12, 2001; or MU–300 Diamond IA Temporary Change, P/N MR–0873TC1, dated November 12, 2001; as applicable, into the AFM or by inserting a copy of this AD into the AFM to include the following procedures:

"Emergency Procedures (400 & MU–300)

Loss of Airspeed

Note: If the pilot's and/or copilot's airspeed(s) are noted to be decreasing toward zero, refer to the AOA indicator for airspeed control and land at the nearest suitable airport.

1. Autopilot—Disconnect
2. Airspeed—Slow to and Maintain 0.2 AOA
3. Thrust—As Required

4. Speed Brakes—As Required (Slow to 0.25 AOA with speed brakes extended)

Note: An AOA of 0.2 (0.25 with speed brakes extended) will yield an airspeed of about 210 knots. Use pitch attitude as the primary reference. Make small changes in pitch and wait for the AOA to stabilize.

When Ready for Descent

5. Seat Belts/Shoulder Harnesses—Fastened
6. Cabin Sign—As Required
7. Recognition Light—As Required
8. Anti/De-Ice Systems—As Required

Caution

If icing conditions are anticipated during the descent and approach, turn ice protection systems ON as early as possible prior to penetrating clouds. Maintain wing anti/deice operation light ON (approximately 70% N2) during descent to assure proper wing anti-ice operation.

9. Cabin Pressure Control—Set Field Elevation + 500 Feet
10. Windshield Defog—As Required
11. Altimeters—Set

When Ready for Approach

12. Airspeed—Slow to and Maintain 0.3 AOA

Note: Maintain 0.3 AOA throughout the configuration change to Flaps 10° Gear Down. This will yield an airspeed of about 180 knots.

13. Fuel Management—Check
14. N1, Landing Distance—Confirm
15. Cabin Sign—Safety
16. Windshield Anti-Ice—Low
17. Hydraulic/Nitrogen Pressure—Check
18. Engine Sync—Off
19. Flaps 10°

Before Landing

20. AOA Index—Preset 1.3 V/Vs
21. Landing Gear—Down
22. Airspeed—Slow to 0.4 AOA
23. Recognition Light—Off
24. Landing Lights—As Required
25. Ignitions—On
26. Flaps—30°
27. Approach Airspeed (VREF)—Slow to and Maintain 0.57 AOA

Note: This will yield a normal approach speed of VREF (0.57 AOA) and normal landing distances.

Balked Landing

28. Thrust—Takeoff N1
29. Pitch Attitude—10°

When Positive Climb Has Been Established

30. Flaps—10°
31. Landing Gear—Up
32. Airspeed—Accelerate to 0.3 AOA
33. Flaps—Up
34. Airspeed—Accelerate and Maintain 0.2 AOA
35. Landing Lights—Ret/off

Emergency Procedures (400A & RJ–61)

Loss of Airspeed

Note: If the pilot's, or copilot's and standby, or all three airspeed(s) are noted to be decreasing toward zero, refer to the standby attitude indicator, standby altimeter, standby heading and the AOA indicator for aircraft control and land at the nearest suitable airport. On PFD equipped airplanes, the pilot's and copilots altimeters, attitude displays and heading displays may be unreliable and the autopilot may disconnect. This may be accompanied by amber boxed A/S, ALT, ATT and/or HDG comparator flags. The comparator flags may be followed by red FAIL flags and removal of airspeed and altitude tapes and attitude/heading displays.

1. Autopilot—Disconnect
2. Airspeed—Slow to and Maintain 0.2 AOA
3. Thrust—As Required
4. Speed Brakes—As Required (Slow to 0.25 AOA with speed brakes extended)

Note: An AOA of 0.2 (0.25 speed brakes extended) will yield an airspeed of about 210 knots. Use pitch attitude as primary reference. Make small changes in pitch attitude and wait for AOA to stabilize.

When Ready for Descent

5. Seat Belts/Shoulder Harnesses—Fastened
6. Cabin Sign—As Required
7. Recognition Light—As Required
8. Anti/De-Ice Systems—As Required

Caution

If icing conditions are anticipated during the descent and approach, turn ice protection systems ON as early as possible prior to penetrating clouds. Maintain wing anti/deice operation light ON (approximately 70% N2) during descent to assure proper wing anti-ice operation.

9. Cabin Pressure Control—Set Field Elevation + 500 Feet
10. Windshield Defog—As Required
11. Altimeters—Set

When Ready for Approach

12. Airspeed—Slow to and Maintain 0.3 AOA

Note: Maintain 0.3 AOA throughout the configuration change to Flaps 10°, Gear Down. This will yield an airspeed of about 180 knots.

13. Fuel Management—Check
14. N1, Landing Distance—Confirm
15. Cabin Sign—Safety
16. Windshield Anti-Ice—Low
17. Hydraulic/Nitrogen Pressure—Check
18. Engine Sync—Off
19. Flaps—10°

Before Landing

20. AOA Index—Preset 1.3 V/Vs
21. Landing Gear—Down
22. Airspeed—Slow to 0.4 AOA
23. Recognition Light—Off
24. Landing Lights—As Required
25. Ignitions—On
26. Flaps—30°
27. Approach Airspeed (VREF) Slow to and Maintain 0.57 AOA

Note: This will yield a normal approach speed of VREF (0.57 AOA) and normal landing distances.

28. Yaw Damp—Off

Balked Landing

29. Thrust—Takeoff N1
30. Pitch Attitude 10°

When Positive Climb Has Been Established

31. Flaps—10°
32. Landing Gear—Up
33. Yaw Damp—On
34. Airspeed—Accelerate to 0.3 AOA
35. Flaps—Up
36. Airspeed—Accelerate and Maintain 0.2 AOA
37. Landing Lights—Ret/off

Emergency Procedures 400T(T–1A)

Loss of Airspeed

Note: If the pilot's, or copilot's and standby, or all three airspeed(s) are noted to be decreasing toward zero, refer to the standby attitude indicator, standby altimeter, standby heading and the AOA indicator for aircraft control and land at the nearest suitable airport. The pilot's and copilots altimeter's, attitude displays and heading displays may be unreliable and the autopilot may disconnect. This may be accompanied by amber boxed A/S, ALT, ATT and/or HDG comparator flags. The comparator flags may be followed by red FAIL flags on the airspeed, altitude, attitude and heading displays.

1. Autopilot—Disconnect
2. Airspeed—Slow to and Maintain 0.2 AOA
3. Thrust—As Required
4. Speed Brakes—As Required (Slow to 0.25 AOA with speed brakes extended)

Note: An AOA of 0.2 (0.25 speed brakes extended) will yield an airspeed of about 210 knots. Use pitch attitude as primary reference. Make small changes in pitch attitude and wait for AOA to stabilize.

When Ready for Descent

5. Seat Belts/Shoulder Harnesses—Fastened
6. Cabin Sign—AS Required
7. Anti/De-Ice Systems—As Required

Caution

If icing conditions are anticipated during the descent and approach, turn ice protection systems ON as early as possible prior to penetrating clouds. Maintain wing anti/deice operation light ON (approximately 70% N2) during descent to assure proper wing anti-ice operation.

8. Cabin Pressure Control—Set Field Elevation + 500 Feet
9. Windshield Defog—As Required
10. Altimeters—Set

When Ready for Approach

11. Airspeed—Slow to and Maintain 0.3 AOA

Note: Maintain 0.3 AOA throughout the configuration change to Flaps 10°, Gear Down. This will yield an airspeed of about 180 knots.

12. Fuel Management—Check
13. N1, Landing Distance—Confirm
14. Cabin Sign—Safety
15. Windshield Anti-Ice—Low
16. Hydraulic/Nitrogen Pressure—Check
17. Engine Sync—Off
18. Flaps—10°
19. GPWS TAC and FLP ORIDE—Off

Before Landing

20. AOA Index—Preset 1.3 V/Vs
21. Landing Gear—Down

22. Airspeed—Slow to 0.4 AOA
23. Landing Lights—As Required
24. Ignitions—On
25. Flaps—Set for Landing
26. Approach Airspeed (VREF)—Slow to and Maintain 0.57 AOA

Note: This will yield an approach speed of VREF (0.57 AOA) and normal landing distances.

27. Yaw Damp—Off

Caution

If icing conditions are encountered during flight, the maximum landing flap is 10° unless one of the following are met.

The icing conditions are encountered for less than 10 minutes, and the RAM Air Temperature (RAT) during the encounter was warmer than −8°C.

A RAT of +10°C, or warmer, is observed during the descent, approach or landing.

If either of the above two conditions are met, Flaps 30° may be used for landing.

Balked Landing

28. Thrust—Takeoff N1
29. Pitch Attitude—10°

When Positive Climb Has Been Established

30. Flaps—10°
31. Landing Gear—Up
32. Yaw Damp—On
33. Airspeed—Accelerate to 0.3 AOA
34. Flaps—Up
35. Airspeed—Accelerate and Maintain 0.2 AOA
36. Landing Lights—Ret/off

Emergency Procedures 400T(TX)

Loss of Airspeed

Note: If the pilot's, or copilot's and standby, or all three airspeed(s) are noted to be decreasing toward zero, refer to the standby attitude indicator, standby altimeter, standby heading and the AOA indicator for aircraft control and land at the nearest suitable airport. The pilot's and copilots altimeter's, attitude displays and heading displays may be unreliable and the autopilot may disconnect. This may be accompanied by amber boxed A/S, ALT, ATT and/or HDG comparator flags. The comparator flags may be followed by red FAIL flags on the airspeed, altitude, attitude and heading displays.

1. Autopilot—Disconnect

34. Airspeed—Accelerate and Maintain 0.2 AOA
35. Landing Lights—Ret/off"

Note 1: When a previously specified Temporary AFM revision has been incorporated into the general revisions of the AFM, the general revision may be inserted in the AFM, provided the information contained in the general revision is identical to that specified in the specified Temporary AFM revision.

Alternative Methods of Compliance

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Wichita Aircraft Certification Office (ACO), FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Wichita ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Wichita ACO.

Special Flight Permits

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(d) Except as provided by paragraph (a) of this AD, the AFM revision shall be done in accordance with Raytheon Beechjet 400T Temporary Change, P/N 132–590002–5TC3, dated November 12, 2001; Beechjet 400T Temporary Change, P/N 134–590002–1TC3, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–91TC5, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–95TC5, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–107TC5, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–109TC5, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–167TC7, dated November 12, 2001; Beechjet 400A Temporary Change, P/N 128–590001–169TC3, dated November 12, 2001; Beechjet 400 Temporary Change, P/N 128–590001–13BTC1, dated November 12, 2001; Beechjet 400 Temporary Change P/N 128–590001–13BTC2, dated November 12, 2001; MU–300 Diamond I Temporary Change, P/N MR–0460TC1, dated November 12, 2001; or MU–300 Diamond IA Temporary Change, P/N MR–0873TC1, dated November 12, 2001; as applicable. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Raytheon Aircraft Company, Department 62, P.O. Box 85, Wichita, Kansas 67201–0085. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Effective Date

(e) This amendment becomes effective on December 11, 2001.

Issued in Renton, Washington, on November 26, 2001.

Kalene C. Yanamura,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Approval and Promulgation of Air Quality Implementation Plans; Connecticut; Revisions to State Plan for Municipal Waste Combustors and Incorporation of Regulation into State Implementation Plan for Ozone

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is approving revisions to Connecticut's State Plan for Municipal Waste Combustors (MWC) submitted by the Connecticut Department of Environmental Protection (DEP) on November 28, 2000 and October 15, 2001. The MWC State Plan implements and enforces provisions at least as protective as the EPA's Emission Guidelines (EGs) applicable to existing MWC units with capacity to combust more than 250 tons per day of municipal solid waste. Further, the EPA is approving a State Implementation Plan (SIP) revision submitted by the State of Connecticut on October 15, 2001. This is a SIP-strengthening revision that incorporates the nitrogen oxide limits and related regulatory provisions of Connecticut's adopted Regulation Section 22a–174–38, Municipal Waste Combustors, into the SIP to further reduce emissions of nitrogen oxides (NO_X) from MWC units. The EPA proposed approval of these revisions on August 24, 2001, and received no comments during the public comment period which ended September 24, 2001. These actions are being taken under the Clean Air Act.

EFFECTIVE DATE: This rule will become effective on January 7, 2002.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours, by appointment at the Office of Ecosystem Protection, U.S. Environmental Protection Agency, EPA New England Regional Office, One Congress Street, 11th floor, Boston, MA; Air and Radiation Docket and Information Center, U.S. Environmental Protection Agency, Room M–1500, 401 M Street, (Mail Code 6102), SW., Washington, DC; and the Bureau of Air Management, Department of Environmental Protection, State Office Building, 79 Elm Street, Hartford, CT 06106–1630.

FOR FURTHER INFORMATION CONTACT: Daniel Brown, (617) 918–1532 or brown.dan@epa.gov.

SUPPLEMENTARY INFORMATION: In the following text the terms "we," "us," or "our" mean the EPA. This notice is organized according to the following Table of Contents.

I. What was our Proposed Rulemaking on the Connecticut DEP's Revisions to the MWC Plan and SIP?
II. What was Connecticut DEP's final MWC Plan and SIP Revision?
III. What Action is the EPA Taking Today?
IV. What are the Administrative Requirements?

I. What Was Our Proposed Rulemaking on the Connecticut DEP's Revisions to the MWC Plan and SIP?

On August 24, 2001 we published a Notice of Proposed Rulemaking (NPR) for the Connecticut DEP's November 28, 2000 revision to its Municipal Waste Combustor (MWC) Plan and its June 4, 2001 proposed revision to its State Implementation Plan (SIP) for ozone. Please refer to our proposed rule published in the **Federal Register** on August 24, 2001 (66 FR 44582) for more information on the Connecticut DEP's submittals. Briefly, the November 28, 2000 submittal consisted of the revised Connecticut regulation 22a–174–38, Municipal Waste Combustors, which Connecticut DEP adopted and which became effective on October 26, 2000. The June 4, 2001 submittal consisted of the revised regulation 22a–174–38 and a request that the nitrogen oxide (NO_X) limits and related regulatory provisions be incorporated into the SIP to further reduce NO_X emissions from MWC units.

In our August 24, 2001 action, we proposed approval of the SIP revision through parallel processing. Under the parallel processing procedure, we work closely with the Connecticut DEP while it is developing its revision to its SIP. The State submitted its proposed SIP revision to us concurrent with its public hearing. We reviewed this proposed state action, and published our notice of proposed rulemaking and request for comments in the **Federal Register** on August 24, 2001.

We did not receive any comments on our proposed approval and the Connecticut DEP addressed all comments it received during its public comment period as described below.

II. What Was Connecticut DEP's Final MWC Plan and SIP Revision?

On October 15, 2001, Connecticut DEP submitted its final MWC Plan revision and SIP revision to the EPA for approval. The submittal includes the final regulation 22a–174–38 (state MWC rule), a certification of public hearing and a hearing report which responds to all public comments raised during the Connecticut DEP's public hearing on July 10, 2001.

Connecticut DEP's final MWC Plan revision and SIP revision submitted on October 15, 2001 is substantially the same as the June 4, 2001 proposed SIP revision which we proposed to approve on August 24, 2001. Therefore, in this action we are fully approving the MWC Plan and SIP revision. The rationale for our action is explained in the NPR and will not be restated here. No public comments were received on the NPR.

III. What Action Is the EPA Taking Today?

EPA is approving Connecticut DEP's revisions to its MWC Plan and approving the provisions of the MWC regulation pertaining to NO_X controls into the ozone SIP.

IV. What Are the Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and

responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*)

The Congressional Review Act, 5 U.S.C. section 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. section 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 4, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects

40 CFR Part 52

Dated: November 9, 2001.

Robert W. Varney,

Regional Administrator, EPA New England.

Chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart H—Connecticut

2. Section 52.370 is amended by adding paragraph (c)(90) to read as follows:

§ 52.370 Identification of plan.

* * * * *

(c) * * *

(90) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on October 15, 2001, to incorporate the nitrogen oxide limits and related regulatory provisions of regulation 22a–174–38, Municipal Waste Combustors.

(i) Incorporation by reference.

(A) The nitrogen oxide emission limits and related regulatory provisions of State of Connecticut Regulation of Department of Environmental Protection Section 22a–174–38, Municipal Waste Combustors effective October 26, 2000, included in sections 22a–174–38 (a), (b), (c), (d), (i), (j), (k), (l), and (m).

(ii) Additional material.

(A) Letter from the Connecticut Department of Environmental Protection dated October 15, 2001, submitting a revision to the Connecticut State Implementation Plan.

2. In § 52.385, Table 52.385 is amended by adding in numerical order a new entry for "22a–174–38" to read as follows:

§ 52.385 EPA-approved Connecticut regulations.

* * * * *

TABLE 52.385.—EPA-APPROVED REGULATIONS

Connecticut State citation	Title/subject	Dates: Date adopted by State	Dates: Date approved by EPA	Federal Register citation	Section 52.370	Comments/description
•	•	•	•	•	•	•
22a–174–38	Municipal Waste Combustors.	10/26/2000	12/6/01	[Insert FR citation from published date].	c(90)	The nitrogen oxide emission limits and related regulatory provisions of 22a–174–38, Municipal Waste Combustors, included in sections 22a–174–38 (a), (b), (c), (d), (i), (j), (k), (l), and (m).

RIN 2050–AE79

NESHAP: Emergency Extension of the Compliance Date for Standards for Hazardous Air Pollutants for Hazardous Waste Combustors

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to extend for one year the compliance date for regulations for incinerators, cement kilns, and lightweight aggregate kilns that burn hazardous waste, promulgated on September 30, 1999 (NESHAP: Final Standards for Hazardous Air Pollutants for Hazardous Waste Combustors). We are taking this action in response to the Court's opinion in *Cement Kiln Recycling Coalition* v. *EPA*, 255 F.3d 855, 872 (D.C. Cir. 2001) issued on July 24, 2001, where the Court vacated the emission standards known as the hazardous waste combustor "floors" and remanded for further proceedings. 255 F.3d at 871. The rules are still in effect, however, because the Court has issued an order (at the request of the parties to the proceeding) which stays issuance of the mandate and vacature does not occur until the Courts issue a mandate. These existing regulations require sources to take actions based on the current compliance date, September 30, 2002. Deadlines for some of these actions are imminent. Given that some delay in compliance will be necessitated as a result of the uncertainty created by the Court's opinion, and that action is needed now because of imminent deadlines which are keyed to the compliance date, it is not appropriate to require sources to comply with the current regulatory schedule. Consequently, EPA is extending the compliance date for one year.

EFFECTIVE DATE: December 6, 2001.

FOR FURTHER INFORMATION CONTACT: For general information, call the RCRA Call Center at 1–800–424–9346 or TDD 1–800–553–7672 (hearing impaired). Callers within the Washington Metropolitan Area must dial 703–412–9810 or TDD 703–412–3323 (hearing impaired). The RCRA Call Center is open Monday–Friday, 9 am to 4 pm, Eastern Standard Time. For more information, contact Rhonda Minnick at 703–308–8771, minnick.rhonda@epa.gov, or write her at the Office of Solid Waste, 5302W, U.S. EPA, Ariel Rios Building, 1200 Pennsylvania Avenue, NW, Washington, DC 20460.

SUPPLEMENTARY INFORMATION:

Part One: Overview and Background for This Final Rule

I. Regulatory Information

Section 553 of the Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. EPA has determined that there is good cause for making today's rule final without prior proposal and opportunity for comment because a change in the compliance date is necessitated by the Court's opinion. There are imminent deadlines which are keyed to the existing compliance date, yet affected sources presently lack information to make necessary compliance decisions. Some immediate change of the compliance date is needed. Thus, notice and public procedure are impracticable. EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(B). EPA also finds that good cause exists under U.S.C. 553(d)(3) for making this rule effective less than 30 days after publication in the **Federal Register**.

II. What Is the Purpose of This Final Rule?

Today's action extends for one year the compliance date for the NESHAP: Final Standards for Hazardous Air Pollutants for Hazardous Waste Combustors (Phase I) rule, published September 30, 1999 (64 FR 52828). We are taking this action in response to the Court's opinion in *Cement Kiln Recycling Coalition* v. *EPA*, 255 F.3d 855, 872 (D.C. Cir. 2001) issued on July 24, 2001, where the Court vacated the emission standards known as the hazardous waste combustor "floors" and remanded for further proceedings. 255 F.3d at 871. "Vacature", however, only actually takes effect when the Court issues an order called a mandate. In this case, the Court has stayed issuance of the mandate (until February 14, 2002) in response to a joint motion from all parties to the case requesting such action. The rules thus are still in effect. These existing regulations require sources to take actions based on the current compliance date, September 30, 2002. Deadlines for some of these actions are imminent. Given that some delay in compliance will be necessitated as a result of the uncertainty created by the Court's opinion, and that action is needed now because of imminent deadlines which are keyed to the compliance date, it is not appropriate to require sources to comply with the current regulatory schedule. Consequently, EPA is extending the compliance date for one year.

III. What Is the Phase I Rule?

In the Phase I final rule, we adopted National Emissions Standards for Hazardous Air Pollutants, pursuant to section 112(d) of the Clean Air Act, to control toxic emissions from the burning of hazardous waste in incinerators, cement kilns, and lightweight aggregate kilns. 64 FR 52828 (September 30, 1999). These emission standards created a technology-based national cap for hazardous air pollutant emissions from the combustion of hazardous waste in these devices. Additional risk-based conditions necessary to protect human health and the environment may be imposed (assuming a proper, site-specific justification) under section 3005(c)(3) of the Resource Conservation and Recovery Act (RCRA).

Section 112(d) of the Clean Air Act (CAA) requires emissions standards for hazardous air pollutants to be based on

the performance of the Maximum Achievable Control Technology (MACT). These standards apply to the three major categories of hazardous waste burners—incinerators, cement kilns, and lightweight aggregate kilns. For purposes of today's action, we refer to these three categories collectively as hazardous waste combustors (HWC).

Additionally, the Phase I HWC MACT rule satisfies our obligation under RCRA (the main statute regulating hazardous waste management) to ensure that hazardous waste combustion is conducted in a manner protective of human health and the environment. 64 FR at 52833, 52839–41. By using both CAA and RCRA authorities in a harmonized fashion, we consolidate regulatory control of hazardous waste combustion into a single set of regulations, thereby minimizing the potential for conflicting or duplicative federal requirements.

More information on the Phase I HWC MACT rule is available electronically from the World Wide Web at *www.epa.gov/hwcmact*.

IV. What Related Actions Have Been Taken Since Publication of the Phase I Rule?

On November 19, 1999, we issued a technical correction to the HWC MACT rule (64 FR 63209). It clarified our intent with respect to certain aspects of the Notification of Intent to Comply and Progress Report requirements of the 1998 "Fast Track" final rule (63 FR 33783). Additionally, specific to the HWC MACT rule, we corrected several typographical errors and omissions.

On July 10, 2000, we issued a second technical correction to the HWC MACT rule (65 FR 42292). This action corrected additional typographical errors and clarified several issues to make the rule easier to understand and implement. This action also supplied one omission from the technical correction published on November 19, 1999, and made one correction to the related June 19, 1998 "Fast Track" final rule (63 FR 33783).

On July 25, 2000, the Court of Appeals for the District of Columbia decided *Chemical Manufacturers Association* v. *EPA*, 217 F. 3d 861 (D.C. Cir. No. 99–1236). The Court held that EPA had the legal authority to promulgate a requirement of early cessation of hazardous waste burning activity for those sources not intending to comply with the MACT emission standards. However, the Court also held that we had not adequately explained our reasons for imposing the early cessation requirement. As a result, the Court vacated the early cessation requirement and the related Notice of Intent to Comply (NIC) and Progress Report requirements. This vacature took effect on October 11, 2000. Since the requirements were not vacated until after sources were required to submit their NICs (on October 2, 2000), we determined that the Court's action does not impact a source's ability to request a RCRA permit modification using the streamlined procedures of § 270.42(j)(1). As long as a source complied with the NIC provisions (including filing the NIC before the provision was vacated), the source has met the requirements in § 270.42(j)(1) and is therefore eligible for the streamlined RCRA permit modification process. The Court's decision does not impact the emission standards or compliance schedule for the other requirements of the HWC NESHAP Subpart EEE.

On November 9, 2000, we issued a third technical correction to the HWC MACT rule (65 FR 67268). It clarified our intent with respect to the applicability of new source versus existing source standards for hazardous waste incinerators. This action also clarified three issues to make the rule easier to understand and implement.

On May 14, 2001, we issued a final rule implementing two court orders that removed affected provisions of the HWC MACT rule from the *Code of Federal Regulations* (66 FR 24270). This action removed the Notice of Intent to Comply provisions (discussed above) and certain operating parameter limits of baghouses and electrostatic precipitators.

On July 3, 2001, we published a direct final rule (66 FR 35087) and a notice of proposed rulemaking (66 FR 35124) promulgating and proposing thirteen amendments to several compliance, testing, and monitoring provisions of the HWC MACT rule. We promulgated these amendments as direct final rules, with an accompanying proposed rule to supplant these rules in the event we received any adverse comment on the amendments. We subsequently received adverse comment on four of the amendments. On October 15, 2001, we published a withdrawal notice (66 FR 52361) removing those parts of the direct final rule that received adverse comment. The nine amendments for which we did not receive adverse comment became effective on October 16, 2001.

On July 3, 2001, we also issued a separate proposed rule soliciting comment on twenty amendments to several compliance, testing, and monitoring provisions of the HWC MACT rule (66 FR 35126). We will address comments to the proposed rule in the future in a final action.

On July 24, 2001, the D.C. Circuit Court issued an opinion vacating the HWC MACT emission standards known as the "floors" and remanded for further proceedings. See *Cement Kiln Recycling Coalition* v. *EPA*, 255 F.3d 855, 872 (D.C. Cir. 2001). The Court also invited any party to file a motion asking that issuance of the mandate be stayed:

> Because this decision leaves EPA without standards regulating HWC emissions, EPA (or any of the parties to this proceeding) may file a motion to delay issuance of the mandate to request either that the current standards remain in place or that EPA be allowed reasonable time to develop interim standards.

255 F.3d at 872.

Part Two: Rationale for Today's Action

I. Why Is a One-Year Extension of the Compliance Date Needed?

In response to the Court's opinion that the Phase I HWC MACT rule be vacated, the Agency and litigants are investigating options to retain some form of the current rules, or issuing some type of interim revised rules. Notwithstanding those efforts, however, and until the Court issues a mandate putting the opinion into force, sources must continue to comply with the rule. The compliance date for the rule is September 30, 2002, three years after the promulgation date.

To meet that compliance date, sources must take steps to comply with the rule prior to that date, and regulatory officials must respond to many of those actions. For example, sources must have submitted by September 30, 2001 requests to extend the compliance date because of inability to meet the emission standards by that date for reasons beyond their control. Regulatory officials should respond to those requests within 30 days of receipt of a complete application. See §§ 63.1206(b)(4), 63.6(i), and 63.1213. In addition, sources must submit the performance test plan to permit officials for review and approval by March 30, 2002, one year prior to the deadline for conducting the initial comprehensive performance test. See § 63.1206(c) and (e). Most sources were planning to submit their test plan and conduct the test in advance of the deadline to facilitate review and approval of the plan and ensure availability of stack testing personnel.

Given the uncertainty created by the opinion as to what standards will ultimately be in place and when sources will have to comply, it is appropriate to delay the compliance date.[1] Quite

[1] If the Agency were not to promulgate an interim rule prior to the Court's issuance of a mandate

simply, sources are (legitimately) unwilling to make the substantial commitments in time, effort, and capital to comply with standards when they no longer know what those standards will be. We believe a one-year delay of the compliance date is warranted. Many sources reasonably stopped most efforts to comply with the rule when the Court issued its opinion on July 24, 2001 because the rule's status was so uncertain. Further, although the Agency plans to promulgate interim rules prior to the Court's issuance of the vacature mandate, the interim rules will not be promulgated until approximately February 14, 2002. That hiatus would justify a six month delay in the compliance date, but the requirements of an interim rule will differ from the current rule to address concerns of litigants and the Court. Thus, sources may need additional time to address such differences. Consequently, we believe a one-year delay in the compliance date is within the range of time extensions that are appropriate.

Should EPA promulgate replacement rules, those rules would, of course, have their own compliance dates (to be determined as part of that rulemaking). Our action today deals only with the status of the existing rule, which date clearly needs to change as a result of the *Cement Kiln Recycling Coalition* opinion.

To implement the one-year delay in the compliance date, we are revising dates in several regulatory provisions. We are revising the compliance date provided by § 63.1206(a)(1) from September 30, 2002 to September 30, 2003. In addition, we are making conforming revisions to several paragraphs that establish deadlines based on the compliance date.

II. Why Is This Rule Issued Without Notice and Opportunity for Public Comment?

EPA finds that there is good cause to issue this rule without prior notice and opportunity for comment (although EPA notes that all of the litigants in the *Cement Kiln Recycling Coalition* proceedings have had actual notice of this action as a result of the on-going discussions following issuance of that opinion, and have had the opportunity to present their views to the appropriate EPA officials). First, as explained above, source owners and operators presently lack the information to make necessary compliance decisions: they do not know what the standards will be, or if there will be any national standards at all. The only thing that is clear is that the current rules, as a result of the Court's opinion and vacature remedy, will require some alteration. Yet there are imminent deadlines (September, 2001 and March, 2002) which are keyed to the September, 2002 compliance date. Some immediate change of the compliance date is thus needed. Second, EPA regards a change in the compliance date as necessitated by the Court's opinion in any case, and thus that this action is essentially non-discretionary. For all of these reasons, EPA finds that there is good cause to issue this rule without notice and opportunity for comment pursuant to 5 U.S.C. section 553(b)(B) (which applies to CAA rulemakings, see section 307(d)(1), final sentence), as well as good cause for this rule to take effect immediately pursuant to 5 U.S.C. section 553(d).

Part Three: Analytical and Regulatory Requirements

I. Executive Order 12866: Regulatory Planning and Review

Under Executive Order 12866, EPA must determine whether a regulatory action is significant and, therefore, subject to comprehensive review by the Office of Management and Budget (OMB), and the other provisions of the Executive Order. A significant regulatory action is defined by the Order as one that may:

—Have an annual effect on the economy of $100 million or more, or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;
—Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
—Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or rights and obligations or recipients thereof; or
—Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866.

Pursuant to the terms of Executive Order 12866, the Agency has determined that this rule is not a "significant regulatory action" and is therefore not subject to OMB review.

The aggregate annualized compliance costs for this final rule are less than $100 million. Furthermore, this rule is not expected to adversely affect, in a material way, the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. The benefits to human health and the environment resulting from today's action have not been monetized but are deemed to be less than $100 million per year.

A. Why Is This Final Rule Necessary?

See Part Two, Section I of this Preamble.

B. Were Non-Regulatory Alternatives First Considered?

Section 1(b)(3) of Executive Order 12866 instructs Executive Branch Agencies to consider and assess available alternatives to direct regulation prior to making a determination for regulation. This regulatory determination assessment should be considered, "to the extent permitted by law, and where applicable." The ultimate purpose of the regulatory determination assessment is to ensure that the most efficient tool, regulation, or other type of action is applied in meeting the targeted statutory objective(s). The consideration of non-regulatory alternatives is not applicable to today's final rule.

C. What Regulatory Options Were Considered?

Alternative regulatory options are not applicable to this action.

II. Regulatory Flexibility Act (RFA), as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 U.S.C. 601 et seq.

The RFA generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of today's final rule on small entities, a small entity is defined as: (1) A small business that has fewer than 750, or 500 employees per firm depending upon the SIC–NAICS code(s) the firm is primarily classified in; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; or (3) a small organization that is any not-for-profit enterprise which is independently owned and

vacating the rule, today's action to delay the compliance date for one year becomes moot. This is because vacature of the emission standards would as a practical matter vacate the compliance date for those standards.

operated and is not dominant in its field.

Because the Agency has made a "good cause" finding that this action is not subject to notice-and-comment requirements under the Administrative Procedure Act or any other statute (see Part Two, Section II), it is not subject to the regulatory flexibility provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

III. Executive Order 13045: "Protection of Children From Environmental Health Risks and Safety Risks'

"Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) applies to any rule that: (1) Is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency. This final rule is not subject to the Executive Order because it is not economically significant as defined in Executive Order 12866. Furthermore, the Agency does not have reason to believe that environmental health or safety risks addressed by this action present a disproportionate risk to children.

IV. Executive Order 12898: Environmental Justice

Executive Order 12898, "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Population" (February 11, 1994), is designed to address the environmental and human health conditions of minority and low-income populations. EPA is committed to addressing environmental justice concerns and has assumed a leadership role in environmental justice initiatives to enhance environmental quality for all citizens of the United States. The Agency's goals are to ensure that no segment of the population, regardless of race, color, national origin, income, or net worth bears disproportionately high and adverse human health and environmental impacts as a result of EPA's policies, programs, and activities. In response to Executive Order 12898, and to concerns voiced by many groups outside the Agency, EPA's Office of Solid Waste and Emergency Response (OSWER) formed an Environmental Justice Task Force to analyze the array of environmental justice issues specific to waste programs and to develop an overall strategy to identify and address these issues (OSWER Directive No. 9200.3–17). We have no data indicating that today's final rule would result in disproportionately negative impacts on minority or low income communities.

V. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $100 million or more in any single year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

EPA has determined that this rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and tribal governments, in the aggregate, or the private sector in any single year. The final rule may result in modified annualized incremental costs from those presented in the Assessment[2], due primarily to baseline adjustments over the one year extension period. However, no significant cost adjustments are anticipated. Because the Agency has made a "good cause" finding that this action is not subject to notice and comment requirements under the Administrative Procedure Act or any other statute (see Part Two, Section II of this action), it is not subject to sections 202 and 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4).

VI. Executive Order 13132: Federalism

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" are defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

This final rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in the Order. Thus, Executive Order 13132 does not apply to this rule.

VII. Executive Order 13175: Consultation and Coordination with Tribal Governments

Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 6, 2000), requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes."

---

[2] "Assessment of Potential Costs, Benefits, and Other Impacts of the Hazardous Waste Combustion MACT Standards: Final Rule," U.S. EPA, July 1999.

This final rule does not have tribal implications. It will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in the Order. Today's rule will not significantly or uniquely affect the communities of Indian tribal governments, nor impose substantial direct compliance costs on them.

VIII Executive Order 13211: Energy Impact Analysis

Executive Order 13211, "Actions Concerning Regulations That Affect Energy Supply, Distribution, or Use" (May 18, 2001), addresses the need for regulatory actions to more fully consider the potential energy impacts of the proposed rule and resulting actions. Under the Order, agencies are required to prepare a Statement of Energy Effects when a regulatory action may have significant adverse effects on energy supply, distribution, or use, including impacts on price and foreign supplies. Additionally, the requirements obligate agencies to consider reasonable alternatives to regulatory actions with adverse affects and the impacts the alternatives might have upon energy supply, distribution, or use.

Today's final rule is not likely to have any significant adverse impact on factors affecting energy supply. We believe that Executive Order 13211 is not relevant to this action.

IX. Paperwork Reduction Act

This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Because there are no paperwork requirements as part of this final rule, we are not required to prepare an Information Collection Request in support of today's action.

X. National Technology Transfer and Advancement Act of 1995

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Public Law 104–113, section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through the Office of Management and Budget, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This final rulemaking does not involve technical standards; thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

XI. The Congressional Review Act (5 U.S. C. 801 et seq., as Added by the Small Business Regulatory Enforcement Fairness Act of 1996)

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing Agency to make a rule effective sooner than otherwise provided by the CRA if the Agency makes a good cause finding that notice and public procedure is impracticable, unnecessary, or contrary to public interest (5 U.S.C. 808(2)). As stated previously, EPA has made such a good cause finding. We have established an effective date of December 6, 2001.

EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 63

Environmental protection, Air pollution control, Hazardous substances, Reporting and recordkeeping requirements.

Dated: November 29, 2001.

Christine Todd Whitman,

Administrator.

For the reasons set out in the preamble, title 40, Chapter I of the Code of Federal Regulations is amended as follows:

PART 63—NATIONAL EMISSIONS STANDARDS FOR HAZARDOUS AIR POLLUTANTS FOR SOURCE CATEGORIES

1. The authority citation for part 63 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

2. Section 63.1206 is amended by:

a. Revising paragraphs (a)(1), (a)(2)(ii), and (a)(4).

b. Revising paragraphs (b)(6)(i), (b)(7)(i)(B), and (b)(7)(ii)(B).

The revisions read as follows:

§ 63.1206 When and how must you comply with the standards and operating requirements?

(a) * * * (1) *Compliance date for existing sources.* You must comply with the standards of this subpart no later than the compliance date, September 30, 2003, unless the Administrator grants you an extension of time under § 63.6(i) or § 63.1213.

(2) * * *

(ii) For a standard in this subpart that is more stringent than the standard proposed on April 19, 1996, you may achieve compliance no later than September 30, 2003 if you comply with the standard proposed on April 19, 1996 after September 30, 1999. This exception does not apply. however, to new or reconstructed area source hazardous waste combustors that become major sources after September 30, 1999. As provided by § 63.6(b)(7), such sources must comply with this subpart at startup.

(4) *Early compliance.* If you choose to comply with the emission standards of this subpart prior to September 30, 2003, your compliance date is the date you postmark the Notification of Compliance under § 63.1207(j)(1).

(b) * * *

(6) * * *

(i) If a DRE test performed after March 30, 1999 is acceptable as documentation of compliance with the DRE standard, you may use the highest hourly rolling average hydrocarbon level achieved during those DRE test runs to document compliance with the hydrocarbon standard. An acceptable DRE test is a test that was used to support successful issuance or reissuance of an operating permit under part 270 of this chapter.

* * * * *

(7) * * *

(i) * * *

(B) You may use DRE testing performed after March 30, 1999 for purposes of issuance or reissuance of a RCRA permit under part 270 of this chapter to document conformance with the DRE standard if you have not modified the design or operation of the source since the DRE test in a manner that could affect the ability of the source to achieve the DRE standard.

(ii) * * *

(B) You may use DRE testing performed after March 30, 1999 for purposes of issuance or reissuance of a RCRA permit under part 270 of this chapter to document conformance with

the DRE standard in lieu of DRE testing during the initial comprehensive performance test if you have not modified the design or operation of the source since the DRE test in a manner that could affect the ability of the source to achieve the DRE standard.

* * * * *

3. Section 63.1207 is amended by:

a. Revising paragraph (c)(2)(i)(A).

b. Revising paragraph (l) introductory text by designating the text after the heading as (l)(1) and revising newly designated paragraph (l)(1).

The revision read as follows:

§ 63.1207 What are the performance testing requirements?

* * * * *

(c) * * *

(2) * * *

(i) * * *

(A) Initiated after March 30, 1999;

* * * * *

(l) Failure of performance text—(1) *Comprehensive performance test.* The provisions of this paragraph do not apply to the initial comprehensive performance test if you conduct the test prior to September 30, 2003 (or a later compliance date approved under § 63.6(i)).

* * * * *

[FR Doc. 01–30267 Filed 12–5–01; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[TX–002; FRL–7113–6]

Clean Air Act Full Approval of Operating Permits Program; State of Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is promulgating full approval of the Operating Permit Program submitted by the Texas Natural Resource Conservation Commission (TNRCC or Commission) based on the revisions submitted on June 12, 1998, and June 1, 2001, which satisfactorily address the program deficiencies identified in EPA's June 7, 1995, and June 25, 1996, Interim Approval (IA) Rulemakings. *See* 60 FR 30037 and 61 FR 32693. The TNRCC revised its program to satisfy the conditions for full approval, and EPA proposed full approval in the **Federal Register** on October 11, 2001 (66 FR 51895). This notice only takes action on issues related to correcting interim approval issues. We will address other issues at a later date as described in sections V.C and V.D of this document.

EFFECTIVE DATE: This rule is effective on November 30, 2001.

ADDRESSES: Copies of documents relevant to this action are available inspection during normal business hours at the following locations. Anyone wanting to examine these documents should make an appointment with the appropriate office at least two days in advance.

Environmental Protection Agency, Region 6, Air Permitting Section (6PD–R), 1445 Ross Avenue, Suite 700, Dallas, Texas 75202–2733.

Texas Natural Resource Conservation Commission, Office of Air Quality, 12124 Park 35 Circle, Austin, Texas 78753.

FOR FURTHER INFORMATION CONTACT: Mr. Stanley M. Spruiell, Air Permitting Section (6PD-R), EPA, Region 6, 1445 Ross Avenue, Suite 700, Dallas, Texas 75202–2733, telephone (214) 665–7212 or e-mail at *spruiell.stanley@epa.gov*.

SUPPLEMENTARY INFORMATION: Throughout this document "we," "us," or "our" means EPA.

III. What Is Our Response to Comments?
IV. Did Texas Submit Other Title V Program Revisions?
V. What is Involved in This Final Action?
VI. What is the Effective Date of EPA's Full Approval of the Texas Title V Program?
VII. Administrative Requirements

I. What Is the Operating Permit Program?

Title V of the Clean Air Act (the "Act") Amendments of 1990 required all States to develop Operating Permit Programs that meet certain Federal criteria. In implementing the title V Operating Permit Programs, permitting authorities require certain sources of air pollution to obtain permits that contain all applicable requirements under the Act. The focus of the title V Operating Permit Program is to facilitate compliance and improve enforcement by issuing each source a permit that consolidates all of the applicable requirements of the Act into a federally enforceable document. This consolidation of all applicable requirements enables the source, the public, and the permitting authority to readily determine which of the Act's requirements apply and how compliance with those requirements is determined.

Sources required to obtain an operating permit under this program include "major" sources of air pollution as defined by title V and certain other sources specified in the Act or in EPA's implementing regulations. This includes all sources regulated under the acid rain program, regardless of size, which must obtain operating permits. Examples of major sources include those that have the potential to emit 100 tons per year (tpy) or more of volatile organic compounds (VOC), carbon monoxide (CO), lead, sulfur dioxide, nitrogen oxides (NO_X), or particulate matter (PM–10); those that emit 10 tpy of any single hazardous air pollutant (HAP) specifically listed under the Act; or those that emit 25 tpy or more of a combination of HAP. In areas that are not meeting the National Ambient Air Quality Standards for ozone, CO, or PM–10, major sources are defined by the gravity of the nonattainment classification. For example, in ozone nonattainment areas classified as "serious," major sources include those with the potential of emitting 50 tpy or more of VOC or NO_X.

II. What Is Being Addressed in This Document?

Where a title V Operating Permit Program substantially, but not fully, met the criteria outlined in the implementing regulations codified at 40 CFR part 70, we granted IA contingent on the State revising its program to correct the deficiencies. Because Texas's Operating Permit Program substantially, but not fully, met the requirements of part 70, we granted a source category-limited IA to the program in a rulemaking published on June 25, 1996 (61 FR 32693). The IA notice stipulated numerous conditions that had to be met in order for the State's program to receive full approval. Texas submitted revisions to its interim approved Operating Permit Program dated June 12, 1998, and June 1, 2001. Texas also submitted supplementary information to EPA on August 22, 2001, August 23, 2001, and September 20, 2001. On November 5, 2001, EPA received a Statement by the Attorney General of Texas stating that the laws of Texas provide adequate authority to carry out all aspects of the program.

On October 11, 2001 (66 FR 51895), we proposed full approval of Texas's title V Operating Permits Program based on our determination that Texas had corrected the IA deficiencies identified in our June 7, 1995 and June 25, 1996 actions. On November 13, 2001, we received comments on our proposal. Our response to the comments are in section III of this action.

In today's action, we are promulgating final full approval of the Texas Operating Permits Program based upon our determination that Texas has corrected the deficiencies identified in the IA rulemaking. We are approving revisions which the TNRCC adopted October 15, 1997 (submitted June 12, 1998) and May 9, 2001 (submitted June 1, 2001). We will take appropriate action on the remaining provisions of the June 1, 2001, submittal in a separate **Federal Register** action. We are also not taking action on issues unrelated to correcting IA issues. We will address these issues at a later date as described in sections V.C and V.D of this notice.

III. What Is Our Response to Comments?

On November 13, 2001, we received two comment letters on the proposed full approval of the Texas program. We received comments from Public Citizen, on behalf of the Public Citizen's Texas Office, Lone Star Chapter of the Sierra Club, Environmental Defense, Citizens for Health Growth, Galveston Houston Association for Smog Prevention, Neighbors for Neighbors, Quality of Life El Paso, Clean Water Action, Texas Center for Policy Studies, and the law firm of Lowerre & Kelly (collectively referred to as Public Citizen). We also received comments from the law firm of Baker Botts, L.L.P., on behalf of the Texas Industry Project.

Below is our response to the comments received on the proposed full approval of the Texas Operating Permits program. In this notice, we are only addressing the comments which relate to our determination that Texas has corrected the IA deficiencies in its title V program. We also received comments which relate to (and in many cases are the same as) comments the we received from citizens in response to our **Federal Register** Notice published December 11, 2000. Because these comments are not related to the correction of IA deficiencies, they will be addressed in a separate **Federal Register** action as described in section V.C of this preamble. In addition, we also received comments not related to the correction of IA deficiencies and which were not raised in response to the December 11, 2000 **Federal Register** notice. These issues will be handled as described in section V.D.

A. Comment A—EPA Failed To Determine Whether Texas's Current Operating Permits Program Complies With Part 70 and Title V

Public Citizen states that since receiving IA, Texas has completely revised its operating permits program. However, EPA has never reviewed these changes to determine whether the interim program that Texas has been running substantially complies with the requirements of part 70. Public Citizen contends that EPA is proposing to grant Texas full approval of its federal operating program without ever analyzing whether or not Texas current program actually meets the minimum requirements of part 70. Public Citizen does not agree with EPA's position to only look narrowly at whether the problems in the 1996 program have been remedied.

Public Citizen believes that, in order to be granted full approval, EPA must evaluate whether Texas's entire program meets the requirements of part 70 and title V and that EPA's notice of proposed approval indicates that such an evaluation has not been undertaken. 66 FR 51895, 51896 (October 11, 2001). Public Citizen does not believe that EPA can turn a blind eye to elements of the program which were not raised as interim deficiency issues and which do not comply with part 70. Public Citizen realizes that EPA is proposing to look at the additional elements of the current program after full approval is granted; however, they believe that EPA has a duty to ensure that Texas's program meets statutory and regulatory requirements before approval can be granted. For the reasons noted below, Public citizen believes that Texas's program does not comply with part 70 and that full approval should be denied.

EPA Response to Comment A

We are aware that issues other than those listed in the June 25, 1996, IA exist in the Texas program and that the Texas regulations have undergone changes since 1996 that EPA has not approved. We agree that these issues must be addressed and that Texas must submit all changes made since 1996 to EPA for review and approval. For the reasons discussed below, however, we disagree that limiting our review to correction of IA deficiencies prohibits us from granting Texas full program approval at this time.

In 1990, Congress amended the Clean Air Act, 42 U.S.C. 7401 *et seq.*), by adding title V, 42 U.S.C. 7661 to 7661f, which requires certain air pollutant emitting facilities, including "major source[s]" and "affected source[s]," to obtain and comply with operating permits. *See* 42 U.S.C. 7661a(a). Title V is intended to be administered by local, state or interstate air pollution control agencies, through permitting programs that have been approved by EPA. *See* 42 U.S.C. 7661a(a). The EPA is charged with overseeing the State's efforts to implement an approved program, including reviewing proposed permits and vetoing improper permits. *See* 42 U.S.C. 7661a(i) and 7661d(b). Accordingly, title V of the Act provides a framework for the development, submission and approval of state operating permit programs. Following the development and submission of a state program, the Act provides two different approval options that EPA may utilize in acting on state submittals. *See* 42 U.S.C. 7661a(d) and (g). Pursuant to section 502(d), EPA "may approve a program to the extent that the program meets the requirements of the Act * * *" The EPA may act on such program submittals by approving or disapproving, in whole or in part, the state program. An alternative option for acting on state programs is provided by the IA provision of section 502(g). This section states: "[i]f a program * * * substantially meets the requirements of this title, but is not fully approvable, the Administrator may by rule grant the program interim approval." This provision provides EPA with the authority to act on State programs that substantially, but do not fully, meet the requirements of title V and part 70. Only those program submittals that meet the requirements of eleven key program areas are eligible to receive IA. *See* 40 CFR 70.4(d)(3)(i)–(xi). Finally, section 502(g) directs EPA to "specify the changes that must be made before the program can receive full approval." 42 U.S.C. 7661a(g); 40 CFR 70.4(e)(3). This explicit directive encompasses another, implicit one: once a state corrects the specified deficiencies then it will be eligible for full program approval. The EPA believes this is so even if deficiencies have been identified sometime after final IA, either because the deficiencies arose after EPA granted IA or, if the deficiencies existed at that time, EPA failed to identify them as such in proposing to grant IA.

Thus, an apparent tension exists between these two statutory provisions. Standing alone, section 502(d) appears to prevent EPA from granting a state operating permit program full approval until the state has corrected all deficiencies in its program no matter how insignificant, and without consideration as to when such deficiency was identified. Alternatively, section 502(g) appears to require that EPA grant a state program full approval if the state has corrected those issues that the EPA identified in the final IA. The central question, therefore, is whether Texas by virtue of correcting the deficiencies identified in the final IA is eligible at this time for full

approval, or whether Texas must also correct any new or recently identified deficiencies as a prerequisite to receiving full program approval.

According to settled principles of statutory construction, statutory provisions should be interpreted so that they are consistent with one another. *See Citizens to Save Spencer County* v. *EPA*, 600 F.2d 844, 870 (D.C. Cir. 1979). Where an agency encounters inconsistent statutory provisions, it must give maximum possible effect to all of the provisions, while remaining within the bounds of its statutory authority. *Id.* at 870–71. Whenever possible, the agency's interpretation should not render any of the provisions null or void. *Id.* Courts have recognized that agencies are often delegated the responsibility to interpret ambiguous statutory terms in such a fashion. *See Chevron U.S.A., Inc.* v. *Natural Resources Defense Council, Inc.*, 467 U.S. 837, 845 (1984). Harmonious construction is not always possible, however, and furthermore should not be sought if it requires distorting the language in a fashion never imagined by Congress. *Citizens to Save Spencer County*, 600 F.2d at 870.

In this situation, in order to give effect to the principles embodied in title V that major stationary sources of air pollution be required to have an operating permit that conforms to certain statutory and regulatory requirements, and that operating permit programs be administered and enforced by state permitting authorities, the appropriate and more cohesive reading of the statute recognizes EPA's authority to grant Texas full approval in this situation while working simultaneously with the State, in its oversight capacity, on any additional problems that were identified. To conclude otherwise would disrupt the current administration of the state program and cause further delay in Texas's ability to issue operating permits to major stationary sources. A smooth transition from IA to full approval is in the best interest of the public and the regulated community and best reconciles the statutory directives of title V.

Furthermore, requiring the State to fix any deficiencies that may exist and that have been identified in the past year to receive full approval runs counter to the established regulatory process that is already in place to deal with newly identified program deficiencies. Section 502(i)(4) of the Act and 40 CFR 70.4(i) and 70.10 provides EPA with the authority to issue notices of deficiency ("NODs") whenever EPA makes a determination that a permitting authority is not adequately administering or enforcing a part 70 program, or that the State's permit program is inadequate in any other way. Consistent with these provisions, in its NOD, EPA will specify a reasonable time frame for the permitting authority to correct any identified deficiencies. The Texas title V IA expires on December 1, 2001. This deadline does not provide adequate time for the State to correct any deficiencies that may be identified at this time prior to the expiration of IA. Allowing the State's program to expire because of issues identified as recently as March 2001 will cause disruption and further delay in the issuance of permits to major stationary sources in Texas. As explained above, we do not believe that title V requires such a result. Rather, the appropriate mechanism for dealing with additional deficiencies that are identified sometime after a program received IA but prior to being granted full approval is a notice of program deficiency or administrative deficiency as discussed herein. This process provides the State an adequate amount of time after such findings to implement any necessary changes without unduly disrupting the entire state operating permit program. As a result, addressing newly identified problems separately from the full approval process will not cause these issues to go unaddressed. To the contrary, Texas will be placed on notice that it must promptly correct the non-IA deficiencies within a specified time period or face the imposition of sanctions and disapproval of its program. Furthermore, because Texas is also required to submit for review and approval all changes that it has made to its title V program since we granted IA, EPA will also disapprove any program revisions that are inconsistent with part 70 through formal notice and comment rulemaking.

B. Comment B—Lack of Sufficient Attorney General (AG) Statement

Public Citizen contends that in the preamble to Texas's 2001 revisions to its program, Texas stated that it would provide an AG Opinion with its submittal package for full approval that would address such issues as Texas Audit Privilege Act.[1] Likewise, in Part I of Texas's Submittal Package, Texas stated that "a legal opinion from the Office of the AG (AG) will be forwarded as a supplement to this submittal after the end of the 2001 Texas Legislative Session." Public Citizen also asserts that Texas had not, however, submitted an AG statement at the time EPA proposed full approval of Texas's program. Public Citizen contends that, in fact, Texas did not file an AG statement with EPA until November 8, 2001, five days before the end of the public comment period on EPA's proposed full approval, and that there was no notice to the public that such statement was available for comment.

Because an AG statement was not produced prior to EPA's proposed full approval of Texas's program, Public Citizen claims that EPA cannot possibly have had sufficient information to determine that Texas's program complied with the requirements of part 70. Likewise, Public Citizen contends that because an AG statement was not provided until five days before the close of the comment period, the public has not had an adequate opportunity to comment on the opinion.

Public Citizen also asserts that there were issues that should have been addressed in the AG statement, such as the Sunset legislation (House Bill 2912), as well as other statutes or regulations adopted by Texas since IA.

Furthermore, because the statement "incorporates" earlier AG statements, Public Citizen contends that it is impossible to determine exactly what is included in this certification and the statement is so vague that it is difficult to determine what authority is being certified. For example, Public Citizen refers to Section IV of the AG Statement which states that state law provides authority to incorporate monitoring consistent with 40 CFR 70.6.[2] It goes on, however, to state that Texas has authority to incorporate monitoring consistent with 40 CFR 70.6(a)(3)(i)(B). Public Citizen asserts that the Texas's program is flawed in that it does not include monitoring "sufficient to assure compliance" as required by 40 CFR 70.6(c)(1), and that the AG statement does not even address this issue.

Likewise, Public Citizen contends that the statement's analysis of SB766 is flawed. First, Public Citizen contends that the AG argues that Section 12 of SB766 does not impact the enforceability of title V permits because it only excuses modifications which occurred before March 1, 1999 and Texas's operating permits program did not include minor new source review conditions until 2001. Public Citizen contends that what the AG fails to state is that each day of operation after modification without the required permit is an ongoing violation.

[1] The EPA is unaware of such a statement in the preamble to Texas's Chapter 122 revisions. The TNRCC, however, did agree to address amnesty provisions of SB 766 in an AG statement. 26 TexReg 3747, 3758–59 (May 25, 2001).

[2] This provision is actually in Section VI of the AG statement.

Therefore, Public Citizen contends that facilities covered by title V may be in continuous violation for modifications made prior to March 1, 1999. Public citizen also argues that the statement argues that Section 12 does not excuse violations of PSD or Nonattainment NSR requirements. Public Citizen contends that while the AG crafts an argument based on legislative history, the AG will not be the final authority on whether or not Section 12 applies to PSD or Nonattainment NSR violations. Public Citizen also contends that the courts will have to decide this issue. Finally, Public citizen believes that the statement misstates important facts. For example, the statement says that applying for *and* obtaining a Voluntary Emission Reduction Permit (VERP) permit is one of the preconditions of Section 12's applicability. Public Citizen argues that SB766 only requires, however, that sources apply for a VERP permit to be eligible for Section 12's immunity and that the statute does not require that such a permit be issued. Public Citizen believes SB766 impermissibly limits Texas's enforcement authority.

EPA Response to Comment B

As stated in our response to Comment A above, EPA believes that Texas only needs to correct the IA deficiencies in order for EPA to grant the State full program approval. As such, for the purpose of this approval, the revised AG statement must only address issues related to the correction of IA deficiencies. The EPA will address the AG discussion of SB 766 in its response to the Citizen Comment letters, as explained in section V.C. Any potential flaws in Texas's program that EPA did not identify as IA deficiencies will also be addressed as set forth in Sections V.C and D.

The EPA believes that it did have sufficient information to propose full approval even though it had not yet received the revised AG statement. The EPA received three previous AG opinions (1993, 1996, and 1998) stating that the laws of Texas provide adequate authority to carry out all aspects of the program. Furthermore, EPA worked closely with TNRCC to correct the IA deficiencies, and was well aware of the changes that were made by TNRCC regarding the IA deficiencies prior to proposing full approval. The EPA did not find any problems in the previous AG statements relating to TNRCC's authority to correct the IA deficiencies to meet the part 70 requirements. In fact, all of the IA deficiencies that EPA identified were corrected by regulatory changes. Based on the three prior AG statements, EPA believed that these changes were within the authority of TNRCC to promulgate. Furthermore, Public Citizen did not raise any issues regarding TNRCC's authority to revise its regulations to correct the IA deficiencies or that the revisions were beyond the scope of TNRCC's authority in its comments. Therefore, EPA believes that it did have sufficient information to propose full approval even though it had not yet received the revised AG statement. For the same reasons, EPA also believes that although Public Citizen had less than 30 days to review the AG statement, this does not prevent EPA from promulgating final approval of the Operating Permits Program.

We also believe, contrary to Public Citizen's assertion, that one can determine what authority is included in the AG statement. For example, Public Citizen claims that the AG states that state law provides authority to incorporate monitoring consistent with 40 CFR 70.6. However, Public Citizen asserts that the Texas's program is flawed in that it does not include monitoring "sufficient to assure compliance" as required by 40 CFR 70.6(c)(1), and that the AG statement does not even address this issue.

40 CFR 70.4(b)(3) provides that the AG statement must include citations to administrative regulations that demonstrate adequate authority to carry out the program. In section VI of the AG statement (Monitoring, Recordkeeping and Reporting), the Texas AG cites to several provisions of the Texas Administrative Code which relate to monitoring. These regulations include 30 TAC 122.142(c) & (h), and 30 TAC Chapter 122, Subchapters G (Periodic Monitoring—122.600 *et seq.*) and H (Compliance Assurance Monitoring—122.700 *et seq.*). Sections 122.142(c) and (h) require permits to contain periodic monitoring and compliance assurance monitoring. Subchapters G and H implement the periodic monitoring and compliance assurance monitoring requirements. Therefore, one can determine what authority is included in the AG statement, and the AG statement addresses the issue of monitoring sufficient to determine compliance. The issue of whether Texas's periodic monitoring regulations and compliance assurance monitoring regulations are deficient will be addressed in our response to the citizen comment letters, as set forth in section V.C. Therefore, we do not agree with these comments.

C. Comments on Minor New Source Review (MNSR)/Part 70 Integration

The EPA received six comments pertaining to minor new source review (MNSR)/Part 70 Integration. The comments pertain to (1) Incorporation of MNSR, (2) Timing of incorporation on minor new source review requirements, (3) Procedure for incorporation of MNSR requirements, (4) Lack of sufficient monitoring, (5) Lack of specificity in MNSR permits, and (6) TNRCC's schedule for incorporating MNSR requirements into existing title V permit and authorizations.

1. Comment C1—Incorporation of Minor New Source Review (MNSR)

Public Citizen acknowledged that Texas has included Chapters 106 and 116 as applicable requirements. While Chapters 106 and 116 are the chapters that provide for preconstruction permits, Public Citizen is concerned that Texas's language is not as clear as the part 70 requirement that the definition of applicable requirement include "any term or condition of any preconstruction permits issued pursuant to regulations approved or promulgated through rulemaking under title I, including parts C or D, of the Act." 40 CFR 70.2. Public Citizen believes that EPA should explain whether and how the Texas definition of applicable requirement is consistent with the part 70 definition and includes both past and future minor new source review requirements. In addition, because of the facial discrepancy between the Texas regulations and the part 70 definition, Public Citizen believes that the Texas AG should provide a legal opinion affirming this understanding.

EPA Response to Comment C1

As the commenter noted, Chapters 106 and 116 implement Texas's preconstruction permit program. These chapters are part of the definition of applicable requirements. Texas's regulations also defines "applicable requirement" to include the terms and conditions of all preconstruction permits. The definition of "applicable requirement" in Section 122.10(2)(H) now provides that an applicable requirement includes:

> (H) All of the requirements of Chapter 106, Subchapter A of this title (relating to permits by rule), or Chapter 116 of this title (relating to Control of Air Pollution by Permits for New Construction or Modification) *and any term or condition of any preconstruction permit*. (Emphasis added).

Furthermore, Section 122.231(c) provides that:

The executive director shall institute proceeding to reopen permits * * * to incorporate the requirements of Chapter 106, Subchapter A * * * or Chapter 116 of this title *or any term or condition of any preconstruction permit.*" (Emphasis added).

Thus, the definition for "applicable requirement" and the regulations for incorporating MNSR permits include the terms and conditions of preconstruction permits, and includes the Texas regulations which implement Texas's preconstruction review program. The preconstruction review program in Chapters 106 and 116 includes MNSR. Therefore, EPA believes that the definition of applicable requirement in 30 TAC 122.10(2)(H) includes any term or condition of any preconstruction permit issued pursuant to regulations approved or promulgated through rulemaking under title I, including parts C or D, of the Act and is consistent with part 70.

We disagree with Public Citizen's contention that an AG statement must confirm this understanding. State regulations must be consistent with the part 70 regulations, but they do not have to track the exact language of part 70. The EPA believes that Section 122.10(2)(H) is consistent with part 70 definition, and therefore disagrees with this comment.

2. Comment C2—Timing of Incorporation of MNSR Requirements

Public Citizen asserts that under Texas's proposal, MNSR requirements will not be incorporated before or upon transition to full approval. In fact, Public Citizen argues that some permits will not be reopened to include minor new source review permit terms and conditions for up to four years, or even up to renewal. Public Citizen also contends that Texas proposes to merely send notification to permit holders upon transition to full approval that their permits will have to be reopened at some time in the future to include minor new source review.

Further, Public Citizen contends that Texas's program does not assure that all permits issued by the State after full approval would include minor new source review permit terms and conditions. Public Citizen argues that the state is allowing those permits that went out for public notice prior to June 3, 2001 to be issued without incorporating minor new source review permit terms and conditions. Public Citizen contends that this violates 40 CFR 70.4(d)(3)(ii)(D) and should not be permitted.

EPA Response to Comment C2

We disagree that the procedures Texas will use to incorporate MNSR requirements into title V permits violates part 70. Texas will reopen its title V permits consistent with 40 CFR 70.4(d)(3)(ii)(D). The September 20, 2001 agreement, as set forth in the **Federal Register**, describes the process for reopening permits to incorporate MNSR requirements. 66 FR at 51897.

The reopening procedure (which begins no later than December 1, 2001) consists of notification of title V permit holders as follows: (1) Direct notification in writing to each individual permit holder no later than December 1, 2001; (2) during stakeholder meetings; (3) through the TNRCC website; and (4) another follow-up letter which will be sent to each permit holder when it is time to reopen the permit holder's permit to incorporate the MNSR permits and permits by rule (PBR).[3]

The procedure provides that all title V permits will be reopened to incorporate MNSR. Permits nearing renewal (*i.e.*, those with less than two years remaining until renewal) will be reopened at renewal to incorporate MNSR. Permits not close to renewal (*i.e.*, those with two or more years remaining until renewal (which includes permits issued prior to June 3, 2001)) will be reopened within three to four years initial issuance to incorporate MNSR. 66 FR at 51898.

This process is consistent with the requirement in 40 CFR 70.4(d)(3)(ii)(D) that a state "institute proceedings to reopen part 70 permits," and provides for a reasonable transition time for a State to reopen title V permits to incorporate MNSR. The reopening process that TNRCC described in its September 20, 2001 letter, and is described above, represents an agreement between EPA and TNRCC on how proceedings will be instituted to reopen all title V permits and ensure that they will have the MNSR requirements. This agreement meets the requirements of part 70 and ensures that all title V permits will be reopened in a timely manner to incorporate MNSR. Furthermore, the requirements of the MNSR permits are enforceable by Texas and EPA even if they have not yet been incorporated into the title V permit. Therefore, we do not agree with this comment.

[3] Although the September 20, 2001 letter from Texas did not reference PBRs as to this issue, the letter did state that PBRs will be cited to the lowest level of citation necessary to make clear what requirements apply to the facility. Furthermore, PBRs also fall under Texas's MNSR program.

3. Comment C3—Procedure for Incorporation of MNSR Requirements

Public Citizen alleges the following:

First, Texas is not proposing to use the reopening provisions of 40 CFR 70.7(f) and (g) in order to incorporate minor new source review requirements into its existing title V permits, but instead will utilize its minor revision process. Public Citizen contends that part 70 only allows the use of streamlined procedures during the interim period. Because Texas did not adopt provisions during the IA period to ensure that MNSR would be properly incorporated into all title V permits upon full approval, Texas must follow the reopening provisions of 40 CFR 70.7(f) and (g) to incorporate MNSR into title V permits.

Second, Public Citizen argues that the 40 CFR 70.4(d)(3)(ii)(D) requirement that states "institute proceedings to reopen permits * * * upon or before granting of full approval" requires the immediate submission of applications or updates to pending applications and does not allow for the delay provided by Texas rules.

Third, Public Citizen argues that Texas is proposing to assume that applicants who have already certified compliance are in compliance with the minor new source review permit terms and conditions which are now applicable. Consequently, Public Citizen contends that Texas will not require an updated compliance certification to certify compliance with these permit terms and conditions, contrary to 40 CFR 70.5(c)(8) and 70.5(b) for compliance certifications and supplementary information.

EPA Response to Comment C3

In response to the first allegation, EPA disagrees that the streamlined procedures set forth in part 70 may only be used during the interim period, and that Texas must use the reopening provisions of 40 CFR 70.7(f) and (g) to incorporate MNSR into its existing title V permits. To the contrary, 40 CFR 70.4(d)(3)(ii)(D) specifies that the State must upon or prior to receiving full approval, "institute proceedings to reopen part 70 permits to incorporate excluded minor NSR permits * * * [and] * * * [s]uch reopenings need not follow full permit issuance procedures nor the notice requirement of § 70.7(f)(3), but may instead follow the permit revision procedure in effect under the State's approved part 70 program for incorporation of minor NSR permits." As described in our **Federal Register** notice proposing approval of the Texas Operating Permits Program,

Texas will institute proceedings to reopen its part 70 permits on or before full program approval and will use the provisions in 30 TAC 122.215 and 122.217 to incorporate the MNSR permits into existing title V permits, which is the permit revision procedure in effect under Texas's approved part 70 program. 66 FR 51897–98. Thus, for the reasons stated herein, EPA believes that Texas's procedures for reopening title V permits to incorporate MNSR is consistent with the requirements of part 70.

In response to the second allegation, EPA disagrees that 40 CFR 70.4(d)(3)(ii)(D) requires the immediate submission of applications or updates to pending applications. As previously discussed, this section requires a state to "institute proceedings to reopen part 70 permits" to incorporate MNSR *on or before a State receives full approval.* The TNRCC will institute proceedings to reopen previously issued title V permits and draft title V permits for which TNRCC issued or authorized the initiation of public notice prior to June 3, 2001. The TNRCC has stated that it will begin these proceedings no later than December 1, 2001. The TNRCC will accomplish this reopening through direct notification in writing to each individual permit holder, during stakeholder meetings, and through the TNRCC website. Another follow-up letter will be sent to each permit holder when it is time to reopen the permit holder's permit to incorporate the MNSR permits and PBRs. 66 FR at 41897–98. Thus, as required by part 70, TNRCC will have *instituted proceedings* to incorporate MNSR prior to full approval. Part 70 does not require that the reopening occur prior to full approval, just that the process begin.

In response to the third allegation, EPA disagrees that Texas will assume that applicants who have already certified compliance are in compliance with the MNSR permit terms and conditions which are now applicable. Furthermore, we believe that the allegation is consistent with of the September 20, 2001, agreement set forth in the October 11, 2001 **Federal Register** notice. 66 FR 51897–98. The process described in the agreement contains no provision which would allow Texas to assume the applicants who have already certified compliance are in compliance with the MNSR permit terms and conditions. To the contrary, 30 TAC 122.142(e) provides that if an emission unit is not in compliance with the applicable requirements (e.g., MNSR requirements) at time of permit issuance, the permit must contain a compliance schedule. Furthermore, Public Citizen's assertion is not consistent with the provisions in 30 TAC 122.146—Compliance Certification Terms and Conditions, which contains no provision which would allow Texas to assume the applicants who have already certified compliance are in compliance with the MNSR permit terms and conditions. Thus, we do not agree with these comments.

4. Comment C4—Lack of Sufficient Monitoring

Public Citizen alleges that Texas has stated that all minor new source review permits incorporated into title V permits will include monitoring that complies with 40 CFR 70.6(a)(3) and (c)(1). Public Citizen argues that those Texas operating permits that were issued or sent to public notice prior to June 3, 2001, clearly will not include adequate monitoring. Thus Public Citizen contends that these operating permits will not include all required applicable requirements or the monitoring sufficient to assure compliance with those requirements. Further, as discussed below, Public Citizen maintains that Texas's program does not provide for incorporation of sufficient monitoring into its title V permit. Public Citizen argues that Texas's program does not require that monitoring sufficient to assure compliance be incorporated into its title V permits. Further, Public Citizen contends that the provisions for incorporation of 40 CFR 70.6(a)(3) monitoring allow this monitoring to be incorporated in an untimely manner that does not provide for sufficient public participation. Public Citizen argues that Texas's program does not assure that adequate monitoring for minor new source review requirements will be incorporated into Texas permits.

EPA Response to Comment C4

The first allegation is that permits that were issued or sent to public notice prior to June 3, 2001 will not include all applicable requirements (*e.g.* MNSR is missing) and will not include all required monitoring. As described in the October 11, 2001 **Federal Register** notice, the TNRCC will reopen all title V permits which the TNRCC had authorized for public notice before June 3, 2001. Those permits which as of December 1, 2001, are two years or less before renewal will be reopened to incorporate MNSR no later than renewal. Permits for which renewal is longer than two years after December 1, 2001 will be reopened within three to four years of initial issuance, which is more expeditious than renewal. The September 20, 2001 agreement provides that all the MNSR permits include all monitoring, reporting and recordkeeping (MRR) requirements as required by part 70. 66 FR at 51898. Thus, Texas will add any necessary provisions to its title V permits to ensure that the requirements of part 70 concerning periodic monitoring (40 CFR 70.6(a)(3)(i)(B)) and monitoring sufficient to assure compliance as required by 40 CFR 70.6(c)(1) are met. It is the continuing responsibility of the source and permitting authority to ensure that a title V permit is not issued until it fully complies with the requirements of part 70. Therefore, we do not agree with this comment.

Public Citizen further alleges that Texas's program does not require that monitoring sufficient to assure compliance be incorporated into its title V permits. Under 30 TAC 122.142(c), each permit must contain periodic monitoring requirements that are designed to produce data that is representative of the emissions unit's compliance with applicable requirements. This is consistent with 40 CFR 70.6(c)(1) which provides that title V permits must contain "periodic monitoring sufficient to yield reliable data from the relevant time period that are representative of the source's compliance with the permit * * *" In addition, 30 TAC 122.142(b)(2)(B)(ii) provides that each emission unit in the permit must contain specific terms and conditions for monitoring requirements associated with the applicable requirement sufficient to ensure compliance with the permit. Therefore, we do not agree with this comment.

Finally, Public Citizen alleges that the Texas program does not provide for sufficient public participation when Texas incorporates monitoring requirements into its title V permits. As stated above, the September 20, 2001, agreement assures that Texas will reopen title V permits in a timely manner to incorporate MNSR and that the incorporation procedures are consistent with part 70. 66 FR at 51897–98. Finally, with regard to the public participation aspect of the comment, if Texas adds MRR when the permit is reopened, then Texas is not required to follow the public participation requirements of 70.7(f)(3) when it adds monitoring. However, if MRR is not included at this time, then Texas would be required to provide for public participation (see 40 CFR 70.7(e)(4)(i)). Therefore, we do not agree with this comment.

5. Comment C5—Lack of Specificity in MNSR Permits

Public Citizen alleges the following:

First, Texas is not requiring permittees to identify all applicable MNSR provisions, but will instead produce a list of all PBRs (one type of minor new source review authorization) developed before 1991. Permittees would then attach the list of PBRs to their title V permit and application and indicate that some of the authorizations on the list applied to them. Permittees would not be required to identify which specific authorizations applied to them until a later date. Public Citizen contends that this makes it impossible for the public to evaluate whether a permittee has correctly identified applicable requirements and will prevent the addition of required monitoring to assure compliance with the applicable pre-1991 PBRs.

Second, Texas will not require all MNSR authorizations to be incorporated into its title V permits. Only those authorizations listed on the unit attribute form will be required to be incorporated into Texas's title V permits.

Third, the Texas approach for incorporating MNSR permit terms and conditions and PBR into title V permits violates title V and part 70. Public Citizen argues that the statute and EPA regulations require title V permits to assure compliance with all applicable requirements, including enforceable emissions limitations and standards. For example, Public Citizen refers to section 504(c) which requires each permit to "set forth inspection, entry, monitoring, compliance certification, and reporting requirements to assure compliance with the permit terms and conditions." Public Citizen also contends that 40 CFR 70.2 defines applicable requirements to include "[a]ny term or condition of any preconstruction permits issued pursuant to regulations approved or promulgated through rulemaking under title I, including parts C or D, of the Act." Public Citizen also contends that section 70.6(a)(1) further requires that each permit shall include "emission limitations and standards, including those operational requirements and limitations that assure compliance with all applicable requirements at the time of permit issuance. Public Citizen contends that the permit shall specify and reference the origin of and authority for each term or condition, and identify any difference in form as compared to the applicable requirement upon which the term or condition is based." Similarly, Public Citizen contends that 40 CFR 70.6(a)(3) requires each operating permit to contain all monitoring and testing associated with applicable requirements, such as minor NSR permit terms and conditions.

Therefore, Public Citizen contends that the Texas approach for assuring compliance with minor NSR permit terms and conditions by identifying and cross-referencing the minor NSR permit by permit number, and PBRs by their Section number, fails to comply with the aforementioned requirements of title V and part 70. Public Citizen contends that the aforementioned provisions require the terms and conditions of minor NSR permits, including actual enforceable emissions limitations and standards, operational requirements, and monitoring, for example, to be identified in title V permits, an obligation that is not fulfilled by unhelpful cross-references to permit numbers or rule sections.

EPA Response to Comment C5

In response to the first allegation, in the September 20, 2001 agreement, as set forth in the October 11, 2001 **Federal Register** notice, the TNRCC agreed that each title V permit will state: (1) That the terms and conditions of MNSR permits and PBR identified and cross-referenced in the title V permit are included as applicable requirements;[4] (2) the MNSR permits and PBR are incorporated by reference into the title V permit by identifying its permit number or the PBR by its Section number; and (3) the terms and conditions of each MNSR permit and PBR are included in the title V permits and are subject to part 70 requirements. 66 FR at 51897. The September 20, 2001, agreement further ensures that TNRCC will ensure availability of all MNSR permits and files to the public. The table of contents to the title V permit will also indicate the location within the title V permit of each MNSR preconstruction authorization numbers (file numbers).[5] 66 FR at 51898.

In response to the second allegation, the September 20, 2001, agreement, as set forth in the October 11, 2001 **Federal Register** notice, requires *all* MNSR permits and PBR to be incorporated into title V permits. The September 20, 2001 agreement does not contain any provision which would limit Texas only to incorporating only those authorizations listed on the unit attribute form as alleged by Public Citizen.

In response to the third allegation, we do not agree that Texas's approach for incorporating MNSR permits and PBR violates title V and part 70. As stated above, all the title V permits will incorporate the necessary MRR which will assure compliance with the title V permit, including MNSR and PBR requirements. Texas's program provides for inspection, entry, monitoring, compliance certification, and reporting requirements. See 30 TAC 122.142—122.146. Furthermore, the September 20, 2001 agreement provides that under the incorporation by reference process, Texas must incorporate all terms and conditions of the MNSR permits and PBR, which would include emission limits, operational and production limits, and monitoring requirements. We therefore believe that the terms and conditions of the MNSR permits so incorporated are fully enforceable under the full approved title V program that we are approving in this action. We therefore do not agree with these comments.

6. TNRCC's Schedule for Incorporating MNSR Requirements Into Existing Title V Permit and Authorizations

Baker Botts, L.L.P., does not support TNRCC's schedule for incorporating MNSR requirements into existing title V permits. The commenter believes that such incorporation should take place no sooner than renewal of the operating permit.

EPA Response to Comment C6

As set forth in our response to Comment C2—Timing of Incorporation of MNSR requirements, Texas will reopen its title V permits as follows: permits nearing renewal (*i.e.*, those with less than two years remaining until renewal) will be reopened at renewal to incorporate MNSR. Permits not close to renewal (*i.e.*, those with two or more years remaining until renewal (which includes permits issued prior to June 3, 2001)) will be reopened within three to four years initial issuance to incorporate MNSR. 66 FR at 51898. This schedule provides for a reasonable transition time for a State to reopen title V permits to incorporate MNSR. Baker Botts'

[4] As previously stated, although the September 20, 2001 did not reference PBRs as to this issue, it did state that PBRs will be cited to the lowest level of citation necessary to make clear what requirements apply to the facility. PBRs also fall under Texas's MNSR program.

[5] The September 20, 2001 agreement does not mention a table of contents, as was indicated in the **Federal Register** notice. 66 FR at 51898. This was not part of the agreement because TNRCC was already including a table of contents in its title V permits which references attachments for preconstruction authorizations. The attachment lists the relevant preconstruction authorizations, including PBRs. Likewise, the reference to providing the entire permit file to the requestor in Items 4 and the modification procedures in Item 5 of the MNSR procedures (66 FR at 51898) were not included in the September 20, 2001 agreement. TNRCC will, of course, provide the entire permit file to anyone to requests it. As to Item 5, this relates to modification permit revision procedures, as required by its regulations.

proposal would delay this incorporation for permits with two or more years until renewal until the permit is renewed, thus further delaying the incorporation of MNSR requirements. The EPA believes that the commenter's approach is not consistent with part 70, and therefore disagrees with this comment.

D. Comment D—Emergency Provisions and TNRCC Upset/Maintenance Reporting Rules

Baker Botts, L.L.P. acknowledges that the TNRCC had removed its upset/maintenance reporting rules from its June 2001 submittal and is not proposing to use the upset/maintenance reporting rules to satisfy emergency provisions of 40 CFR part 70. As a result of TNRCC's actions, this deficiency no longer exists. However, Baker Botts also believes that the TNRCC's upset/maintenance reporting rules do not undermine the part 70 deviation reporting requirements. If a site's upset report previously submitted to TNRCC contains the information required for title V deviation reporting purposes, that report may be referenced in a site's deviation report; however, if a site has not already reported a deviation under sections 101.6 or 101.7, the Texas title V program requires the site to include the event in its next title V deviation repot. Thus, Baker Botts believes TNRCC's upset/maintenance reporting rules are not grounds for finding of deficiency.

EPA Response to Comment D

The EPA agrees that emergency provision deficiency has been corrected. However, Baker Botts claims that the upset/maintenance rules do not undermine part 70 deviation reporting requirements, and that the upset/reporting rules are not grounds for a finding of deficiency. The EPA did not state in its October 11, 2001 **Federal Register** notice that the upset/maintenance rules undermine Part 70 deviation reporting requirements, or that the upset/reporting rules are deficient. Therefore, this comment is beyond the scope of this action.

E. Comment E—Definition of "Major Source"

Public Citizen asserts that part 70 requires fugitive emissions for all sources subject to Clean Air Act section 111 and 112 standards to be included in the calculation to determine whether a source is "major." Public Citizen contends that Texas current definition of "major source" only requires inclusion of fugitives for source categories regulated under section 111 or 112 as of August 7, 1980.

Public Citizen states that Texas has not changed its regulations in response to this deficiency. The EPA's proposed approval acknowledges that Texas definition does not match the current requirement in 40 CFR 70.2. 66 FR 51895, 51899 (October 11, 2001). The fact that EPA has proposed to amend the regulation does not alter Texas's obligation to comply with it.

EPA Response to Comment E

Texas' definition of major source for category 27 reads as follows:

(xxvii) any stationary source category regulated under FCAA, § 111 (Standards of Performance for New Stationary Sources) or § 112 for which EPA has made an affirmative determination under FCAA, § 302(j) (Definitions).

On November 27, 2001, EPA revised the definition of "major source" for category 27 to read as follows:

(xxvii) Any other stationary source category, which as of August 7, 1980 is being regulated under section 111 or 112 of the Act.

66 FR 59161, 59166. Texas' regulation is consistent with the revised definition because both cover the same universe of sources. The Texas requirement to count fugitive emissions applies to sources "for which EPA has made an affirmative determination under FCAA section 302(j)" whereas the part 70 definition applies to sources which were "subject to section 111 or 112 standards promulgated as of August 7, 1980." Because, August 7, 1980, was the date of EPA's last "affirmative determination under section 302(j)" the Texas requirement is now consistent with the current requirements of both parts 70 and part 71. Therefore, EPA does not agree with this comment.

F. Comment F—Definition of "Title I Modification"

Public Citizen asserts that part 70 states that minor permit modification procedures may be used only for those permit modifications which "are not modifications under any provision of title I of the Act." 40 CFR 70.7 (e)(2)(i)(A)(5). Public Citizen further argues that part 70 states that off-permit changes may be made if certain conditions are met, including the requirement that the changes not be "modifications under any provision of title I of the Act." 40 CFR 70.4(b)(12).

Public Citizen states that in EPA's notice of proposed interim approval for Texas, EPA interpreted "title I modifications" to include minor new source review and pre-1990 National Emissions Standards for Hazardous Air Pollutant ("NESHAP") requirements. 60 FR 30037, 30041 (June 7, 1995). Public Citizen argues that because Texas defined title I modification to exclude changes reviewed under a minor new source review program or changes that trigger the application of NESHAPS established prior to the 1990 amendments, EPA found Texas's program deficient. *Id.*

Public Citizen maintains that Texas removed the definition of title I modification from its regulations in response to EPA's comments. They contend that Texas has clearly stated, however, that it maintains its interpretation that largely excludes modifications made pursuant to Texas's minor new source review program from the definition of title I modification. As a result Public Citizen argues that Texas is proposing to allow minor new source review authorizations and modifications to be incorporated into its title V permits through minor modification and off-permit procedures.

Public Citizen contends that "title I modifications" clearly include modifications under State minor new source review programs. Public Citizen refers to Section 110(a) of the Clean Air Act is clearly within title I of the Act. Further, Public Citizen contends that section 110(a)(2)(c) refers to "modifications" of minor new source review authorizations. Public Citizen contends that the interpretation adopted by EPA in the preamble to the 1994 proposal for revisions to part 70 constitutes the Agency's initial, definitive interpretation of "title I modification." 59 FR 44460, 44462 (Aug. 29, 1994). Accordingly, Public Citizen contends that EPA may only change such an interpretation pursuant to notice and comment rulemaking. *See* generally, *Paralyzed Veterans* v. *D.C. Arena*, 111 F.3d 579, 586 (D.C. Cir. 1997).

EPA Response to Comment F

As stated in proposal and in the June 7, 1995 **Federal Register** notice, we noted that at the time of interim approval Texas's definition of "title I modification" in Section 122.10 did not include changes reviewed under a minor source preconstruction review plan (MNSR), nor did it include changes that trigger the application of National Emission Standards for Hazardous Air Pollutants (NESHAP) established pursuant to section 112 of the Act prior to the 1990 Amendments. 60 FR at 30041. In the 1998 submittal, Texas deleted the definition of title I modification from Section 122.10. Since part 70 does not have a definition of title I modification, Texas's elimination of its definition of title I modification corrected the deficiency by removing

the possibility of a conflicting regulatory definition.

Thus, as to the adequacy of the Texas regulations, the commenter's assertions regarding the meaning and status of EPA's statements in the August 29, 1994 proposed Part 70 revisions, and the June 7, 1995 proposed approval concerning the definition of "Title I modification" have been rendered moot by Texas' removal of the definition from its regulations. It follows that there is no need for EPA to respond to the commenter's views regarding EPA's statements for the purpose of resolving a possible regulatory conflict. Moreover, to the extent that the commenter remains concerned about this issue due to the manner in which Texas has implemented its program, the commenter's generalized allegations that Texas maintains interpretations that are at odds with what the commenter believes EPA's interpretations are, or should be, such allegations lack sufficient specificity to require a response. If there are specific permits as to which the commenter believes Texas is implementing its program in a manner inconsistent with the requirements of applicable Federal law, it may of course present them to EPA for response.

G. Comment G—Fugitive Emissions in Applications

Public Citizen states that EPA noted in the June 7, 1995, notice of proposed IA that Texas did not require fugitive emissions to be included in permit applications in the manner required by 40 CFR 70.3. 60 FR 30037 (June 7, 1995). Public Citizen contends that Texas still does not require that complete permit applications include fugitive emissions. While Texas did adopt Section 122.132(e)(10), as indicated in the proposed full approval notice, Public Citizen contends that this provision does not ensure that applications and permits will include fugitive emissions. Public Citizen contends that Texas allows facilities to submit "abbreviated applications," which are required to include only: (1) Identifying information regarding the site and applicant, (2) certification by a responsible official and (3) any other information deemed necessary by the executive director. 30 TAC 122.132(c). Public Citizen contends that these applications do not require the submissions of fugitive emission information.

Similarly, Public Citizen contends that Texas's regulations provide for a "phased permit detail process." 30 TAC 122.131. Public Citizen contends that this process allows sites with 75 or more emission units in nonattainment areas, or with 150 or more emission units in attainment areas, to qualify for the phased permit detail process. Public Citizen contends that these sites are allowed to submit permit applications that include fugitive emission information and all other detailed information for only a portion of their emissions units. Public Citizen contends that the sites are then required to follow a schedule, included as a term and condition of the permit, for submitting the additional detailed information. 30 TAC 122.131(b).

Thus, Public Citizen contends that Texas's abbreviated application and phased permit detail process do not comply with Part 70's requirement that permit applications include fugitive emissions in the same manner as stack emissions. 40 CFR 70.3(d).

EPA Response to Comment G

Although TNRCC does allow facilities to submit an abbreviated application, the fact remains that the remaining information, including fugitive emissions information, is required for every operating permit. The TNRCC informs the facility when the remaining information needs to be submitted. 30 TAC 122.132(c) & 122.132(e)(10). This applies even if the "phased permit detail process" is followed. 30 TAC 122.131(b). The abbreviated application procedure was developed to allow TNRCC to develop the application submittal schedule without requiring the applicant to continually update and certify the detailed application information prior to the technical review of the permit. 26 TexReg at 3762. It does not make any difference that the abbreviated application does not contain fugitive emissions information so long as this information is submitted when requested by TNRCC and is available to the public when the draft permit goes out for public comment. A full application, including fugitive emissions information, is required prior to TNRCC issuing a draft permit. 30 TAC 122.132(c) & (e); 26 TexReg at 3762. Therefore, EPA does not agree with this comment.

H. Comment H—Inadequate Personnel and Funding

Public Citizen contends that EPA noted in the proposed approval that Texas had to provide complete projection of program costs for four years after approval was required for full approval. 66 FR 51895, 51902 (Oct. 11, 2001). Public Citizen argues that Section 70.4(b)(8) of EPA's regulations require states to submit a statement that adequate personnel and funding have been made available to develop, administer, and enforce the operating permit program. Public Citizen contends that this statement must include an estimate of the permit program costs for the first four years after approval and a description of how the state plans to cover those costs. 40 CFR 70.4(b).

Public Citizen further contends that Texas's supplemental "Statement of Adequate Personnel and Funding" submitted on August 22, 2001, acknowledges that the agency will face a funding shortfall for its operating permits program in 2003 unless the fees charged by the State are increased. The statement says, "staff will recommend to the Commission to raise the emissions fee to $30 per ton. Public Citizen contends that this increase is necessary to provide the funding to support the title V activities of the state and is contingent on approval by the Commission." Likewise, Public Citizen contends that the Texas Sunset Commission Staff Report on the TNRCC noted that the title V fund—the Clean Air Account—will have a $3.2 million shortfall by fiscal year 2003. Commenters believe that the State must commit to raising the emission fee in 2003, rather than merely stating that staff will recommend such an increase.

Even with the increase in fees, however, Commenters do not believe that Texas has demonstrated adequate personnel and funding to run the state operating permits program. Public Citizen argues that the most complex and time-consuming title V facilities in Texas are due to be permitted over the next few years. Further, minor new source review requirements will have to be incorporated into Texas permits during this period. Public Citizen contends that in EPA's proposal for revisions to IA criteria, EPA noted:

> Texas has pointed to the exceptionally large number of part 70 sources which are located in the State and which are candidates for minor NSR. Texas estimates that it has over 3,000 part 70 sources, including the nations largest concentration of chemical manufacturing and petroleum refining facilities. Many of these sources have large numbers of emission units, making part 70 permitting difficult and time-consuming. * * * While Texas's burden of processing part 70 applications will be heavy in any event, Texas contends that the added burden of integrating minor NSR into part 70 permits will completely overwhelm the State's processing system in the initial years of implementation.

59 FR 44572, 44574–44575 (Aug. 29, 1994).

Public Citizen contends that despite this huge increase in workload, Texas has projected that only a very small increase in the percentage of time,

required by only some of the divisions assigned to title V, will be needed in the coming years. For example, Public Citizen argues that the air permits division is projected to only provide an 8.3% increase in staff time, while the field operations and enforcement divisions project no increase. Public Citizen does believe Texas had projected costs for staff adequate to handle incorporation of minor new source review and the processing and enforcement of the large, complex sites that will require permitting in the next few years.

In addition, Public Citizen contends that as a result of the low salaries offered by the Texas Natural Resource Conservation Commission (TNRCC), the agency often has numerous vacancies. Public Citizen contends that the high turnover means that there is often a lack of trained, experienced personnel and that remaining personnel must shoulder an unreasonable workload.

EPA Response to Comment H

As stated in the proposal, on August 22, 2001, Texas submitted a complete four-year projection. In its fee demonstration, Texas documented that it requires an average of $34,274,000 per year to cover the cost of the title V program. Texas projects that it will collect an average of approximately $36,840,000 per year in fees from title V sources. This demonstration indicates that the title V fees that Texas anticipates will be collected are sufficient to cover the program costs with an adequate margin of safety. The TNRCC has the authority to adjust the emissions fee as necessary using its rulemaking authority (Texas Health & Safety Code Section 382.0621). The demonstration submitted by Texas meets the requirements of 40 CFR 70.4(b)(7) and (8), and therefore we do not agree with this comment.

I. Comment I—Monitoring Requirements and Public Participation

Baker Botts L.L.P. responded to our proposal to take no action on TNRCC's Chapter 122 revisions relating to periodic monitoring (PM), compliance assurance monitoring (CAM), and public participation. It believes that these provisions meet the requirements of part 70 and that we should approve them. Baker Botts further states that Texas's part 70 program satisfies all part 70 requirements with respect to compliance and deviation reporting based on the monitoring requirements and that the deviation reporting and compliance certification of 30 TAC Chapter 122 fully comply with part 70.

EPA Response to Comment I

As stated in the October 11, 2001, proposal and in section IV of this preamble, we are not taking action on provisions relating to General Operating Permits (promulgated February 26, 1999), Public Participation (promulgated September 24, 1999), and Compliance Assurance Monitoring and Periodic Monitoring (promulgated September 1, 2000) at this time. Texas submitted these revisions to EPA for approval on June 1, 2001. Some of these revisions are related to the comments we received from citizens in response to our **Federal Register** notice published December 11, 2000. The citizens identified areas where they believe that certain of these provisions are deficient. The rationale for taking no action on these provisions is outlined in detail in our response to Comment A, section III of this notice. We will respond to the citizen comments as described in section V.C of this preamble which provides additional information on the citizen comment letters. As discussed therein, we will respond either by publishing a notice of deficiency if we determine that a deficiency exists, or we will notify the commenter in writing to explain our reasons for not making a finding of deficiency. Any provisions unrelated to the citizen comment letters will be addressed in accordance with section V.D.

J. Comment J—Statutory Changes Enacted After State Submittal of Operating Program

Public Citizen claims that several statutory changes adopted since 1995 constitute program deficiencies, and that these changes were not adequately addressed, or not addressed at all, in the AG statement. These statutes include the following:

a. Audit Privilege—Tex. Rev. Civ. Stat. Art. 4447cc. (2 commenters);

b. Voluntary Emissions Reduction Permit Program—SB766;

c. Regulatory Flexibility—SB 1591 (1997) Section 5.123, Texas Water Code; and

d. TNRCC Sunset Legislation—HB2912.

Audit Privilege Act Comments

Baker Botts, L.L.P. states that the Audit Privilege Act does not limit the TNRCC's ability to adequately administer and enforce the title V program.

Public Citizen states that the Audit Privilege Act prevents the State from having the authority to seek appropriate penalties and injunctive relief for Clean Air Act violations. Public Citizen argues that there is no AG statement reflecting the interpretation or implementation of the Texas audit privilege law to respond to the deficiency noted in EPA's IA of the Texas title V Program. Public Citizen further argues that Texas has implemented and interpreted the law contrary to EPA's audit policy and the requirements for state title V permit programs. While the EPA reached an agreement with Texas on amendments to its law in 1997, Public Citizen contends that EPA made it clear that the actual implementation of the law would be a critical factor in EPA's future evaluation of the law.

Public Citizen contends that the Audit Privilege Act violates EPA guidance[6] because of inadequate limits on privileged information. Public Citizen contends that The EPA guidance limits the circumstances under which information may be "privileged" pursuant to an audit law. Public Citizen also contends that Information may not be privileged if (1) it is required by law, regulation or permit (2) state access is needed to verify compliance, or (3) an audit presents evidence of criminal conduct. It also contends that it is unclear under the Texas audit law whether information required to be reported or maintained pursuant to title V or a title V permit may be considered exempt. Thus, Public Citizen contends that EPA must require Texas law to be amended to make clear that none of this information may be privileged, withheld from the public, or excluded from any judicial or administrative proceeding involving any party.

Also, Public Citizen alleges that Texas law does not have a sufficient limit on claims of privilege regarding documents needed to verify compliance. Because Texas Audit law allows certain information collected during an audit to be held as privileged, even if no notice of audit is filed with the state, Public Citizen contends that many companies do audits just to claim the privilege. Thus, Public Citizen contends that whether violations were found during an audit cannot be determined under Texas law because industry can simply claim privilege for all information collected during the audit. Public Citizen contends that no subsequent inspection will include inspection of the "privileged" documents because TNRCC has instructed its personnel to not ask for information from audits and to even refuse to look at information offered by the regulated entity. There is no provision for reviewing documents

[6] Herman & Nichols, Effect of Audit Immunity/Privilege Laws on States' Ability to Enforce title V Requirements (April 5, 1996).

that are required to be made available or public under Texas law.

Furthermore, Public Citizen contends that the law does not prevent all evidence of criminal conduct from being disclosed. While the law provides that such information may be used in criminal proceedings, it does not remove the barrier to obtaining such information for use in criminal investigations.

Public Citizen also claims that the Audit Privilege Act violates EPA guidance by providing inadequate limits on immunity from penalties. Public Citizen contends that EPA's guidance requires state audit laws to limit the types of violations that may be exempt from penalties. Public Citizen argues that the guidance provides that state audit laws must not exempt (1) repeat violations, (2) violations of previous court or administrative orders, (3) violations resulting in serious harm or risk of harm, or (4) violations resulting in substantial economic benefit to the violator. *Id.* at p. 4. The Texas Audit Privilege Law exempts repeat violations and violations of previous court orders or administrative orders. Tex. Rev. Civ. Stat. art. 4447cc, Sec. 10. (2000).

Public Citizen contends that the Texas audit law does provide that a violation is not exempt if the violation resulted in "injury or imminent and substantial risk of serious injury to one or more persons at the site or off-site substantial actual harm or imminent and substantial risk of harm to persons, property, or the environment." *Id.* at Sec. 10(b)(7). Public Citizen argues that this standard is higher than the "resulting in serious harm or risk of harm" provided by EPA guidance. Likewise, the Texas law provides that immunity does not apply if "the violations have resulted in a substantial economic benefit which gives the violator a clear advantage over its business competitors" conflicts with EPA's requirement that immunity not be granted where the violation resulted in a substantial economic benefit.

Public Citizen contends that these problems with Texas law are exacerbated by the fact that Texas does not require facilities to prove their entitlement to immunity. Public Citizen contends that facilities are not required to submit proof of such entitlement to the State when they conduct an audit. The audit documents themselves are simply labeled as privileged by the permittee. Further, Public Citizen contends that the Audit Privilege Act expressly states that in a civil or administrative enforcement action "[a]fter the person claiming the immunity establishes a *prima facie* case of voluntary disclosure * * * the enforcement authority has the burden of rebutting the presumption by a preponderance of the evidence or, in a criminal case, by proof beyond a reasonable doubt." Tex. Rev. Civ. Stat. art. 4447cc, Sec. 10(f) (2000).

Although more than 500 disclosures of violation have been filed, Public Citizen contends that TNRCC has never collected a penalty because a violation was a continuous or repeat violation, caused the risk of serious injury, or because a competitive advantage or economic benefit was obtained through the violation.

Public Citizen also claims that as a result of its audit law, Texas lacks the minimum enforcement authority required by title V to administer a state operating permits program because Texas lacks authority to recover civil penalties for "each violation" occurring at a title V source, if that violation qualifies for the immunity provisions of the Texas Audit Privileges Law. Therefore, EPA must disapprove the Texas program as a result of the state's inadequate enforcement authority.

EPA Response to Audit Privilege Act Comments

Public Citizen has raised a mixture of authority and implementation issues regarding the Audit Privilege Act. EPA is responding below to the authority issue and will respond to the implementation issues at a later date, as the implementation issues are unrelated to correcting interim approval deficiencies.

The EPA believes that the Texas Audit Privilege Act (Audit Act) is not in conflict with Texas's authority to enforce Title V. In evaluating the Audit Act, as well as those of other states, EPA has looked to the requirements for enforcement authority contained in the federal environmental statutes and their implementing regulations for all federal programs to determine if the state retains the minimum requirements necessary for approval or authorization of those federal programs.[7]

With respect to the issue regarding alleged inadequate limits on privileged information, Texas has said that it will interpret Section 9(c) of the Audit Act[8] as giving the public the right to obtain any information in the state's possession required to be made available under federal or Texas law, irrespective of whether it is privileged under Texas law. This interpretation is consistent with federal delegation provisions that require States to make information publicly available. For example, Section 3006(f) of the Resource Conservation and Recovery Act (RCRA) requires that to be authorized, a state must make public any information it has obtained on "facilities and sites for the treatment, storage and disposal of hazardous waste * * * in substantially the same manner * * * as would be the case if the Administrator [of EPA] was carrying out the provisions of this subchapter in such state." Section 3007(b) of RCRA goes even further in requiring public availability of information obtained from "any person" by the state or EPA, as long as the information may not be claimed as confidential under the Freedom of Information Act (FOIA). Federal regulations governing the Safe Drinking Water Act provide the same degree of public access.

Likewise, under Section 114(c) of the Act, any records, reports or information obtained under section 114(a) of the Act must be available to the public, as long as the information may not be claimed as confidential under FOIA. Sections 502(b)(8) and 503(c) of the Act and 40 CFR 70.4(b)(3)(viii) provide that the permit application, compliance plan, permit, monitoring and compliance report are available to the public, subject to the same protections under FOIA. In addition, these same authorities provide that the contents of a Title V permit cannot be claimed as confidential. The Texas AG has certified that:

> State law provides authority to make available to the public any permit application, compliance plan, permit, and monitoring and compliance certification report, except for information entitled to confidential treatment. State law provides that the contents of an operating permit shall not be entitled to confidential treatment.

Attorney General Statement, Section XIII (October 29, 2001). Therefore, EPA believes that the Audit Privilege Act meets the minimum federal statutory and regulatory requirements for access to information.

Furthermore, EPA disagrees that the Audit Privilege Act provides a barrier to obtaining information for use in criminal investigations. The Audit Privilege Act limits the application of the privilege to "civil or administrative proceedings", which cannot reasonably be read as encompassing criminal investigations. *See* Tex. Rev. Civ. Stat. Art. 4447cc, Sec. 5(b). In addition,

---

[7] See, for example, Clean Air Act sections 110, 114, and 502 and 40 CFR 70.11; Resource Conservation and Recovery Act section 3006 and 40 CFR part 271; Clean Water Act Section 402 and 40 CFR 123.27.

[8] "If information is required to be available to the public by operation of a specific state or federal law, the governmental authority shall notify the person claiming the privilege of the potential for public disclosure prior to obtaining such information under Subsection (a) or (b)." Tex. Rev. Civ. Stat. Art. 4447cc, Sec. 9(c).

Section 9(b) removes any limit on the State's ability to review any information that is required to be made available under federal or state law prior to any in camera determination that such material may be privileged.[9] Those requirements encompass virtually all information that is relevant to determining a violation, leaving the State with ample authority to conduct both civil and criminal investigations without the encumbrance of a prior hearing to determine whether the material can be reviewed.

As to the issues regarding alleged inadequate limits on immunity from penalties, EPA points out that if the violation "results in injury or imminent and substantial risk of serious injury to one or more persons at the site or off-site substantial actual harm or imminent and substantial risk of harm to persons, property, or the environment", or "the violation has resulted in a substantial economic benefit which gives the violator a clear advantage over its business competitors", immunity does not apply. Tex. Rev. Civ. Stat. Art. 4447cc, Sec. 10(b)(7) and 10(c)(5). Furthermore, EPA believes that Texas has retained authority to curb abuses because it can issue administrative or consent orders for violations even if these are voluntarily disclosed, and the subsequent violation of such orders is not entitled to immunity under State law. In addition, Texas has the discretion to determine that a pattern of significant violations should disqualify a company from further penalty amnesty.

Therefore, for the reasons set forth in the **Federal Register** notice (66 FR at 51903) and as set forth above, EPA believes that TNRCC has adequate authority to enforce Title V. Because implementation issues are not related to interim approval issues, we will address those allegations as set forth in Section V.D.

K. Comment K—Confidentiality

In this comment, Public Citizen is concerned that public air-related information that should not be classified as confidential is being withheld under claims of confidentiality. Much of this comment is identical to a comment received in a citizen comment letter. This portion of the comment will be addressed as set forth in section V.C. Public Citizen did raise one additional issue, namely, the alleged change in the treatment of emissions data by the Texas AG. Public Citizen contends that previously, a 1975 AG statement prevented companies from stopping the release of emissions data to the public if a company had claimed the emissions data as confidential. Now, Public Citizen contends that the AG has stated that emissions related data, including modeling of impacts, and information in a number of other documents of impacts, and information in a number of a other documents claims as confidential business information must be excluded from public access. Thus, Public Citizen asserts that Texas should submit a supplemental AG statement on this issue, and EPA should withhold approval until this issue is resolved.

EPA Response to Comment K

As previously noted, EPA is fully approving the Texas operating permit program because we believe that Texas has adequately addressed the IA deficiencies we identified in our 1995 and 1996 **Federal Register** notices. As such, for the purpose of this approval, Texas is only required to address issues related to the correction of IA deficiencies. The EPA will address the issue relating to the confidentiality of emissions data as set forth in section V.D.

IV. Did Texas Submit Other Title V Program Revisions?

The June 1, 2001, submittal included other changes that Texas made to Chapter 122. These changes were made after we granted IA of Texas's operating permits program and do not address the IA deficiencies. Because the following changes do not address the IA issues, they do not affect our decision to grant full approval of Texas operating permits program. The additional revisions to Chapter 122 relate to General Operating Permits (promulgated February 26, 1999), Public Participation (promulgated September 24, 1999) and Compliance Assurance Monitoring and Periodic Monitoring (promulgated September 1, 2000).

We have received comments from citizens concerning these additional provisions in response to our **Federal Register** notice published December 11, 2000. The citizens identified areas where they believe these provisions are deficient. We will respond to the citizen comments as described in section V.C of this preamble which provides additional information on the citizen comment letters. We will take appropriate action on the other revisions to Chapter 122 at a later date.

V. What Is Involved in This Final Action?

A. Final Action

In this action, we are promulgating full approval of the operating permits program submitted by the State of Texas. The program was submitted by Texas to us for the purpose of complying with federal requirements found in title V of the Act and in part 70, which mandate that States develop, and submit to us, programs for issuing operating permits to all major stationary sources, and to certain other sources with the exception of Indian Lands. We have reviewed this submittal of the Texas operating permits program and are granting full approval.

B. Indian Lands and Reservations

In its program submission, Texas did not assert jurisdiction over Indian country. To date, no tribal government in Texas has applied to EPA for approval to administer a title V program in Indian country within the state. The EPA regulations at 40 CFR part 49 govern how eligible Indian tribes may be approved by EPA to implement a title V program on Indian reservations and in non-reservation areas over which the tribe has jurisdiction. EPA's part 71 regulations govern the issuance of federal operating permits in Indian country. EPA's authority to issue permits in Indian country was challenged in *Michigan* v. *EPA*, (D.C. Cir. No. 99–1151). On October 30, 2001, the court issued its decision in the case, vacating a provision that would have allowed EPA to treat areas over which EPA determines there is a question regarding the area's status as if it is Indian country, and remanding to EPA for further proceedings. The EPA will respond to the court's remand and explain EPA's approach for further implementation of part 71 in Indian country in a future action.

C. Citizen Comment Letters

On May 22, 2000, EPA promulgated a rulemaking that extended the IA period of 86 operating permits programs until December 1, 2001. 65 FR 32035. The action was subsequently challenged by the Sierra Club and the New York Public Interest Research Group (NYPIRG). In settling the litigation, EPA agreed to publish a notice in the **Federal Register** that would alert the public that they may identify and bring to EPA's attention alleged programmatic and/or implementation deficiencies in title V programs and that EPA would respond to their allegations within specified time periods if the comments were made

[9] "Notwithstanding the privilege established under this Act, a regulatory agency may review information that is required to be available under a specific state or federal law, but such review does not waive or eliminate the administrative or civil evidentiary privilege where applicable. Tex. Rev. Civ. Stat. Art. 4447cc, Sec. 9(b).

within 90 days of publication of the **Federal Register** notice.

Several citizens commented on what they believe to be deficiencies with respect to the Texas title V program. As stated in the October 11, 2001 **Federal Register** notice proposing to fully approve the Texas operating permit program, EPA takes no action on those comments in today's action. Rather, EPA expects to respond by December 14, 2001 to timely public comments on programs that have obtained IA. We will publish a notice of deficiency (NOD) when we determine that a deficiency exists, or we will notify the commenter in writing to explain our reasons for not making a finding of deficiency. In addition, we will publish a notice of availability in the **Federal Register** notifying the public that we have responded in writing to these comments and how the public may obtain a copy of our response. An NOD will not necessarily be limited to deficiencies identified by citizens and may include any deficiencies that we have identified through our program oversight. Furthermore, in the future, EPA may issue an additional NOD if EPA or a citizen identifies other deficiencies.

D. Non IA Issues Not Addressed in Citizen Comment Letter Responses

Public Citizen raised many issues in response to our October 11, 2001, proposal that are not related to the IA issues and were not raised in response to EPA's December 2000 notice soliciting citizen comments on state operating permit programs. These issues include sufficiency of the AG Statement, statutory changes enacted after 1995, Audit Privilege Act implementation, confidentiality of emissions data, alleged failure of Texas's compliance assurance monitoring provisions to comply with part 64, public participation in enforcement, emergency orders, temporary sources, alleged violation of statutory deadlines, insignificant emission units, and acid rain requirement. For the reasons set forth in our response to Comment A in section III, EPA believes that limiting our review to IA issues does not limit our ability to grant full approval to Texas. Therefore, EPA will address the issues at a later date.

VI. What Is the Effective Date of EPA's Full Approval of the Texas Title V Program?

The EPA is using the good cause exception under the Administrative Procedure Act (APA) to make the full approval of the state's program effective on November 30, 2001. In relevant part, the APA provides that publication of "a substantive rule shall be made not less than 30 days before its effective date, except— * * * (3) as otherwise provided by the agency for good cause found and published with the rule. 5 U.S.C. 553(d)(3). Section 553(b)(3)(B) of the APA provides that good cause may be supported by an agency determination that a delay in the effective date is impracticable, unnecessary, or contrary to the public interest. The EPA finds that it is necessary and in the public interest to make this action effective sooner than 30 days following publication. In this case, EPA believes that it is in the public interest for the program to take effect before December 1, 2001. EPA's IA of Texas's prior program expires on December 1, 2001. In the absence of this full approval of Texas's amended program taking effect on November 30, 2001, the federal program under 40 CFR part 71 would automatically take effect in Texas and would remain in place until the effective date of the fully-approved state program. The EPA believes it is in the public interest for sources, the public and Texas to avoid any gap in coverage of the state program, as such a gap could cause confusion regarding permitting obligations. Furthermore, a delay in the effective date is unnecessary because Texas has been administering the title V permit program for six years under an IA. Through this action, EPA is approving a few revisions to the existing and currently operational program. The change from the interim approved program which substantially met the part 70 requirements, to the fully approved program is relatively minor, in particular if compared to the changes between a state-established and administered program and the federal program.

VII. Administrative Requirements

Under Executive Order 12866, Regulatory Planning and Review (58 FR 51735, October 4, 1993), this final approval is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) the Administrator certifies that this final approval will not have a significant economic impact on a substantial number of small entities because it merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. This rule does not contain any unfunded mandates and does not significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4) because it approves pre-existing requirements under state law and does not impose any additional enforceable duties beyond that required by state law. This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175, "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000). This rule also does not have Federalism implications because it will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, "Federalism" (64 FR 43255, August 10, 1999). This rule merely approves existing requirements under state law, and does not alter the relationship or the distribution of power and responsibilities between the State and the Federal government established in the Clean Air Act. This final approval also is not subject to Executive Order 13045, "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) or Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001), because it is not a significant regulatory action under Executive Order 12866. This action will not impose any collection of information subject to the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, other than those previously approved and assigned OMB control number 2060–0243. For additional information concerning these requirements, see 40 CFR part 70. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

In reviewing State operating permit programs submitted pursuant to title V of the Clean Air Act, EPA will approve State programs provided that they meet the requirements of the Clean Air Act and EPA's regulations codified at 40 CFR part 70. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a State operating permit

program for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews an operating permit program, to use VCS in place of a State program that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will be effective on November 30, 2001.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 4, 2002. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401–7671q.

Dated: November 29, 2001.

Lawrence E. Starfield,

Acting Deputy Regional Administrator, Region 6.

For the reasons set out in the preamble, Appendix A of Part 70 of title 40 of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

2. Appendix A to part 70 is amended under the entry for Texas by adding paragraph (b) to read as follows:

Appendix A to part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

Texas

* * * * *

(b) The Texas Natural Resource Conservation Commission submitted program revisions on June 12, 1998, and June 1, 2001, and supplementary information on August 22, 2001; August 23, 2001; September 20, 2001; and November 5, 2001. The rule revisions adequately addressed the conditions of the IA effective on July 25, 1996, and which will expire on December 1, 2001. The State is hereby granted final full approval effective on November 30, 2001.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[FRL–7110–7]

Indiana: Final Authorization of State Hazardous Waste Management Program Revision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is granting Indiana final authorization of the changes to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). The Agency published a proposed rule on August 17, 2001 at 66 FR 43143 and provided for public comment. The public comment period ended on September 17, 2001. We received no comments. No further opportunity for comment will be provided. EPA has determined that Indiana's revisions satisfy all the requirements needed to qualify for final authorization, and is authorizing the State's changes through this final action.

DATES: This final authorization will be effective on December 6, 2001.

ADDRESSES: You can view and copy Indiana's application from 9 am to 4 pm at the following addresses: Indiana Department of Environmental Management, 100 North Senate, Indianapolis, Indiana, (mailing address P.O. Box 6015, Indianapolis, Indiana 46206) contact Lynn West (317) 232–3593, and EPA Region 5, contact Gary Westefer at the following address.

FOR FURTHER INFORMATION CONTACT: Gary Westefer, Indiana Regulatory Specialist, U.S. EPA Region 5, DM–7J, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–7450.

SUPPLEMENTARY INFORMATION: On August 17, 2001, U.S. EPA published a proposed rule proposing to grant Indiana authorization for changes to its Resource Conservation and Recovery Act program, listed in section E of that notice, which was subject to public comment. No comments were received. We hereby determine that Indiana's hazardous waste program revisions satisfy all of the requirements necessary to qualify for final authorization.

A. Why Are Revisions to State Programs Necessary?

States which have received final authorization from EPA under RCRA section 3006(b), 42 U.S.C. 6926(b), must maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal program. As the Federal program changes, States must change their programs and ask EPA to authorize the changes. Changes to State programs may be necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, States must change their programs because of changes to EPA's regulations in 40 Code of Federal Regulations (CFR) parts 124, 260 through 266, 268, 270, 273 and 279.

B. What Decisions Have We Made in This Rule?

We conclude that Indiana's application to revise its authorized program meets all of the statutory and regulatory requirements established by RCRA. Therefore, we propose to grant Indiana Final authorization to operate its hazardous waste program with the changes described in the authorization application. Indiana has responsibility for permitting Treatment, Storage, and Disposal Facilities (TSDFs) within its borders (except in Indian Country) and for carrying out the aspects of the RCRA program described in its revised program application, subject to the limitations of the Hazardous and Solid Waste Amendments of 1984 (HSWA). New Federal requirements and prohibitions imposed by Federal regulations that EPA promulgates under the authority of HSWA take effect in authorized States before they are authorized for the requirements. Thus,

EPA will implement those requirements and prohibitions in Indiana, including issuing permits, until the State is granted authorization to do so.

C. What Is the Effect of Today's Authorization Decision?

The effect of this decision is that a facility in Indiana subject to RCRA will now have to comply with the authorized State requirements instead of the equivalent Federal requirements in order to comply with RCRA. Indiana has enforcement responsibilities under its State hazardous waste program for violations of such program, but EPA retains its authority under RCRA sections 3007, 3008, 3013, and 7003, which include, among others, authority to:

- do inspections, and require monitoring, tests, analyses or reports
- enforce RCRA requirements and suspend or revoke permits
- take enforcement actions regardless of whether the State has taken its own actions

This action does not impose additional requirements on the regulated community because the regulations for which Indiana is being authorized by today's action are already effective, and are not changed by today's action.

D. Proposed Rule

On August 17, 2001 (66 FR 43143) EPA published a proposed rule. In that rule we proposed granting authorization of changes to Indiana's hazardous waste program and opened our decision to public comment. The Agency received no comments on this proposal. EPA found Indiana's RCRA program to be satisfactory.

E. What Has Indiana Previously Been Authorized for?

Indiana initially received Final authorization on January 31, 1986, effective January 31, 1986 (51 FR 3955) to implement the RCRA hazardous waste management program. We granted authorization for changes to their program on October 31, 1986, effective December 31, 1986 (51 FR 39752); January 5, 1988, effective January 19, 1988 (53 FR 128); July 13, 1989, effective September 11, 1989 (54 FR 29557); July 23, 1991, effective September 23, 1991 (56 FR 33717); July 24, 1991, effective September 23, 1991 (56 FR 33866); July 29, 1991, effective September 27, 1991 (56 FR 35831); July 30, 1991, effective September 30, 1991 (56 FR 36010); August 20, 1996, effective October 21, 1996 (61 FR 43018); September 1, 1999, effective November 30, 1999 (64 FR 47692), and January 4, 2001, effective January 4, 2001 (66 FR 733).

F. What Changes Are We Authorizing With Today's Action?

On March 16, 2001, Indiana submitted a final complete program revision application, seeking authorization of their changes in accordance with 40 CFR 271.21. We now make a final decision, that Indiana's hazardous waste program revision satisfies all of the requirements necessary to qualify for Final authorization. Therefore, we propose to grant Indiana Final authorization for the following program changes: n

Description of Federal Requirement (include Checklist #, if relevant)	FEDERAL REGISTER date and page (and/or RCRA statutory authority)	Analogous State Authority

G. Where Are the Revised State Rules Different From the Federal Rules?

Indiana has excluded the non-delegable Federal requirements at 40 CFR 268.5, 268.6, 268.42(b), 268.44, and 270.3 in their Incorporation by Reference at 3.1–12–2 and 3.1–13–2(4). EPA will continue to implement those requirements.

H. Who Handles Permits After the Authorization Takes Effect?

Indiana will issue permits for all the provisions for which it is authorized and will administer the permits it issues. EPA will continue to administer any RCRA hazardous waste permits or portions of permits which we issued prior to the effective date of this authorization until they expire or are terminated. We will not issue any more new permits or new portions of permits for the provisions listed in the Table above after the effective date of this authorization. EPA will continue to implement and issue permits for HSWA requirements for which Indiana is not yet authorized.

I. What Is Codification and Is EPA Codifying Indiana's Hazardous Waste Program as Authorized in This Rule?

Codification is the process of placing the State's statutes and regulations that comprise the State's authorized hazardous waste program into the Code of Federal Regulations. We do this by referencing the authorized State rules in 40 CFR part 272. We reserve the amendment of 40 CFR part 272, subpart P for this authorization of Indiana's program changes until a later date.

J. Administrative Requirements

The Office of Management and Budget has exempted this action from the requirements of Executive Order 12866 (58 FR 51735, October 4, 1993), and therefore this action is not subject to review by OMB. This action authorizes State requirements for the purpose of RCRA 3006 and imposes no additional requirements beyond those imposed by State law. Accordingly, I certify that this action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this action authorizes pre-existing requirements under State law and does not impose any additional enforceable duty beyond that required by State law, it does not contain any unfunded mandate or significantly or

uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 6, 2000), requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the federal government and Indian tribes." This rule does not have tribal implications. It will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175. Indiana is not approved to implement the RCRA hazardous waste program in Indian country. This action has no effect on the hazardous waste program that EPA implements in the Indian country within the State. Thus, Executive Order 13175 does not apply to this rule.

This action will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely authorizes State requirements as part of the State RCRA hazardous waste program without altering the relationship or the distribution of power and responsibilities established by RCRA. This action also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant and it does not make decisions based on environmental health or safety risks. This rule is not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001)) because it is not a significant regulatory action under Executive Order 12866.

Under RCRA 3006(b), EPA grants a State's application for authorization as long as the State meets the criteria required by RCRA. It would thus be inconsistent with applicable law for EPA, when it reviews a State authorization application, to require the use of any particular voluntary consensus standard in place of another standard that otherwise satisfies the requirements of RCRA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 F.R. 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this document and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Mineral Materials Disposal; Sales; Free Use; Correction

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rule; correction.

SUMMARY: The Bureau of Land Management (BLM) published in the **Federal Register** of November 23, 2001, a final rule revising the regulations on Mineral Materials Disposal. The final rule inadvertently contained an incorrect effective date.

EFFECTIVE DATES: The effective date of the final rule published on November 23, 2001 (66 FR 58892), is corrected to read January 22, 2002.

FOR FURTHER INFORMATION CONTACT: Ted Hudson, Federal Register Liaison Officer, at (202) 452–5042. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, 24 hours a day, 7 days a week.

SUPPLEMENTARY INFORMATION: On November 23, 2001, BLM published a final rule in the **Federal Register** (66 FR 58892) revising the regulations on Mineral Materials Disposal in 43 CFR part 3600. In FR Doc. 01–29001, we stated the wrong effective date in the first column of page 58892. The effective date should have been 60 days after the date of publication, or January 22, 2002.

Dated: November 26, 2001.

[DFARS Case 2000–D306]

Defense Federal Acquisition Regulation Supplement; Performance-Based Contracting Using Federal Acquisition Regulation Part 12 Procedures

AGENCY: Department of Defense (DoD).

ACTION: Interim rule with request for comments.

SUMMARY: DoD has issued an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement Section 821(b) of the National Defense Authorization Act for Fiscal Year 2001. Section 821(b) permits DoD to treat certain performance-based service contracts and task orders as contracts for the procurement of commercial items.

DATES: *Effective date:* December 6, 2001.

Comment date: Comments on the interim rule should be submitted to the address shown below on or before February 4, 2002, to be considered in the formation of the final rule.

ADDRESSES: Respondents may submit comments directly on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf/pubcomm*. As an alternative, respondents may e-mail comments to: *dfars@acq.osd.mil*. Please cite DFARS Case 2000–D306 in the subject line of e-mailed comments.

Respondents that cannot submit comments using either of the above methods may submit comments to: Defense Acquisition Regulations Council, Attn: Ms. Sandra Haberlin, OUSD(AT&L)DP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062; facsimile (703) 602–0350. Please cite DFARS Case 2000–D306.

At the end of the comment period, interested parties may view public comments on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf*.

FOR FURTHER INFORMATION CONTACT: Ms. Sandra Haberlin, (703) 602–0289.

SUPPLEMENTARY INFORMATION:

A. Background

This interim rule amends DFARS Part 212, Acquisition of Commercial Items, and DFARS Part 237, Service Contracting, to implement Section 821(b) of the National Defense Authorization Act for Fiscal Year 2001 (Public Law 106–398).

Section 821(b) of Public Law 106–398 establishes an incentive for the use of performance-based service contracts. Section 821(b) permits a contracting officer to use the same procedures used for the acquisition of commercial items under Part 12 of the Federal Acquisition Regulation (FAR) for a performance-based service contract or task order, if certain conditions are met. These conditions include—

1. The contract or task order must—
(a) Be firm-fixed-price;
(b) Have a value of $5 million or less;
(c) Set forth specifically each task to be performed;
(d) Define each task in measurable, mission-related terms; and
(e) Identify the specific end products or output to be achieved for each task;

2. The contractor must provide similar services at the same time to the general public under terms and conditions similar to those in the contract or task order; and

3. The procedures in FAR Subpart 13.5, Test Program for Certain Commercial Items, must not be used.

Since procurements undertaken pursuant to the authority of Section

821(b) will be conducted under FAR Part 12, the clauses at FAR 52.212–4 and 52.212–5 will be incorporated into resulting contracts. In this regard, when soliciting offers, contracting officers may need to modify paragraph (a) of the provision at 52.212–4 in particular, addressing inspection and acceptance, as may be necessary to ensure the contract's remedies adequately protect the Government's interests. For example, contracting officers may wish to negotiate the inclusion of commercial remedies such as extension of contract performance or the right to reduce the contract price to reflect the reduced value of the services performed when defects in services cannot be corrected by reperformance.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD does not expect this rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule pertains only to those small entities that will be awarded performance-based service contracts or task orders meeting the conditions specified in the rule. Therefore, DoD has not prepared an initial regulatory flexibility analysis. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subparts in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2000–D306.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

D. Determination To Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense that urgent and compelling reasons exist to publish an interim rule prior to affording the public an opportunity to comment. This interim rule implements Section 821(b) of the National Defense Authorization Act for Fiscal Year 2001 (Public Law 106–398). Section 821(b) establishes an incentive for the use of performance-based service contracts by permitting DoD to treat a performance-based service contract as a contract for the procurement of commercial items if certain conditions are met. Section 821(b) became effective on October 30, 2000, and the contracting authority provided under that section expires on October 30, 2003. Comments received in response to this interim rule will be considered in the formation of the final rule.

List of Subjects in 48 CFR Parts 212 and 237

Government procurement.

Michele P. Peterson,

Executive Editor, Defense Acquisition Regulations Council.

Therefore, 48 CFR Parts 212 and 237 are amended as follows:

1. The authority citation for 48 CFR Parts 212 and 237 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 212—ACQUISITION OF COMMERCIAL ITEMS

2. Subpart 212.1 is added to read as follows:

Subpart 212.1—Acquisition of Commercial Items—General

Sec.
212.102 Applicability.
212.102 Applicability.

(a)(i) In accordance with Section 821 of the National Defense Authorization Act for Fiscal Year 2001 (Public Law 106–398), the contracting officer also may use FAR part 12 for any performance-based contracting for services if the procedures in FAR Subpart 13.5 are not used, and the contract or task order—

(A) Is entered into on or before October 30, 2003;

(B) Has a value of $5 million or less;

(C) Meets the definition of performance-based contracting at FAR 2.101;

(D) Uses quality assurance surveillance plans;

(E) Includes performance incentives where appropriate;

(F) Specifies a firm-fixed price; and

(G) Is awarded to an entity that provides similar services at the same time to the general public under terms and conditions similar to those in the contract.

(ii) In exercising the authority specified in paragraph (a)(i) of this section, the contracting officer should modify paragraph (a) of the clause at FAR 52.212–4 as may be necessary to ensure the contract's remedies adequately protect the Government's interests.

PART 237—SERVICE CONTRACTING

3. Subpart 237.6 is added to read as follows:

Subpart 237.6—Performance-Based Contracting

Sec.
237.601 General.
237.601 General.

See 212.102 for the use of FAR part 12 procedures with performance-based contracting.

BILLING CODE 5000–04–U

DEPARTMENT OF DEFENSE

48 CFR Part 217

[DFARS Case 2000–D303/304]

Defense Federal Acquisition Regulation Supplement; Multiyear Contracting

AGENCY: Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD has issued a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement Sections 802 and 806 of the National Defense Authorization Act for Fiscal Year 2001. Sections 802 and 806 amend requirements pertaining to multiyear contracting.

EFFECTIVE DATE: December 6, 2001.

FOR FURTHER INFORMATION CONTACT: Ms. Sandra Haberlin, Defense Acquisition Regulations Council, OUSD (AT&L) DP (DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–0289; facsimile (703) 602–0350. Please cite DFARS Case 2000–D303/304.

SUPPLEMENTARY INFORMATION:

A. Background

Section 802 of the National Defense Authorization Act for Fiscal Year 2001 (Pub. L. 106–398) relocated provisions relating to multiyear contracts for services from 10 U.S.C. 2306(g) to a new 10 U.S.C. 2306c. Section 806 of Public Law 106–398 amended 10 U.S.C. 2306b to add reporting requirements pertaining to multiyear contracts for property. This final rule updates DFARS Subpart 217.1 to reflect current statutory requirements pertaining to multiyear contracts.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

This final rule does not constitute a significant revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comment is not required. However, DoD will consider comments from small entities concerning the affected DFARS subpart in accordance with 5 U.S.C. 610. Such comments should cite DFARS Case 2000–D303/304.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 217

Government procurement.

Michele P. Peterson,

Executive Editor, Defense Acquisition Regulations Council.

Therefore, 48 CFR Part 217 is amended as follows:

1. The authority citation for 48 CFR part 217 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 217—SPECIAL CONTRACTING METHODS

2. Sections 217.170 through 217.172 are revised to read as follows:

217.170 General.

(a) Before awarding a multiyear contract, the head of the agency must compare the cost of that contract to the cost of an annual procurement approach, using a present value analysis. Do not award the multiyear contract unless the analysis shows that the multiyear contract will result in the lower cost (10 U.S.C. 2306b(l)(7); Section 8008(a) of Public Law 105–56 and similar sections in subsequent DoD appropriations acts).

(b) The head of the agency must provide written notice to the congressional defense committees at least 10 days before termination of any multiyear contract (10 U.S.C. 2306b(l)(6); 10 U.S.C. 2306c(d)(3); Section 8008(a) of Public Law 105–56 and similar sections in subsequent DoD appropriations acts).

(c) Every multiyear contract must comply with FAR 17.104(c), unless an exception is approved through the budget process in coordination with the cognizant comptroller.

(d)(1) DoD must receive authorization from, or provide notification to, Congress before entering into a multiyear contract for certain procurements, including those expected to—

(i) Exceed $500 million (see 217.171(a)(5); 217.172(c); and 217.173(b)(4));

(ii) Employ economic order quantity procurement in excess of $20 million in any one year (see 217.174(a)(1));

(iii) Employ an unfunded contingent liability in excess of $20 million (see 217.171(a)(4)(i) and 217.172(d)(1));

(iv) Involve a contract for advance procurement leading to a multiyear contract that employs economic order quantity procurement in excess of $20 million in any one year (see 217.174(a)(2)); or

(v) Include a cancellation ceiling in excess of $100 million (see 217.171(a)(4)(ii) and 217.172(d)(2)).

(2) A DoD component must submit a request for authority to enter into multiyear contracts described in paragraphs (d)(1)(i) through (iv) of this section as part of the component's budget submission for the fiscal year in which the multiyear contract will be initiated. DoD will include the request, for each candidate it supports, as part of the President's Budget for that year and in the Appendix to that budget as part of proposed legislative language for the appropriations bill for that year (Section 8008(b) of Public Law 105–56).

(3) If the advisability of using a multiyear contract becomes apparent too late to satisfy the requirements in paragraph (d)(2) of this section, the request for authority to enter into a multiyear contract must be—

(i) Formally submitted by the President as a budget amendment; or

(ii) Made by the Secretary of Defense, in writing, to the congressional defense committees. (Section 8008(b) of Public Law 105–56)

(4) Agencies must establish reporting procedures to meet the congressional notification requirements of paragraph (d)(1) of this section. The head of the agency must submit a copy of each notice to the Director of Defense Procurement, Office of the Under Secretary of Defense (Acquisition, Technology, and Logistics) (OUSD (AT&L) DP), and to the Deputy Under Secretary of Defense (Comptroller) (Program/Budget) (OUSD (C) (P/B)).

217.171 Multiyear contracts for services.

(a) *10 U.S.C. 2306c.* (1) The head of the agency may enter into a multiyear contract for a period of not more than 5 years for the following types of services (and items of supply relating to such services), even though funds are limited by statute to obligation only during the fiscal year for which they were appropriated:

(i) Operation, maintenance, and support of facilities and installations.

(ii) Maintenance or modification of aircraft, ships, vehicles, and other highly complex military equipment.

(iii) Specialized training requiring high quality instructor skills (*e.g.*, training for pilots and aircrew members or foreign language training).

(iv) Base services (*e.g.*, ground maintenance, in-plane refueling, bus transportation, and refuse collection and disposal).

(2) The head of the agency must be guided by the following principles when entering into a multiyear contract for services:

(i) The portion of the cost of any plant or equipment amortized as a cost of contract performance should not exceed the ratio between the period of contract performance and the anticipated useful commercial life of the plant or equipment. As used in this section, "useful commercial life" means the commercial utility of the facilities rather than the physical life, with due consideration given to such factors as the location, specialized nature, and obsolescence of the facilities.

(ii) Consider the desirability of obtaining an option to extend the term of the contract for a reasonable period not to exceed 3 years at prices that do not include charges for plant, equipment, or other nonrecurring costs already amortized.

(iii) Consider the desirability of reserving the right to take title, under the appropriate circumstances, to the plant or equipment upon payment of the unamortized portion of the cost.

(3) Before entering into a multiyear contract for services, the head of the agency must make a written determination that—

(i) There will be a continuing requirement for the services consistent with current plans for the proposed contract period;

(ii) Furnishing the services will require—

(A) A substantial initial investment in plant or equipment; or

(B) The incurrence of substantial contingent liabilities for the assembly, training, or transportation of a specialized work force; and

(iii) Using a multiyear contract will promote the best interests of the United States by encouraging effective competition and promoting economies in operations.

(4) The head of the agency must provide written notice to the congressional defense committees at least 30 days before award of a

multiyear contract for services that include—

(i) An unfunded contingent liability in excess of $20 million (Section 8008(a) of Public Law 105–56 and similar sections in subsequent DoD appropriations acts); or

(ii) A cancellation ceiling in excess of $100 million.

(5) The head of the agency must not initiate a multiyear contract for services exceeding $500 million unless a law specifically provides authority for the contract.

(b) *10 U.S.C. 2829.* (1) The head of the agency may enter into multiyear contracts for supplies and services required for management, maintenance, and operation of military family housing and may pay the costs of such contracts for each year from annual appropriations for that year.

(2) The head of the agency may use this authority only if the term of the contract does not exceed 4 years.

217.172 Multiyear contracts for supplies.

(a) This section applies to all multiyear contracts for supplies, including weapon systems. For policies that apply only to multiyear contracts for weapon systems, see 217.173.

(b) The head of the agency may enter into a multiyear contract for supplies if, in addition to the conditions listed in FAR 17.105–1(b), the use of such a contract will promote the national security of the United States.

(c) The head of the agency must not enter into or extend a multiyear contract that exceeds $500 million (when entered into or when extended) until the Secretary of Defense identifies the contract and any extension in a report submitted to the congressional defense committees (10 U.S.C. 2306b(l)(5)).

(d) The head of the agency must provide written notice to the congressional defense committees at least 30 days before award of a multiyear contract that includes—

(1) An unfunded contingent liability in excess of $20 million (10 U.S.C. 2306b(l)(1); Section 8008(a) of Public Law 105–56 and similar sections in subsequent DoD appropriations acts); or

(2) A cancellation ceiling in excess of $100 million (10 U.S.C. 2306b(g)).

(e) The Secretary of Defense may instruct the head of the agency proposing a multiyear contract to include in that contract negotiated priced options for varying the quantities of end items to be procured over the life of the contract (10 U.S.C. 2306b(j)).

3. Section 217.174 is revised to read as follows:

217.174 Multiyear contracts that employ economic order quantity procurement.

(a) The head of the agency must provide written notice to the congressional defense committees at least 30 days before awarding—

(1) A multiyear contract providing for economic order quantity procurement in excess of $20 million in any one year; or

(2) A contract for advance procurement leading to a multiyear contract that employs economic order quantity procurement in excess of $20 million in any one year. (10 U.S.C. 2306b(l)(1); Section 8008(a) of Public Law 105–56 and similar sections in subsequent DoD appropriations acts)

(b) Before initiating an advance procurement, the contracting officer must verify that it is consistent with DoD policy (e.g., Chapter 2 of DoD 5000.2–R, Mandatory Procedures for Major Defense Acquisition Programs (MDAPs) and Major Automated Information System (MAIS) Acquisition Programs, and the full funding policy in Volume 2A, Chapter 1, of DoD 7000.14–R, Financial Management Regulation).

Proposed Rules

Federal Register
Vol. 66, No. 235
Thursday, December 6, 2001

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1410

RIN 0560–AF77

Conservation Reserve Program—Cropland Eligibility and Private Sector Technical Assistance

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Commodity Credit Corporation (CCC) proposes a series of amendments to the Conservation Reserve Program (CRP) regulations. These proposed amendments would make certain orchard lands, vineyards, berry lands, and hay lands eligible for enrollment, provide for acquisition of private sector technical assistance, and make minor technical and clerical adjustments to the regulations. This action would allow producers greater flexibility in enrolling in the CRP, thereby allowing CCC greater flexibility in conducting the CRP, and provide enhanced environmental benefits under the CRP.

DATES: Comments must be submitted on or before February 4, 2002.

ADDRESSES: All comments concerning these proposed regulations should be either addressed to Robert Stephenson, Director, Conservation and Environmental Programs Division, USDA/FSA/CEPD/STOP 0513, 1400 Independence Avenue, SW., Washington, DC 20250–0513 or sent electronically to: *crprule@wdc.usda.gov.*

FOR FURTHER INFORMATION CONTACT: Robert Stephenson, (202) 720–6221.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This proposed rule is issued in conformance with Executive Order 12866 and has been determined to be significant has been reviewed by the Office of Management and Budget (OMB).

Regulatory Flexibility Act

It has been determined that the Regulatory Flexibility Act is not applicable to this rule since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

Environmental Evaluation

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental impact assessment nor an Environmental Impact Statement is needed.

Executive Order 12988

This proposed rule has been reviewed in accordance with Executive Order 12988. This proposed rule, if adopted, would not be retroactive and would not pre-empt State laws. Before any judicial action may be taken with respect to the provisions of the proposed rule, if adopted, administrative remedies at 7 CFR parts 11 and 780 would have to be exhausted.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983). Unfunded Mandates

Title II of the Unfunded Mandate Reform Act of 1995 (UMRA), Pub. L. 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under Section 202 of the UMRA, agencies generally must prepare a written statement, including a cost-benefit assessment, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, or tribal governments, in the aggregate, or the private sector, of $100 million or more in any 1 year. When such a statement is needed for a rule, section 205 of the UMRA generally requires agencies to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, more cost-effective or least burdensome alternative that achieves the objectives of the rule. This rule contains no Federal mandates (under the regulatory provisions of Title II of the UMRA) for State, local, and tribal governments or the private sector. Therefore, this rule is not subject to the requirements of Sections 202 and 205 of the UMRA.

Federal Domestic Assistance Program

The title and number of the Federal Domestic Assistance Program, as found in the Catalog of Federal Domestic Assistance, to which this rule applies, is the Conservation Reserve Program—10.069.

Paperwork Reduction Act

The Office of Management and Budget has approved the information collection requirements contained in the current regulations at 7 CFR part 1410 under provisions of 44 U.S.C. Chapter 33 and OMB Control Number 0560–0125, effective through October 31, 2002.

Background

The purpose of the Conservation Reserve Program (CRP) is to cost-effectively assist owners and operators in conserving and improving soil, water, and wildlife resources by converting highly erodible and other environmentally sensitive acreage normally devoted to the production of agricultural commodities to a long-term vegetative cover. CRP participants enter into contracts for 10 to 15 years in exchange for annual rental payments and cost-share assistance for installing certain conservation practices. In determining the amount of annual rental payments to be paid, CCC considers, among other things, the amount necessary to encourage owners or operators of eligible cropland to participate in the CRP. Applicants submit offers in such a manner as the Secretary prescribes. The maximum rental payments CCC will pay reflect site-based soil productivity, prevailing local cash equivalent rental rates, maintenance costs, and other factors. Offers by producers who request rental payments greater than the amount CCC is willing to pay for their soil type are automatically rejected by CCC. Except for the continuous signup process, remaining offers are evaluated for possible acceptance based on a comparison of environmental benefits indicators with the rental payment cost.

The continuous signup process does not include an evaluation based on environmental benefits indicators because only those practices designed to obtain high environmental benefits are eligible to be offered during the continuous signup. Acreage determined eligible and suitable to be devoted to continuous signup practices by the Secretary is automatically accepted in the CRP provided all other eligibility requirements are met.

Program Changes

Proposed changes fall into three general categories: (1) Changes to § 1410.6, Eligible Land; (2) permitting CCC to acquire private sector technical assistance; and (3) minor editorial, technical, and conforming amendments.

Section 1410.6 Eligible Land

Generally, by statute, CRP land enrolled in the program must be cropland, but the rules for the program provide that the crop history must generally be a history of production of tillable crops. That limitation provides for focusing the CRP on the conversion of land with the most intensive uses to a cover crop. Also, this focus emphasizes the "reserve" nature of the program and can provide a greater amount of public benefit by producing savings in other programs as recompense for the monies spent on this program. This rule, however, proposes that for the continuous sign-ups held for the CRP and for enrollments in the Conservation Reserve Enhancement Program (CREP), certain orchard lands, vineyards, berry fields, and hay land be permitted to be enrolled. These lands can provide significant benefits in those special sign-ups which involve special, often narrow (geographically) practices such as conservation measures along stream banks where these enrollments may even be more beneficial than the enrollment of normal cropland. Such an expansion of the eligibility criteria for the program had been requested by a number of State governments involved in CREP agreements.

Private Sector Technical Assistance

Currently, technical assistance for running the CRP is generally conducted through the auspices of the Natural Resources Conservation Service (NRCS) and a number of decisions which may be needed for the CRP are by regulation committed to the NRCS. However, because of funding and other considerations it may be necessary for some determinations, from time to time, to be made using private contractors or other agencies. Accordingly, this rule proposes that some references to the NRCS in the regulations be replaced or amended. This change will allow greater flexibility in running the program even though no fundamental change in program operations is contemplated at this time. No changes for the participant are anticipated regarding eligibility or paperwork. These adjustments to the regulations are found at 7 CFR 1410.1(f), 1410.2, 1410.3(b), 1410.6(b)(2)(i), 1410.6(b)(2)(iv), and 1410.22.

Minor Editorial, Technical, and Conforming Amendments

CCC further proposes a number of minor amendments for clarity at §§ 1410.4, 1410.20, and 1410.62(f) and to more closely track the CRP legislation. These modifications involve: (1) Adding a specific reference to the statutory requirement that allowing greater than a certain maximum level of CRP participation in a county requires a finding that producers are having trouble complying with conservation plans; (2) changing the limit on how much land one farm can have in both the CRP and in the Production Flexibility Program to that based on the amount of the farm's "agricultural use" land rather than the farm's "cropland"; and (3) specifying that only that land which was "cropland" at the start of the contract will be treated as "cropland" during the duration of the contract. Also, § 1410.1(g), which currently provides for the development by State FSA committees of State-specific evaluation processes to rank acreage, is removed because no State FSA committee has developed a State-specific evaluation process for bid acceptance for over 2 years.

List of Subjects in 7 CFR Part 1410

Administrative practices and procedures, Agriculture, Conservation plan, Natural resources, Technical assistance.

For reasons set out in the preamble, 7 CFR part 1410 is proposed to be amended as follows:

PART 1410—CONSERVATION RESERVE PROGRAM

1. The authority citation for 7 CFR part 1410 continues to reads as follows:

Authority: 15 U.S.C. 714b and 714c; 16 U.S.C. 3801–3847.

2. In § 1410.1:

a. Paragraphs (a) and (f) are revised;

b. Paragraph (g) is removed; and

c. Paragraphs (h) through (k) are redesignated as paragraphs (g) through (j).

The revisions read as follows:

§ 1410.1 Administration.

(a) The regulations in this part will be administered under the general supervision and direction of the Executive Vice President, Commodity Credit Corporation (CCC), through the Deputy Administrator for Farm Programs (Deputy Administrator) of the Farm Service Agency (FSA). In the field, the regulations in this part will be administered by the State and county FSA committees ("State committees" and "county committees", respectively). Further, CCC may enter into agreements to perform technical assistance with the private sector; however, national level concurrence between FSA and the Natural Resource Conservation Service (NRCS) or Forest Service (FS), as appropriate, is required for CCC to acquire private sector technical assistance, except when NRCS or FS cannot provide technical assistance due to funding or other restrictions. Further, private sector costs should be comparable when practicable, to the cost of technical assistance provided by NRCS and FS.

* * * * *

(f) Notwithstanding other provisions of the preceding paragraphs of this section, the Erosion Index (EI), suitability of land for permanent vegetative or water cover, factors for determining the likelihood of improved water quality, and adequacy of the planned practice to achieve desired objectives shall be determined by the Natural Resource Conservation Service (NRCS), or any other technical authority approved by CCC. Any CCC-approved technical authority shall utilize the NRCS Field Office Technical Guide (FOTG), or other CRP guidelines established by CCC.

* * * * *

3. In § 1410.2, the definition of technical assistance is revised to read as follows:

§ 1410.2 Definitions.

* * * * *

Technical assistance means the assistance provided in connection with the CRP to owners or operators by NRCS, FS, or another source as approved by CCC in developing conservation plans, determining the eligibility of land and practices, and implementing and certifying conservation practices, and forestry issues.

* * * * *

4. Section 1410.3 paragraph (b) is revised to read as follows:

§ 1410.3 General description.

* * * * *

(b) A participant must obtain a conservation plan prepared in accordance with NRCS planning policy for eligible acreage, available in the National Conservation Planning Handbook and the General Manual at the Natural Resource Conservation Service State offices and field offices.

* * * * *

5. Section 1410.4 is revised to read as follows:

§ 1410.4 Maximum county acreage.

(a) Except as provided in paragraph (b) of this section, the maximum acreage which may be placed in the CRP and the WRP may not exceed 25 percent of the total cropland in the county; further, no more than 10 percent of the cropland in the county may be subject, in the aggregate, to a CRP or WRP easement;

(b) The restrictions in paragraph (a) of this section may be waived if CCC determines that such action would not adversely affect the local economy of the county, and also that operators in the county are having difficulties complying with conservation plans directed under part 12 of this title;

(c) These restrictions on participation shall be in addition to any other restriction imposed by law.

6. In § 1410.6, revise paragraphs (a)(2)(ii), (b)(2)(i) introductory text, (b)(2)(iv), (b)(4), (b)(8) and (b)(9) and add a new paragraph (b)(12) to read as follows:

§ 1410.6 Eligible land.

(a) * * *

(2) * * *

(ii) As determined by CCC, is or will be planted to trees, and such other woody and non-woody vegetation as appropriate, for water quality purposes in or near riparian areas or in other areas where, as determined by CCC in accordance with the FOTG, the same or similar water quality enhancement benefits will be obtained; or

* * * * *

(b) * * *

(2)(i) Be a field which has evidence of scour erosion caused by out-of-bank flows of water, as determined by CCC in accordance with the FOTG. In addition such land must:

* * * * *

(iv) Be planted to an appropriate tree species, unless tree planting is determined by CCC to be inappropriate under provisions of the FOTG, in which case the eligible cropland shall be devoted to another acceptable permanent vegetative cover identified as appropriate in the FOTG; or

* * * * *

(4) Be devoted to certain covers, which are established and maintained in accordance with the FOTG and other guidelines approved by CCC provided such acreage is not required to be maintained as such under any life span obligations; or

* * * * *

(8) Be within a public wellhead protection area or in an approved Hydrologic Unit Area as determined by the NRCS or other delegatee as determined by NRCS;

(9) Be within a designated conservation priority area as determined by CCC; or

* * * * *

(12) is cropland devoted to orchard lands, vineyards, berry land, or hay lands, as determined by CCC, but will only be eligible for continuous signup practices authorized by § 1410.30 or practices authorized by § 1410.50(b).

* * * * *

7. Section 1410.20, paragraph (a)(4)(ii), is revised to read as follows:

§ 1410.20 Obligations of participant.

(a) * * *

(4) * * *

(ii) Reduce production flexibility contract acres enrolled under part 1412 of this chapter or CRP acres enrolled under this part so that the total of such acres does not exceed the total agricultural use land on the farm;

* * * * *

8. Section 1410.22 paragraphs (a) and (e) are revised to read as follows:

§ 1410.22 Conservation plan.

(a) The applicant shall obtain a conservation plan which is developed in accordance with NRCS conservation planning policy and is approved by the conservation district for the land to be entered in the CRP. If the conservation district declines to review the conservation plan, such approval may be waived by CCC.

* * * * *

(e) All conservation plans and revisions of such plans shall be made in accordance with the NRCS conservation planning policy and be subject to the approval of CCC.

9. Section 1410.62, paragraph (f), is revised to read as follows:

§ 1410.62 Miscellaneous.

* * * * *

(f) Cropland enrolled in CRP shall be classified as cropland for the time period enrolled in CRP and, after the time period of enrollment, may be removed from such classification upon a determination by the county committee that such land no longer meets the conditions identified in part 718 of this title.

* * * * *

Signed at Washington, D.C., on November 29, 2001.

James R. Little,

Executive Vice President, Commodity Credit Corporation.

[FR Doc. 01–30213 Filed 12–5–01; 8:45 am]

BILLING CODE 3410–05–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2001–NE–12–AD]

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce plc RB211 Trent 875, 877, 884, 892, 892B, and 895 Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The Federal Aviation Administration (FAA) proposes to adopt a new airworthiness directive (AD) that is applicable to Rolls-Royce plc RB211 Trent 875, 877, 884, 892, 892B, and 895 series turbofan engines. This proposal would require reapplication of dry film lubricant to low pressure compressor (LPC) fan blade roots. This proposal is prompted by an aborted take-off resulting from LPC fan blade loss. Since this event, four additional cracked LPC fan blade roots have been reported. The actions specified by the proposed AD are intended to prevent LPC fan blade loss, which could result in an uncontained engine failure and possible aircraft damage.

DATES: Comments must be received by February 4, 2002.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Regional Counsel, Attention: Rules Docket No. 2001–NE–12–AD, 12 New England Executive Park, Burlington, MA 01803–5299. Comments may be inspected at this location between 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Comments may also be sent via the Internet using the following address: *9-ane-adcomment@faa.gov*. Comments sent via the Internet must contain the docket number in the subject line. The service information referenced in the proposed rule may be obtained from Rolls-Royce plc, PO Box 31, Derby, England, DE248BJ; telephone: 011–44–1332–242–424; fax: 011–44–1332–245–418. This information may be examined,

by appointment, at the FAA, New England Region, Office of the Regional Counsel, 12 New England Executive Park, Burlington, MA.

FOR FURTHER INFORMATION CONTACT: Keith Mead, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803–5299; telephone: (781) 238–7744, fax: (781) 238–7199.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2001–NE–12–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRM's

Any person may obtain a copy of this NPRM by submitting a request to the FAA, New England Region, Office of the Regional Counsel, Attention: Rules Docket No. 2001–NE–12–AD, 12 New England Executive Park, Burlington, MA 01803–5299.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom (U.K.), recently notified the FAA that an unsafe condition may exist on Rolls-Royce plc RB211 Trent 875, 877, 884, 892, 892B, and 895 series turbofan engines. The CAA advises that a Trent 800 series powered aircraft experienced an aborted take-off as a result of an inability to achieve the commanded exhaust pressure ratio (EPR) on the Number 1 engine. Ground inspection of the engine revealed loss of one LPC fan blade. Since this event, four additional LPC fan blade roots have been reported cracked. Loss of the LPC fan blade resulted from high stresses and subsequent cracking in the fan blade root. Investigation by the engine manufacturer has shown that regular reapplication of dry film lubricant on the LPC fan blade root results in reduced blade to disk friction during engine operation and hence reduced blade root stressing. The FAA concurs with the manufacturer's determination as to the optimum times to perform the reapplication of the dry film lubricant, as provided in this proposal. The actions specified by the proposed AD are intended to prevent LPC fan blade loss, which could result in an uncontained engine failure and possible aircraft damage.

Manufacturer's Service Information

Rolls-Royce has issued Mandatory Service Bulletin (MSB) RB.211–72–D347, Revision 2, dated May 30, 2001, that requires initial and reapplication of dry film lubricant to LPC fan blade roots. The CAA classified this service bulletin as mandatory and issued AD 001–03–2001 in order to ensure the airworthiness of these Rolls-Royce engines in the U.K.

Bilateral Agreement Information

This engine model is manufactured in the U.K. and is type certificated for operation in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Proposed Requirements of This AD

Since an unsafe condition has been identified that is likely to exist or develop on other Rolls-Royce plc RB211 Trent 875, 877, 884, 892, 892B, and 895 series turbofan engines of the same type design , the proposed AD would require initial and reapplication of dry film lubricant to LPC blade roots. The actions would be required to be accomplished in accordance with the SB described previously.

Economic Impact

The FAA estimates that 88 engines installed on aircraft of U.S. registry would be affected by this proposed AD. The FAA also estimates that it would take approximately 6 work hours per engine to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Based on these figures, the total labor cost impact of the proposed AD on U.S. operators is estimated to be $31,680 to accomplish each application of lubricant. The FAA estimates that operators will apply lubricant an average of 1.5 times per year, making the total annual cost of compliance with this proposal $ 47,520.

Regulatory Impact

This proposed rule does not have federalism implications, as defined in Executive Order 13132, because it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, the FAA has not consulted with state authorities prior to publication of this proposed rule.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Rolls-Royce plc: Docket No. 2001–NE–12–AD.

Applicability: This airworthiness directive (AD) is applicable to Rolls-Royce plc RB211 Trent 875, 877, 884, 892, 892B, and 895 series turbofan engines with low pressure compressor (LPC) fan blade part numbers: FK 30838, FK30840, FK30842, FW12960, FW12961, FW12962, FW13175, or FW18548. These engines are installed on, but not limited to Boeing 777 airplanes.

Note 1: This AD applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Compliance with this AD is required as indicated, unless already done.

To prevent LPC fan blade loss, which could result in an uncontained engine failure and possible aircraft damage, accomplish the following:

TABLE 1.—INITIAL AND REPETITIVE APPLICATION THRESHOLDS

LPT Fan blade part Nos.	Initial compliance criteria	Repetitive compliance criteria
FK30842, FK30840, and FK30838	Before achieving 600 cycles since installation	Repeat at intervals not exceeding 600 cycles since last compliance.
FW12961, FW12960, FW12962, FW13175, FW18548.	Before achieving 1200 cycles since installation.	Repeat at intervals not exceeding 1200 cycles since last compliance.

(a) Apply an approved dry film lubricant to low pressure compressor (LPC) fan blade roots as specified in Table 1 above. Aircraft Maintenance Manual (AMM) task 72–31–11–300–801–R00 (Repair Scheme FRS A031 by air spray method only) or engine manual 72–31–11–R001 (Repair Scheme FRS A028) contain procedures for renewing the dry film lubricant on the blade roots. For purposes of this AD, approved lubricants are Dow Corning 321R (Rolls-Royce (RR) Omat item 4/52), Rocol Dry Moly Spray (RR Omat item 4/52), Molydag 709 (RR Omat item 444), or PL.237/R1 (RR Omat item 4/43).

Fan Blades Exceeding Initial Application Thresholds

(b) For blades that have, on the effective date of the AD, more cycles since installation than the initial compliance criteria in Table 1 of this AD, inspect blades within 100 cycles in service after the effective date of this AD.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office (ECO). Operators must submit their request through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, ECO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the ECO.

Special Flight Permits

(d) Special flight permits may be issued in accordance §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the aircraft to a location where the requirements of this AD can be done.

Note 3: The subject of this AD is addressed in Civil Aviation Authority Airworthiness Directive 001–03–2001, dated March 2, 2001.

Issued in Burlington, Massachusetts, on November 30, 2001.

Francis A. Favara,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[ME065–7014; A–1–FRL–7114–5]

Approval and Promulgation of Air Quality Implementation Plans; Maine; Control of Gasoline Volatility

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a State Implementation Plan (SIP) revision submitted by the State of Maine on June 7, 2000 and May 29, 2001, establishing a lower Reid Vapor Pressure (RVP) fuel requirement for gasoline distributed in southern Maine which includes York, Cumberland, Sagadahoc, Kennebec, Androscoggin, Knox, and Lincoln Counties. Maine has developed these fuel requirements to reduce emissions of volatile organic compounds (VOC) in accordance with the requirements of the Clean Air Act (CAA). EPA is proposing to approve Maine's fuel requirements into the Maine SIP because EPA has found that the requirements are necessary for southern Maine to achieve the national ambient air quality standard (NAAQS) for ozone. The intended effect of this action is to propose approval of Maine's request to control the RVP of fuel in these seven southern counties. This action is being taken under section 110 of the Clean Air Act.

DATES: Written comments must be received on or before January 7, 2002.

ADDRESSES: Comments may be mailed to David Conroy, Unit Manager, Air Quality Planning, Office of Ecosystem Protection (mail code CAQ), U.S. Environmental Protection Agency, EPA–New England, One Congress Street, Suite 1100, Boston, MA 02114–2023. Copies of the State submittal and EPA's technical support document are available for public inspection during normal business hours, by appointment at the Office of Ecosystem Protection, U.S. Environmental Protection Agency, EPA-New England, One Congress Street, 11th floor, Boston, MA and the Bureau of Air Quality Control, Department of Environmental Protection, 71 Hospital Street, Augusta, ME 04333.

FOR FURTHER INFORMATION CONTACT: Robert C. Judge, (617) 918–1045.

SUPPLEMENTARY INFORMATION: The information in this section is organized as follows:

I. Description of the SIP Revision and EPA's Action

A. What Is the Background for This Action?
B. What is Reid Vapor Pressure?
C. What are the relevant Clean Air Act requirements?
D. How has the State met the Test Under Section 211(c)(4)(C)?
E. What Comments were Previously Submitted on Maine's low-RVP Rule?
F. Why is EPA Taking this Action?

II. Proposed Action

III. What Are the Administrative Requirements?

I. Description of the SIP Revision and EPA's Action

A. What is the Background for this Action?

Under the Clean Air Act Amendments of 1990, southern Maine was divided into three separate ozone nonattainment areas: the Portland area which is comprised of York, Cumberland and Sagadahoc Counties; the Lewiston-Auburn area which is comprised of Androscoggin and Kennebec counties; and the Knox and Lincoln County area. Each of these areas was classified as moderate nonattainment for ozone. The ozone attainment deadline for these areas was initially November 15, 1996. Just downwind from these areas, the largely rural counties of Hancock and Waldo were designated nonattainment for ozone and classified as marginal.

To bring these areas into attainment, the State has adopted and implemented a broad range of ozone control measures including stage II vapor recovery on larger gasoline retail facilities, numerous stationary and area source VOC controls, a vehicle inspection and maintenance (I/M) program, and the California low emission vehicle program. In addition, the State participated in the federal reformulated gasoline (RFG) program in the seven southern counties in Maine from January 1, 1995 until March 10, 1999, when the State's opt-out of the federal RFG became effective. This strategy and other measures resulted in significant air quality improvements in southern Maine.

EPA issued a direct final rule to approve a low RVP control program for the seven southern Maine counties on May 14, 1999 (64 FR 26306), but received adverse comment on that action. As a result, that direct final action was withdrawn on June 28, 1999 (64 FR 24557). Those comments are addressed in this notice for the purpose of developing this proposal.

After EPA withdrew the 1998 direct final approval of the State's low-RVP program, Maine Department of Environmental Protection (DEP) amended its low RVP control program and revised its SIP submittal request. The amendments changed the RVP of a compliant fuel and became effective on June 1, 2000. The rule as amended requires that beginning May 1, 1999 through September 15, 1999, and each May 1 through September 15 thereafter, no gasoline may be sold with an RVP greater than 7.8 psi in the counties of York, Cumberland, Sagadahoc, Kennebec, Androscoggin, Knox, and Lincoln. The State's low-RVP rule is codified in Chapter 119 of the Maine Department of Environmental Protection's regulations, entitled "Motor Vehicle Fuel Volatility Limit."

The DEP submitted this amended low-RVP rule to EPA as a revision to the SIP on June 7, 2000. On May 29, 2001, Maine submitted additional technical support for the SIP revision, including materials supporting the State's request to waive Clean Air Act preemption of state fuel controls pursuant to section 211(c)(4) of the Act and a description of its fuel enforcement strategy.

By this low-RVP rule, Maine is ensuring that it replaces much of the VOC benefits that RFG had been required to achieve. These emission reductions were critical to Maine's attainment of the 1-hour ozone standard in several areas.

B. What Is Reid Vapor Pressure?

Reid Vapor Pressure, or RVP, is a measure of a gasoline's volatility at a certain temperature and is a measurement of the rate at which gasoline evaporates and emits VOC; the lower the RVP, the lower the rate of evaporation. The RVP of gasoline can be lowered by reducing the amount of its more volatile components, such as butane. Lowering RVP in the summer months can offset the effect of summer temperature upon the volatility of gasoline, which, in turn, lowers emissions of VOC. Because VOC is a necessary component in the production of ground level ozone in hot summer months, reduction of RVP will help areas achieve the NAAQS for ozone and thereby produce benefits for human health and the environment.

The primary emission reduction benefits from low-RVP gasoline used in motor vehicles comes from reductions in VOC evaporative emissions; exhaust emission reductions are much smaller. Because oxides of nitrogen (NO_X) are a product of combustion from motor vehicles, they will not be found in evaporative emissions, and low-RVP gasoline will have little or no effect on NO_X.

C. What Are the Relevant Clean Air Act Requirements?

In determining the approvability of a SIP revision, EPA must evaluate the proposed revision for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans).

For SIP revisions approving certain state fuel measures, an additional statutory requirement applies. CAA section 211(c)(4)(A) prohibits state regulations respecting a fuel characteristic or component for which EPA has adopted a control or prohibition under section 211(c)(1), unless the state control is identical to the federal control. Section 211(c)(4)(C) provides an exception to this preemption if EPA approves the state requirements in a SIP. Section 211(c)(4)(C) states that the Administrator may approve an otherwise preempted state fuel standards in a SIP:

> only if [s]he finds that the State control or prohibition is necessary to achieve the national primary or secondary ambient air quality standard which the plan implements. The Administrator may find that a State control or prohibition is necessary to achieve that standard if no other measures that would bring about timely attainment exist, or if other measures exist and are technically possible to implement, but are unreasonable or impracticable.

EPA's August, 1997 "Guidance on Use of Opt-in to RFG and Low RVP Requirements in Ozone SIPS" gives further guidance on what EPA is likely to consider in making a finding of necessity. Specifically, the guidance recommends breaking down the necessity demonstration into four steps: identify the quantity of reductions needed to reach attainment; identify other possible control measures and the quantity of reductions each measure would achieve; explain in detail which of those identified control measures are considered unreasonable or impracticable; and show that even with the implementation of all reasonable and practicable measures, that the state would need additional emission reductions for timely attainment, and that the state fuel measure would supply some or all of such additional reductions.

EPA has evaluated the submitted SIP revision and has determined that it is consistent with the requirements of the CAA, EPA regulations, and conforms to EPA's completeness criteria in 40 CFR part 51, Appendix V. Further, EPA has looked at Maine's demonstration that the low-RVP fuel control is necessary in accordance with 211(c)(4)(C) and agrees with the State's conclusion that a fuel measure is needed to achieve the 1-hour ozone NAAQS.

The SIP submittal contains: (1) Chapter 119, Maine Department of Environmental Protection regulations, as amended by the Maine Board of Environmental Protection and effective on June 1, 2000; (2) documentation of

the public notice dated December 4, 1999, and a transcript of the public hearing regarding the amendment of Chapter 119, dated January 6, 2000; (3) evidence of State legal authority; and (4) application for waiver of federal preemption. Information regarding prohibitions on the sale of non-conforming gasoline, test procedures and sampling for the SIP revision can be found in Chapter 119 of the Maine Department of Environmental Protection regulations, and Maine statutes on enforcement and penalties can be found at Title 38 of Maine Revised Statutes Annotated (M.R.S.A.) sections 348 and 349. Based on this and a detailed enforcement strategy in the May 29, 2001 submittal, EPA has concluded that these provisions confer on the State the requisite authority to enforce compliance with the 7.8 psi RVP limit.

D. How Has the State Met the Test Under Section 211(c)(4)(C)?

CAA section 211(c)(4)(A) preempts certain state fuel regulations by prohibiting a state from prescribing or attempting to enforce any control or prohibition respecting any characteristic or component of a fuel or fuel additive for the purposes of motor vehicle emission control if the Administrator has prescribed under section 211(c)(1) a control or prohibition applicable to such characteristic or component of the fuel or fuel additive, unless the state prohibition is identical to the prohibition or control prescribed by the Administrator.

EPA has adopted Federal RVP controls under sections 211(c) and 211(h). See 56 FR 64704 (Dec. 12, 1991). These regulations are found in 40 CFR 80.27. Maine is required under the Federal rule to meet the 9.0 psi RVP standard. See 40 CFR 80.27(a)(2).

A state may prescribe and enforce an otherwise preempted low-RVP requirement only if the EPA approves the control into the state's SIP. In order to approve a preempted state fuel control into a SIP, EPA must find that the state control is necessary to achieve a NAAQS because no other reasonable or practicable measures exist to bring about timely attainment. Thus, to determine whether Maine's low-RVP rule is necessary to meet the ozone NAAQS, EPA must consider whether there are other reasonable and practicable measures available to produce the emission reductions needed to achieve the 1-hour ozone NAAQS.

With the State's decision to opt-out of the federal RFG program, additional VOC reductions are necessary to ensure that the Portland area meets the 1-hour ozone standard. The Portland area has measured air quality in recent years fluctuating between meeting and exceeding the 1-hour standard. Maine has had exceedances of the 1-hour ozone standard in 1999 and 2001—two out of the three years since the State opted out of the federal RFG program. Given this situation, it is clear that the VOC reductions provided by participation of the seven counties of southern Maine in the federal RFG program are critical to the Portland area's achievement of the ozone NAAQS.

For purposes of demonstrating necessity, EPA has used the phase 1 RFG VOC reductions required in the SIP submitted by Maine on July 19, 1995 for its 15 percent rate of progress plan as an estimate of the emission reductions that are necessary for southern Maine to achieve the ozone NAAQS. EPA believes this estimate of necessary reductions is conservative. In its 15-percent rate of progress plan for the Portland area, Maine had estimated that RFG would achieve 6.96 tons of VOC reduction per summer day. This figure was calculated using only vehicle miles traveled in the three-county Portland area. The sale of RFG in the surrounding four counties further benefitted the Portland area due to driving patterns into and around the Portland area and the geographic proximity of these surrounding four counties (Knox, Lincoln, Androscoggin, and Kennebec). These counties are downwind of the Portland area, and had previously participated in the RFG program. While these areas are no longer violating the one-hour ozone NAAQS, they did benefit from the fuel program's reductions. Further, persons traveling from these areas do travel into the Portland area, exacerbating the air quality problem in that area.

With this estimate of the VOC reductions necessary to achieve the ozone NAAQS, the State evaluated an extensive list of non-fuel alternative controls to determine if reasonable and practicable controls could be implemented to provide sufficient VOC reductions in a timely manner. The State analyzed potential control measures by reviewing previously prepared emission inventories to determine if other non-fuel control measures could be adopted and used to replace the VOC reductions that RFG had achieved. The State reviewed all the source categories that comprised the emission inventory, and evaluated control measures on each source category. For a variety of reasons, most control measures were either already implemented, or were found to be unreasonable or impracticable for achieving reductions in a timely manner. (See May 29, 2001 submittal from the State of Maine.)

As one example, the State evaluated the possibility of further controlling gasoline refueling, or stage II, emissions. The State does have a stage II vapor recovery program for larger facilities, but expanding the geographic coverage, and requiring smaller facilities (i.e., gas stations) to comply would yield among the most additional VOC reductions of any control strategy that the State reviewed. The State concluded that a legislative change, as well as a regulatory change, would be necessary to further control emissions from this source category. As a result, such controls could not be adopted and implemented as quickly as the low-RVP fuel control. Further, the actual installation of these controls would take additional time, which would not be reasonable or practicable because the State needed to replace the reductions as soon as possible. For these reasons, the State concluded that further stage II controls were not a practical measure for achieving VOC emission reductions. Other control measures were similarly evaluated, and determined to be either technically impossible or unreasonable and impracticable, or in a longer time frame when the State needed to secure the replacement emission reductions as soon as possible to achieve the NAAQS.

The State's analysis identified several non-fuel alternative controls that could conceivably be implemented by the summer of 2001—the earliest time frame for EPA approval of this low-RVP standard. (See May 29, 2001 State submittal) At best, adoption of all available measures would result in about 0.5 tons per day (tpd) of emission reductions—substantially less than the estimated reductions needed. Thus, even with implementation of all reasonable and practicable non-fuel control measures, additional VOC reductions are necessary. It should be noted that this low-RVP rule has been in effect at the State level since 1999, and the State reports that fuel sold in this area has been complying with this RVP limit.

Maine's low-RVP rule achieves approximately 4.5 tpd of VOC reductions beginning the summer of 1999 (based on vehicle miles traveled in the Portland area). Because low-RVP fuel sales in the four surrounding counties will reduce emissions in the Portland area when drivers from these areas travel into Portland, EPA believes RVP controls in these areas will further benefit the Portland area. EPA believes these emission reductions are necessary to achieve the applicable ozone NAAQS

in southern Maine. EPA is basing today's action on the information available to the Agency at this time, which indicates that adequate reasonable and practicable non-fuel measures are not available to the State that would achieve these needed emission reductions, and protect Maine's air quality in a timely manner. Hence, EPA is finding that the RVP standards are necessary for attainment of the applicable ozone NAAQS, and EPA is proposing to approve them as a revision to the Maine SIP.

E. What Comments Were Previously Submitted on Maine's low-RVP Rule?

On May 14, 1999 (64 FR 26306, 64 FR 26352), EPA published a Direct Final Rulemaking (DFR) and parallel Notice of Proposed Rulemaking (NPRM) proposing approval of a SIP revision for Maine for a low-RVP fuel control program. The NPRM provided the public with the opportunity to comment. On June 11, 1999, the Oxygenated Fuels Association (OFA) provided comment on that rulemaking. In accordance with established Direct Final Rulemaking procedures, EPA withdrew the DFR and would have had to respond to OFA's comments before taking final action on the NPRM.

After EPA withdrew the DFR, however, Maine DEP amended its low-RVP program and submitted a revised SIP revision, which is the basis for today's new proposed rulemaking. While EPA is not taking final action on the 1999 NPRM on which OFA commented, EPA has nevertheless considered the comments raised by OFA in developing this new proposal and has decided to address those points in developing today's proposal. Because EPA's prior withdrawn action is distinct from the action proposed today, parties seeking to participate in this rulemaking for comment and judicial review purposes should submit comments during the comment period on this action.

Comment 1. OFA commented that the State of Maine can not adopt a fuel strategy under section 211(c) because it is not necessary for attainment. Under the Clean Air Act (CAA), EPA can only waive the federal preemption of state fuel programs when the state fuel program is necessary for attainment. The State had already achieved attainment of the 1-hour ozone standard using RFG, and chose to no longer participate in the RFG program. OFA argues the State cannot adopt a new fuel control measure and justify it as necessary for attainment when it is choosing to no longer implement a control measure that helped achieve attainment. OFA also takes issue with the fact that RFG actually sold in Maine achieved more reductions than it was required to, and that we were only requiring Maine to replace the reductions that RFG was required to achieve.

Response 1. The commenter is correct in that EPA believes that RFG contributed to cleaner air in Maine. Maine, however, has decided that RFG is no longer a desirable fuel control for the State and has adopted the low-RVP control measure to replace at least some of the emission reductions provided by RFG. Maine chose to implement RFG, and Federal regulations allowed the State to choose to no longer implement RFG subject to the constraints in the RFG opt-out rule. With RFG no longer viewed as a viable option in the State, due to concerns about MTBE contaminating groundwater, Maine moved forward to replace the fuel measure by achieving the emission reductions it had planned for in its SIP.

It is important to note, however, that EPA required the State to take several steps before allowing the State to "opt-out" of the RFG program. Consistent with the RFG opt-out procedures (40 CFR 80.72), the State identified an alternative control measure to make up for planned emission reductions lost from opting-out of RFG, and provided adequate lead time to industry to notify that the State was opting-out of the program. Nevertheless, Maine made a decision fully allowed under the RFG program, and followed the criteria outlined in the rule. The State had relied upon RFG in the Portland area in the plan submitted under section 182(b)(1) of the CAA (*i.e.*, the 15 percent plan). As required by the RFG opt-out rule (40 CFR 80.72(b)(3)), Maine identified the measures with which it intended to replace RFG. Based on that, EPA allowed the RFG opt-out to proceed.

As OFA pointed out, current data suggests that RFG has achieved more clean air benefits than required under the Clean Air Act and the RFG rules. As the commenter correctly pointed out, RFG achieved emission reductions of VOC, air toxics and NO_X well in excess of that required by law. However, the RFG opt-out rule only requires that States move to replace emission reductions that were planned for. In light of the fact that RFG did in fact achieve more emission reductions than required, EPA intends to continue to work with Maine to ensure that Maine's actual air quality is not degraded by the State's choice to opt-out of the RFG program.

The relevant the issue for today's action, however, is whether or not Maine, in fact, needed emission reductions from RFG to attain the 1-hour ozone standard. The fact that RFG was cleaner than required would seem to argue even more strongly that the emission reductions from RFG were necessary to achieve attainment. In fact, as pointed out in the May 14, 1999 **Federal Register** (64 FR 26308), Maine achieved the 1-hour standard by the slimmest of margins. Since then, Maine has fluctuated between meeting and violating the 1-hour ozone standard. Not sustaining those emission reductions will jeopardize Maine's attainment of the 1-hour standard.

Comment 2. OFA commented that this 211(c) waiver was not necessary to meet the 1-hour ozone standard, since EPA had proposed in December, 1998 that the 1-hour standard was achieved in the Portland area, and had previously found that the 1-hour standard had been met in all other parts of the State. OFA further contends that, based on DC court ruling (*ATA* vs. *EPA*—May 14, 1999), that EPA could not justify the need for fuel controls based on the fact that Maine's air quality was violating the new 8-hour ozone NAAQS.

Response 2. On June 9, 1999, EPA determined that the Portland, Maine area had attained the 1-hour ozone standard (64 FR 30911), and revoked the one-hour standard. This determination was based on data collected from 1996–1998. For the time period 1997–1999, however, Maine again violated the one-hour ozone standard. On July 20, 2000 (65 FR 45182), due to uncertainty regarding the implementation of the 8-hour ozone standard, EPA determined that the one-hour standard should apply again in all areas where it was previously revoked, such as Maine. Subsequently, based on data collected in 1998–2000 and 1999–2001, Maine is again measuring air quality which meets the one-hour ozone standard.

Because Maine achieved the 1-hour ozone standards by only the slimmest of margins with reductions achieved though fuel controls, and because Maine continues to monitor exceedances that could be even worse without the current RVP controls, EPA concludes that the VOC reductions provided by the State fuel controls are necessary to achieve the 1-hour ozone NAAQS. In today's action, we are proposing to approve the State's 7.8 psi RVP fuel control program into the SIP to replace much of the emission reductions that RFG was designed to achieve. Failure to do so would jeopardize Maine's ability to achieve the 1-hour standard. EPA is not relying upon a finding that the State's

fuel control is necessary under section 211(c)(4)(C) to achieve the 8-hour ozone NAAQS.

Comment 3. OFA contends that Maine (or EPA) did not identify the level of reductions necessary to achieve attainment of the ozone standard in Maine.

Response 3. EPA, and Maine, identified a conservative amount of reductions that were necessary for Maine to achieve the 1-hour ozone standard. Maine had previously established that, as part of the 15 percent rate of progress plan for the Portland area, RFG had been expected to achieve 6.96 tons of VOC reductions per summer day. As pointed out in our earlier rulemaking (64 FR 26308), EPA had also determined that, with the strategies that Maine had implemented, the 1-hour ozone standard had been achieved by the slimmest of margins. In short, the Portland area needed all of the reductions that had been achieved to secure attainment. As discussed in the previous response, this is further evidenced by the fact that Maine subsequently violated the 1-hour standard after opt-out. Even this past summer, 2001, Maine has recorded 1-hour exceedances. As such, in order to preserve clean air, Maine would need to replace emission reductions from any program implemented and relied upon in the 15 percent rate of progress plan. As stated earlier, because RFG is no longer being implemented, those reductions must be replaced.

OFA made the additional point that the emission reductions from RFG were underestimated for two reasons, and that more than 6.96 tons of VOC reductions per summer day would need to be replaced for the Portland area. First, OFA pointed out that the 6.96 tpd estimate represents only the emission reductions required to be achieved in the Portland area (York, Cumberland, and Sagadahoc Counties) from RFG, and that RFG was also sold in four other counties (Androscoggin, Kennebec, Knox and Lincoln counties). Second, OFA explained that RFG in practice actually achieved more emission reductions than required, and that this should be the clean air target.

EPA agrees with OFA that RFG likely provided more than 6.96 tpd of VOC reductions for the Portland area. As explained above, this further stresses the importance and necessity of Maine replacing this control measure even if the State's 7.8 psi RVP fuel control program does not require the same level of reductions that RFG achieved in practice. Nevertheless, EPA intends to continue to work with Maine to ensure that all of the actual emissions reductions achieved by RFG will be replaced to ensure sustained clean air for Maine's citizens.

Comment 4. OFA argues that this low-RVP fuel control strategy was not the only available control measure to bring about timely attainment. OFA contends that RFG was available, and in fact brought about attainment in Maine and that RFG should have been among the measures that EPA evaluated as a measure which could bring about attainment, since it was technically possible to implement, and was reasonable and practicable. OFA also took issue with Maine's argument that other non-fuel measures were not available to achieve the level of reductions necessary because of the lead time needed to implement those additional programs (such as further Stage 2 vapor recovery). OFA argued that Maine had known since at least 1997 that the State was considering opting-out of the RFG program, and that proper planning would have allowed the State to achieve any requisite emission reductions with other non-fuel control measures.

Response 4. We address this comment in two parts. First is to discuss EPA policy requiring that a State's section 211(c) analysis look at only non-fuel measures to secure the emission reductions necessary for attainment, prior to being allowed to adopt or enforce otherwise preempted fuel controls. The second point will discuss, in this instance, whether or not sufficient non-fuel control measures exist which could eliminate the need for the low-RVP fuel control pursuant to section 211(c)(4)(C).

On the first point, section 211(c)(4)(C) provides that EPA can approve an otherwise preempted state fuel control only if there are no other reasonable or practicable measures available to achieve the NAAQS. EPA interprets the reference to other measures that must be evaluated as generally not encompassing other fuels measures. The Agency believes that the Act does not call for a comparison between state fuels measures to determine which measures are unreasonable or impracticable, but rather section 211(c)(4) is intended to ensure that a state resorts to a fuel measure only if there are no available practicable and reasonable non-fuels measures. This interpretation minimizes the burden on the oil industry of different state fuel measures where non-fuel measures are available, and thereby satisfies one of the underlying purposes of section 211(c)(4). But where the state must turn to a fuel measure, it gives the state flexibility to choose whatever particular fuel measure best suits its needs. Under this interpretation, EPA retains the ability not to approve a state fuel measure that is grossly over-burdensome, however, because the state must show that whatever fuel measure it selects is necessary to achieve needed emissions reductions. Thus, in demonstrating that measures other than requiring 7.8 psi RVP gasoline are unreasonable or impracticable, Maine need not address the reasonableness or practicability of other possible state fuel measures, such as RFG. EPA expects that once States determine that fuel controls are necessary, they will work judiciously with suppliers to find a fuel which balances the environmental need, against the cost to industry and consumers. EPA has articulated this principal in earlier rulemaking actions in St. Louis on July 2, 1997 (62 FR 35756), Phoenix on February 10, 1998 (63 FR 6653), and Pittsburg on June 8, 1998 (63 FR 31116).

With respect to OFA's claim that measures would have been available had Maine properly planned for the possibility that RFG opt-out could be occurring, we believe the history is not so plain. Maine clearly had wrestled with RFG through several legislative sessions. However, each year, the State maintained its commitment to the RFG program. It would have been unreasonable to expect the State to adopt control measures based on the possibility of one day opting-out of the RFG program. It would be even more extreme to suggest that Maine should attempt to secure legislative authority to adopt additional controls measures before a decision was made to opt-out of RFG.

On October 13, 1998, Maine made the formal decision that it no longer felt it could continue to participate in the RFG program. From that point forward, though it was clear that the State preferred to adopt a fuel control measure, it had also looked at an extensive list of non-fuel measures, relying in large part upon the State's detailed analysis prepared in the Spring of 1996 in support of its 15 percent rate of progress plan. Part of the reason the State stayed in the RFG program at that time was that no other reasonable alternatives existed. When Maine reanalyzed the availability of further control measures under this 211(c)(4) waiver request, the State again found that no additional non-fuel measures were available that could provide emission reductions in sufficient quantity in an expeditious fashion. EPA has reached that same conclusion in our independent analysis of the situation (see EPA's Technical Support Document). It would not be reasonable

to expect Maine (or any area) to be adopting control measures to replace the reductions from RFG at the same time the State was defending the program. Instead, we reviewed the availability of control measures to secure the needed reductions today.

Comment 5. Maine did not demonstrate that low RVP gasoline standards are necessary to attain a national ambient air quality standard (NAAQS), and maintenance is not a statutory basis for a waiver.

Response 5. EPA believes, as discussed elsewhere in this notice, that the emission reductions from a fuels control program (i.e., RFG, or this low RVP fuel) are necessary for Maine to achieve the 1-hour ozone NAAQS. As stated in response 3, Maine has had recent exceedances of the 1-hour ozone NAAQS, and they clearly need all of the emission reductions they have achieved through this control program. The Portland area remains designated nonattainment for ozone, and these emission reductions are necessary.

F. Why Is EPA Taking This Action?

EPA is proposing to approve a SIP revision at the request of the Maine DEP. This rule has been adopted at the State level since the summer of 1999. However, to ensure that it secures the needed approval under section 211(c)(4)(C) of the Clean Air Act, Maine submitted this action for EPA approval, to make it part of the SIP.

II. Proposed Action

EPA is proposing to approve a SIP revision submitted by the State of Maine on June 7, 2000 and May 29, 2001, establishing a 7.8 psi RVP fuel requirement for gasoline distributed in southern Maine which includes York, Cumberland, Sagadahoc, Kennebec, Androscoggin, Knox, and Lincoln Counties. This revision will propose to approve into the SIP Maine DEP's Chapter 119, entitled "Motor Vehicle Fuel Volatility Limit" as amended on June 1, 2000. Maine has developed these fuel requirements to reduce emissions of volatile organic compounds (VOC) in accordance with the requirements of the Clean Air Act (CAA). EPA is proposing to approve Maine's fuel requirements into the SIP because EPA has found that the requirements are necessary for southern Maine to achieve the national ambient air quality standard for ozone.

III. What Are the Administrative Requirements?

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely proposes to approve a state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule would approve pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104–4). This rule also does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: November 26, 2001.

Robert W. Varney,

Regional Administrator, EPA—New England.

BILLING CODE 6560–50–P

DEPARTMENT OF DEFENSE

48 CFR Part 235

[DFARS Case 2001–D002]

Defense Federal Acquisition Regulation Supplement; Research and Development Streamlined Contracting Procedures

AGENCY: Department of Defense (DoD).

ACTION: Proposed rule with request for comments.

SUMMARY: DoD is proposing to amend the Defense Federal Acquisition Regulation Supplement (DFARS) to eliminate the requirement for posting of solicitations at the research and development streamlined solicitation website. Instead, each contracting activity will use its own procedures for electronic posting of research and development streamlined solicitations. Contracting activities will continue to make synopses and solicitations available through the Governmentwide point of entry (FedBizOpps).

DATES: Comments on the proposed rule should be submitted in writing to the address shown below on or before February 4, 2002, to be considered in the formation of the final rule.

ADDRESSES: Respondents may submit comments directly on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf/pubcomm*. As an alternative, respondents may e-mail comments to: *dfars@acq.osd.mil*. Please cite DFARS Case 2001–D002 in the subject line of e-mailed comments.

Respondents that cannot submit comments using either of the above methods may submit comments to: Defense Acquisition Regulations Council, Attn: Ms. Angelena Moy, OUSD(AT&L)DP(DAR), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062; facsimile (703) 602–0350. Please cite DFARS Case 2001–D002.

At the end of the comment period, interested parties may view public comments on the World Wide Web at *http://emissary.acq.osd.mil/dar/dfars.nsf*.

FOR FURTHER INFORMATION CONTACT: Ms. Angelena Moy, (703) 602–1302.

SUPPLEMENTARY INFORMATION:

A. Background

DFARS Subpart 235.70 contains streamlined procedures for acquiring research and development using a standard solicitation and contract format. The standard format is available on the research and development streamlined solicitation (RDSS) website at http://www/rdss.osd.mil. DFARS 235.7003–2 presently requires that each solicitation issued in the standard format be posted at the RDSS website. This proposed rule eliminates the requirement for contracting activities to post their solicitations at the RDSS website, to permit each activity to use its own procedures for electronic posting of solicitations. However, contracting activities will continue to make synopses and solicitations available through the Governmentwide point of entry (FedBizOpps) in accordance with FAR 5.102 and 5.203.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

The proposed rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, et *seq.*, because the rule does not significantly change solicitation procedures or limit public access to solicitation information. Therefore, DoD has not performed an initial regulatory flexibility analysis. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subpart in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2001–D002.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 235

Government procurement.

Michele P. Peterson,

Executive Editor, Defense Acquisition Regulations Council.

Therefore, DoD proposes to amend 48 CFR part 235 as follows:

1. The authority citation for 48 CFR part 235 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 235—RESEARCH AND DEVELOPMENT CONTRACTING

2. Section 235.7003–2 is revised to read as follows:

235.7003–2 RDSS process.

(a) *Synopsis.* The synopsis required by FAR 5.203 must include—

(1) The information required by FAR 5.207; and

(2) A statement that the solicitation will be issued in the research and development streamlined solicitation format shown at the RDSS/C website.

(b) *Solicitation.*

(1) The solicitation, to be made available consistent with the requirements of FAR 5.102—

(i) Must be in the format shown at the RDSS/C website;

(ii) Must include the applicable version number of the RDSS standard format; and

(iii) Must incorporate by reference the appropriate terms and conditions of the RDSS standard format.

(2) To encourage preparation of better cost proposals, consider allowing a delay between the due dates for technical and cost proposals.

Fish and Wildlife Service

50 CFR Parts 17 and 21

RIN 1018–AH87

Migratory Bird Permits; Regulations Governing Rehabilitation Activities and Permit Exceptions

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed regulation would create a permit category to specifically authorize rehabilitation activities involving migratory birds. Migratory bird rehabilitation is the practice of caring for sick, injured, or orphaned migratory birds with the goal of releasing them back to the wild. Currently, in the absence of a permit specifically for this purpose, migratory bird rehabilitation activities are authorized by issuance of a special purpose permit under 50 CFR 21.27. In addition, this proposed regulation would create a permit exception for public officials responsible for tracking infectious diseases.

DATES: You should submit written comments by March 6, 2002, to the address below.

ADDRESSES: You may mail or deliver written comments to the Division of Migratory Bird Management, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 634, Arlington, Virginia 22203–1610. Please reference "RIN 1018–AH87" at the top of your letter. Alternatively, you may submit your comments via the Internet to: *migbird_rehab@fws.gov*. Please submit Internet comments as an ASCII file avoiding the use of special characters and any form of encryption. Please also include your name and return address in your e-mail message. If you do not receive a confirmation that we have received your message, contact us directly at 703/358–1714.

The complete file for this proposed rule is available for inspection, by appointment, during normal business hours at the Division of Migratory Bird Management, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 634, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Jon Andrew, Chief, Division of Migratory Bird Management, U.S. Fish and Wildlife Service; 703 / 358–1714.

SUPPLEMENTARY INFORMATION:

Background

The Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*) prohibits possession

of any bird protected by treaties between the U.S. and Canada, Mexico, Japan, and Russia. Birds covered by the Act are referred to as "migratory birds." Presently, if you wish to provide treatment to sick, injured, or orphaned migratory birds, you must obtain a special purpose permit from the U.S. Fish and Wildlife Service under 50 CFR 21.27. The special purpose permit category is used to authorize activities not specifically covered by other existing types of permits. In order to more effectively promote rehabilitation and conservation of migratory birds, and to facilitate the activities of rehabilitators nationwide by providing them with a reliable, consistent regulatory framework, we are proposing this rule to create a new permit category specifically authorizing rehabilitation of migratory birds.

Currently, approximately 2,500 special purpose permits for migratory bird rehabilitation purposes are active nationwide, representing almost half the approximately 5,500 currently active special purpose permits. Because the special purpose permit can cover numerous types of activities, the framework for issuing these permits is necessarily broad and general. The Service has addressed this generality by issuing standard conditions with which holders of special purpose permits for rehabilitation must conform. This proposed rehabilitation permit regulation largely incorporates—and expands upon—those existing standard conditions.

The impetus behind creating a rehabilitation permit category is threefold: to codify permit conditions through the public rulemaking process; to clarify what is expected from migratory bird rehabilitators by providing more specificity and detail to permit requirements; and to bring greater consistency nationwide to the regulation of migratory bird rehabilitation.

This proposed rule addresses rehabilitation of threatened and endangered migratory bird species, and amends 50 CFR 17 (Endangered and Threatened Wildlife), to exempt persons who obtain a rehabilitation permit from having to obtain a permit under part 17. The rule was written with the premise that migratory bird rehabilitators should not be required to obtain two separate permits when there is always some possibility that they may be presented with a sick or injured, endangered or threatened migratory bird species. Accordingly, the rule contains numerous provisions addressing rehabilitation of threatened and endangered migratory bird species, including additional requirements to notify and coordinate with the Service. Some rehabilitators may not be authorized to care for threatened and endangered species. Individual permits may be further conditioned at the time of issuance to specify which categories of migratory bird species the permittee is authorized to rehabilitate.

The proposed rule also provides an exemption to the permit requirements of 50 CFR part 17 and 50 CFR part 21 for vets who treat listed migratory bird species, under certain conditions.

In conjunction with an ongoing review of all U.S. Fish and Wildlife Service permit fee schedules, the Division of Migratory Bird Management is reviewing and revising migratory bird permit application processing fees. Currently, applicants for Special Purpose—Rehabilitation permits do not pay a processing fee. This proposed rule would require rehabilitation permit applicants to pay the permit application fee listed in 50 CFR 13.11.

Permit Exception for Authorities Tracking Infectious Disease

This proposed rule also adds a new permit exception to § 21.12 to allow wildlife managers and public health officials responsible for monitoring West Nile virus and other health threats to collect, possess, transport, and dispose of sick or dead migratory birds or their parts for analysis to confirm the presence or absence of infectious disease. It would also cover authorities dealing with avian diseases caused by natural toxins, such as botulism. The exception does not apply to healthy birds, or where circumstances indicate that the death, injury, or disability of a bird was caused by factors other than infectious disease. This permit exception will facilitate timely response to public health concerns and outbreaks of avian infectious disease.

Endangered Species Act Consideration

Section 7(a)(2) of the Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531, *et seq.*), requires all Federal agencies to "insure that any action authorized, funded, or carried out . . . is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of [critical] habitat." This proposed rule is currently being reviewed pursuant to section 7 of the ESA. Section 7 consultation on this rule will be concluded before this rule is finalized. Individual decisions to issue rehabilitation permits to cover species that are listed as endangered or threatened will require consultation pursuant to section 7 of the ESA.

Required Determinations

Responsibilities of Federal Agencies To Protect Migratory Birds (Executive Order 13186)

This rule has been evaluated for impacts to migratory birds, with emphasis on species of management concern, and is in accordance with the guidance in E.O. 13186.

Regulatory Planning and Review (Executive Order 12866)

In accordance with the criteria in Executive Order 12866, this rule is not a significant regulatory action. OMB has made this final determination of significance under E.O. 12866.

a. This rule will not have an annual economic effect of $100 million or adversely affect an economic sector, productivity, jobs, the environment, or other units of government. A cost-benefit and economic analysis is not required.

b. This rule will not create serious inconsistencies or otherwise interfere with other agencies' actions. The Fish and Wildlife Service is the only Federal agency responsible for enforcing the Migratory Bird Treaty Act.

c. This rule will not materially affect entitlements, grants, user fees, loan programs, or the rights and obligations of their recipients. This rule does not have anything to do with the aforementioned programs.

d. This rule does not raise novel legal or policy issues. Rehabilitation activities for migratory birds currently operate under a different permit than that proposed in this rule.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*, as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996), whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must either certify that the rule will not have a significant economic impact on a substantial number of small entities (i.e., small business, small organizations, and small governmental jurisdictions), or prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities.

We have examined this proposed rule's potential effects on small entities as required by the Regulatory Flexibility Act. This proposed rule requires applicants for migratory bird

rehabilitation permits to pay the fee listed in the Service permit application fee schedule at 50 CFR 13.11. Currently, the Service waives fees for rehabilitation permit applicants, although the fee schedule is being revised as part of a separate proposed rule revising part 13. We will consider and address the economic effects of proposed fee revisions as part of that rulemaking. Because permit application fees will be addressed in another proposed rule, we certify that this action will not have a significant economic impact on a substantial number of small entities. A final Regulatory Flexibility Analysis is not required. Accordingly, a Small Entity Compliance Guide is not required.

Unfunded Mandates Reform Act

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501, *et seq.*):

a. This rule will not "significantly or uniquely" affect small governments. A Small Government Agency Plan is not required. We have determined and certified pursuant to the Unfunded Mandates Reform Act, 2 U.S.C. 1502 *et seq.*, that this rulemaking will not impose a cost of $100 million or more in any given year on local or State government or private entities.

b. This rule will not produce a Federal mandate of $100 million or greater in any year, i.e., it is not a "significant regulatory action" under the Unfunded Mandates Reform Act.

Takings

In accordance with Executive Order 12630, the rule does not have significant takings implications. This rule will not result in the physical occupancy of property, the physical invasion of property, or the regulatory taking of any property. A takings implication assessment is not required.

Federalism

In accordance with Executive Order 13132, and based on the discussions in Regulatory Planning and Review above, this rule does not have significant Federalism effects. A Federalism assessment is not required. Due to the migratory nature of certain species of birds, the Federal Government has been given responsibility over these species by the Migratory Bird Treaty Act. This rule does not have a substantial direct effect on fiscal capacity, change the roles or responsibilities of Federal or State governments, or intrude on State policy or administration.

Civil Justice Reform

In accordance with Executive Order 12988, the Office of the Solicitor has determined that the rule does not unduly burden the judicial system and meets the requirements of sections 3(a) and 3(b)(2) of the Order. The Department of the Interior has certified to the Office of Management and Budget that this rule meets the applicable standards provided in Sections 3(a) and 3(b)(2) of E.O. 12988.

Paperwork Reduction Act

This proposed rule does not contain new or revised information collection for which Office of Management and Budget approval is required under the Paperwork Reduction Act. Information collection associated with migratory bird permit programs is covered by an existing OMB approval, No. 1018–0022. The Service may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number.

National Environmental Policy Act

We have determined that this rule is categorically excluded under the Department's NEPA procedures in 516 DM 2, Appendix 1.10.

Government-to-Government Relationship with Tribes

In accordance with the President's memorandum of April 29, 1994, "Government-to-Government Relations with Native American Tribal Governments" (59 FR 22951), E.O. 13175, and 512 DM 2, this rule will have no effect on federally recognized Indian tribes.

Clarity of Regulations

Executive Order 12866 requires each agency to write regulations that are easy to understand. We invite your comments on how to make this rule easier to understand, including answers to questions such as the following: (1) Are the requirements in the rule clearly stated? (2) Does the rule contain technical language or jargon that interferes with its clarity? (3) Does the format of the rule (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce its clarity? (4) Would the rule be easier to understand if it were divided into more (but shorter) sections? (5) Is the description of the rule in the "Supplementary Information" section of the preamble helpful in understanding the rule? What else could we do to make the rule easier to understand?

Send a copy of any written comments about how we could make this rule easier to understand to: Office of Regulatory Affairs, Department of the Interior, Room 7229, 1849 C Street NW., Washington, DC 20240. You also may e-mail comments to: *Exsec@ios.doi.gov*.

Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. You may call 703/358–2329 to make an appointment to view the files. Individual respondents may request that we withhold their home address from the rulemaking record, which we will honor to the extent allowable by law. Under limited circumstances, as allowable by law, we can withhold from the rulemaking record a respondent's identity. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representing an organization or business, available for public inspection in their entirety.

List of Subjects

50 CFR Part 17

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, Transportation.

50 CFR Part 21

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife, Birds, Migratory birds.

For the reasons set forth in this preamble, the U.S. Fish and Wildlife Service proposes to amend Title 50, Chapter I, Subchapter B of the CFR as follows:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. Amend § 17.21 by adding paragraphs (c)(6), (c)(7), (d)(3), and (d)(4) to read as follows:

§ 17.21 Prohibitions.

* * * * *

(c) * * *

(6) Notwithstanding paragraph (c)(1) of this section, any person acting under a valid migratory bird rehabilitation permit issued pursuant to § 21.31 of this subchapter may take endangered migratory birds without an endangered

species permit if such action is necessary to aid a sick, injured, or orphaned specimen, provided the permittee:

(i) Notifies the issuing Migratory Bird Permit Program Office immediately upon receipt of such bird (contact information can be obtained from the Internet at *http://offices.fws.gov*), and

(ii) Disposes of or transfers such birds, or their parts or feathers, as directed by the Migratory Bird Permit Program Office.

(7) Notwithstanding paragraph (c)(1) of this section, persons exempt from the permit requirements of part 21 under paragraphs 21.12(c) and (d) may take endangered migratory birds without an endangered species permit in performing the activities authorized under paragraphs 21.12(c) and (d).

(d) * * *

(3) Notwithstanding paragraph (d)(1) of this section, any person acting under a valid migratory bird rehabilitation permit issued pursuant to § 21.31 of this subchapter may possess and transport endangered migratory birds without an endangered species permit when such action is necessary to aid a sick, injured, or orphaned specimen, provided the permittee:

(i) Notifies the issuing Migratory Bird Permit Program Office immediately upon receipt of such bird (contact information can be obtained from the Internet at *http://offices.fws.gov*), and

(ii) Disposes of or transfers such birds, or their parts or feathers, as directed by the Migratory Bird Permit Program Office.

(4) Notwithstanding paragraph (d)(1) of this section, persons exempt from the permit requirements of part 21 under paragraphs 21.12(c) and (d) may possess and transport endangered migratory bird species without an endangered species permit in performing the activities authorized under paragraphs 21.12(c) and (d) .

* * * * *

PART 21—MIGRATORY BIRD PERMITS

3. The authority citation for part 21 continues to read as follows:

Authority: Pub. L. 95–616, 92 Stat. 3112 (16 U.S.C. 712(2)); Pub. L. 106–108.

4. Amend § 21.2 by revising paragraph (b) to read as follows:

§ 21.2 Scope of regulations.

* * * * *

(b) This part, except for § 21.22 (banding and marking), § 21.29 (falconry), and § 21.31 (rehabilitation), does not apply to the bald eagle (*Haliaeetus leucocephalus*) or the golden eagle (*Aquila chrysaetos*), for which regulations are provided in part 22 of this subchapter.

* * * * *

5. Amend § 21.12 by adding new paragraphs (c) and (d) to read as follows:

§ 21.12 General exceptions to permit requirements.

* * * * *

(c) Employees of Federal, State, and local wildlife agencies; employees of Federal, State, and local public health agencies; and laboratories under contract to such agencies may in the course of official business collect, possess, transport, and dispose of sick or dead migratory birds or their parts for analysis to confirm the presence of infectious disease. Nothing in this section authorizes the take of uninjured or healthy birds without prior authorization from the Service. Additionally, nothing in this section authorizes the taking, collection, or possession of migratory birds when circumstances indicate reasonable probability that death, injury, or disability was caused by factors other than infectious disease and/or natural toxins. These factors may include, but are not limited to, oil or chemical contamination, electrocution, shooting, or pesticides. If the cause of death of a bird is determined to be other than natural causes or disease, Service law enforcement officials must be contacted without delay.

(d) Licensed veterinarians are not required to obtain a Federal migratory bird permit to temporarily possess, stabilize or euthanize sick and injured migratory birds. However, veterinarians must transfer any such bird to a permitted rehabilitator as soon as is practicable following necessary treatment, unless the bird is euthanized. Veterinarians must notify the local Service Ecological Services Office immediately upon receiving a threatened or endangered migratory bird species. Contact information for Ecological Services offices can be located on the Internet at *http://offices.fws.gov*. Veterinarians must administer euthanasia in accordance with § 21.31(e)(3)(ii). Disposition of dead migratory birds must be in accordance with § 21.31(e)(3)(iv). Veterinarians must comply with the recordkeeping requirements in § 21.31(e)(5).

6. Amend part 21, subpart C, by adding a new § 21.31 to read as follows:

§ 21.31 Rehabilitation permits.

(a) *What is the permit requirement?* Except as provided in § 21.12, a rehabilitation permit is required to take, temporarily possess, or transport any migratory bird for rehabilitation purposes. However, any person who finds a sick, injured, or orphaned migratory bird may, without a permit, take possession of the bird in order to immediately transport it to a permitted rehabilitator.

(b) *What are the general permit provisions?*

(1) The permit authorizes you to:

(i) Take from the wild or receive from another person sick, injured, or orphaned migratory birds, and to possess them and provide medical care for them for up to 180 days;

(ii) Transport the birds to a suitable habitat for release, to another permitted rehabilitator's facilities, or to a veterinarian;

(iii) Conduct euthanization and/or necropsy (for threatened or endangered species, euthanization and necropsy require prior approval from your Regional Migratory Bird Permit Program Office);

(iv) Transfer or dispose of migratory birds; and

(v) Receive, possess for up to 24 hours, stabilize, and transfer types of migratory bird species not authorized by your permit, in cases of emergency.

(2) The permit does not authorize the use of migratory birds for educational purposes. Birds may not be displayed to the public unless you use video equipment or barriers that prevent the birds from both hearing and seeing the public. You may not use any equipment for this purpose that causes stress or harm, or impedes the rehabilitation of any bird.

(c) *How do I apply for a migratory bird rehabilitation permit?* You must submit your application to the appropriate Regional Director—Attention Migratory Bird Permit Program Office. You can find addresses for the appropriate Regional Directors in § 2.2 of subchapter A of this chapter. Your application must contain the information required under § 13.12(a) of this chapter, and the following information:

(1) A description of your experience and training in maintaining and rehabilitating migratory birds. Include a list of the species with which you have worked, noting any threatened and endangered species; the types of injuries you have treated; and the treatments provided.

(2) A list of types of species you intend to rehabilitate (e.g., passerines, raptors, etc.).

(3) A description of your rehabilitation facilities. Attach photographs and diagrams of your enclosures. Diagrams must include dimensions and a description of interior

and exterior construction materials, such as flooring and caging materials. Indicate the species or type of species to be housed in each.

(4) A letter of recommendation from a permitted rehabilitator who is familiar with your training and experience, including experience with threatened and endangered species. Also provide a letter from a permitted rehabilitator stating his or her willingness to provide you with assistance. If these are the same individual, a single letter will suffice.

(5) A letter from a licensed veterinarian acknowledging agreement to work with you by providing any necessary veterinary assistance. Any first-hand knowledge of your training or qualifications for rehabilitating migratory birds should be addressed in the letter.

(6) The names of persons (subpermittees) who will be assisting you, including anyone who will be regularly transporting birds to or from your facility. Anyone who will be performing permitted activities in your absence must be at least 18 years of age and listed on your permit as a subpermittee. You must include a description of the qualifications of anyone who will be performing permitted activities in your absence, including any experience with threatened or endangered species. If a subpermittee will be authorized to rehabilitate migratory birds at a site other than your facility, you need to provide the following information: name, address, date of birth, description of the individual's expertise in working with the type of species to be cared for, the type of care to be provided, and photographs and/or diagrams of the individual's facilities.

(7) A copy of your State rehabilitation permit or license, if one is required in your State.

(8) A check or money order made payable to the "U.S. Fish and Wildlife Service" in the amount of the application fee for permits issued under this section listed in § 13.11 of this chapter.

(d) *What criteria will the Service consider before issuing a permit?* (1) Upon receiving an application completed in accordance with paragraph (b) of this section, the Regional Director will decide whether to issue you a permit based on the general criteria of § 13.21 of this chapter, and the following factors:

(i) Whether you are at least 18 years of age with adequate experience rehabilitating migratory birds.

(ii) Whether your facilities are adequate to properly care for the type(s) of species of migratory birds for which you seek authorization to rehabilitate.

(iii) Whether you have an agreement with a qualified veterinarian to provide medical care for the birds you intend to rehabilitate.

(iv) Whether a State permit or license is required, and if so, whether you have the required permit or license.

(2) In issuing a permit, the Regional Director may place restrictions on the types of migratory bird species you are authorized to rehabilitate, based on your experience and facilities, as well as the specific requirements, traits, and conservation status of particular species.

(e) *What are the standard conditions for this permit?* In addition to the general permit conditions set forth in part 13 of this chapter, rehabilitation permits are subject to the following conditions:

(1) *Facilities.* To conduct the activities authorized by a rehabilitation permit, you must have appropriate facilities or a working relationship with a person or organization with such facilities. All facilities must be approved and identified on the face of your permit. In evaluating whether facilities are adequate, the Service will use as a guideline the current standards developed by the National Wildlife Rehabilitation Association and the International Wildlife Rehabilitation Council (Minimum Standards for Wildlife Rehabilitation).[1] The Regional Migratory Bird Permit Program Office may authorize variation from the standards where it is reasonable and necessary to accommodate a particular rehabilitator's circumstances. However, except as provided by paragraph (f)(2)(i) of this section, all facilities must adhere to the following criteria:

(i) Rehabilitation facilities for migratory birds must be secure and provide protection from predators, domestic animals, undue noise and human disturbance, sun, wind, and inclement weather.

(ii) Caging must be made of a material that will not entangle or cause injury to the type of birds that will be housed within.

(iii) Facilities must be large enough to allow easy access for caring for the species of bird housed in the facility and to allow each bird to fully extend its wings.

(iv) The floor must be well-drained and kept clean.

(v) You must provide adequate perches for birds under your care.

(vi) Birds must be housed only with compatible migratory bird species.

(2) *Subpermittees.* Except as provided by paragraphs (e)(2)(ii) and (f)(2)(ii) of this section, anyone who will be assisting you by performing permitted activities in your absence must either possess his or her own Federal rehabilitation permit or be authorized as a subpermittee on your permit. Subpermittees must be at least 18 years of age and possess sufficient experience to tend the species in their care. As the primary permittee, you are directly responsible for the actions of any subpermittees acting under your permit.

(i) Subpermittees authorized to care for migratory birds at a site other than your facility must have facilities adequate to house the species in their care. All such facilities must be approved and identified on the face of your permit.

(ii) Any individual who transports birds to or from your facility on a regular basis must either have his or her own permit, be listed on your permit as a subpermittee, or be named in a letter from you to your issuing Migratory Bird Permit Program Office.

(3) *Disposition of birds under your care.* You may not retain migratory birds longer than 180 days without additional authorization from your Regional Migratory Bird Permit Office. Every precaution must be taken to avoid imprinting or habituating birds in your care to humans, and all imprinted birds must be transferred to the Service or a designee of the Service.

(i) You must release all recuperated birds to the wild in an appropriate season and habitat for the species, preferably near the point where the bird was taken from the wild. If the appropriate season for release is outside the 180-day timeframe, you must seek authorization from the Service to hold the bird until the appropriate season. For most species, you should work with local and State wildlife agencies to identify appropriate release sites. Before releasing a threatened or endangered migratory bird, you must coordinate with the nearest U.S. Fish and Wildlife Service Ecological Services Office. You can obtain contact information for this office from your issuing Migratory Bird Permit Program Office or from the Internet at *http://offices.fws.gov.*

(ii) Any bird that has sustained injuries requiring amputation of a leg, a foot, or a wing at the elbow (humero-ulnar joint) or above must be euthanized. You must euthanize any bird that, after medical treatment, is blind, cannot feed itself, perch upright,

[1] Copies may by obtained by contacting either the National Wildlife Rehabilitators Association: 14 North 7th Avenue, St. Cloud MN 56303–4766, or the International Wildlife Rehabilitation Council: 4437 Central Place, Suite B–4, Suisun, CA 94585–1633.

or ambulate without inflicting additional injuries to itself. You are required to obtain authorization from your issuing Migratory Bird Permit Program Office before euthanizing endangered and threatened migratory bird species. In some cases, the Service may designate a disposition other than euthanization for those birds. If Service personnel are not available, you may euthanize endangered and threatened migratory birds without Service authorization where prompt euthanization is warranted by humane consideration for the welfare of the bird.

(iii) Unreleasable live birds that are suitable for use in educational programs, foster parenting, research projects, or other permitted activities may be placed with persons permitted or otherwise authorized to possess migratory birds, with prior approval from your issuing Migratory Bird Permit Program Office.

(iv) You may donate dead birds and parts thereof, except threatened and endangered species and bald and golden eagles, to persons authorized by permit to possess migratory bird specimens or exempted from permit requirements under § 21.12.

(A) You must send all dead bald and golden eagles, and their parts and feathers, to: National Eagle Repository, Building 128, Rocky Mountain Arsenal, Commerce City, Colorado 80022.

(B) You must obtain approval from your issuing Migratory Bird Permit Program Office before disposing of or transferring any dead endangered or threatened migratory bird specimen, parts, or feathers.

(C) Unless specifically required to do otherwise by the Service, you must destroy all other dead specimens by burial or incineration.

(v) With authorization from your issuing Migratory Bird Permit Program Office, you may hold a non-releasable bird longer than 180 days for the purpose of fostering juveniles during their rehabilitation. You may also use birds you possess under an educational permit to foster juveniles.

(vi) You may possess no more than a reasonable number of feathers for the repair of damaged feathers of birds in your care.

(vii) You may draw blood and take other medical samples from the birds under your care for purposes of diagnosis and recovery of the individual bird, or for transfer to authorized facilities conducting research pertaining to a contagious disease or other public health hazard (e.g., West Nile virus).

(viii) All birds held under this permit remain under the stewardship of the U.S. Fish and Wildlife Service and may be recalled at any time.

(4) *Notification to the U.S. Fish and Wildlife Service.* (i) When you acquire a threatened or endangered migratory bird species, or bald or golden eagle, whether live or dead, you are required to immediately notify your issuing Migratory Bird Permit Program Office.

(ii) You must immediately notify the local U.S. Fish and Wildlife Service Law Enforcement Office, and within 48 hours your issuing Migratory Bird Permit Program Office, if you have reason to believe a bird has been poisoned, electrocuted, shot, or otherwise subject to criminal activity. Contact information for local Service Law Enforcement offices can be located on the Internet at *http://offices.fws.gov*.

(iii) If the sickness, injury, or death of any bird is due or likely due to avian virus, or other contagious disease or public health hazard, you should notify your issuing Migratory Bird Program Office within 48 hours.

(5) *Recordkeeping.* You must maintain complete and accurate records of all migratory birds that you receive, including for each bird the date received, type of injury or illness, disposition, and date of disposition. You must retain these records for five (5) years following the end of the calendar year covered by the records.

(6) *Annual report.* You must submit a completed Form 3–202–4 by January 31 of each year for the preceding year to your issuing Migratory Bird Permit Program Office.

(7) Additional conditions may be stipulated on the face of the permit at the discretion of the Regional Director.

(8) The permittee assumes responsibility for damage or injury to any person or property occasioned through the possession or handling of migratory birds, and the U.S. Government shall be indemnified against claims for damage or injury in such cases.

(f) *How does this permit apply to oil and hazardous waste spills?* Prior to entering the location of an oil or hazardous material spill, you must notify the U.S. Fish and Wildlife Service Field Response Coordinator or other designated Service representative and obtain permission from the On-Scene Coordinator. All activities within the location of the spill are subject to the authority of the On-Scene Coordinator. The U.S. Fish and Wildlife Service is responsible for the disposition of all migratory birds, dead or alive.

(1) Permit provisions in oil or hazardous material spills.

(i) In addition to the rehabilitation permit provisions set forth in paragraph (b) of this section, when under the authority of the designated U.S. Fish and Wildlife Service representative, this permit further authorizes you to temporarily possess healthy, unaffected birds for the purpose of removing them from imminent danger.

(ii) This permit does not authorize salvage of dead migratory birds. When dead migratory birds are discovered, a Service law enforcement officer must be notified immediately in order to coordinate the handling and collection of evidence. Contact information for local Service Law Enforcement Offices can be located on the Internet at http://offices.fws.gov. The designated Service representative will have direct control and responsibility over all live migratory birds, and will coordinate the collection, storage, and handling of any dead migratory birds with the Service's Division of Law Enforcement.

(iii) You must notify your issuing Migratory Bird Permit Program Office of any migratory birds in your possession within 24 hours of removing such birds from the area.

(2) Conditions specific to oil and hazardous waste spills.

(i) *Facilities.* Facilities used at the scene of oil or hazardous waste spills may be temporary, mobile, and in some circumstances, provide less space and protection from noise and disturbance than facilities authorized under paragraph (e)(1)(i) of this section. Such facilities should conform as closely as possible with the facility specifications contained in the Service policy, Best Practices for Migratory Bird Care During Oil Spill Response.

(ii) *Subpermittees.* In cases of oil and hazardous waste spills, persons who assist with cleaning or treating migratory birds at the on-scene facility will not be required to have a rehabilitation permit or be a subpermittee; however, volunteers must be trained in rescue protocol for migratory birds affected by oil and hazardous waste spills. A permit (or subpermittee designation) is required to perform extended rehabilitation of such birds, after initial cleaning and treating, at a subsequent location.

(g) *Will I also need a permit from the State in which I live?* Nothing in this section prevents a State from making and enforcing laws or regulations consistent with this section that are more restrictive or give further protection to migratory birds. If your State requires a license or permit to rehabilitate migratory birds, you must obtain that license or permit and adhere

to its requirements, in addition to the terms of your Federal permit.

(h) *How long is a migratory bird rehabilitation permit valid?* Your rehabilitation permit will expire on the date designated on the face of the permit unless amended or revoked. No rehabilitation permit will have a term exceeding five (5) years.

Dated: November 13, 2001.

Joseph E. Doddridge,

Assistant Secretary for Fish and Wildlife and Parks.

Notices

Federal Register
Vol. 66, No. 235
Thursday, December 6, 2001

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 01–013–3]

Protection of Sunflowers From Red-Winged Blackbird Damage in North Dakota and South Dakota; Request for Public Involvement

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of availability of scoping document.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service's Wildlife Services program has developed a scoping document for an environmental impact statement being prepared to analyze the potential environmental effects of reducing blackbird damage to ripening sunflowers in North Dakota and South Dakota. This scoping document addresses the comments received and issues raised in response to our March 2001 and May 2001 notices on this subject. The information received in response to this notice, as well as the information received previously, will be considered during development of an environmental impact statement prepared in accordance with the National Environmental Policy Act.

DATES: We invite you to comment on the scoping document. We will consider all comments we receive that are postmarked, delivered, or e-mailed by January 7, 2002.

ADDRESSES: You may submit comments by postal mail/commercial delivery or by e-mail. If you use postal mail/commercial delivery, please send four copies of your comment (an original and three copies) to: Docket No. 01–013–3, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 01–013–3. If you use e-mail, address your comment to *regulations@aphis.usda.gov*. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and "Docket No. 01–013–3" on the subject line.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: Mr. Phil Mastrangelo, State Director, Wildlife Services, APHIS, USDA, 2110 Miriam Circle, Suite A, Bismarck, ND 58501–2502; phone (701) 250–4405.

SUPPLEMENTARY INFORMATION: Wildlife Services (WS) of the Animal and Plant Health Inspection Service (APHIS) provides technical and operational assistance to entities who request assistance to reduce damage caused by wildlife, in this case to sunflower producers. WS loans damage abatement equipment (e.g., propane cannons, pyrotechnics), conducts training workshops, provides informational leaflets on damage management and sources of damage abatement tools, and, in the case of blackbird damage to sunflowers, conducts roost management programs to disperse blackbirds from sunflower production areas.

In 2000, approximately 81 percent of the sunflower production in the United States occurred in North Dakota and South Dakota. In North Dakota, the acreage of sunflower increased from 12,500 acres in 1962 to 1.3 million acres in 2000, with a commercial value of $125 million. In South Dakota, sunflower acreage increased from 132,000 acres in 1977 to 719,000 acres in 2000, with a commercial value of $63 million. However, increased production of sunflowers has been hampered by damage associated with blackbirds feeding on the ripening crop.

Damage surveys conducted in sunflower production areas in North Dakota and South Dakota indicate that overall loss is generally 1 to 2 percent of the crop. If all producers received less than 2 percent damage, there would be little concern for damage caused by blackbirds. However, damage is not equally distributed, can be severe for some producers, and is fairly consistent from year-to-year within a locality. Research has been conducted throughout the northern Great Plains to estimate the amount of damage birds have caused to ripening sunflower crops. Historically, sunflower damage surveys have estimated blackbird damage to range from $4–7 million annually in North Dakota and South Dakota.

Sunflower growers and Government agencies have used both lethal and nonlethal techniques to reduce red-winged blackbird damage to ripening sunflowers. The goal of nonlethal methods is to decrease the availability or attractiveness of the crop to blackbirds or to disperse the birds so that damage is not concentrated in any given area. Examples of nonlethal methods include altering farming practices, using audio and visual frightening devices, growing bird-resistant sunflowers, increasing weed control in fields, and growing decoy crops. Additionally, research has shown that opening dense cattail stands, which are traditional roost sites for blackbirds, aids in dispersing blackbirds from nearby sunflower crops. To date, nonlethal blackbird damage management initiatives have been somewhat effective in reducing blackbird damage to unharvested sunflowers, but have not alleviated the problem for all sunflower growers.

Scoping Document

The scoping document made available by this notice explains why WS is preparing an environmental impact statement (EIS) to analyze the potential environmental effects of reducing blackbird damage to ripening sunflowers in North Dakota and South Dakota. This scoping document describes and defines the blackbird damage problem to sunflower crops grown in North Dakota and South Dakota. The goal of the WS blackbird

damage management program—to reduce the level of blackbird damage to sunflower crops in North Dakota and South Dakota to no more than 5 percent in individual sunflower fields—is also explained.

Included in the scoping document is a summary of the WS role in managing blackbird damage. This includes past research efforts by WS' National Wildlife Research Center (NWRC), an overview of proposed future research, and a summary of WS operational programs. Information regarding State and academic programs, and the efforts of sunflower producers for reducing blackbird damage, is also provided. The scoping document details the Federal and State laws that are applicable to the reduction of blackbird damage.

Based on WS' experience and comments received in response to our previous notices on the subject, which were published in the **Federal Register** on March 22, 2001 (66 FR 16028–16031, Docket No. 01–013–1), and May 21, 2001 (66 FR 27933–27934, Docket No. 01–013–2), WS proposes to analyze three alternatives for detailed evaluation in the EIS:

(1) *Continue the Current Operational Wildlife Services Program of Technical Assistance and Cattail Management in North Dakota and South Dakota, and Associated Research (No Action Alternative).* Under this alternative, WS' professional wildlife biologists would continue to respond to requests for assistance with blackbird damage to sunflower crops, using all the lethal and non-lethal techniques currently available. WS would continue to provide technical assistance to sunflower producers. The cattail management program would continue at its current level (70 percent maximum treatment per wetland, up to 6,000 acres annually). Current and future NWRC research activities regarding blackbird damage management to sunflower crops and associated blackbird biology would continue.

(2) *Integrated Adaptive Management Program.* Under this alternative, WS' professional wildlife biologists would continue to use, as appropriate, all available damage management techniques for reducing blackbird damage to sunflower crops. This could include chemical repellents and frightening devices. WS would continue to provide technical assistance to sunflower producers.

Cattail management would continue under this alternative. However, treatment of cattail wetlands would increase to 8,000 acres annually from the current level of 6,000 acres.

The WS operational program could also include spring baiting using the avian toxicant DRC–1339. Spring baiting with DRC–1339-treated rice could be conducted for 5 years beginning at the end of March and continuing through the third week of April each year. Up to 25 bait plots of 2 acres each would be treated in east-central South Dakota (possible counties include Brookings, Clark, Codington, Deuel, Hamlin, Kingsbury, Lake, Miner, and Moody Counties). Bait plots would be established near blackbird staging areas in harvested grain fields. Spring baiting is intended to reduce the population of red-winged blackbirds by up to 2 million each year to reduce fall damage to sunflowers. North Dakota State University researchers determined likely blackbird baiting sites based on studies of habitat preferences of spring migratory blackbirds.

Under this alternative, extensive program monitoring would be conducted by WS personnel, in cooperation with the NWRC and North Dakota State University, to determine the effectiveness of DRC–1339 spring baiting and cattail management to reduce sunflower damage. WS biologists would also evaluate and monitor the effects on populations of blackbirds and non-target species. Monitoring would include blackbird population surveys, sunflower damage assessments, and the study of habitat variables, migration timing and patterns, and related climate variations within selected plots in sunflower production areas. If monitoring results indicate that spring baiting does not reduce sunflower damage, the spring baiting program would be terminated.

(3) *Implement State, Private, and Sunflower Producer Damage Management Actions, with no Wildlife Services Programs.* Under this alternative, WS would not participate in or implement any wildlife damage assessments or programs for reducing blackbird damage to sunflower crops in North Dakota and South Dakota. No technical assistance, research, lethal/non-lethal programs, cattail management, or any other related actions would be provided by WS. Certain functions of the present WS program would most likely be conducted by individual sunflower producers. All requests made to WS for sunflower crop protection would be referred to the North Dakota and South Dakota Departments of Agriculture, other Federal or State agencies, private businesses, or organizations, as appropriate.

The scoping document explains why five suggested alternatives will not be evaluated in detail in the EIS. These include: (1) Create and implement crop damage insurance against blackbird depredation; (2) financial compensation for economic losses to sunflower crops caused by blackbirds; (3) eradicate blackbirds; (4) reintroduce cougars, coyotes, wolves, bobcats, and other predator species to reduce populations of depredating blackbirds in North Dakota and South Dakota; and (5) physical exclusion of blackbirds from sunflower fields with netting or other material.

The scoping document identifies issues proposed for detailed analysis in the EIS. These include: (1) The cumulative impact on populations of target blackbird and non-target species of plants and wildlife, including Federally and State-protected species, from the use of DRC–1339 and glyphosate; (2) effects on biodiversity, including effects of glyphosate on terrestrial and wetland biodiversity, effects on terrestrial biodiversity from reducing populations of blackbirds, including impacts on insect populations, and effects on terrestrial biodiversity from reducing populations of terrestrial non-target plants and animals; (3) degree of humaneness of lethal methods for reducing blackbird populations; (4) cost-effectiveness of Federal actions for reducing economic impacts of blackbird depredation on sunflower crops; (5) potential for and impacts of exotic and nuisance plant species to invade wetlands after treatment with glyphosate; and (6) impacts of non-herbicidal components of glyphosate, such as surfactants, on insect populations.

The scoping document may be obtained from the person listed under **FOR FURTHER INFORMATION CONTACT.** We ask you to please read the scoping document and let us know, at a minimum:

- What are your concerns regarding the current program and the proposed changes (issues)?
- What are your concerns regarding environmental impacts that you want us to study in the EIS (issues)?
- How does this program affect you and how do you feel about protecting sunflowers from blackbird damage?
- What other ways of reducing damage to sunflower crops in North Dakota and South Dakota (alternatives) do you want us to consider?
- What ways of reducing environmental impacts (mitigation measures) do you want us to consider?
- What way would you prefer that we reduce blackbird damage to sunflower crops (preferred alternative)?

• What methods would you like us to use to evaluate environmental impacts?

Preparation of the EIS

Following completion of the scoping process, we will prepare a draft EIS for the program to protect sunflowers from blackbird damage. A notice announcing that the draft EIS is available for review will then be published in the **Federal Register**. The notice will also request comments concerning the draft EIS.

Done in Washington, DC, this 30th day of November, 2001.

W. Ron DeHaven,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 01–30258 Filed 12–5–01; 8:45 am]

BILLING CODE 3410–34–U

DEPARTMENT OF AGRICULTURE

Forest Service

USDA Forest Service and State of Florida Land Exchange, National Forests in Florida, Baker, Citrus, Franklin, Hernando, Lake, Liberty, Okaloosa, Osceola, Pasco, Santa Rosa, and Sumter Counties, FL

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The USDA Forest Service is issuing this notice to advise the public that an environmental impact statement (EIS) will be prepared for a proposed land exchange between the State of Florida and the Forest Service in Baker, Citrus, Franklin, Hernando, Lake, Liberty, Okaloosa, Osceola, Pasco, Santa Rosa, and Sumter counties, Florida. The Forest Service invites written comments and suggestions on the scope of the environmental analysis for the EIS from Federal, State, and local agencies, federally recognized Tribes, and other individuals or organizations that may be interested in or affected by the proposed action.

DATES: Comments should be submitted by January 18, 2002 at the address listed below. A draft EIS is expected to be completed in July 2002. The final EIS is scheduled to be completed in October 2002.

ADDRESSES: To ensure that the full range of issued related to the proposed action is addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. You may request to be placed on the project mailing list or you may direct questions, comments and suggestions to Mr. Gary Hegg, NEPA Coordinator, Apalachicola National Forest, 57 Taff Drive, Crawfordville, Florida 32327, telephone (850) 926–3561.

FOR FURTHER INFORMATION CONTACT: Mrs. Chris Zajicek, Lands Program Manager, USDA Forest Service, 325 John Knox Road Suite F–100, Tallahassee, Florida 32303, telephone (850) 942–9328.

SUPPLEMENTARY INFORMATION: The Forest Service is proposing a value for value exchange of federal land and mineral rights for state lands. The federal lands are from three locations, the Choctawhatchee (357±acres), Apalachicola (4,053±acres), and the Ocala National Forests (237±acres). The federal mineral rights are from two locations, lands under the Blackwater (182,300±acres) and Withlacoochee State Forests (114,000±acres). The Lands that the State would exchange are in two locations, Pinhook Swamp (33,700±acres) and Seminole State Forest Lands (214±acres). Newsletters describing the proposed action and soliciting comments will be sent to appropriate Federal, State and local agencies, and to organizations and citizens who express interest in this proposal. Preliminary issues include the different levels of protection between state and federal ownership regarding cultural resources and Tribal consultation rights and protection provided for Proposed, Endangered, Threatened and Sensitive (PETS) species. Possible other alternatives under consideration include: Taking no action, purchasing the land to be acquired, an alternative that does not include the Tate's Hell Tract, and an alternative where only the mineral rights are exchanged for an equal value of land in the Pinhook Swamp. The comment period on the draft EIS will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**. The Forest Service believes, at this early state, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC, 435 US. 519, 553 (1978).* Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement. To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful it comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Dated: November 28, 2001.

Marsha Kearney,

Forest Supervisor, National Forests in Florida.

[FR Doc. 01–30237 Filed 12–5–01; 8:45 am]

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Forest Service

Master Development Plan For Pelican Butte Ski Area, Winema National Forest, Klamath County, OR

AGENCY: Forest Service, USDA.

ACTION: Cancellation notice.

SUMMARY: On October 18, 1996, a Notice of Intent (NOI) to prepare an environmental impact statement for the Master Development Plan For Pelican Butte Ski Area, was published in the **Federal Register** (61 FR 54410). The 1996 NOI is hereby rescinded.

FOR FURTHER INFORMATION CONTACT: Charles Graham, Forest Supervisor, Winema National Forest, 2819 Dahlia Street, Klamath Falls, Oregon 97601, telephone 541–883–6736.

Dated: November 29, 2001.

Jack B. Sheehan,

Deputy Forest Supervisor.

BILLING CODE 3410–11–M

AMTRAK REFORM COUNCIL

Notice of Meeting

AGENCY: Amtrak Reform Council.

ACTION: Notice of special public business meeting in Washington, DC.

SUMMARY: As provided in Section 203 of the Amtrak Reform and Accountability Act of 1997 (Reform Act), the Amtrak Reform Council (Council) gives notice of a special public meeting of the Council. On Friday, December 14, 2001, the Council will hold a Business Meeting from 9:30 a.m.–4 p.m. Eastern Standard Time (EST) during which time the Council members will discuss the various options for restructuring intercity rail passenger service. The Council's action plan must be submitted to the Congress on February 7, 2002.

On Friday, November 9th, the Amtrak Reform Council approved a resolution finding that Amtrak would not achieve operational self-sufficiency by December 2, 2002 as required by the Amtrak Reform and Accountability Act of 1997. The Council's Finding starts a 90-day clock in which the Council must submit an action plan for a restructured and rationalized national rail passenger system to Congress. During this same time period, Amtrak must submit a plan to Congress for liquidation.

DATES: The Business Meeting will be held on Friday, December 14, 2001, from 9:30 a.m.–4 p.m. EST. The event is open to the public.

ADDRESSES: The Business Meeting will take place in the Monet Suite in the Loews L'Enfant Hotel, 480 L'Enfant Plaza, SW, Washington, DC 20024. The nearest Metro stop is L'Enfant. Persons in need of special arrangements should contact the person listed below.

FOR FURTHER INFORMATION CONTACT: Deirdre O'Sullivan, Amtrak Reform Council, Room 7105, JM-ARC, 400 Seventh Street, SW, Washington, DC 20590, or by telephone at (202) 366–0591; FAX: 202–493–2061. For information regarding ARC's Finding Resolution, the ARC's Annual Reports, information about ARC Council Members and staff, and much more, you can also visit the Council's Web site at *www.amtrakreformcouncil.gov*.

SUPPLEMENTARY INFORMATION: The ARC was created by the Amtrak Reform and Accountability Act of 1997 (Reform Act), as an independent commission, to evaluate Amtrak's performance and to make recommendations to Amtrak for achieving further cost containment, productivity improvements, and financial reforms. In addition, the Reform Act provides: that the Council is to monitor cost savings from work rules established under new agreements between Amtrak and its labor unions; that the Council submit an annual report to Congress that includes an assessment of Amtrak's progress on the resolution of productivity issues; and that, after a specified period, the Council has the authority to determine whether Amtrak can meet certain financial goals specified under the Reform Act and, if it finds that Amtrak cannot, to notify the President and the Congress.

The Reform Act prescribes that the Council is to consist of eleven members, including the Secretary of Transportation and ten others nominated by the President and the leadership of the Congress. Members serve a five-year term.

Issued in Washington, DC, December 3, 2001.

Thomas A. Till,

Executive Director.

[FR Doc. 01–30265 Filed 12–5–01; 8:45 am]

BILLING CODE 4910–06–P

BROADCASTING BOARD OF GOVERNORS

Sunshine Act Meeting

Date and Time: December 11, 2001; 11 a.m.–4 p.m.

Place: Cohen Building, Room 3321, 330 Independence Ave., SW., Washington, DC 20237.

Closed Meeting: The members of the Broadcasting Board of Governors (BBG) will meet in closed session to review and discuss a number of issues relating to U.S. Government-funded non-military international broadcasting. They will address internal procedural, budgetary, and personnel issues, as well as sensitive foreign policy issues relating to potential options in the U.S. international broadcasting field. This meeting is closed because if open it likely would either disclose matters that would be properly classified to be kept secret in the interest of foreign policy under the appropriate executive order (5 U.S.C. 552b.(c)(1)) or would disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action. (5 U.S.C. 552b.(c)(9)(B)) In addition, part of the discussion will relate solely to the internal personnel and organizational issues of the BBG or the International Broadcasting Bureau. (5 U.S.C. 552b.(c)(2) and (6))

Contact Person for More Information: Persons interested in obtaining more information should contact either Brenda Hardnett or Carol Booker at (202) 401–3736.

Dated: December 3, 2001.

Carol Booker,

Legal Counsel.

BILLING CODE 8230–01–M

DEPARTMENT OF COMMERCE

Submission For OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

AGENCY: U.S. Census Bureau.

Title: Government Finance Forms.

Form Number(s): F–5, F–11, F–12, F–13, F–21, F–22, F–25, F–28, F–29, F–32, F–42.

Agency Approval Number: 0607–0585.

Type of Request: Revision of a currently approved collection.

Burden: 115,076 hours.

Number of Respondents: 47,981.

Avg Hours Per Response: 2 hours and 23 minutes.

Needs and Uses: Title 13, section 161, of the United States Code requires the Secretary of Commerce to conduct a census of governments every fifth year. Section 182 allows the Secretary to conduct annual surveys in other years. The Census Bureau requests OMB clearance of the questionnaires needed to conduct the 2002 Census of Governments, Finance Phase and the 2003 Annual Survey of State and Local Government Finance. There are eleven survey forms used to collect data on government finances. Since there are many different types and sizes of governments, each form is tailored to the unique characteristics of the type and size of government or government agency to be surveyed. In both the census and annual surveys, equivalent data are collected, except for the F–11 and F–12 retirement forms. For these forms, in the census year, an additional organizational and system coverage section is included. There are no other changes to these forms, as currently cleared.

The Census Bureau incorporates the data collected on these forms into its governmental finance program. This program has made possible the dissemination of comprehensive and comparable governmental finance statistics since 1902. The data are released in reports which contain

benchmark statistics on public revenue, expenditure, debt, and assets. They are widely used by federal, state, and local legislators, policy-makers, administrators, analysts, economists, and researchers to follow the changing characteristics of the government sector of the economy.

Affected Public: State, local or Tribal government.

Frequency: Annually.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., sections 161 and 182.

OMB Desk Officer: Susan Schechter, (202) 395–5103.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton, Departmental Paperwork Clearance Officer, (202) 482–3129, Department of Commerce, room 6086, 14th and Constitution Avenue, NW, Washington, DC 20230 (or via the Internet at *mclayton@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Susan Schechter, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: December 3, 2001.

Madeleine Clayton,

Departmental Paperwork Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 01–30294 Filed 12–5–01; 8:45 am]

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Submission For OMB Review; Comment Request

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

AGENCY: U.S. Census Bureau.

Title: Boundary and Annexation Survey (BAS).

Form Number(s): BAS 1, BAS 1A, BAS 2, BAS 2A, BAS 2CUO, BAS 3, BAS 3A, BAS 4, BAS 5, BAS 5A, 8 letters, 2 postcards, 12 inserts.

Agency Approval Number: 0607–0151.

Type of Request: Revision of an existing collection.

Burden: 40,986 hours.

Number of Respondents: 13,662.

Avg Hours Per Response: 3 hours.

Needs and Uses: The Census Bureau requests extension of the OMB clearance for the Boundary and Annexation Survey (BAS). The Census Bureau conducts the BAS annually to collect information on the creation of newly incorporated municipalities, minor civil divisions (MCDs), counties, federally recognized American Indian areas (AIAs) which include reservations and/or off-reservation trust lands, and Alaska Native Regional Corporations (ANRCs), the dissolution of incorporated municipalities and MCDs, and changes to the boundaries of counties, incorporated municipalities, MCDs, AIAs, and ANRCs. The BAS information is used to provide an appropriate record for reporting the results of the decennial and economic censuses and the Census 2000 Long Form Transitional Database, to support the annual population estimates program, to update the municipal, MCD, county, AIA, and ANRC inventory for the Federal Information Processing Standards (FIPS) program managed by the U.S. Geological Survey (USGS) for the National Institute of Standards and Technology, and to update the Geographic Names Information System (GNIS) maintained by the USGS.

Affected Public: State, local or Tribal government.

Frequency: Annually.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., Section 6.

OMB Desk Officer: Susan Schechter, (202) 395–5103.

Copies of the above information collection proposal can be obtained by calling or writing Madeleine Clayton, Departmental Paperwork Clearance Officer, (202)482–3129, Department of Commerce, room 6086, 14th and Constitution Avenue, NW, Washington, DC 20230 (or via the Internet at *mclayton@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Susan Schechter, OMB Desk Officer, room 10201, New Executive Office Building, Washington, DC 20503.

Dated: December 3, 2001.

Madeleine Clayton,

Departmental Paperwork Clearance Officer, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

Bureau of the Census

[Docket Number 011120280–1280–01]

Annual Surveys in the Manufacturing Area

AGENCY: Bureau of the Census, Commerce.

ACTION: Notice of determination.

SUMMARY: The Bureau of the Census (Census Bureau) is conducting the 2001 Annual Surveys in the Manufacturing Area. The 2001 Annual Surveys consist of the Current Industrial Reports surveys, the Annual Survey of Manufactures, the Survey of Industrial Research and Development, and the Survey of Plant Capacity Utilization. We have determined that annual data collected from these surveys are needed to aid the efficient performance of essential governmental functions and have significant application to the needs of the public and industry. The data derived from these surveys, most of which have been conducted for many years, are not publicly available from nongovernmental or other governmental sources.

FOR FURTHER INFORMATION CONTACT: William G. Bostic, Jr., Chief, Manufacturing and Construction Division, on (301) 457–4593.

SUPPLEMENTARY INFORMATION: The Census Bureau is authorized to take surveys necessary to furnish current data on the subjects covered by the major censuses authorized by Title 13, United States Code (U.S.C.), sections 61, 81, 182, 224, and 225. These surveys will provide continuing and timely national statistical data on manufacturing for the period between economic censuses. The next economic censuses will be conducted for the year 2002. The data collected in these surveys will be within the general scope and nature of those inquiries covered in the economic censuses.

Current Industrial Reports

Most of the following commodity or product surveys provide data on shipments or production, data on stocks, unfilled orders, orders booked, consumption, and so forth. Reports will be required of all, or a sample of, establishments engaged in the production of the items covered by the following list of surveys.

Survey Title	
MA313F	Yarn Production.
MA313K	Knit Fabric Production.
MA314Q	Carpets and Rugs.
MA315D	Gloves and Mittens.
MA316A	Footwear Production.
MA321T	Lumber Production and Mill Stocks.
MA325F	Paint and Allied Products.
MA325G	Pharmaceutical Preparations, except Biologicals.
MA327C	Refractories.
MA327E	Consumer, Scientific, Technical, and Industrial Glassware.
MA331A	Iron and Steel Castings.
MA331B	Steel Mill Products.
MA331E	Nonferrous Castings.
MA332Q	Antifriction Bearings.
MA333A	Farm Machinery and Lawn and Garden Equipment.
MA333D	Construction Machinery.
MA333F	Mining Machinery and Mineral Processing Equipment.
MA333L	Internal Combustion Engines.
MA333M	Refrigeration, Air-conditioning, and Warm Air Equipment.
MA333P	Pumps and Compressors.
MA334B	Selected Instruments and Related Products.
MA334M	Consumer Electronics.
MA334P	Communication Equipment.
MA334Q	Semiconductors, Printed Circuit Boards, and Electronic Components.
MA334R	Computers and Office and Accounting Machines.
MA334S	Electromedical and Irradiation Equipment.
MA335A	Switchgear, Switchboard Apparatus, Relays, and Industrial Controls.
MA335E	Electric Housewares and Fans.
MA335F	Major Household Appliances.
MA335H	Motors and Generators.
MA335J ..	Insulated Wire and Cable.
MA335K	Wiring Devices and Supplies.

The following list of surveys represent annual counterparts of monthly and quarterly surveys and will cover only those establishments that are not canvassed, or do not report, in the more frequent surveys. Accordingly, there will be no duplication in reporting. The content of these annual reports will be identical with that of the monthly and quarterly reports.

Survey Title	
M311H ...	Animal and Vegetable Fats and Oils (Stocks).
M311J	Oilseeds, Beans, and Nuts (Primary Producers).
M311L	Fats and Oils (Renderers).
M311M ...	Animal and Vegetables Fats and Oils (Consumption and Stocks).
M311N ...	Animal and Vegetables Fats and Oils (Production, Consumption, and Stock).
M313P ...	Consumption on the Cotton System.
M327G ...	Glass Containers.
M331J	Inventories of Steel Producing Mills.
M336G ...	Civil Aircraft and Aircraft Engines.
M336L	Truck Trailers.
MQ311A	Flour Milling Products.
MQ313D	Consumption on the Woolen System and Worsted Combing.
MQ313T	Broadwoven Fabrics (Gray).
MQ314X	Bed and Bath Furnishings.
MQ315A	Apparel.
MQ325A	Inorganic Chemicals.
MQ325B	Fertilizer Materials.
MQ325C	Industrial Gases.
MQ327D	Clay Construction Products.
MQ332E	Plumbing Fixtures.
MQ333W	Metalworking Machinery.
MQ335C	Fluorescent Lamp Ballasts

Annual Survey of Manufactures

The Annual Survey of Manufactures collects industry statistics, such as total value of shipments, employment, payroll, workers' hours, capital expenditures, cost of materials consumed, supplemental labor costs, and so forth. This survey, while conducted on a sample basis, covers all manufacturing industries, including data on plants under construction but not yet in operation.

Survey of Industrial Research and Development

The Survey of Industrial Research and Development measures spending on research and development activities in private U.S. businesses. The Census Bureau collects and compiles this information with funding from the National Science Foundation (NSF). The NSF publishes the results in its publication series. Four data items in the survey provide interim statistics collected in the Census Bureau's Economic Censuses. These items (total company sales, total company employment, and total expenditures and Federally-funded expenditures for research and development conducted within the company) are collected on a mandatory basis under the authority of Title 13, U.S.C. Responses to all other data collected for the NSF are voluntary.

Survey of Plant Capacity Utilization

The Survey of Plant Capacity Utilization is designed to measure the use of industrial capacity. The survey collects information on actual output and estimates of potential output in terms of value of production. These data are the basis for calculating rates of utilization of full production capability and use of production capability under national emergency conditions.

Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act (PRA) unless that collection of information displays a current valid Office of Management and Budget (OMB) control number. In accordance with the PRA, 44 U.S.C., Chapter 45, the OMB approved the 2001 Annual Surveys under the following OMB Control Numbers: Current Industrial Reports—0607–0206, 0607–0392, 0607–0393, 0607–0395, 0607–0476, and 0607–0776; Annual Surveys of Manufactures—0607–0449; Survey of Industrial Research and Development—3145–0027; and Survey of Plant Capacity Utilization—0607–0175. We will provide copies of the form upon written request to the Director, U.S. Census Bureau, Washington, DC 20233–0001.

Based upon the foregoing, I have directed that the Annual Surveys in the Manufacturing Area be conducted for the purpose of collecting these data.

Dated: November 27, 2001.

William G. Barron, Jr.,

Acting Director, Bureau of the Census.

DEPARTMENT OF COMMERCE

Bureau of Export Administration

National Security Assessment of the U.S. Maritime Industry

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before February 4, 2002.

ADDRESSES: Direct all written comments to Madeleine Clayton, DOC Paperwork Clearance Officer, (202) 482–3129, Department of Commerce, Room 6086, 14th and Constitution Avenue, NW, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Dawnielle Battle, BXA ICB Liaison, (202) 482–0637, Bureau of

Export Administration (BXA), Department of Commerce, Room 6877, 14th and Constitution Avenue, NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION

I. Abstract

Commerce/BXA, in coordination with the Department of the Navy, Carderock Division, and the Department of Transportation, Maritime Administration is conducting a survey of the U.S. maritime industry in order to assess the health and competitiveness as well as the technology requirements of the forms that comprise this critical sector.

II. Method of Collection

The information will be collected using a non-recurring, mandatory survey. It will be collected in written form.

III. Data

The survey will collect information on the nature of the business performed by each firm; estimated sales and employment data; financial information; research and development expenditures and funding sources; capital expenditures and funding sources; competitiveness issues and technology requirements.

OMB Number: 0694–0113.
Form Number: N/A.
Type of Review: Regular Submission.
Affected Public: The vendor, supplier and manufacturer base of the U.S. Maritime industry.
Estimated Number of Respondents: 2,000.
Estimated Time Per Response: 4.0 hours.
Estimated Total Annual Burden Hours: 8,000 hours.
Estimated Total Annual Cost: No equipment or other materials will need to be purchased to comply with the requirement.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: December 3, 2001.

Madeleine Clayton,

Departmental Paperwork Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 47–2001]

Foreign-Trade Zone 50, Long Beach, CA, Proposed Foreign-Trade Subzone, Ultramar Diamond Shamrock Corporation (Oil Refinery Complex), Los Angeles, CA

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Board of Harbor Commissioners of the City of Long Beach, grantee of FTZ 50, requesting special-purpose subzone status for the oil refinery complex of Ultramar Diamond Shamrock Corporation (Ultramar), located in Los Angeles, California. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR part 400). It was formally filed on November 27, 2001.

The Ultramar refinery complex (120,000 BPD, 54 tanks with 3.1 million barrel capacity on 5.9 million square feet) is located at 2402 East Anaheim Street, Wilmington area of Los Angeles (Los Angeles County), California. The refinery is within the Long Beach port of entry.

The "Wilmington" refinery (435 full-time and 133 contract employees) is used to produce fuels and petrochemical feedstocks. Fuel products include gasoline, jet fuel, distillates, residual fuels, naphthas and motor fuel blendstocks. Petrochemical feedstocks and refinery by-products include propane, butane, petroleum coke and sulfur. Some 35 percent of the crude oil and natural gas condensate (54 percent of inputs) is sourced abroad. The company is also requesting to import certain intermediate inputs (naphthas and gas oils) under FTZ procedures. Currently 35 percent of the refinery's intermediate inputs are foreign-sourced.

Zone procedures would exempt the refinery from Customs duty payments on the foreign products used in its exports. On domestic sales, the company would be able to choose the Customs duty rates that apply to certain petrochemical feedstocks and refinery by-products (duty-free) by admitting incoming foreign inputs (crude oil, natural gas condensate, gas oil, naphtha) in non-privileged foreign status. The duty rates on inputs range from 5.25¢/barrel to 10.5¢/barrel. The application indicates that the savings from zone procedures would help improve the refinery's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below.

The closing period for their receipt is [60 days from date of publication]. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to February 19, 2002).

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce, Export Assistance Center, One World Trade Center, Suite 1670, Long Beach, CA 90831.

Office of the Executive Secretary, Foreign-Trade Zones Board, Room 4008, U.S. Department of Commerce, 14th & Pennsylvania Avenue, NW., Washington, DC 20230.

Dated: November 29, 2001.

Dennis Puccinelli,

Executive Secretary.

Brake Rotors From the People's Republic of China: Initiation of Sixth New Shipper Antidumping Duty Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce has received requests to conduct a new shipper review of the antidumping duty order on brake rotors from the People's

Republic of China. In accordance with 19 CFR 351.214(d), we are initiating a review for Longkou TLC Machinery Co., Ltd.

EFFECTIVE DATE: December 6, 2001.

FOR FURTHER INFORMATION CONTACT: Brian Smith or Terre Keaton, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–1766 and (202) 482–1280, respectively.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended ("the Act"), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce ("the Department") regulations are to 19 CFR Part 351 (April 2001).

SUPPLEMENTARY INFORMATION:

Background

The Department has received a timely request from Longkou TLC Machinery Co., Ltd. ("LKTLC"), in accordance with 19 CFR 351.214(c), for a new shipper review of the antidumping duty order on brake rotors from the People's Republic of China ("PRC"), which has an October semiannual anniversary month.

As required by 19 CFR 351.214(b)(2)(i), (ii), and (iii)(A), the company identified above has certified that it did not export brake rotors to the United States during the period of investigation ("POI"), and that it has never been affiliated with any exporter or producer which did export brake rotors during the POI. The company has further certified that its export activities are not controlled by the central government of the PRC, satisfying the requirements of 19 CFR 351.214(b)(2)(iii)(B). Pursuant to the Department's regulations at 19 CFR 351.214(b)(2)(iv)(A), LKTLC submitted documentation establishing the date on which it first shipped the subject merchandise to the United States, the date of entry of that first shipment, the volume of that shipment, and the date of the first sale to an unaffiliated customer in the United States.

In accordance with section 751(a)(2)(B) of the Act, as amended, and 19 CFR 351.214(b), and based on information on the record, we are initiating the new shipper review for LKTLC.

Initiation of Review

In accordance with section 751(a)(2)(B)(ii) of the Act and 19 CFR 351.214(d)(1), we are initiating a new shipper review of the antidumping duty order on brake rotors from the PRC. We intend to issue the preliminary results of this review not later than 180 days after the date on which the review is initiated.

Antidumping duty proceeding	Period to be reviewed
PRC: Brake Rotors, A–570–846	
Longkou TLC Machinery Co., Ltd.	04/01/01–09/30/01

We will instruct the Customs Service to allow, at the option of the importer, the posting, until the completion of the review, of a bond or security in lieu of a cash deposit for each entry of the merchandise exported by the above-listed company. This action is in accordance with 19 CFR 351.214(e).

Interested parties that need access to proprietary information in this new shipper review should submit applications for disclosure under administrative protective orders in accordance with 19 CFR 351.305 and 351.306.

This initiation and notice are in accordance with section 751(a) of the Act (19 U.S.C. 1675(a)) and 19 CFR 351.214(d).

Dated: November 30, 2001.

Richard Moreland,

Deputy Assistant Secretary, for Import Administration.

International Trade Administration

[A–122–503]

Iron Construction Castings From Canada: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 6, 2001.

FOR FURTHER INFORMATION CONTACT: Alexander Amdur or Karine Gziryan, AD/CVD Enforcement, Office 4, Group II, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–5346, (202) 482–4081, respectively.

Time Limits

Statutory Time Limits

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department of Commerce (the Department) to make a preliminary determination within 245 days after the last day of the anniversary month of an order or finding for which a review is requested and a final determination within 120 days after the date on which the preliminary determination is published. However, if it is not practicable to complete the review within these time periods, section 751(a)(3)(A) of the Act allows the Department to extend the 245-day time limit for the preliminary determination to a maximum of 365 days and the time limit for the final determination to 180 days (or 300 days if the Department does not extend the time limit for the preliminary determination) from the date of publication of the preliminary determination.

Background

On April 30, 2001, the Department published a notice of initiation of administrative review of the antidumping duty order on iron construction castings from Canada, covering the period March 1, 2000 through February, 2001. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews* 66 FR 21310. The preliminary results are currently due no later than December 1, 2001.

Extension of Time Limit for Preliminary Results of Review

We determine that it is not practicable to complete the preliminary results of this review within the original time limit. Therefore, the Department is extending the time limit for completion of the preliminary results until no later than March 31, 2002. See Decision Memorandum from Holly A. Kuga to Bernard T. Carreau, dated concurrently with this notice, which is on file in the Central Records Unit, Room B–099 of the Department's main building. We intend to issue the final results no later than 120 days after the publication of the preliminary results notice.

This extension is in accordance with section 751(a)(3)(A) of the Act.

Dated: November 29, 2001.

Bernard T. Carreau,

Deputy Assistant Secretary for Import Administration, Group II.

[A–588–845]

Extension of Time Limit for the Final Results of the Antidumping Duty Administrative Review: Stainless Steel Sheet and Strip in Coils From Japan

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of time limit for the final results of the antidumping duty administrative review of stainless steel sheet and strip in coils from Japan.

SUMMARY: The Department of Commerce ("Department") is extending the time limit for the final results of the review of stainless steel sheet and strip in coils from Japan. This review covers the period January 4, 1999 through June 30, 2000.

EFFECTIVE DATE: December 6, 2001.

FOR FURTHER INFORMATION CONTACT: Juanita H. Chen or James C. Doyle, Enforcement Group III, Import Administration, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue, NW., Washington, DC 20230; telephone: 202–482–0409, or 202–482–0159, respectively.

Statutory Time Limits

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended ("Act"), requires the Department of Commerce ("Department") to issue the final results of an antidumping duty administrative review within 120 days of the date on which the preliminary results are published. However, if the Department concludes that it is not practicable to complete the review within the time period, the Department may extend the 120-day period to 180 days.

Background

On September 6, 2000, the Department published a notice of initiation of the administrative review of stainless steel sheet and strip in coils from Japan, covering the period January 4, 1999 through June 30, 2000. *See Notice of Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part*, 65 FR 53980 (September 6, 2000). The preliminary results of this administrative review were published in the **Federal Register** on August 8, 2001. *See Notice of Preliminary Results of Antidumping Duty Administrative Review: Stainless Steel Sheet and Strip in Coils from Japan*, 66 FR 41543 (August 8, 2001) ("Preliminary Results"). The current due date for the final results is December 6, 2001.

Extension of Time Limits for the Final Results

Due to the complexity of issues present in this administrative review, such as home market affiliated downstream sales and complicated cost accounting issues, it is not practicable to complete this review within the original time period. Therefore, the Department has postponed the deadline for issuing the final results until February 4, 2002, which is 180 days after publication of the Preliminary Results in this administrative review.

Dated: November 30, 2001.

Barbara E. Tillman,

Acting Deputy Assistant Secretary for Import Administration, Group III.

[A–489–807]

Certain Steel Concrete Reinforcing Bars From Turkey; Amended Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 6, 2001.

SUMMARY: The Department of Commerce is publishing amended final results of the antidumping duty administrative review on certain steel concrete reinforcing bars from Turkey.

FOR FURTHER INFORMATION CONTACT: Irina Itkin or Elizabeth Eastwood, AD/CVD Enforcement Group I, Office 2, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone (202) 482–0656 or (202) 482–3874, respectively.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are to 19 CFR part 351 (2000).

Amendment to Final Results

In accordance with section 751(a) of the Act, on November 7, 2001, the Department published the final results of administrative review of the antidumping duty order on certain steel concrete reinforcing bars (rebar) from Turkey. *See Certain Steel Concrete Reinforcing Bars from Turkey; Final Results of Antidumping Duty Administrative Review*, 66 FR 56274 (Nov. 7, 2001). On November 13, 2001, we received an allegation, timely filed pursuant to 19 CFR 351.224(c)(2), from a respondent, the Ekinciler Group (Ekinciler), that the Department had made a ministerial error in its final results. We did not receive comments from Colakoglu Metalurji A.S. (Colakoglu), Diler Demir Celik Endustrisi ve Ticaret A.S., Yazici Demir Celik Sanayi ve Ticaret A.S., and Diler Dis Ticaret A.S. (collectively "Diler"), or ICDAS Celik Enerji Tersane ve Ulasim Sanayi, A.S. (ICDAS), the other three respondents in this review. After analyzing Ekinciler's submission, we have determined, in accordance with 19 CFR 351.224, that a ministerial error was made because we did not publish the correct recalculated margin for Ekinciler in the **Federal Register**.

On November 13, 2001, we also received ministerial error allegations from AmeriSteel Corporation, the petitioner in this review. After analyzing the petitioner's submission, we have also determined, in accordance with 19 CFR 351.224, that a second ministerial error was made in our final margin calculation for Ekinciler. Specifically, we find that we failed to properly sum Ekinciler's adjusted financing expenses as shown in Attachment 2 of the October 31, 2001, memorandum from Elizabeth Eastwood to the file entitled "Calculations Performed for the Ekinciler Group (Ekinciler) for the Final Results in the 1999–2000 Antidumping Duty Administrative Review on Steel Concrete Reinforcing Bars from Turkey." Correcting this mistake resulted in a revised interest expense ratio for Ekinciler, and thus a revised margin.

For a detailed discussion of the ministerial errors noted above, as well as the Department's analysis, see the memorandum to Richard W. Moreland from the Team, dated November 29, 2001.

Therefore, in accordance with 19 CFR 351.224(e), we are amending the final results of the 1999–2000 antidumping duty administrative review of rebar from Turkey. The revised weight-averaged dumping margins are as follows:

Exporter/ manufacturer	Original final margin percentage	Revised final margin percentage
Colakoglu Metalurji A.S.	9.51	.....
Ekinciler Holding A.S./ Ekinciler Demir Celik A.S.	6.83	8.41
Diler Demir Celik Endustrisi ve ticaret A.S./Yazici Demir Celik Sanayi ve ticaret A.S./Diler Dis Ticaret A.S.	0.00	.....
ICDAS Celik Enerji Tersane ve Ulasim Sanayi A.S.	0.00	.....

This administrative review and notice are in accordance with sections 751(a)(1) and 777(i) of the Act.

Dated: November 29, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

Notice of Preliminary Results of Antidumping Duty New Shipper Review: Structural Steel Beams From Japan

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of preliminary results in the antidumping duty new shipper review of structural steel beams from Japan.

SUMMARY: In response to a request from Yamato Kogyo Co., Ltd. ("Yamato Kogyo"), the Department of Commerce ("Department") is conducting an antidumping duty new shipper review of the antidumping duty order on structural steel beams from Japan. This new shipper review covers imports of subject merchandise from Yamato Kogyo. The period of review is February 11, 2000 through November 30, 2000.

The Department preliminarily determines that Yamato Kogyo has not made sales of structural steel beams from Japan at below normal value during the period of review. If these preliminary results are adopted in our final results of this new shipper review, we will instruct the U.S. Customs Service to liquidate entries during the period of review without regard to antidumping duties.

Interested parties are invited to comment on these preliminary results. *See* "Preliminary Results of the Review" section, *infra*.

EFFECTIVE DATE: December 6, 2001.

FOR FURTHER INFORMATION CONTACT: Juanita H. Chen or James C. Doyle, Import Administration, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue, NW., Washington, DC 20230; telephone: 202–482–0409 or 202–482–0159, respectively.

SUPPLEMENTARY INFORMATION:

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended ("Act"), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR part 351 (2000). *See Antidumping Duties; Countervailing Duties; Final rule*, 62 FR 27296 (May 19, 1997) (*"AD/CVD Final Rule"*).

Background

On June 19, 2000, the Department published in the **Federal Register** a notice of the antidumping duty order on structural steel beams from Japan. *See Structural Steel Beams from Japan: Notice of Antidumping Duty Order*, 65 FR 37960 (June 19, 2000). On December 27, 2000, Yamato Kogyo, a producer and exporter of subject merchandise during the period of review ("POR"), requested that the Department conduct an antidumping duty new shipper review of the antidumping duty order. On January 24, 2001, the Department requested that Yamato Kogyo provide: (1) Certification that it has never been affiliated with any exporter or producer who exported the subject merchandise to the United States during the period of investigation ("POI"); (2) a list of all of its affiliates during the POI; and (3) clarification on whether there were shipments of subject merchandise during the review period subsequent to the shipment reported. See Letter from James C. Doyle, Program Manager to Thomas Rogers, Capital Trade Incorporated (January 24, 2001). The Department also conducted an automated customs query on January 24, 2001, and found no shipments by Yamato Kogyo during the POI. See Memorandum to the File from Juanita H. Chen (January 25, 2001). On January 29, 2001, Yamato Kogyo submitted the requested certification, listing and clarification. See Letter from Thomas Rogers to Secretary Evans (January 29, 2001). On January 31, 2001, the Department initiated a new shipper review of the antidumping duty order on structural steel beams from Japan. *See Initiation of New Shipper Antidumping Duty Review: Structural Steel Beams From Japan*, 66 FR 10668 (February 16, 2001).

On February 16, 2001, the Department issued its antidumping duty questionnaire. Subsequently, the Department corrected the period of review from the requested period of June 1, 2000 through November 30, 2000, to the current period of February 11, 2000 through November 30, 2000. *See* Memorandum to the File from Juanita H. Chen (February 22, 2001). On February 23, 2001, the Department granted Yamato Kogyo's request to limit its reporting period of home market sales to the three months preceding and two months following the months of the first and last U.S. sales in the POR, noting that such reporting is at Yamato Kogyo's own risk. See Memorandum to the file from Juanita H. Chen (February 23, 2001).

On March 21, 2001, the Department received Yamato Kogyo's Section A response to the questionnaire ("Section A response"). On April 13, 2001, the Department received Yamato Kogyo's Sections B and C responses to the questionnaire ("Sections B/C response"). On August 20, 2001, the Department issued a Sections A–C supplemental questionnaire. On September 18, 2001, the Department received Yamato Kogyo's Sections A–C supplemental response ("Supplemental Response"), along with revised data files.

Under section 751(a)(2)(B)(iv) of the Act, the Department may extend the deadline for completion of a new shipper review if it determines that the case is extraordinarily complicated. On June 12, 2001, the Department fully extended the time limit for the preliminary results of this new shipper review by 120 days until November 27, 2001. *See Notice of Extension of Time for the Preliminary Results of the Antidumping Duty New Shipper Review: Structural Steel Beams from Japan*, 66 FR 32790 (June 18, 2001).

The Department is conducting this new shipper review in accordance with section 751 of the Act.

Period of Review

The POR is February 11, 2000 through November 30, 2000.

Verification

Pursuant to section 782(i)(3) of the Act, the Department verified the information provided by Yamato Kogyo for use in our preliminary results. We used standard verification procedures, including on-site inspection of Yamato Kogyo's facilities, as well as of relevant sales and financial records. From October 3, 2001 through October 5, 2001, we conducted verification of sales information submitted by Yamato Kogyo. Our verification results are outlined in the public version of the verification report and are on file in the central records unit located in room B–099 of the main Department of Commerce Building, 1401 Constitution Avenue, NW., Washington, DC. See Report on the Sales Verification of Yamato Kogyo Co. Ltd. (November 14, 2001) ("Verification Report").

Scope of the Review

For purposes of this investigation, the products covered are doubly-symmetric shapes, whether hot- or cold-rolled, drawn, extruded, formed or finished, having at least one dimension of at least 80 mm (3.2 inches or more), whether of carbon or alloy (other than stainless) steel, and whether or not drilled, punched, notched, painted, coated, or clad. These products ("Structural Steel Beams") include, but are not limited to, wide-flange beams ("W" shapes), bearing piles ("HP" shapes), standard beams ("S" or "I" shapes), and M-shapes.

All products that meet the physical and metallurgical descriptions provided above are within the scope of this investigation unless otherwise excluded. The following products, are outside and/or specifically excluded from the scope of this investigation:

- Structural steel beams greater than 400 pounds per linear foot or with a web or section height (also known as depth) over 40 inches.

The merchandise subject to this investigation is classified in the Harmonized Tariff Schedule of the United States ("HTSUS") at subheadings: 7216.32.0000, 7216.33.0030, 7216.33.0060, 7216.33.0090, 7216.50.0000, 7216.61.0000, 7216.69.0000, 7216.91.0000, 7216.99.0000, 7228.70.3040, 7228.70.6000. Although the HTSUS subheadings are provided for convenience and Customs purposes, the written description of the merchandise under investigation is dispositive.

Facts Available

Section 776(a) of the Act provides that, if an interested party withholds information that has been requested by the Department, fails to provide such information in a timely manner or in the form or manner requested, significantly impedes a proceeding under the antidumping statute, or provides information which cannot be verified, the Department shall use, subject to sections 782(d) and (e) of the Act, facts otherwise available in reaching the applicable determination. Pursuant to section 782(e), the Department shall not decline to consider submitted information if all of the following requirements are met: (1) The information is submitted by the established deadline; (2) the information can be verified; (3) the information is not so incomplete that it cannot serve as a reliable basis for reaching the applicable determination; (4) the interested party has demonstrated that it acted to the best of its ability; and (5) the information can be used without undue difficulties. We have applied facts available for the reported payment date pursuant to section 776(a) of the Act because Yamato Kogyo did not report payment date, as requested by the Department. When asked for an explanation, it stated that it "cannot readily {report} the specific payment date for each transaction" and instead reported the payment due date based on the payment terms. *See* Sections B/C response at B–14. At verification, we noted the actual payment date appears on the receipt of payment. *See* Verification Report at 12. These receipts of payments show that payment on the invoice is made well in advance of the actual due date. Accordingly, we have used facts available for payment date, in order to calculate a more accurate credit expense by taking the simple average of the number of days between the shipment date and actual payment date, from those home market sales reviewed at verification for which actual payment date information is available. Additionally, for those home market sales for which we have actual payment date information, we have used the actual payment date to calculate the credit expense.

Product Comparisons

In accordance with section 771(16) of the Act, we considered all structural steel beam products covered by the "Scope of the Review" section of this notice, supra, which were produced and sold by Yamato Kogyo in the home market during the POR, to be foreign like products for the purpose of determining appropriate product comparisons to U.S. sales of structural steel beam products. We have relied on four characteristics to match U.S. sales of subject merchandise to comparison sales of the foreign like product: hot/cold formed, shape/size, strength/grade, and coating (listed in order of preference).

Export Price/Constructed Export Price

In accordance with section 772(a) of the Act, export price ("EP") is the price at which the subject merchandise is first sold (or agreed to be sold) before the date of importation by the producer or exporter of the subject merchandise outside of the United States to an unaffiliated purchaser in the United States or to an unaffiliated purchaser for exportation to the United States. In accordance with section 772(b) of the Act, constructed export price ("CEP") is the price at which the subject merchandise is first sold (or agreed to be sold) in the United States before or after the date of importation by or for the account of the producer or exporter of such merchandise or by a seller affiliated with the producer or exporter, to a purchaser not affiliated with the producer or exporter. For purposes of this review, Yamato Kogyo has classified its sale(s) as EP sales. *See* Sections B/C response, at C–11. Yamato Kogyo identified one channel of distribution (sales to distributors in the U.S. market) for its U.S. sale(s) during the POR. *Id.* at C–13. Based on Yamato Kogyo's description of its U.S. sales process, that it sells the merchandise directly to unaffiliated distributors in the U.S. market, and did not sell in the U.S. through an affiliated U.S. importer, we preliminarily determine that Yamato Kogyo's sale(s) were EP sales. *See* Section A response, at A–8. We calculated EP in accordance with section 772(a) of the Act. We based EP on packed prices for export to distributors in the U.S. market. We made deductions for foreign inland freight, foreign brokerage and handling, foreign inland and marine insurance, and credit expenses in accordance with section 772(c) of the Act.

Normal Value

In accordance with section 773(a)(1)(C) of the Act, to determine whether there was sufficient volume of sales in the home market to serve as a viable basis for calculating NV (*i.e.*, the aggregate volume of home market sales of the foreign like product is greater than or equal to five percent of the aggregate volume of U.S. sales), we compared Yamato Kogyo's volume of home market sales of the foreign like product to the volume of U.S. sales of the subject merchandise. Because Yamato Kogyo's aggregate volume of home market sales of the foreign like

product was greater than five percent of its aggregate volume of U.S. sales for the subject merchandise, we determined that the home market was viable. We therefore based NV on home market sales to unaffiliated purchasers and to those affiliated customer sales which passed the arm's length test, as discussed, *infra*, made in the usual commercial quantities and in the ordinary course of trade. We made adjustments, where applicable, for movement expenses (*i.e.*, inland freight, warehousing expense, and inland insurance) in accordance with section 773(a)(6)(B) of the Act. We recalculated credit expenses, where appropriate, using actual payment dates or the average of actual payment dates reported. *See* Facts Available section of this notice, *supra;* Verification Report, at 12; Analysis Memorandum for Yamato Kogyo Co., Ltd. (November 27, 2001) at 3. Additionally, in accordance with section 773(a)(6), we deducted home market packing costs and added U.S. packing costs.

Arm's Length Sales

Yamato Kogyo reported that it made home market sales of subject merchandise to affiliates, and also reported that it did not make sales of subject merchandise to affiliated parties for consumption. *See* Section A response, at A–3; *see also* Yamato Kogyo's Supplemental Response, at 11–12.

If any sales to affiliated customers in the home market are not made at arm's length prices, we exclude them from our analysis because we consider them to be outside the ordinary course of trade. To test whether sales were made at arm's length prices, we compare, on a model-specific basis, the starting prices of sales to affiliated and unaffiliated customers, net of all movement charges, direct selling expenses, and packing. Where prices to the affiliated party were on average 99.5 percent or more of the price to the unaffiliated parties, we determine that sales made to the affiliated party were at arms's length. *See* 19 CFR 351.403(c). In instances where no price ratio can be constructed for an affiliated customer because identical merchandise was not sold to unaffiliated customers, we are unable to determine that these sales were made at arm's length prices and, therefore, exclude them from our analysis. *See Notice of Final Determination of Sales at Less Than Fair Value: Certain Cold-Rolled Carbon Steel Flat Products from Argentina*, 58 FR 37062, 37077 (July 9, 1993). In our home market NV calculation, we have included Yamato Kogyo's sales to its affiliated customers because those sales pass the Department's arm's length test.

Date of Sale

Yamato Kogyo stated that it reported its home market sales based on the shipment date of such sales. *See* Verification Report at Exhibit 1. Yamato Kogyo explained that "the terms of the sale may change up to the date of shipment." *See* Sections B/C response, at B–13. Yamato Kogyo stated that, for the U.S. market, it issues the invoice when it ships the merchandise, and for the home market, it issues the invoice either: (1) the day of shipment, when the merchandise is loaded onto the barge (for sales shipped by barge); or (2) the day following shipment, when the merchandise is received by the customer (for sales shipped by truck). *See* Section A response, at 13. Section 351.401(i) of the Department's regulations states that the Department will normally use the date of invoice, as recorded in the exporter's or producer's records kept in the ordinary course of business, as the date of sale, but may use a date other than the date of invoice if it better reflects the date on which the material terms of sale are established. The preamble to these regulations provides an explanation of this policy, as well as examples of when the Department may choose to base the date of sale on a date other than the date of invoice. *See AD/CVD Final Rule*, 62 FR at 27348–49. From Yamato Kogyo's response, it appears that the material terms of sale are established by the date of shipment. Accordingly, for these preliminary results, in accordance with 19 CFR 351.401(i), we based date of sale on the shipment date.

Level of Trade

In accordance with section 773(a)(1)(B) of the Act, to the extent practicable, we determine NV based on sales in the comparison market at the same level of trade ("LOT") as the EP transactions. As noted in the "Export Price/Constructed Export Price" section, *supra*, we preliminarily determine that Yamato Kogyo's U.S. sale(s) were EP sales. The NV LOT is that of the starting-price sales in the comparison market or, when NV is based on CV, that of the sales from which we derive SG&A expenses and profit. For EP sales, the LOT is also the level of the starting-price sale, which is usually from the exporter to the unaffiliated U.S. customer.

To determine whether NV sales are at a different LOT than EP sales, we examine stages in the marketing process and selling functions along the chain of distribution between the producer and the unaffiliated customer. If the comparison-market sales are at a different LOT, and the difference affects price comparability, as manifested in a pattern of consistent price differences between the sales on which NV is based and comparison-market sales at the LOT of the export transaction, we make an LOT adjustment under section 773(a)(7)(A) of the Act.

In the present review, Yamato Kogyo stated that it is not claiming a LOT adjustment. However, to determine whether an adjustment is nevertheless necessary, in accordance with the principles discussed above, we examined information regarding the distribution systems and selling functions in both the United States and Japanese markets.

For the LOT in the home market, Yamato Kogyo stated that all sales were shipped directly to the final customer, either to trading companies or general contractors, and for the LOT in the U.S. market, stated that all sales were made to distributors. Yamato Kogyo reported two channels of distribution in the home market: (1) sales to trading companies; and (2) direct sales to general contractors. Yamato Kogyo reported one channel of distribution in the U.S. market: sales to unaffiliated distributors.

For sales in the home market, Yamato Kogyo asserts the sales are "effectively" through a single sales channel, *i.e.* from Yamato Kogyo to the customer. For sales to trading companies in the home market, Yamato Kogyo reported that the trading company issues the purchase order and makes payment, however Yamato Kogyo makes shipments directly to the trading company's customer (either a distributor or a general contractor/construction company). For sales to general contractors in the home market, Yamato Kogyo deals directly with the general contractor. For sales shipped by barge, Yamato Kogyo issues the invoice when the merchandise is loaded, and for sales shipped by truck, Yamato Kogyo issues the invoice the day the merchandise is received by the customer (usually the day following shipment). In some cases, Yamato Shoji issues the invoice to the customer. Yamato Kogyo (and in some cases, Yamato Shoji) makes the freight and delivery arrangements, provides technical information, and performs sales promotion activities such as sales calls. Based on our review of the selling functions performed in the channels of distribution in the home market, there do not appear to be any substantial differences in selling activity when the customer is a trading company versus a general contractor. Accordingly, we

preliminarily determine that there is one LOT in the home market.

For sales to the U.S. market, Yamato Kogyo sold and shipped directly to an unaffiliated distributor. Yamato Kogyo issues the invoice when it ships the merchandise. For sales to the U.S. market, Yamato Kogyo makes the freight arrangements but stated that it performs little other selling activities or services. We preliminarily determine there is one LOT in the U.S. market.

Based on our analysis of the selling functions performed for sales in the home market and EP sales in the U.S. market, we preliminarily determine that Yamato Kogyo performs significantly more selling functions in the home market than for the U.S. market; thus, these sales are made at different LOTs. However, because there is only one LOT in the home market, we cannot determine if there is a pattern of consistent price differences between the sales on which NV is based and the comparison market sales at the LOT of the export transaction, and do not have the means to calculate a LOT adjustment. Accordingly, we have not made a LOT adjustment.

Currency Conversion

We made currency conversions into U.S. dollars based on the exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank, in accordance with section 773A(a) of the Act.

Preliminary Results of Review

As a result of our review, we preliminarily determine that the following weighted-average dumping margin exists for the period February 11, 2000 through November 30, 2000:

Producer/Manufacturer/Exporter	Weighted-average margin (percent)
Yamato Kogyo, Co. Ltd	0.00

In accordance with 19 CFR 351.224(b), the Department will disclose to parties to this proceeding the calculations performed in connection with these preliminary results within five days of the date of publication of this notice.

Pursuant to 19 CFR 351.309, interested parties may submit written comments on these preliminary results. Case briefs must be submitted no later than 30 days after the date of publication of this notice. Rebuttal briefs, which must be limited to issues raised in the case briefs, must be submitted no later than five days after the time limit for filing case briefs. Parties submitting arguments in this proceeding are requested to submit with the argument: (1) A statement of the issue, and (2) a brief summary of the argument. Case and rebuttal briefs must be served on interested parties in accordance with 19 CFR 351.303(f). Also, within 30 days of the date of publication of this notice, an interested party may request a public hearing on arguments to be raised in the case and rebuttal briefs. *See* 19 CFR 351.310(c). Unless the Secretary specifies otherwise, the hearing, if requested, will be held two days after the date for submission of rebuttal briefs, or the first working day thereafter. The Department will issue the final results of this new shipper review, including the results of its analysis of issues raised in any case or rebuttal brief, within 120 days of publication of these preliminary results.

Assessment

The Department shall determine, and the U.S. Customs Service ("Customs") shall assess, antidumping duties on all appropriate entries. In accordance with 19 CFR 351.212(b), we have calculated exporter/importer-specific assessment rates. We calculated importer-specific duty assessment rates on a unit value per metric ton basis by summing the dumping margins on U.S. sales, and then dividing this sum by the total metric tons of all U.S. sales examined. If these preliminary results are adopted in our final results, we will instruct Customs not to assess antidumping duties on the merchandise subject to review. Upon completion of this review, the Department will issue appraisement instructions directly to Customs.

Cash Deposit

The following cash deposit requirements will be effective upon publication of the final results of this new shipper review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this new shipper review, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for the reviewed company will be the rate established in the final results of this new shipper review (except that no deposit will be required if the rate is zero or *de minimis*, i.e., less than 0.5 percent); (2) for previously investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in this review or the original LTFV investigation, the cash deposit rate will continue to be the "all others" rate of 37.13 percent established in the LTFV investigation. These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next review.

Notification to Interested Parties

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This new shipper review and notice are issued and published in accordance with sections 751(a)(2)(B) and 777(i)(1) of the Act.

Dated: November 27, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–588–857]

Antidumping Duty Order: Welded Large Diameter Line Pipe From Japan

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of antidumping duty order.

EFFECTIVE DATE: December 6, 2001.

FOR FURTHER INFORMATION CONTACT: John Drury or Helen Kramer at (202) 482–0195 and (202) 482–0405, respectively; AD/CVD, Enforcement, Office 8, Group III, Import Administration, Room 7866, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230.

The Applicable Statute

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments

made to the Tariff Act of 1930 ("the Act") by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations at 19 CFR part 351 (April 2001).

Scope of Investigation

The product covered by this investigation is certain welded carbon and alloy line pipe, of circular cross section and with an outside diameter greater than 16 inches, but less than 64 inches, in diameter, whether or not stencilled. This product is normally produced according to American Petroleum Institute (API) specifications, including Grades A25, A, B, and X grades ranging from X42 to X80, but can also be produced to other specifications. The product currently is classified under U.S. Harmonized Tariff Schedule (HTSUS) item numbers 7305.11.10.30, 7305.11.10.60, 7305.11.50.00, 7305.12.10.30, 7305.12.10.60, 7305.12.50.00, 7305.19.10.30, 7305.19.10.60, and 7305.19.50.00. Although the HTSUS item numbers are provided for convenience and customs purposes, the written description of the scope is dispositive. Specifically not included within the scope of this investigation is American Water Works Association (AWWA) specification water and sewage pipe and the following size/grade combinations; of line pipe:

- Having an outside diameter greater than or equal to 18 inches and less than or equal to 22 inches, with a wall thickness measuring 0.750 inch or greater, regardless of grade.
- Having an outside diameter greater than or equal to 24 inches and less than 30 inches, with wall thickness measuring greater than 0.875 inches in grades A, B, and X42, with wall thickness measuring greater than 0.750 inches in grades X52 through X56, and with wall thickness measuring greater than 0.688 inches in grades X60 or greater.
- Having an outside diameter greater than or equal to 30 inches and less than 36 inches, with wall thickness measuring greater than 1.250 inches in grades A, B, and X42, with wall thickness measuring greater than 1.000 inches in grades X52 through X56, and with wall thickness measuring greater than 0.875 inches in grades X60 or greater.
- Having an outside diameter greater than or equal to 36 inches and less than 42 inches, with wall thickness measuring greater than 1.375 inches in grades A, B, and X42, with wall thickness measuring greater than 1.250 inches in grades X52 through X56, and with wall thickness measuring greater than 1.125 inches in grades X60 or greater.
- Having an outside diameter greater than or equal to 42 inches and less than 64 inches, with a wall thickness measuring greater than 1.500 inches in grades A, B, and X42, with wall thickness measuring greater than 1.375 inches in grades X52 through X56, and with wall thickness measuring greater than 1.250 inches in grades X60 or greater.
- Having an outside diameter equal to 48 inches, with a wall thickness measuring 1.0 inch or greater, in grades X–80 or greater.

Antidumping Duty Order

In accordance with section 735(a) of the Act, the Department made its final determination that welded large diameter line pipe from Japan is being sold at less than fair value. *See Notice of Final Determination of Sales at Less Than Fair Value: Welded Large Diameter Line Pipe from Japan*, 66 FR 47172 (September 11, 2001).

On October 25, 2001, in accordance with section 735(d) of the Act, the U.S. International Trade Commission ("ITC") notified the Department that a U.S. industry is "materially injured," within the meaning of section 735(b)(1)(A)(i) of the Act, by reason of less-than-fair-value imports of welded large diameter line pipe from Japan.

Therefore, in accordance with section 736(a)(1) of the Act, the Department will direct U.S. Customs to assess, upon further advice by the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price of the merchandise for all relevant entries of welded large diameter line pipe from Japan. These antidumping duties will be assessed on all imports of the subject merchandise that are entered, or withdrawn from warehouse, for consumption on or after June 27, 2001, the date of publication of the preliminary determination in the **Federal Register** (*see Notice of Preliminary Determination of Sales at Less Than Fair Value: Welded Large Diameter Line Pipe From Japan*, 66 FR 34151). On or after the date of publication of this notice in the **Federal Register**, Customs officers must require, at the same time as importers normally would deposit estimated duties, cash deposits based on the rates listed below. The "All Others" rate applies to all exporters of subject merchandise not specifically listed. The weighted-average dumping margins are as follows:

Manufacturer/Exporter	Margin (percent)
Nippon Steel Corporation (Nippon)	30.80
Kawasaki Steel Corporation (Kawasaki)	30.80
All Others	30.80

This notice constitutes the antidumping duty order with respect to welded large diameter line pipe from Japan. Interested parties may contact the Department's Central Records Unit, Room B–099 of the main Commerce building, for copies of an updated list of antidumping duty orders currently in effect.

This order is published in accordance with section 736(a) of the Act.

Dated: November 30, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

[Docket No. 000929280–1201–01]

RIN 0693–ZA42

Announcing Approval of Federal Information Processing Standard (FIPS) 197, Advanced Encryption Standard (AES)

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice.

SUMMARY: The Secretary of Commerce approves FIPS 197, Advanced Encryption Standard (AES), and makes it compulsory and binding on Federal agencies for the protection of sensitive, unclassified information. A new robust encryption algorithm was needed to replace the aging Data Encryption Standard (FIPS 46–3), which had been developed in the 1970s. In September 1997, NIST issued a **Federal Register** notice soliciting an unclassified, publicly disclosed encryption algorithm that would be available royalty-free worldwide. Following the submission of 15 candidate algorithms and three publicly held conferences to discuss and analyze the candidates, the field was narrowed to five candidates. NIST continued to study all available information and analyses about the candidate algorithms, and selected one of the algorithms, the Rijndael algorithm, to propose for the AES.

EFFECTIVE DATE: This standard is effective May 26, 2002.

FOR FURTHER INFORMATION CONTACT: Ms. Elaine Barker, (301) 975–2911, National Institute of Standards and Technology, 10 Bureau Drive, STOP 8930, Gaithersburg, MD 20899–8930.

A copy of FIPS 197 is available electronically from the NIST web site at: *<http://csrc.nist.gov/encryption/aes/index.html/>*.

SUPPLEMENTARY INFORMATION: A notice was published in the **Federal Register** (Volume 66, Number 40, pp. 12762–3) on February 28, 2001, announcing the proposed FIPS for Advanced Encryption Standard for public review and comment. The **Federal Register** notice solicited comments from the public, academic and research communities, manufacturers, voluntary standards organizations, and Federal, state, and local government organizations. In addition to be published in the **Federal Register**, the notice was posted on the NIST Web pages; information was provided about the submission of electronic comments. Comments and responses were received from 21 private sector organizations, individuals, and groups of individuals, and from one federal government organization. None of the comments opposed the adoption of the AES as a Federal Information Processing Standard. Comments supported the selection of the algorithm and commended the clear, well-written presentation of the standard. Some comments offered editorial suggestions, pointed out perceived inconsistencies in the text, and requested clarifications. All of the editorial recommendations were carefully reviewed, and changes were made to the standard where appropriate.

Following is an analysis of the technical and related comments received.

Comment: The FIPS for AES should include support for additional block and key sizes. This would take advantage of the AES algorithm's built-in flexibility, making it better suited for use in a hashing mode and with communications applications that require minimal overhead (padding).

Response: NIST recognizes that one of the AES algorithm's strengths is its inherent support for additional block and key sizes. However, other block and key sizes have not been subjected to the same public analyses as those sizes that are provided for in the recommended FIPS. As a result, NIST believes that it would not be appropriate to include the additional sizes at this time. The block and key sizes are specified as parameters in the recommended FIPS, and could be modified to include other block and key sizes in the future if needed. The recommended standard explains that the use of parameters in the specification is intended to encourage AES implementers to build their applications and systems with future flexibility and adaptability in mind. NIST will monitor future developments, and will consider adding more parameters to the specification if needed in the future.

Comment: For added security, and to meet the needs for extremely long-term security, NIST should increase the number of rounds that are specified by the AES algorithm (i.e., the amount of processing used for encryption and decryption). Since new techniques to break the algorithm may evolve, the margin of security offered by the algorithm should be increased.

Response: Prior to its evaluation of the five finalist candidate algorithms, NIST's AES selection team discussed the issue of whether the number of rounds should be changed for one or more of the algorithms; the selection team decided to consider only the algorithms as initially submitted. Changing the number of prescribed rounds would change the way that the algorithm was defined (e.g., its key schedule), and the process of proposing, reviewing, and evaluating an algorithm would have to start over from the beginning. If the number of rounds were changed, many of the security and performance analyses that had already been performed on the candidate algorithms would no longer be useful.

Furthermore, throughout the development and review of the recommended FIPS, there was little agreement on which key sizes should have more rounds, and less agreement on how many rounds to add. Some who commented on the Draft FIPS proposed adding just two rounds, while another comment suggested adding 114 rounds.

NIST is not aware of advances in cryptographic techniques that would threaten the security provided by the recommended FIPS, but will continue to follow developments, to reevaluate the standard, and to consider changes or additions that might be needed. As with its other cryptographic standards, NIST will review the recommended FIPS every five years to consider whether the standard should be reaffirmed, amended, or withdrawn.

Comment: Since the AES algorithm allows three different key sizes, NIST should provide guidance to users regarding how and for what purpose(s) the different keys should be used.

Response: NIST is currently developing a guideline that will address numerous key management issues, including considerations for selecting from among multiple key sizes. Details on the content and development of that guideline are available on NIST's web pages http://csrc.nist.gov/encryption/kms/white-paper.pdf.

Comment: Statements in the FIPS are unclear and ambiguous regarding validation requirements for AES implementations. Additionally, many of these statements refer to FIPS 140–2, which has not been approved and which has a transition period when both FIPS 140–1 and FIPS 140–2 are in effect.

Response: FIPS 140–2 was approved in May 2001, and became effective on November 25, 2001. However, references to FIPS 140–2 have been removed in order to limit any misunderstandings.

Following approval of this recommended FIPS, vendors may request that their AES implementation be tested and validated either for conference to the AES specification or in conjunction with a cryptographic module validation test (i.e., validation testing for FIPS 140–2). The process is the same for all testing of implementations of FIPS-approved algorithms under the Cryptographic Module Validation Program.

Comment: Comments indicated concern about the padding to be used when the length of the data to be encrypted was not an even multiple of the block size. Other comments proposed more optimal specifications of the algorithm.

Response: NIST considers padding and optimization to be outside the scope of this standard. Padding will be addressed in a standard or recommendation to be developed on the modes of operation for the AES, and in the applications and protocols that use the AES.

It is expected that many optimization of the AES will be developed over time. NIST plans to post information that it receives on optimization issues on its web pages with the permission of the submitter.

Comment: One comment recommended the selections of a different algorithm, one that had not been submitted during the AES development process.

Response: NIST conducted an open process to solicit and evaluate algorithms for consideration for the AES. All candidate algorithms have been thoroughly reviewed and analyzed by the international cryptographic community.

Authority: Under section 5131 of the Information Technology Management Reform

Act of 1996 and the Computer Security Act of 1987, the Secretary of Commerce is authorized to approve standards and guidelines for the cost effective security and privacy of sensitive information processed by federal computer systems.

Executive Order 12866: This notice has been determined not to be significant for the purposes of E. O. 12866.

Dated: November 28, 2001.

Karen H. Brown,

Acting Director, National Institute of Standards and Technology.

BILLING CODE 3510–CN–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 120301A]

Proposed Information Collection; Comment Request; Economic Data Collection for the Atlantic Wreckfish Fishery

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3506 (c)(2)(A)).

DATES: Written comments must be submitted on or before February 4, 2002.

ADDRESSES: Direct all written comments to Madeleine Clayton, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6086, 14th and Constitution Avenue NW, Washington DC 20230 (or via Internet at MClayton@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Jim Waters, Department of Commerce, NOAA, National Marine Fisheries Service, 101 Pivers Island Road, Beaufort, NC 28516–9722, (252–7288710).

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Marine Fisheries Service (NMFS) proposes to collect to conduct a one-time census to collect economic, sociocultural, and demographic data about commercial fishing for wreckfish (*Polyprion americanus*) along the U.S. south Atlantic coast. The wreckfish fishery has been managed with individual transferable quotas (ITQs) since 1992. Few shareholders currently fish for wreckfish, yet they have not sold or leased their shares. This project will address why shareholders chose not to participate in the wreckfish fishery, where and for what species they did fish, and why they did not sell or lease their unused quota to generate revenue even though they did not fish for wreckfish. Equally important is to determine if the process of developing an ITQ system contributed to the rapid increase in fishing effort in the early 1990s. The results of this inquiry could offer important lessons for economists, fishery managers and others researching the appropriateness of applying ITQ systems in other fisheries in the southeast.

II. Method of Collection

Data will be collected through personal interviews with approximately 50 past and current shareholders in the ITQ management system for the wreckfish fishery. Interviews will include open-ended questions so that respondents can put into their own words their thoughts, interpretations and experiences with the fishery and the ITQ management program. All interviews will be tape-recorded and transcribed. Results of the study will be made available both through publications and on a National Marine Fisheries Community Impacts web page. Participation in the study will be voluntary.

III. Data

OMB Number: None.
Form Number: None.
Type of Review: Regular submission.
Affected Public: Business or other for-profit organizations.
Estimated Number of Respondents: 50.
Estimated Time Per Response: 2 hours.
Estimated Total Annual Burden Hours: 100.
Estimated Total Annual Cost to Public: $0.

IV. Request for Comments

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: November 29, 2001.

Madeleine Clayton,

Departmental Paperwork Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 120301C]

Proposed Information Collection; Comment Request; Highly Migratory Species Logbooks

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3506 (c)(2)(A)).

DATES: Written comments must be submitted on or before February 4, 2002.

ADDRESSES: Direct all written comments to Madeleine Clayton, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6086, 14th and Constitution Avenue NW, Washington DC 20230 (or via Internet at MClayton@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Jill Stevenson at the National Marine Fisheries Service (NMFS) Highly Migratory Species Division, 1315 East-West Highway, Silver Spring, MD 20910, or by email at *jill.stevenson@noaa.gov*or phone at 301–713–2347.

SUPPLEMENTARY INFORMATION:

I. Abstract

Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), NOAA is responsible for management of the Nation's marine fisheries. In addition, NOAA must comply with the United States' obligations under the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971 *et seq.*). NMFS collects information via vessel logbooks to monitor the U.S. catch of Atlantic swordfish, sharks, and bluefin tuna in relation to the quotas, thereby ensuring that the United States complies with its international obligations. The information supplied through vessel logbooks also provides the catch and effort data necessary to assess the status of highly migratory species and to evaluate bycatch in each fishery. Stock assessments are conducted and presented to the International Commission for the Conservation of Atlantic Tunas (ICCAT) periodically and provide, in part, the basis for ICCAT management recommendations which become binding on member nations. Supplementary information on fishing costs and earnings has been collected via this vessel logbook program on a voluntary basis. This economic information enables NMFS to assess the economic impacts of regulatory programs on small businesses and fishing communities. Given the need for more representative data and more complete analyses, NMFS proposes to make the cost/earnings summary a mandatory requirement of this program.

II. Method of Collection

Vessel owners who are issued a vessel permit in the swordfish or shark fisheries are required to complete vessel logbooks for all trips targeting Atlantic highly migratory species(HMS). In addition, selected tuna vessels (10 percent of permitted fleet) will be required to complete logbooks. Under this revised collection, the cost/earnings summary of the logbook would be required for selected vessels for all trips targeting HMS.

III. Data

OMB Number: 0648–0371.
Form Number: NOAA Form 88–191.
Type of Review: Regular submission.
Affected Public: Business or other for-profit organizations (fishing vessel owners).
Estimated Number of Respondents: 5,840.
Estimated Time Per Response: 10 minutes for cost/earnings summaries attached to logbook reports, 12 minutes for logbook catch reports, 2 minutes for negative logbook catch reports.
Estimated Total Annual Burden Hours: 25,383.
Estimated Total Annual Cost to Public: $0 (no capital expenditures required).

IV. Request for Comments

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: November 29, 2001.

Madeleine Clayton,

Departmental Paperwork Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 120301D]

Proposed Information Collection; Comment Request; Vessel-Marking Requirements in Antarctic Waters

AGENCY: National Oceanic and Atmospheric Administration (NOAA).

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3506 (c)(2)(A)).

DATES: Written comments must be submitted on or before February 4, 2002.

ADDRESSES: Direct all written comments to Madeleine Clayton, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6086, 14th and Constitution Avenue NW, Washington DC 20230 (or via Internet at MClayton@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Robin Tuttle, F/ST3, Room 12643, SSMC–3, 1315 East-West Highway, Silver Spring, MD 20910–3282 (phone 301–713–2282, ext. 199).

SUPPLEMENTARY INFORMATION:

I. Abstract

U.S. vessels participating in Antarctic fisheries must display the vessel's official identification number or international radio call sign in three locations on the vessel. The requirement aids in the enforcement of fishery regulations.

II. Method of Collection

The information is displayed in three locations on the vessel.

III. Data

OMB Number: 0648–0368.
Form Number: None.
Type of Review: Regular submission.
Affected Public: Business or other for-profit organizations, individuals.
Estimated Number of Respondents: 3.
Estimated Time Per Response: 45 minutes.
Estimated Total Annual Burden Hours: 2.
Estimated Total Annual Cost to Public: $90.

IV. Request for Comments

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

[Docket Number 981203295–1272–06; CFDA: 11.552]

RIN 0660–ZA05

Technology Opportunities Program

AGENCY: National Telecommunications and Information Administration, Commerce.

ACTION: Notice of solicitation of grant applications.

SUMMARY: The National Telecommunications and Information Administration (NTIA) issues this Notice describing the conditions under which applications will be received by the Technology Opportunities Program (TOP) and how NTIA will select applications for funding, subject to the availability of Fiscal Year 2002 funds.

The Bush Administration believes that new technologies and the deployment of high-speed networks are crucial to promoting America's economic growth and our nation's social well-being. The TOP program can play an important role in extending those priorities to underserved communities, through matching grants to state, local, and tribal governments and non-profit entities that demonstrate innovative uses of digital network technologies. TOP projects address specific challenges and realize opportunities for change in such areas as lifelong learning, community and economic development, government and public services, safety, health, culture, and the arts.

DATES: Complete applications for the Fiscal Year 2002 TOP grant program must be mailed or hand-carried to the address indicated below and received by NTIA no later than 8:00 P.M. EST, March 21, 2002. NTIA anticipates the processing and selection of applications for funding will require 6 months. NTIA expects to announce FY 2002 awards prior to September 30, 2002.

ADDRESSES: Completed applications must be mailed, shipped, or sent overnight express to:

Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW
HCHB, Room 4092
Washington, DC 20230

or hand-delivered to:

Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 1874
1401 Constitution Avenue, NW
Washington, DC 20230

Room 1874 is located at entrance #10 on 15th Street NW, between Pennsylvania and Constitution Avenues.

Materials needed to complete an application can be obtained electronically via TOP's Web site at *http://www.ntia.doc.gov/top* or by contacting the TOP office at 202–482–2048.

FOR FURTHER INFORMATION CONTACT: Stephen J. Downs, Director of the Technology Opportunities Program. Telephone: 202–482–2048; fax: 202–501–5136; e-mail: *top@ntia.doc.gov*.

SUPPLEMENTARY INFORMATION:

Authority: NTIA issues this Notice subject to the appropriations made available under continuing resolution (Public Law 107–70). NTIA anticipates making grant awards provided that funding for TOP is continued beyond December 7, 2001, the expiration date of the current continuing resolution.

Eligible Organizations

All non-profit entities (including, but not limited to, faith-based organizations, national organizations and associations, non-profit community-based organizations, non-profit health care providers, schools, libraries, museums, colleges, universities, public safety providers) and state, local, and tribal governments are eligible to apply.

Although individuals and for-profit organizations are not eligible to apply, they are encouraged to participate as project partners.

Funding Availability

Issuance of grants is subject to the availability of FY 2002 funds. Based on the status of relevant appropriations legislation, NTIA expects to have approximately $12.5 million available for new grants. Further notice will be made in the **Federal Register** and the TOP web site of the final status of funding for this program at the appropriate time.

Based on past experience, NTIA expects this year's grant round to be very competitive. In Fiscal Year 2001, NTIA received over 660 applications collectively requesting more than $367 million in federal funds. From these applications, the Department of Commerce announced 74 awards totaling $42.8 million in federal funds.

Award Amount

An applicant may request up to a total of $750,000 in funds from NTIA. TOP expects the federal amounts awarded to range from $200,000 to $750,000, with an average of approximately $500,000. The amount awarded covers the duration of the project.

Matching Funds Requirements

Grant recipients under this program will be required to provide matching funds toward the total project cost. Applicants must document their capacity to provide matching funds. Matching funds may be in the form of cash or in-kind contributions. NTIA will provide up to 50 percent of the total project cost, unless the applicant can document extraordinary circumstances warranting a grant of up to 75 percent. Grant funds under this program are usually released in direct proportion to local matching funds utilized and documented as having been expended.

Generally, federal funds may not be used as matching funds, except as provided by federal statute. If you plan to use funds from a federal agency as matching funds, you should contact the federal agency that administers the funds in question and obtain documentation from that agency's Office of General Counsel to support the use of federal funds for matching purposes.

Completeness of Application

TOP will initially review all applications to determine whether all required elements are present and clearly identifiable. The required elements are listed and described in the Guidelines for Preparing Applications'Fiscal Year 2002. Details on how to access the Guidelines for Preparing Applications'Fiscal Year 2002, are available in the section "Other Information" in this Notice. Each of the required elements must be present and clearly identified. Failure to do so may result in rejection of the application. For details on how to obtain materials needed to complete an application, see "Addresses" in this Notice.

Application Deadline

As noted above, complete applications for the Fiscal Year 2002 TOP grant program must be received by NTIA no later than 8 P.M. EST, March 21, 2002. A postmark date is not sufficient. Applications which have been provided to a delivery service on or before March 20, 2002, with "delivery guaranteed" before 8:00 P.M. on March 21, 2002, will be accepted for review if the applicant can document that the application was provided to the delivery service with delivery to the

address listed above guaranteed prior to the closing date and time. Applications will not be accepted via facsimile machine transmission or electronic mail.

NTIA anticipates that it will take approximately six months to complete the review of applications and make final funding decisions.

Program Funding Priorities

Through TOP, NTIA provides underserved communities with opportunities to explore the possibilities that emerging digital network technologies offer to solve critical challenges in such areas as lifelong learning, community and economic development, government and public services, safety, health, culture, and the arts.[1]

TOP projects demonstrate creative uses of digital network technologies to address pressing needs in the public and non-profit sectors. Therefore, TOP expects each applicant to present a clear vision and a workable plan to apply digital network technologies to address specific challenges in their communities. Rather than simply requesting funds to build capacity or upgrade existing equipment, each application should describe a project that pinpoints specific problems, proposes creative solutions, and postulates measurable outcomes.

As a national program, TOP emphasizes innovation, learning, and diffusion of new ideas and practical knowledge. Each TOP-supported project must be innovative in the sense that it represents a departure from how other communities and groups across the country are using digital network technologies to overcome obstacles. Each TOP project should yield new insights into how best to use these technologies and offer opportunities to learn what works well and what does not. Because these grants will serve as national models for other communities, NTIA expects each project to include provisions for thorough evaluations that will provide valid and reliable data as well as valuable lessons learned to be shared with others interested in the project.

All funded projects must be interactive in that they allow end users to share information with each other or gain access to information on an on-demand basis, as opposed to a one-way or broadcast basis.[2] TOP-supported projects must also involve communication and new partnerships among multiple unaffiliated organizations or enable direct, interactive communication between an organization and the public it serves.

For the FY 2002 grant competition, TOP is interested in projects that involve:

- Broadband technologies that bring very high-speed communications directly to end users;
- Mobile wireless communication technologies that offer end users greater flexibility in how, where, and when they access information;
- Empowering end users to move beyond passive information consumption to become valued contributors to the development, use, and expansion of shared information resources; [3] and
- Emerging data sharing techniques that facilitate the seamless and secure exchange of information across organizational boundaries.

In previous fiscal years, NTIA supported planning projects. The emphasis for Fiscal Year 2002 is on projects that deploy, use, and evaluate digital network technologies. NTIA will, however, support projects that incorporate some planning activities as part of the proposed project.

Limitations on Project Scope

Each TOP project is expected to include a range of activities that support project development, implementation, and evaluation. However, TOP will not support projects whose primary purpose is to develop network infrastructure, to create hardware or software, to provide training on the use of the network technologies, or to build voice-based systems. Details on these restrictions are discussed below.

(1) Infrastructure Development Projects. Every TOP applicant is expected to create a project that describes and provides funding for specific applications of digital network technologies to address important community challenges. Therefore, TOP will not support projects whose primary purpose is to create telecommunications or network infrastructure without significant dedication of resources to specific applications of that infrastructure.

(2) Hardware or Software Development Projects. Some projects may require limited software development or the customization or modification of existing software or hardware in order to meet particular end-user requirements or to enable the exchange of information across networks. However, the creation of a software or hardware product cannot be a project's primary purpose.

(3) Training Projects. While TOP does consider training to be an essential aspect of most projects, TOP will not support projects whose primary purpose is to provide training in the use of software applications, Internet use, or other use of network technologies.

(4) Voice-based Systems. Two-way, interactive voice networks are an important element of the existing network systems. Voice as a means for conveying information and voice input tools play critical roles in ensuring people with disabilities have access to network technology. However, TOP will not support projects whose primary purpose is to either build or install voice-based communication networks such as call centers, two-way radio networks, enhanced-911 and 311 systems, or 800 MHZ radio systems.

Review Criteria

Reviewers will analyze and rate each application using the following criteria. The relative weights of each criterion are identified in parentheses.

1. Project Purpose (20%)

Each application should describe a clearly defined project that focuses on underserved communities. In this criterion, reviewers will judge each application on (1) the overall design of the project and (2) the degree to which it provides opportunities for underserved communities.

In assessing the project design, reviewers will examine the degree to which the applicant clearly: (1) Defines the problem(s) within the community to be served and describes its severity; (2) proposes creative and practical means of addressing the community's problem(s) through specific applications of digital network technologies; and (3) identifies anticipated outcomes and that are both realistic and measurable. Reviewers will also assess the degree to which an applicant convincingly links the three major elements—problem(s), solution(s), and outcome(s).

Reviewers will assess the degree to which the project targets underserved communities and populations, and the degree to which the proposed project

[1] "Underserved" refers to various groups of people and geographic communities that face technological, economic, physical, linguistic, or cultural barriers that limit access to the benefits of digital network technologies.

[2] An "end user" is an individual who directly utilizes the network technology.

[3] For example, once isolated communities now use Internet technology to collect and express their histories; children have become agents of community change as they have used network technology to collect information, provide analysis, and contribute to the public policy dialogue in their communities; and citizens are exploring the creation of databases which enrich the resources made available by local and state governments.

will address the circumstances and challenges (such as poverty, low literacy, disabilities, high unemployment, low educational achievement, high crime rate, poor health status, etc.) they face.

2. Innovation (20%)

Reviewers will assess innovation by examining both the technology to be used and the application of technology in a particular setting, to serve a particular population, or to solve a particular problem. TOP defines innovation broadly. For example, projects that involve imaginative partnerships, the introduction of new business processes designed to offer more effective services, untested strategies for overcoming access barriers, or new techniques that transform inter-organizational relationships can all be considered innovative. TOP encourages applicants to experiment with leading edge technologies. It is, however, the creativity behind the application of the technology to meet community needs that ultimately determines the level of innovation.

Using their experience in their respective fields, reviewers will examine each project in a national context and evaluate how an application compares with, complements, and improves on what is known about using digital network technology as a solution to problems in its particular field.

3. Diffusion Potential (20%)

The innovations and approaches to be demonstrated in any proposed project should contain the potential to be diffused broadly throughout the country. NTIA expects that each awarded project will serve as a model for other communities to follow.

To assess this potential for diffusion, reviewers will consider five factors:

(1) The degree to which the problem identified by the applicant is common to many communities;

(2) The relative advantage of the project's innovations over established approaches to addressing the specified problems;

(3) The ease of replication and adaptation, based on considerations such as cost and complexity;

(4) The applicant's plans and budget resources dedicated to disseminate actively the knowledge gained from the project's successes and failures; and

(5) The capability and experience of an applicant or their partner organizations to reach communities across the country and disseminate their findings.

4. Project Feasibility (15%)

In assessing the feasibility of each application, reviewers will focus on six issues: the technical approach, the qualifications of the project staff, the proposed budget, the implementation schedule, plans for protecting privacy, and the applicant's plan for sustaining the project beyond the grant period.

(1) In assessing the technical approach, reviewers will examine the degree to which the proposed system would work and operate with other systems; technological alternatives that have been considered; designs for system maintenance and periodic upgrades; and plans for project expansion. Applicants are expected to make use of existing infrastructure and commercially available telecommunications services, unless extraordinary circumstances require the construction of new network facilities.

(2) In assessing the qualifications of the project team, reviewers will assess the applicant and its partners to determine if they have the resources, expertise, and experience necessary to undertake, evaluate, and complete the project and disseminate results within the proposed period.

(3) Reviewers will analyze the budget in terms of clarity and cost-effectiveness. The proposed budget should be appropriate to the tasks proposed and sufficiently detailed so that reviewers can easily understand the relationship of items in the budget to the project narrative.

(4) Reviewers also will assess the degree to which the implementation process is comprehensive, reasonable, and can be completed in the proposed time frame.

(5) Reviewers will evaluate the applicant's plans to safeguard the privacy of the project's end users and others affected by the project.

(6) Finally, reviewers will examine the applicant's strategies to sustain the project after the completion of the grant.

5. Community Involvement (15%)

Each application will be rated on the overall level and breadth of community involvement in the development and implementation of the proposed project. Reviewers will:

(1) Analyze the applicant's partnerships to ensure that they include linkages among unaffiliated organizations (from the public, non-profit, or private sectors) as an ongoing and integral part of project planning and implementation. TOP considers partners to be organizations that supply cash or in-kind resources and/or play an active role in the planning and implementation of the project;

(2) Examine the steps the applicant has taken to include and sustain the involvement of a variety of community stakeholders. Reviewers will look for evidence of demand, from the community, the end users, and the potential beneficiaries, for the services proposed by the project; and

(3) Consider the degree of attention paid to the needs, skills, working conditions, and living environments of the targeted end users. Reviewers will consider the extent to which applicants involve representatives from a broad range of potential users in both the design and implementation of the project and consider the varying degrees of abilities of all end users, including individuals with disabilities. Reviewers will also assess the degree to which the project addresses barriers which limit a community's or a group's access to digital network technologies. Finally, reviewers will assess the applicant's plans for training end users and upgrading their skills.

6. Evaluation (10%)

Each application will be rated on its proposed plans for evaluating the project. Reviewers will assess the extent to which the applicant's research or evaluation design: (1) Provides for continuous feedback for project planning, implementation, review and revision; (2) addresses the problems, solutions, and anticipated outcomes described in the project purpose and yields valid and reliable findings; (3) captures lessons learned and sufficient descriptive data so that others may easily adapt and replicate the project; and (4) meets TOP's requirements for an independent evaluation as described in the "Reporting Requirements" section of Notice.

In assessing evaluation, reviewers will examine:

(1) The research design and methodology;

(2) Evaluation questions, data collection, and data analysis plans;

(3) The qualifications of any staff or external evaluators working on the evaluation; and

(4) The allocation of resources for implementing the evaluation and reporting project findings.

Eligible Costs

Eligible Costs. Allowable costs incurred under approved projects shall be determined in accordance with applicable federal cost principles, i.e., OMB Circular A–21, A–87, A–122, or Appendix E of 45 CFR part 74. If included in the approved project budget, TOP will allow costs for personnel; fringe benefits; computer

hardware, software, and other end-user equipment; telecommunication services and related equipment; consultants, evaluators, and other contractual items; travel; rental of office equipment, furniture, and space; and supplies. All costs must be reasonable and directly related to the project.

Indirect Costs. The total dollar amount of the indirect costs proposed in an application under this program must not exceed the indirect cost rate negotiated and approved by a cognizant federal agency.

Ineligible Costs

Costs associated with the construction or major renovation of buildings are not eligible. While costs for the construction of new network facilities are eligible, applicants are expected to make use of existing infrastructure and commercially available telecommunications services. Only under extraordinary circumstances will the construction of new network facilities be approved.

Costs for professional services are also ineligible. TOP defines professional services as activities delivered over a network that would otherwise be provided in a face-to-face setting such as teaching students, counseling clients, providing direct patient care, or interpreting services, etc. For example, if the project proposes to create a telemedicine network, the costs of setting up, maintaining, and evaluating the use of the network are eligible, but payment for the time or services of physicians or other health professionals providing care over the network is not an eligible cost.

Note that costs that are ineligible for TOP support may not be included as part of the applicant's matching fund contribution.

In addition, the restrictions on the use of grant funds defined in the Consolidated Appropriations Act for Fiscal Year 2001, Public Law 106–553 are still applicable. The act placed restrictions on eligible costs for applicants that are recipients of Universal Service Fund discounts and applicants receiving assistance from the Department of Justice's Regional Information Sharing Systems Program as part of the project costs. The statute provided:

> That notwithstanding any other provision of law, no entity that receives telecommunications services at preferential rates under section 254(h) of the Act (47 U.S.C. 254(h)) or receives assistance under the regional information sharing systems grant program of the Department of Justice under part M of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796h) may use funds under a grant under this heading to cover any costs of the entity that would otherwise be covered by such preferential rates or such assistance, as the case may be.

Accordingly, recipients of the above-described preferential rates or assistance are prohibited from including any costs that would be covered by such preferential rates or assistance in their proposed TOP grant budget. More details on this restriction can be found in the Guidelines for Preparing Applications—Fiscal Year 2002.

NTIA will clarify this restriction through a Notice of Availability of Funds which will be released in the **Federal Register** and TOP's web site once a FY 2002 appropriations bill is signed into law.

Award Period

Successful applicants will have up to 36 months to complete their projects. While the completion time will vary depending on the complexity of the project, NTIA has found that most grant recipients require at least two years to complete and evaluate fully their projects. Accordingly, NTIA encourages applicants to propose projects that last two to three years.

Selection Process

The selection process will last approximately six months and involves four stages outlined below:

(1) During the first stage, each eligible application will be reviewed by a panel of outside readers, who have demonstrated expertise in both the programmatic and technological aspects of the application. The review panel members will evaluate applications according to the review criteria provided in this Notice and provide the ratings to the program staff. As discussed below, these ratings constitute one of the selection factors to be used by the TOP Director when preparing the slate of recommended grant awards.

(2) Upon completion of the external review process, program staff will analyze applications considered for award that will be based on the degree to which a proposed project meets the program's funding scope as described in the section entitled "Limitations on Project Scope;" the eligibility of costs and matching funds included in an application's budget; and the extent to which an application complements or duplicates projects previously funded or under consideration by NTIA or other federal programs.[4]

The TOP Director then prepares and presents a slate of recommended grant awards to the Office of Telecommunications and Information Applications' (OTIA) Associate Administrator for review and approval of the recommended slate.[5] The Director's recommendations and the Associate Administrator's review and approval will take into account the following selection factors:

1. The evaluations of the outside reviewers;
2. The analysis of program staff;
3. The degree to which the proposed grants meet the program's priorities as described in the section entitled "Program Funding Priorities;"
4. The geographic distribution of the proposed grant awards;
5. The variety of technologies and diversity of uses of the technologies employed by the proposed grant awards;
6. The provision of access to and use of digital network technologies by rural communities and other underserved groups;
7. Avoidance of redundancy and conflicts with the initiatives of other federal agencies; and,
8. The availability of funds.

(3) Upon approval by the OTIA Associate Administrator, the Director's recommendations will then be presented to the Selecting Official, the NTIA Administrator. The NTIA Administrator selects the applications to be negotiated for possible grant award taking into consideration the Director's recommendations and the degree to which the slate of applications, taken as a whole, satisfies the selection factors described above and the program's stated purposes as set forth in the section entitled "Program Funding Priorities."

(4) After applications have been selected in this manner, negotiations will take place between TOP staff and the applicant. These negotiations are intended to resolve any differences that exist between the applicant's original request and what TOP proposes to fund, and if necessary, to clarify items in the application. Not all applicants who are contacted for negotiation will necessarily receive a TOP award. Final selections made by the Administrator will be based upon the recommendations by the Director and

---

[4] See discussion of "Eligible Costs" and "Matching Funds Requirements" in this Notice.

Information on previously funded grants is available from the TOP. In the section "Other Information" of this Notice, details are available on how to access this information.

[5] The Office of Telecommunication and Information Applications is the division of the National Telecommunications and Information Administration that supervises NTIA's grant awards programs.

the OTIA Associate Administrator and the degree to which the slate of applications, taken as a whole, satisfies the program's stated purposes as set forth in the section entitled "Program Funding Priorities," upon the conclusion of negotiations.

Use of Program Income

Applicants are advised that any program income generated by a proposed project is subject to special conditions. Anticipated program income must be documented appropriately in the project budget. In addition, should an application be funded, unanticipated program income must be reported to TOP, and the budget for the project must be renegotiated to reflect receipt of this program income. Program income means gross income earned by the recipient that is either directly generated by a supported activity, or earned as a result of the award. In addition, federal policy prohibits any recipient or subrecipient receiving federal funds from the use of equipment acquired with these funds to provide services to non-federal outside organizations for a fee that is less than private companies charge for equivalent services. This prohibition does not apply to services provided to outside organizations at no cost.

Policy on Sectarian Activities

Applicants are advised that on December 22, 1995, NTIA issued a notice in the **Federal Register** on its policy with regard to sectarian activities. Under NTIA's policy, while religious activities cannot be the essential thrust of a grant, an application will not be ineligible where sectarian activities are only incidental or attenuated to the overall project purpose for which funding is requested. Applicants for whom this policy may be relevant should read the policy that was published in the **Federal Register** at 60 FR 66491, Dec. 22, 1995.

Reporting Requirements

To ensure compliance with federal regulations and collect systemic evaluation data on each project, successful TOP applicants have a number of basic reporting requirements once they are awarded a grant. At project outset, TOP grantees provide detailed baseline information on the project objectives, goals, partners, and populations served. Each quarter, grantees provide financial reports and updates on project activities. At project completion, TOP grantees must also provide a closeout report.

Finally, because evaluation results play such a critical role in helping other organizations learn about what works well and what does not, each TOP-supported project will provide NTIA a final evaluation report. To ensure the validity of the findings, the final evaluation report must be completed by an independent evaluator or team of evaluators who are not in a direct reporting relationship with the applicant.[6] TOP will make copies of the final evaluation report available to the public.

Waiver Authority

It is the general intent of NTIA not to waive any of the provisions set forth in this Notice. However, under extraordinary circumstances and when it is in the best interest of the federal government, NTIA, upon its own initiative or when requested, may waive the provisions in this Notice. Waivers may only be granted for requirements that are discretionary and not mandated by statute. Any request for a waiver must set forth the extraordinary circumstances for the request and be included in the application or sent to the address provided in the **ADDRESSES** section above. NTIA will not consider a request to waive the application deadline for an application until the application has been received.

Intergovernmental Review

Applications under this program are subject to Executive Order 12372, "Intergovernmental Review of Federal Programs."

Other Information

Electronic Information. Information about NTIA and TOP, including this document and the Guidelines for Preparing Applications—Fiscal Year 2002, can be retrieved electronically via the Internet using the World Wide Web at *http://www.ntia.doc.gov/top*. This document can be provided in alternate formats, including braille. If you need assistance please contact TOP at 202–482–2048 or *top@ntia.doc.gov*.

In order to facilitate the diffusion of ideas generated by the grant round and opportunities for other potential funders to identify promising projects, TOP will provide a copy of each application's executive summary and contact information on its home page.

For FY 2002, applicants to the TOP will also be able to utilize the Internet to prepare their Standard Forms 424 and 424A and an executive summary. Through TOP's web site at *http://www.ntia.doc.gov/top*, applicants can access helpful guides and online tools with self calculating totals and pre-filled forms that will reduce the time it takes to prepare the application forms. These tools are optional and not required to prepare an application.

Please note that applicants must submit all application materials (even those forms prepared online) in hard copy with appropriate signatures as specified in the Application Deadline section of this Notice.

Submission Requirements. TOP requests one original and five copies of the application. Applicants for whom the submission of five copies presents financial hardship may submit one original and two copies of the application. In addition, all applicants are required to submit a copy of their application to their state Single Point of Contact (SPOC) offices, if they have one. For information on contacting state SPOC offices, refer to the Guidelines for Preparing Applications—Fiscal Year 2002.

Disposition of Unsuccessful Applications. Applications accepted for review for the Fiscal Year 2002 grant round will be stored at the Department of Commerce until the start of the next grant competition or one year, whichever period is longer. At the end of that period, the applications will be destroyed.

Sensitive Information. Because of the high level of public interest in projects supported by TOP, the program anticipates receiving requests for copies of successful applications. Applicants are hereby notified that the applications they submit are subject to the Freedom of Information Act. To assist NTIA in making disclosure determinations, applicants may identify sensitive information and label it "confidential."

Human Subject Research Protections. The Department of Commerce, through Part 27 of Title 15 of the Code of Federal Regulations, requires that all applications awarded under the TOP ensure protections for any human subjects involved in research.

For each application that involves human subject research, applicants should clearly indicate in the evaluation section of the application that:

(1) The project involves human subjects research, but the research will likely be eligible for an exemption from Institutional Review Board approval, or

(2) The project involves human subjects research, and you either have or will seek approval of the research from an Institutional Review Board.

[6] In large institutions, such as universities, colleges, and foundations, an independent evaluator can include a representative from departments not associated with the applicant. In addition, TOP's requirement for having a grantee have an independent evaluator develop the final evaluation report does not preclude an applicant from conducing the evaluation in conjunction with an independent evaluator.

If an application is considered for funding, the grant applicant will be asked to submit appropriate documentation of IRB approval or exemption status to the Federal Program Officer for approval by Department officials. More details on human subject research protections are available through the TOP's Web site at *http://www.ntia.doc.gov/top* and the Guidelines for Preparing Applications—Fiscal Year 2002.

Grant Requirements. The Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements contained in the **Federal Register** notice of October 1, 2001 (66 FR 49917), are applicable to this solicitation.

Other Requirements. It has been determined that this Notice is not significant for purposes of Executive Order 12866.

Because notice and comment are not required under 5 U.S.C. 553, or any other law, for notices relating to public property, loans, grants, benefits or contracts (5 U.S.C. 553(a)), a Regulatory Flexibility Analysis is not required and has not been prepared for this Notice, 5 U.S.C. 601 *et seq.*

It has been determined that this Notice does not contain policies with Federalism implications as that term is defined in Executive Order 13132.

This document contains collection-of-information requirements subject to the Paperwork Reduction Act (PRA). The use of Standard Forms 424, 424A, 424B, and SF–LLL have been approved by OMB under the respective control numbers 0348–0043, 0348–0044, 0348–0040, and 0348–0046.

Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the Paperwork Reduction Act, unless that collection displays a currently valid OMB control number.

Nancy J. Victory,

Assistant Secretary for Communications and Information.

BILLING CODE 3510–60–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

Public User ID Badging

ACTION: Proposed collection; comment request.

SUMMARY: The United States Patent and Trademark Office (USPTO), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on the continuing information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before February 4, 2002.

ADDRESSES: Direct all written comments to Susan K. Brown, Records Officer, Office of Data Management, Data Administration Division, USPTO, Suite 310, 2231 Crystal Drive, Washington, DC 20231; by telephone at (703) 308–7400; or by electronic mail at *susan.brown@uspto.gov*.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Catherine Hollan, Manager, Public Search Facilities, USPTO, Room 2C04, 2021 South Clark Place, Arlington, VA 22202; by telephone at (703) 306–2608; or by electronic mail at *chollan@uspto.gov*.

SUPPLEMENTARY INFORMATION:

I. Abstract

The United States Patent and Trademark Office (USPTO) is required by 35 U.S.C. 41(i)(1) to maintain a Public Search Facility to provide patent and trademark collections for the public to search and retrieve information. The Public Search Facilities are maintained for public use with paper and automated search files and trained staff to assist searchers. The Public Search Facilities are available to everyone.

In order to maintain and control the patent and trademark collections so that the information is available to the public, the USPTO issues Public User ID badges to users who wish to use the Public Search Facilities. For many years, the USPTO issued paper User IDs, but the USPTO now uses an electronic badging database for the issuance of plastic ID badges.

The plastic ID badge shows a color photograph of the user, a bar-coded user number, and an expiration date. The badging system allows the USPTO to electronically store the information, which can be updated periodically. The ID system is designed to enable the USPTO to (a) identify users of patent and trademark documents, (b) confine user access to public areas, (c) locate and control access to patent and trademark documents, and (d) identify users of USPTO services.

The Public User ID badge enables the USPTO to accurately track use of the documents and to identify anyone misusing the search facilities. The USPTO uses the ID badges to identify, counsel, and sanction users who destroy, misfile, or remove documents from its collections, or who mishandle its equipment. The Public User ID also grants the public limited access to the non-public parts of the USPTO, such as the Examiner areas. To access these areas, users are required to wear a visible USPTO employee ID, a contractor ID, or a Public User ID. (The Public User ID badges enable the USPTO to immediately confirm a user's identity via an on-the-spot comparison with the color photograph on the badge.)

For its ID system, the USPTO collects the following mandatory identifying information: name and mailing address (as verified on a picture ID such as a driver's license), signature, and a digital photograph of the user that is taken by USPTO staff. Optional information includes telephone number and USPTO Attorney Registration Number, if any.

II. Method of Collection

The application for the Public User ID is completed on site and handed to a staff member to enter into the system and issue the badge.

III. Data

OMB Number: 0651–0041.

Form Number(s): PTO–2030.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households; businesses or other for-profits; not-for-profit institutions; farms; the Federal Government; and state, local or tribal governments.

Estimated Number of Respondents: 9,084 responses per year.

Estimated Time Per Response: The USPTO estimates that it will take the public approximately five minutes (.08 hours) to gather the necessary information, prepare the form, and submit the completed application for a Public User ID or to renew the Public User ID Badge, and approximately ten minutes (.17 hours) to supply any optional information to the staff, have the photograph taken, and be issued the Public User ID Badge.

Estimated Total Annual Respondent Burden Hours: 1,054 hours per year.

Estimated Total Annual Respondent Cost Burden: $109,616 per year. The USPTO estimates that of those users requesting Public User IDs, approximately 1/3 of the users will be attorneys and 2/3 will be paraprofessionals. Using the professional hourly rate of $252 per hour for associate attorneys in private firms and the paraprofessional hourly rate of $30 per hour, the average hourly rate for all respondents to this collection will be $104 per hour.

Item	Estimated time for response (minutes)	Estimated annual responses	Estimated annual burden hours
Application for Public User ID	5	3,642	291
Issue Public User ID Badge	10	3,642	619
Renew Public User ID Badge	5	1,800	144
Total		9,084	1,054

Estimated Total Annual Nonhour Respondent Cost Burden: $0. (There are no capital start-up or maintenance costs or filing fees associated with this information collection.)

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, e.g., the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: November 26, 2001.

Susan K. Brown,

Records Officer, USPTO, Office of Data Management, Data Administration Division.

BILLING CODE 3510–16–P

DEPARTMENT OF COMMERCE

Technology Administration

Announcing a Public Workshop on Digital Entertainment and Rights Management

AGENCY: Technology Administration, Commerce.

ACTION: Notice of a public workshop.

SUMMARY: The United States Department of Commerce Technology Administration (TA) announces a public workshop on digital entertainment and its availability to consumers. The workshop will help gather data on such issues as the strengths, weaknesses and availability of current and imminent technological solutions to protect digital content, barriers that are inhibiting movies, music and games from coming online and the capability of networks to handle digital content such as video-on-demand to the home. Limited seating will be available to members of the general public. It is recommended that persons wishing to become general public attendees call in advance to reserve seating, on a first come, first served basis.

DATES: This workshop will be held on December 17, 2001, from 9 a.m.–4 p m.

ADDRESSES: The workshop will be held at the Herbert C. Hoover Building, 1401 Constitution Avenue, NW., Room 4830, Washington, DC. Entrance on 14th St. between Pennsylvania and Constitution Aves., NW.

FOR FURTHER INFORMATION CONTACT: Further information may be obtained from Chris Israel, Deputy Assistant Secretary for Technology Policy, Technology Administration, (202) 482–5687.

SUPPLEMENTARY INFORMATION: Pursuant to its statutory authority found at 15 U.S.C. 3704(c), the Technology Administration is authorized, among other things, to do the following:

- Conduct technology policy analyses to improve United States industrial productivity, technology, and innovation, and cooperate with United States industry in the improvement of its productivity, technology, and ability to compete successfully in world markets;
- Determine the relationships of technological developments and international technology transfers to the output, employment, productivity, and world trade performance of United States and foreign industrial sectors;
- Determine the influence of economic, labor and other conditions, industrial structure and management, and government policies on technological developments in particular industrial sectors worldwide;
- Identify technological needs, problems, and opportunities within and across industrial sectors that, if addressed, could make a significant contribution to the economy of the United States;
- Assess whether the capital, technical and other resources being allocated to domestic industrial sectors which are likely to generate new technologies are adequate to meet private and social demands for goods and services and to promote productivity and economic growth;
- Propose and support studies and policy experiments, in cooperation with other Federal agencies, to determine the effectiveness of measures with the potential of advancing United States technological innovation;
- Serve as a focal point for discussions among United States companies on topics of interest to industry and labor, including discussions regarding manufacturing and discussions regarding emerging technologies; and,
- Consider government measures with the potential of advancing United States technological innovation and exploiting innovations of foreign origin.

With these responsibilities in mind, the Technology Administration is planning on holding a full-day, moderated series of informal discussions with relevant stakeholders to gather information on the availability of digital entertainment and status of copyright protection and rights management tools. The discussions will help gather data on such issues as the strengths, weaknesses and availability of technological solutions, as well as network capability.

Authority: This work effort is being initiated pursuant to TA's statutory responsibilities, codified at section 3704 of Title 15 of the United States Code.

Dated: November 30, 2001.

Phillip J. Bond,

Undersecretary of Commerce for Technology.

[FR Doc. 01–30221 Filed 12–5–01; 8:45 am]

BILLING CODE 3510–13–P

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 02–C0002]

MTS Products, Inc., a Corporation Provisional Acceptance of a Settlement Agreement and Order

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: It is the policy of the Commission to publish settlements which it provisionally accepts under the Consumer Product Safety Act in the **Federal Register** in accordance with the terms of 16 CFR 1118.20. Published below is a provisionally-accepted Settlement Agreement with MTS Products, Inc., a corporation containing a civil penalty of $75,000.

DATES: Any interested person may ask the Commission not to accept this agreement or otherwise comment on its contents by filing a written request with the Office of the Secretary by December 21, 2001.

ADDRESSES: Persons wishing to comment on this Settlement Agreement should send written comments to the Comment 02–C0002, Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207.

FOR FURTHER INFORMATION CONTACT: Dennis C. Kacoyanis, Trial Attorney, Office of the General Counsel, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 504–0980, 1346.

SUPPLEMENTARY INFORMATION: The text of the Agreement and Order appears below.

Dated: December 3, 2001.

Todd A. Stevenson,

Acting Secretary.

[CPSC Docket No. 02–C0002]

In the Matter of MTS PRODUCTS, INC., a corporation.

Settlement Agreement and Order

1. This Settlement Agreement and Order, entered into between MTS Products, Inc. (hereinafter, "MTS" or "Respondent"), a corporation, and the staff of the Consumer Product Safety Commission (hereinafter, "staff"), pursuant to the procedures set forth in 16 CFR 1118.20, is a compromise resolution of the matter described herein, without a hearing or a determination of issues of law and fact.

I. The Parties

2. The "staff" is the staff of the Consumer Product Safety Commission (hereinafter, "Commission"), an independent federal regulatory commission of the United States government established pursuant to section 4 of the Consumer Product Safety Act (CPSA), as amended, 15 U.S.C. 2053.

3. Respondent MTS Products, Inc. is a corporation organized and existing under the laws of the State of California. Its office is located at 190401 Business Center Drive, Northridge, CA 91324. Respondent is a manufacturer and wholesaler of general merchandise including juvenile products.

II. Allegations of the Staff

4. In March 1996, MTS manufactured and distributed in commerce 18,200 J. Mason Infant Carriers (hereinafter, "Infact Carrier"), Model Number 12502, "Squiggles," Model Number 12505, "Aurora Dreams," and Model No. 12506, "Aurora Dreams With Canopy" MTS is, therefore, a "manufacturer" of a "consumer product" "distributed in commerce" as those terms are defined in sections 3(a)(1), (4), and (11) of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2052(a)(1), (4), and (11).

5. Between June 6, 1996 and February 24, 1997, MTS received seven reports of the Infant Carrier's carrying handle breaking during use, allowing babies to fall to the ground or the floor. Several babies sustained bruises, cuts, and abrasions to the face. MTS did not report this information to the Commission.

6. MTS had sufficient information to conclude that the Infant Carriers contained a defect which could create a substantial product hazard, but failed to report such information as required by section 15(b) of the CPSA, 15 U.S.C. 2064(b). A failure to report under section 15(b) is a prohibited act under section 19(a)(4) of the CPSA, 15 U.S.C. 2068(a)(4). By knowingly failing to report, MTS subjected itself to civil penalties under section 20 of the COSA, 15 U.S.C. 2069.

III. Response of MTS

7. Respondent denies the staff's allegations set forth in paragraphs 4 through 6 above.

8. Respondent denies that the Infant Carrier contains a defect which could create a substantial product hazard under section 15(a) of the CPSA, 15 U.S.C. 2064(a).

9. Respondent denies that it knowingly violated the reporting requirement of section 15(b) of the CPSA, 15 U.S.C. 2064(b) pursuant to section 19(a)(4) of the CPSA, 15 U.S.C. 2068(a)(4).

10. Respondent contends that its contractor had used re-grind plastic material to complete a production run one day in March 1996. This material was not in accordance with Respondent's specifications for its Infant Carriers. It appears that a minimum of 100 Infant Carriers may have been affected. Because Respondent did not date code its Infant Carriers, Respondent recalled all Infant Carriers manufactured in March 1996. The total number of Infant Carriers recalled was 18,200.

IV. Agreement of the Parties

11. The Commission has jurisdiction over Respondent and the subject matter of this Settlement Agreement and Order under the Consumer Product Safety Act (CPSA), 15 U.S.C. 2051 *et seq.*

12. This Agreement is entered into for settlement purposes only and does not constitute an admission by Respondent or a determination by the Commission that Respondent knowingly violated the CPSA's Reporting Requirement.

13. Upon provisional acceptance of this Settlement Agreement and Order by the Commission, this Settlement Agreement and Order shall be placed on the public record and shall be published in the **Federal Register** in accordance with the procedures set forth in 16 CFR 1118.20(f). If the Commission does not receive any written request not to accept the Settlement Agreement and Order within 15 days, the Settlement Agreement and Order will be deemed to be finally accepted on the 16th day after the date it is published in the **Federal Register**.

14. Upon final acceptance of this Settlement Agreement by the Commission and issuance of the Final Order, Respondent knowingly, voluntarily, and completely waives any rights it may have in this matter (1) to an administrative or judicial hearing, (2) to judicial review or other challenge or contest of the validity of the Commission's actions, (3) to a determination by the Commission as to whether Respondent failed to comply with the CPSA, as alleged, (4) to a statement of findings of facts or conclusions of law, and (5) to any claims under the Equal Access to Justice Act.

15. In settlement of the staff's allegations, Respondent agrees to pay a $75,000.00 civil penalty as set forth in the incorporated Order.

16. The Commission may publicize the terms of the Settlement Agreement and Order.

17. Upon final acceptance by the Commission of this Settlement Agreement and Order, the Commission shall issue the attached Order incorporated herein by reference.

18. Agreements, understandings, representations, or interpretations made outside this Settlement Agreement and Order may not be used to vary or contradict its terms.

19. The provisions of this Settlement Agreement and Order shall apply to Respondent and each of its successors and assigns.

Respondents MTS Products, Inc.

Dated: December 18, 2000.

Paula Willis Mueller,

Vice President, General Merchandise Manager, MTS Products, Inc., 19401 Business Center Drive, Northridge, CA 91324.

Commission Staff.

Alan H. Schoem,
Assistant Executive Director, Consumer Product Safety Commission, Office of Compliance, Washington, DC 20207–0001.

Eric L. Stone,
Director, Legal Division, Office of Compliance.

Dated: December 21, 2000.

Dennis C. Kacoyanis,
Trial Attorney, Legal Division, Office of Compliance.

Order

Upon consideration of the Settlement Agreement entered into between Respondent MTS Products, Inc. (hereinafter, "Respondent"), a corporation, and the staff of the Consumer Product Safety Commission ("Commission"); and the Commission having jurisdiction over the subject matter and Respondent; and it appearing that the Settlement Agreement and Order is in the public interest, IT IS

Ordered, that the Settlement Agreement be and hereby is accepted, and it is

Further Ordered, that upon final acceptance of the Settlement Agreement and Order, Respondent MTS Products, Inc. shall pay to the United States Treasury a civil penalty in the amount of seventy-five thousand and 00/100 dollars ($75,000.00) in two (2) installments each. The first payment of thirty-seven thousand five hundred and 00/100 dollars ($37,500.00) shall be paid within twenty (20) days after service of the Final Order of the Commission (hereinafter, "anniversary date"). The second payment of thirty-seven thousand five hundred and 00/100 dollars ($37,500.00) shall be paid within one (1) year of the anniversary date. Upon the failure of Respondent MTS Products, Inc. to make a payment or upon the making of a late payment by Respondent MTS Products, Inc. (a) the entire amount of the civil penalty shall be due and payable, and (b) interest on the outstanding balance shall accrue and be paid at the federal legal rate of interest under the provisions of 28 U.S.C. 1961(a) and (b).

Provisionally accepted and provisional Order issued on the 3rd day of December, 2001.

By Order of the Commission,

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–M

DEPARTMENT OF ENERGY

National Energy Technology Laboratory; Notice of Availability of a Financial Assistance Solicitation

AGENCY: National Energy Technology Laboratory, Department of Energy (DOE).

ACTION: Notice of availability of a Financial Assistance Solicitation.

SUMMARY: Notice is hereby given of the intent to issue Financial Assistance Solicitation No. DE–PS26–02NT15379 entitled "Applications of Petroleum Technologies on Native American and Alaskan Native Corporation Properties for the Benefit of the Entire Tribe/Native Corporation." The DOE/NETL is seeking applications on behalf of the National Petroleum Technology Office, for support of projects consistent with applied research for development, exploration, processing and environmental solutions for oil production problems on Native American and Alaskan Native Corporation lands, thereby commonly benefitting the Tribe or Corporation. This program is directed toward creating cooperative efforts between the Tribes or Corporations and the oil industry.

DATES: The solicitation will be available on the DOE/NETL's Internet address at *http://www.netl.doe.gov/business* and on the "Industry Interactive Procurement System" (IIPS) webpage located at *http://e-center.doe.gov* on or about December 10, 2001.

FOR FURTHER INFORMATION CONTACT: Juliana L. Murray, U.S. Department of Energy, National Energy Technology Laboratory, PO Box 10940, MS 921–107, Pittsburgh, PA 15236, E-mail Address: murray@netl.doe.gov, Telephone Number: 412–386–4872.

SUPPLEMENTARY INFORMATION: The DOE supports modern petroleum technologies on Native American and Alaskan Native Corporation lands which are both economically and environmentally viable. For a number of reasons, many areas on Native American and Alaskan Native Corporation lands are under explored and consequently have underdeveloped oil reserves. This program is directed toward creating cooperative efforts between the Tribes or Corporations and the oil industry.

The four areas of interest for the technical topics of this solicitation are:

(1) Development Program

The Development program is directed toward technologies to improve the development of a known oil field on Native American and Alaskan Native Corporation lands. Proposed efforts must be economically and environmentally viable as well as an improvement in the development of an oil field. The types of technologies to be considered are not limited to, but may include, reservoir characterization, completion or stimulation, secondary or tertiary oil recovery, artificial lift, well workovers, well drilling, field studies and production management;

(2) Exploration Program

The Exploration program is directed toward technologies to promote the exploration of undiscovered oil fields on Native American and Alaskan Native Corporation lands. In cooperation with the Tribal management, proposed efforts must be economically and environmentally viable as well as an improvement of oil field exploration techniques. The types of technologies to be considered are not limited to, but may include, non-invasive exploration techniques, computer-based modeling for exploration and well drilling and evaluation;

(3) Environmental Program

The Environmental program is directed toward technologies to reduce the cost of effective environmental oil and gas field compliance. The types of technologies to be considered are not limited to, but may include, soil remediation and remediation due to past operational practices or problems, air emissions, innovative waste and produced water management; and

(4) Oil Processing Program

The oil processing program is directed toward an increase in refining capacity by addressing issues that limit potential construction. The types of studies to be considered are those that evaluate the environmental impact and the economic feasibility of oil processing on Native American lands. Projects that focus on reducing the environmental impact of oil refining on these lands will also be considered.

Proposed efforts must incorporate innovative technologies to improve the development of a known oil field, to promote exploration of undiscovered oil reserves, to study viable solutions to evaluate and minimize the environmental impact of oil processing construction/operation or to reduce the cost of effective environmental oil and gas field compliance.

This solicitation fits into the overall mission of NETL by furthering to resolve the environmental, supply and reliability constraints of producing and using fossil energy resources to provide Americans with a stronger economy,

healthier environment and more secure future. Reserves and production are expected to increase as well as potential for facilitating a cleaner environment and a strong potential to increase processing capacity. The benefits are far-reaching to U.S. citizens, Native American Tribes, Alaskan Native Corporations and the U.S. Government by promoting a stronger economy, healthier environment and more secure future.

This solicitation is a follow-on to a 1999 Native American Solicitation. DOE anticipates issuing approximately two to five financial assistance (grant) awards with a project performance period no less than one year in length and up to two years in length. Approximately $1.2 million of DOE funding is planned for this solicitation. DOE has determined the minimum cost share of twenty percent (20%) of the total estimated project cost is required; details of the cost sharing requirement and the specific funding levels will be contained in the program solicitation.

This solicitation will be targeted for unrestricted competition however, all potential offerors must provide a letter of commitment for the project from the Native American Tribe's governing body or from the governing body of an Alaskan Native Corporation (more information will be provided in the solicitation). Applications submitted by or on behalf of (1) another Federal agency; (2) a Federally Funded Research and Development Center sponsored by another Federal agency; or (3) a Department of Energy (DOE) Management Operating (M&O) contractor will not be eligible for award under this solicitation. However, an application that includes performance of a portion of the work by a DOE M&O contractor will be evaluated and may be considered for award subject to the provisions to be set forth in Program Solicitation DE–PS26–02NT15379 (**Note:** The limit on participation by an M&O contractor for an individual project under this solicitation cannot exceed 20% of the total project cost).

Once released, the solicitation will be available for downloading from the IIPS Internet page. At this Internet site you will also be able to register with IIPS, enabling you to submit an application. If you need technical assistance in registering or for any other IIPS function, call the IIPS Help Desk at (800) 683–0751 or e-mail the Help Desk personnel at *IIPS_HelpDesk@e-center.doe.gov*. The solicitation will only be made available in IIPS, no hard (paper) copies of the solicitation and related documents will be made available.

Prospective applicants who would like to be notified as soon as the solicitation is available should subscribe to the Business Alert Mailing List at *http://www.netl.doe.gov/business*. Once you subscribe, you will receive an announcement by e-mail that the solicitation has been released to the public. Telephone requests, written requests, e-mail requests, or facsimile requests for a copy of the solicitation package will not be accepted and/or honored. Applications must be prepared and submitted in accordance with the instructions and forms contained in the solicitation. The actual solicitation document will allow for requests for explanation and/or interpretation.

Issued in Pittsburgh, PA, on November 29, 2001.

Dale A. Siciliano,

Deputy Director, Acquisition and Assistance Division.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP02–56–000]

Dominion Transmission, Inc.; Notice of Proposed Changes in FERC Gas Tariff

November 30, 2001.

Take notice that on November 27, 2001, Dominion Transmission Inc. (DTI) filed, as part of its FERC Gas Tariff, Third Revised Volume No. 1, Eleventh Revised Sheet No. 31, and Fourteenth Revised Sheet No. 32, with an effective date of January 1, 2002.

DTI states that the purpose of this filing is to adopt the 2002 Gas Research Institute (GRI) surcharges approved by the Commission in Docket No. RP01–434–000.

DTI states that copies of its letter of transmittal and enclosures have been served upon DTI 's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Linwood A. Watson, Jr.,

Acting Secretary.

[Docket No. RP02–57–000]

Dominion Transmission, Inc.; Notice of Proposed Changes in FERC Gas Tariff

November 30, 2001.

Take notice that on November 27, 2002, Dominion Transmission Inc. (DTI), filed as part of its FERC Gas Tariff, Third Revised Volume No. 1, the following revised tariff sheets, with an effective date of January 1, 2002:

Second Revised Sheet No. 606
Third Revised Sheet No. 1000
Second Revised Sheet No. 1057
First Revised Sheet No. 1093
Second Revised Sheet No. 1112
Second Revised Sheet No. 1117
Second Revised Sheet No. 1119
Second Revised Sheet No. 1120
Second Revised Sheet No. 1126
Second Revised Sheet No. 1171
Third Revised Sheet No. 1184
Second Revised Sheet No. 1185
First Revised Sheet Nos. 2000–2005
First Revised Sheet Nos. 2052–2054
First Revised Sheet Nos. 2101–2104
First Revised Sheet No. 2151
First Revised Sheet No. 2153
First Revised Sheet No. 2154
First Revised Sheet No. 2156
Second Revised Sheet No. 2203
Second Revised Sheet No. 2204
Second Revised Sheet No. 2206
First Revised Sheet No. 2252
First Revised Sheet No. 2253
Third Revised Sheet No. 2304
First Revised Sheet No. 2305
First Revised Sheet No. 2352
First Revised Sheet No. 2353
First Revised Sheet Nos. 2402–2404
First Revised Sheet Nos. 2452–2454
First Revised Sheet No. 2501
First Revised Sheet No. 2506
First Revised Sheet No. 2507

DTI is filing the above-referenced tariff sheets to make various administrative changes and correct typographical errors.

DTI states that copies of its letter of transmittal and enclosures have been served upon DTI's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EG02–35–000, et al.]

Bluegrass Generation Company, L.L.C., et al.; Electric Rate and Corporate Regulation Filings

November 29, 2001.

Take notice that the following filings have been made with the Commission:

1. Bluegrass Generation Company, L.L.C.

[Docket No. EG02–35–000]

Take notice that on November 26, 2001, Bluegrass Generation Company, L.L.C., 1000 Louisiana, Suite 5800, Houston, Texas filed with the Federal Energy Regulatory Commission (Commission) an application for determination of exempt wholesale generator status pursuant to part 365 of the Commission's regulations.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

2. Foothills Generating, L.L.C.

[Docket No. EG02–36–000]

Take notice that on November 26, 2001, Foothills Generating, L.L.C., 1000 Louisiana, Suite 5800, Houston, Texas filed with the Federal Energy Regulatory Commission (Commission) an application for determination of exempt wholesale generator status pursuant to part 365 of the Commission's regulations.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

3. Renaissance Power, L.L.C.

[Docket No. EG02–37–000]

Take notice that on November 26, 2001, Renaissance Power, L.L.C., 1000 Louisiana, Suite 5800, Houston, Texas filed with the Federal Energy Regulatory Commission (Commission) an application for determination of exempt wholesale generator status pursuant to part 365 of the Commission's regulations.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

4. Rolling Hills Generating, L.L.C.

[Docket No. EG02–38–000]

Take notice that on November 26, 2001, Rolling Hills Generating, L.L.C., 1000 Louisiana, Suite 5800, Houston, Texas filed with the Federal Energy Regulatory Commission (Commission) an application for determination of exempt wholesale generator status pursuant to part 365 of the Commission's regulations.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

5. Duke Energy Corporation

[Docket No. ER01–1616–005]

Take notice that on November 26, 2001, Duke Energy Corporation tendered for filing with the Federal Energy Regulatory Commission (Commission) its compliance filing in the above-captioned docket pursuant to the Commission's November 7, 2001 order in Docket Nos. ER01–1616–000, *et al.*

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice.

6. New York Independent System Operator, Inc.

[Docket No. ER01–3001–001]

Take notice that on November 26, 2001 the New York Independent System Operator, Inc. (NYISO) filed a compliance filing in the above-captioned proceedings. The NYISO was required to submit this compliance filing pursuant to New York Independent System Operator, Inc., 97 FERC ¶61,095 (October 25, 2001).

A copy of this filing was served upon all persons designated on the official service list compiled by the Secretary in Docket No. ER01–3001–000.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice.

7. American Electric Power Service Corporation

[Docket No. ER01–3026–002]

Take notice that on November 26, 2001, American Electric Power Service Corporation (AEPSC) tendered for filing with the Federal Energy Regulatory Commission (Commission) the Amended Facilities Agreement between Ohio Power Company and Fremont Energy Center LLC. The agreement is pursuant to the AEP Companies' Open Access Transmission Service Tariff (OATT) that has been designated as the Operating Companies of the American Electric Power System FERC Electric Tariff Revised Volume No. 6, effective June 15, 2000.

AEP requests an effective date of November 6, 2001.

A copy of the filing was served upon the Ohio Public Utilities Commission.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice.

8. PPL Electric Utilities Corporation

[Docket No. ER02–128–002]

Take notice that on November 26, 2001, PPL Electric Utilities Corporation (PPL Electric) and Williams Generation Company—Hazleton (WGC) filed with the Commission revisions to the Interconnection Agreement originally filed with the Commission on October 18, 2001 and supplemented on October 23, 2001.

PPL Electric and WGC request an effective date of October 19, 2001 for the Interconnection Agreement, as revised.

PPL Electric and WGC also enclose a form of cancellation designated in accordance with Order No. 614, to cancel the interconnection agreement that will be superceded by the Interconnection Agreement submitted in this docket.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice.

9. The Dayton Power and Light Company

[Docket No. ER02–403–000]

Take notice that on November 26, 2001, The Dayton Power and Light Company (Dayton) submitted service agreements establishing Dominion Nuclear Marketing II, Inc. as a customer under the terms of Dayton's Open Access Transmission Tariff.

Dayton requests an effective date of one day subsequent to this filing for the service agreements.

Copies of this filing were served upon Dominion Nuclear Marketing II, Inc. and the Public Utilities Commission of Ohio.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice.

10. The Dayton Power and Light Company

[Docket No. ER02–404–000]

Take notice that on November 26, 2001, The Dayton Power and Light Company (Dayton) submitted service agreements establishing with Dominion Nuclear Marketing II, Inc. as a customer under the terms of Dayton's Open Access Transmission Tariff.

Dayton requests an effective date of one day subsequent to this filing for the service agreements.

Copies of this filing were served upon with Dominion Nuclear Marketing II, Inc. and the Public Utilities Commission of Ohio.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice.

11. Entergy Services, Inc.

[Docket No. ER02–405–000]

Take notice that on November 26, 2001, Entergy Services, Inc., on behalf of Entergy Mississippi, Inc., tendered for filing an unexecuted, amended and restated Interconnection and Operating Agreement with Duke Energy Hinds, LLC (Duke Hinds), and an updated Generator Imbalance Agreement with Duke Hinds (the First Revised Interconnection Agreement). Duke Hinds objects to certain aspects of the First Revised Agreement, including Duke Hinds' cost responsibility for the interconnection facilities necessary for the physical interconnection of the Duke Hinds Facility to Entergy's transmission system.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice.

12. TransÉnergie U.S. Ltd., Hydro One Delivery Services Inc.

[Docket No. ER02–406–000]

Take notice that on November 26, 2001, TransÉnergie U.S. Ltd. (TEUS) and Hydro One Delivery Services Inc. (Hydro One Delivery), on behalf of their to-be-formed project development subsidiary, LELCO, submitted for filing, pursuant to section 205 of the Federal Power Act, an application requesting that the Commission (1) grant LELCO blanket authority to make sales of transmission rights at negotiated rates, and (2) grant certain waivers, in connection with their proposed Lake Erie Link transmission interconnector project.

Comment date: December 20, 2001, in accordance with Standard Paragraph E at the end of this notice.

13. Geysers Power Company, LLC

[Docket No. ER02–407–000]

Take notice that on November 26, 2001, Geysers Power Company, LLC (Geysers Power), tendered for filing its updated Rate Schedules for the calendar year 2002 for Reliability Must-Run services provided to the California Independent System Operator Corporation (CAISO) pursuant to the Geysers RMR Agreement for Units 13 and 16. This filing is being made in response to the ISO's designation of Geysers Unit 16 as a Reliability Must-Run (RMR) Unit for calendar year 2002 in order to (i) provide required annual updates of the contract service limits, monthly options payments and start-up costs for the Geysers Units 13 and 16 governed by the RMR Agreement; (ii) set new rates reflecting the revisions to the Annual Fixed Revenue Requirement in accordance with Schedule F of the RMR Agreement; (iii) revise the RMR Agreement in accordance with a settlement agreement reached in 1999 among various RMR parties; and (iv) comply with Order No. 614, 90 FERC ¶61,352 (2000).

Copies of this filing have been served upon the CAISO and Pacific Gas and Electric Company.

Comment date: December 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

14. PPL Electric Utilities Corporation

[Docket No. ES02–8–000]

Take notice that on November 13, 2001, PPL Electric Utilities Corporation submitted an application pursuant to section 204 of the Federal Power Act

seeking authorization to issue promissory notes and other evidences of secured and unsecured short-term indebtedness through December 31, 2003, in an amount not to exceed $1 billion at any one time.

Comment date: December 17, 2001, in accordance with Standard Paragraph E at the end of this notice.

15. UtiliCorp United Inc.

[Docket No. ES02–9–000]

Take notice that on November 14, 2001, UtiliCorp United Inc. submitted an application pursuant to section 204 of the Federal Power Act seeking authorization to issue, from time to time, up to and including $500 million, in the aggregate at any one time outstanding, of short-term notes and other evidences of indebtedness, including guarantees of securities issued by subsidiaries or affiliates.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

16. UtiliCorp United Inc.

[Docket No. ES02–10–000]

Take notice that on November 15, 2001, UtiliCorp United Inc. (UtiliCorp) submitted an application pursuant to section 204 of the Federal Power Act seeking authorization to issue to issue UtiliCorp Common Stock shares in an Exchange Offer pursuant to which the public shareholders of Aquila will receive a determined number of shares of UtiliCorp Common Stock.

UtiliCorp also requests an exemption from the Commission's competitive bidding and negotiated placement requirements at 18 CFR 34.2.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

17. UtiliCorp United Inc.

[Docket No. ES02–11–000]

Take notice that on November 9, 2001, UtiliCorp United Inc. submitted an application pursuant to section 204 of the Federal Power Act seeking authorization to issue, from time to time, up to and including $500 million, in the aggregate at any one time outstanding, of short-term notes and other evidences of indebtedness, including guarantees of securities issued by subsidiaries or affiliates.

Comment date: December 11, 2001, in accordance with Standard Paragraph E at the end of this notice.

18. Soyland Power Cooperative Inc.

[Docket No. ES02–12–000]

Take notice that on November 10, 2001, Soyland Power Cooperative Inc. (Soyland) submitted an application pursuant to section 204 of the Federal Power Act seeking authorization to issue up to and including $12 million of long-term debt.

Soyland also requests a waiver from the Commission's competitive bidding and negotiated placement requirements at 18 CFR 34.2.

Comment date: December 14, 2001, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Application Accepted for Filing and Soliciting Comments, Protests, and Motions To Intervene

November 30, 2001.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 12132–000.

c. *Date filed:* October 15, 2001.

d. *Applicant:* Lake Altoona Water Power Company, Inc.

e. *Name and Location of Project:* The Lake Altoona Dam Project would be located at the existing county-owned dam on the Eau Claire River in The City of Altoona, Eau Claire County, Wisconsin.

f. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

g. *Applicant contact:* Mr. Thomas J. Reiss Jr., Lake Altoona Water Power Company, Inc., P.O. Box 553, 319 Hart Street, Watertown, WI 53094, (920) 261–7975.

h. *FERC Contact:* Tom Papsidero, (202) 219–2715.

i. *Deadline for filing comments, protests, and motions to intervene:* 60 days from the issuance date of this notice.

All documents (original and eight copies) should be filed with: David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Please include the project number (P–12132–000) on any comments or motions filed. The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on each person in the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

j. *Description of Project:* The proposed project would consist of: (1) The existing reinforced concrete, 223-foot-long, 43-foot-high, Lake Altoona Dam, (2) a proposed 50-foot-long, 12-foot-diameter reinforced concrete penstock, (3) a proposed powerhouse containing one generating unit having a total installed capacity of 875 kW, (4) a proposed 200-foot-long 4.2-kV transmission line, and (5) appurtenant facilities. The project would have an annual generation of 2.5 GWh.

k. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). A copy is also available for inspection and reproduction at the address in item g above.

l. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) and 4.36.

m. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) and 4.36.

n. Notice of Intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

o. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

p. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

q. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. An additional copy must be sent to Director, Division of Hydropower Administration and Compliance, Federal Energy Regulatory Commission, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

r. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

November 30, 2001.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Preliminary Permit.

b. *Project No:* 12136–000.

c. *Date Filed:* November 7, 2001.

d. *Applicant:* Public Utility District No. 1 of Franklin County.

e. *Name of Project:* Scooteney Hydroelectric Project.

f. *Location:* The proposed project would be located at Scooteney Lake 10 miles southeast of Othello, in Franklin County, Washington at Station 1622+11 on the Potholes East Canal, a man-made structure within the Columbia Basin Project. The project will require the use of an existing irrigation canal administered owned by the U.S. Bureau of Reclamation (BOR) and would occupy lands on which the United States has been granted an easement.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Kenneth A. Sugden, Manager, Public Utility District No. 1 of Franklin County, 1411 W. Clark, Pasco, WA 99302–2407, Telephone: (509) 547–5591.

i. *FERC Contact:* Mr. Lynn R. Miles, Sr. (202) 219–2671.

j. *Deadline for filing motions to intervene, protests and comments:* 60 days from the issuance date of this notice.

All documents (original and eight copies) should be filed with: David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Please include the Project Number (12136–000) on any comments, protest, or motions filed.

The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on each person in the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Project:* The proposed project would utilize the BOR's existing irrigation canal and consist of: (1) An intake structure (2) a concrete bypass weir, (3) a powerhouse with an installed capacity of 1,450 kW, (3) a 13.8 kv transmission line approximately 2,000 feet long, and (4) appurtenant facilities. The project would have an annual generation of 4.23 GWh.

l. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also

be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance).

m. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) and 4.36.

n. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) and 4.36.

o. Notice of Intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

p. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

q. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

r. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Hydropower Administration and Compliance, Federal Energy Regulatory Commission, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

s. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

November 30, 2001.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Preliminary Permit.

b. *Project No:* 12138–000.

c. *Date Filed:* November 7, 2001.

d. *Applicant:* Public Utility District No. 1 of Franklin County.

e. *Name of Project:* PEC 1973 Hydroelectric Project.

f. *Location:* The proposed project would be located approximately 2 miles west of Mesa, in Franklin County, Washington at an existing check/drop structure within the Potholes East Canal system at station 1973+00. The project will require the use of an existing irrigation canal administered by the U.S. Bureau of Reclamation (BOR) and would occupy lands on which the United States has been granted an easement.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Kenneth A. Sugden, Manager, Public Utility District No. 1 of Franklin County, 1411 W. Clark, Pasco, WA 99302–2407, Telephone: (509) 547–5591.

i. *FERC Contact:* Mr. Lynn R. Miles, Sr. (202) 219–2671.

j. *Deadline for filing motions to intervene, protests and comments:* 60 days from the issuance date of this notice.

All documents (original and eight copies) should be filed with: David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Please include the Project Number (12138–000) on any comments, protest, or motions filed.

The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on each person in the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Project:* The proposed project would utilize the BOR's existing irrigation canal and will not require a new or existing dam. The project would consist of: (1) an intake structure constructed integral with the powerhouse to avoid the use of a lengthy penstock, (2) a concrete

bypassed weir, (3) a powerhouse with an installed capacity of 2,000 kW, (3) a 13.8 kv transmission line approximately 500-foot long, and (4) appurtenant facilities. The project would have an annual generation of 5,440,000 kWh.

l. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance).

m. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) and 4.36.

n. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) and 4.36.

o. Notice of Intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

p. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

q. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

r. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Hydropower Administration and Compliance, Federal Energy Regulatory Commission, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

s. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

November 30, 2001.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Preliminary Permit.

b. *Project No:* 12139–000.

c. *Date Filed:* November 7, 2001.

d. *Applicant:* Public Utility District No. 1 of Franklin County.

e. *Name of Project:* EBC 625 Hydroelectric Project.

f. *Location:* The proposed project would be located at Station 625+00 on the existing Eltopia Branch Canal, an irrigation canal administered by the U.S. Bureau of Reclamation (BOR) near Eltopia, in Franklin County, Washington. The project would occupy lands on which the United States has been granted an easement.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Kenneth A. Sugden, Manager, Public Utility District No. 1 of Franklin County, 1411 W. Clark, Pasco, WA 99302–2407, Telephone: (509) 547–5591.

i. FERC Contact: Mr. Lynn R. Miles, Sr. (202) 219–2671.

j. *Deadline for filing motions to intervene, protests and comments:* 60 days from the issuance date of this notice.

All documents (original and eight copies) should be filed with: David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Please include the Project Number (12139–000) on any comments, protest, or motions filed.

The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on each person in the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Project:* The proposed project would utilize the BOR's existing irrigation canal and would consist of: (1) a concrete intake structure, (2) a concrete bypass weir, (3) a 60-inch diameter, 750-foot-long, buried steel penstock, (4) a powerhouse with an installed capacity of 1.1 MW, (3) a 13.8 kv transmission line approximately 2,000-foot-long, and (4) appurtenant facilities. The project would have an annual generation of 3.76 GWh.

l. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance).

m. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) and 4.36.

n. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) and 4.36.

o. Notice of Intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

p. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

q. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

r. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Hydropower Administration and Compliance, Federal Energy Regulatory Commission, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

s. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[OPP–42080A; FRL–6813–1]

Nebraska State Plan for Certification ofApplicators of Restricted Use Pesticides; Notice of Approval

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In the **Federal Register** of October 3, 2001 (66 FR 50430) (FRL–6798–8), EPA issued a notice of intent to approve an amended Nebraska Plan for the certification of applicators of restricted use pesticides. In this notice EPA solicited comments from the public on the proposed action to approve the amended Nebraska Plan. The amended Certification Plan Nebraska submitted to EPA contained several statutory, regulatory, and programmatic changes to its current Certification Plan. The proposed amendments established new commercial and noncommercial categories and subcategories along with their respective standards of competency, and the payment of appropriate fees for the licensing of commercial, noncommercial and private applicators. No comments were received and EPA hereby approves the amended Nebraska Plan.

ADDRESSES: The amended Nebraska Certification Plan can be reviewed at the locations listed under Unit I.B. of the **SUPPLEMENTARY INFORMATION.**

FOR FURTHER INFORMATION CONTACT: John Tice, Water, Wetlands and Pesticide Division/Pesticide Branch (WWPD/PEST), Environmental Protection Agency, Region VII, 901 N. 5th St., Kansas City, KS; telephone number: (402) 437–5080; fax number: (402) 323–9079; e-mail address: Tice.john@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to those involved in agriculture and anyone involved with the distribution and application of pesticides for agricultural purposes. Others involved with pesticides in a

non-agricultural setting may also be affected. In addition, this action may be of interest to others, such as, those persons who are or may be required to conduct testing of chemical substances under the Federal Food, Drug, and Cosmetic Act (FFDCA), or the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of the Amended State Plan, Other Related Documents, and Additional Information?

To obtain copies of the amended Nebraska Certification Plan, other related documents, or additional information contact:

1. John Tice at the address listed under **FOR FURTHER INFORMATION CONTACT**.

2. Tim Creger, Nebraska, Department of Agriculture, P.O. Box 94756, Lincoln, NE 68509–4756; telephone number: (402) 471–2394; e-mail address: timc@agr.state.ne.us.

3. Jeanne Heying, Field and External Affairs Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW.; telephone number: (703) 308–3240; e-mail address: heying.jeanne@epa.gov.

4. The Nebraska Certification plan and proposed changes may be viewed on the internet at the following URL: http://www.agr.state.ne.us/division/bpi/pes/p07.pdf.

II. What Action Is the Agency Taking?

EPA is approving the amended Nebraska Certification Plan. This approval is based upon the EPA review of the Nebraska Plan and finding it in compliance with FIFRA and 40 CFR part 171. Further, there were no public comments submitted to the earlier **Federal Register** Notice soliciting comments. The amended Nebraska Certification Plan is therefore approved.

List of Subjects

Environmental protection.

Dated: November 19, 2001.

Martha R. Steincamp,

Acting Regional Administrator, Region VII.

BILLING CODE 6560–50–S

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission

November 30, 2001.

Summary: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

Dates: Written comments should be submitted on or before January 7, 2002. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

Addresses: Direct all comments to Judy Boley, Federal Communications Commission, Room 1–C804, 445 12th Street, SW., DC 20554 or via the Internet to *jboley@fcc.gov*.

For Further Information Contact: For additional information or copies of the information collection(s), contact Judy Boley at 202–418–0214 or via the Internet at *jboley@fcc.gov*.

Supplementary Information:

OMB Control No.: 3060–0756.

Title: Procedural Requirements and Policies for Commission Processing of BOC Applications for the Provisions of In-Region, InterLATA Services Under Section 271 of the Telecommunications Act of 1996.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit; State, Local or Tribal Government.

Number of Respondents: 75.

Estimated Time Per Response: 250.9 hours (average).

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 18,820 hours.

Total Annual Cost: $0.

Needs and Uses: The Public Notice sets forth procedural requirements and policies relating to the Commission processing of Bell Operating Company (BOC) applications to provide in-region, interLATA services pursuant to section 271 of the Communications Act of 1934, as amended. BOCs must file applications, which provide information on which the applicant intends to rely in order to satisfy the requirement of section 271. State regulatory commission and Department of Justice can file written consultations relating to the applications. Interested third parties may file comments and reply comments regarding the applications. All of the requirements are used to ensure that BOCs have complied with their obligations under Communications Act of 1934, as amended, before being authorized to provide in-region, interLATA services pursuant to section 271.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATIONS

Sunshine Act Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2 p.m. on Monday, December 10, 2001, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous Board of Directors' meetings.

Summary reports, status reports, and reports of actions taken pursuant to authority delegated by the Board of Directors.

Memorandum re: Memorandum of Understanding with Farm Service Agency.

Discussion Agenda:

Memorandum and resolution re: Proposed Regulation Regarding Payment of Post-Insolvency Interest in Receiverships With Surplus Funds.

Memorandum and resolution are: Amendment to Part 325—Capital Standards for Nonfinancial Equity Investments.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, N.W., Washington, DC.

The FDIC will provide attendees with auxiliary aids (e.g., sign language interpretation) required for this meeting. Those attendees needing such assistance should call (202) 416–2089 (Voice); (202) 416–2007 (TTY), to make necessary arrangements.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Executive Secretary of the Corporation, at (202) 898–6757.

Dated: December 3, 2001.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

FEDERAL ELECTION COMMISSION

Sunshine Act Meeting

DATE & TIME: *Tuesday, December 11, 2001 at 10:00 A.M.*

PLACE: 999 E Street, NW., Washington, DC.

STATUS: This Meeting Will Be Closed to the Public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. § 437g

Audits conducted pursuant to 2 U.S.C. § 437g, § 438(b), and Title 26, U.S.C.

Matters concerning participation in civil actions or proceedings or arbitration

Internal personnel rules and procedures or matters affecting a particular employee

DATE & TIME: *Thursday, December 13, 2001 at 10:00 A.M.*

PLACE: 999 E Street, NW., Washington, DC (Ninth Floor).

STATUS: This Meeting Will Be Open to the Public

ITEMS TO BE DISCUSSED:

Correction and Approval of Minutes

Election of Officers

Service Awards

Future Meeting Dates

Revised Draft Advisory Opinion 2001–16: Democratic National Committee by counsel, Joseph E. Sandler and Neil Reiff

Voting System Standards—Release for Public Comment

Administrative Matters

PERSON TO CONTACT FOR INFORMATION: Mr. Ron Harris, Press Officer Telephone: (202) 694–1220.

Mary W. Dove,

Secretary of the Commission.

BILLING CODE 6715–01–M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Commission hereby gives notice of the filing of the following agreement(s) under the Shipping Act of 1984. Interested parties can review or obtain copies of agreements at the Washington, DC offices of the Commission, 800 North Capitol Street, NW., Room 940. Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days of the date this notice appears in the **Federal Register**.

Agreement No.: 010786–012.

Title: Contship and Italia di Navigazione SpA Space Charter and Sailing Agreement.

Parties: Contship Containerlines, Italia di Navigazione S.p.A.

Synopsis: The proposed agreement modification increases the minimum number of slots chartered by Italia on Contship's vessels from 130 to 150.

Agreement No.: 011671–004.

Title: Italia/Contship Space Charter and Sailing Agreement.

Parties: Italia di Navigazione S.p.A., Contship Containerlines, Lykes Lines Limited, LLC, TMM Lines Limited, LLC.

Synopsis: The proposed amendment restates the agreement and adds TMM Lines Limited and Lykes Lines Limited as parties, provides for new slot allocations among the parties, eliminates obsolete language, and changes the name of the agreement.

By Order of the Federal Maritime Commission.

Dated: November 30, 2001.

Bryant L. VanBrakle,

Secretary.

FEDERAL RESERVE SYSTEM

Sunshine Act Meeting

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

TIME AND DATE: 3:30 p.m. on Tuesday, December 4, 2001.

The business of the Board requires that this meeting be held with less than one week's advance notice to the public, and no earlier announcement of the meeting was practicable.

PLACE: Marriner S. Eccles Federal Reserve Board Building, 20th and C Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Future capital framework. (This item was originally announced for a closed meeting on December 3, 2001.)

2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Michelle A. Smith, Assistant to the Board; 202–452–3204.

SUPPLEMENTARY INFORMATION: You may call 202–452–3206 beginning at approximately 5 p.m. two business days before the meeting for a recorded announcement of bank and bank holding company applications scheduled for the meeting; or you may contact the Board's Web site at *http://www.federalreserve.gov* for an electronic announcement that not only lists applications, but also indicates procedural and other information about the meeting.

Dated: December 3, 2001.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

Privacy Act of 1974; System of Records

AGENCY: Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS), formerly Health Care Financing Administration (HCFA).

ACTION: Notice of a new system of records.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, we are proposing to establish a new system of records. The proposed system is titled "Medicare Beneficiary Database (MBD)," HHS/CMS/CBS, System No. 09–70–0536. The Medicare program is rapidly changing to accommodate expansion of new service delivery models and payment options, allowing for more medical choices for its beneficiaries. To successfully support ongoing and expanded program administration, service delivery modalities and payment coverage options, CMS proposes to establish an enterprise database. More specifically, the proposed system will contain a complete "beneficiary insurance profile" that reflects individual Medicare and Medicaid health insurance coverage and Medicare health plan and demonstration enrollment. Once fully developed, the MBD would provide a database of pertinent and comprehensive personal data on people with Medicare and persons dually eligible for both Medicare and Medicaid under either the Fee for Service or Managed Care Programs. It would support data processing, at the discrete beneficiary level, necessary for continued and evolving program operations including but not limited to Medicare claims payment, entitlement, Medicare + Choice elections and payments, coordination of benefits for the purpose of conducting Medicare business, payment demonstrations and Medicaid coverage. The data in this database is held at the person level and is identified through use of an individual health insurance claim number. As such, the MBD would serve as CMS's singular, reliable and authoritative data source, from which all systems can retrieve current, standard, valid and timely data necessary for Medicare Program administration. MBD will provide CMS with a centralized database that is able to communicate with other systems while being able to view, manage, and update beneficiary information. It will also provide new sets of data not found in existing CMS systems. Other groups of information maintained in this data management structure will be initially extracted from data elements currently maintained in other CMS systems of records: "Enrollment Database (EDB)" (formerly known as the Health Insurance Master Record), System No. 09–70–0502, "Group Health Plan (GHP), System No. 09–70–5001," and the "Medicaid Statistical Information System (MSIS), System No. 09–70–4001." These systems will remain active for the purposes stated in their current notices. The data elements include, but are not limited to, standard data for identification such as health insurance claim number (HICN), social security number (SSN), sex, race/ethnicity, date of birth, geographical location, Medicare entitlement information, M+C plan elections and enrollment, End Stage Renal Disease (ESRD) coverage, primary insurance coverage, e.g., the "working aged" population, historic and current listing of residences, and Medicaid eligibility and Managed Care institutional status.

The MBD is in its first stage of a multi-year implementation. In its full implementation the MBD will be the national source of comprehensive beneficiary information and provide consistent information throughout Medicare operations. The first application of the MBD focuses on the Medicare Managed Care Program. The system is being developed in several different stages and this notice addresses the initial stage of development that will contain data of interest to the Medicare Managed Care program rather than the Fee For Service Program. The initial stage will include two major functions: (1) Allows system users to view and update beneficiary data based upon role based security access and (2) allows accurate and timely processing of beneficiary residence information particularly for mailings and to processing managed care payments. The MBD update function will ensure the accuracy and timeliness of data using business rules developed to assess and validate the correctness of new and changed data. However, historic data will be retained to provide insurance profiles for specified "points in time". Further, for accurate beneficiary residence address processing, the MBD identifies the conditions where the acceptance of new or corrected address information will trigger the establishment of a new or corrected period of Beneficiary

Residence History Information or Beneficiary Temporary Residency History Information. It also would identify the conditions where new Social Security Administration (SSA) State and County Codes must be derived when an address is changed. Future modifications of the MBD that substantially change the system of records will follow a corresponding modification or alteration of this system notice.

The primary purpose of this system of records is to provide the Centers for Medicare & Medicaid Services (CMS) with a singular, authoritative, database of comprehensive data on people enrolled in Medicare. The development and operation of the MBD would establish within CMS, a singular, national source of comprehensive beneficiary information. This information would be consistent throughout the Medicare Program, providing key benefits to CMS's program, administrative and customer service goals. The MBD will combine and house beneficiary centric data that resides currently within CMS databases such as the EDB, MSIS and GHP. It will be the authoritative database for approved agency contractors who need specific types of data to support and implement business processes. Although the MBD does not replace any of these systems at this time, the MBD will provide the most current and reliable information for contractors to make timely decisions about payment and service delivery. The Information retrieved from this system of records will also be disclosed to: (1) Support regulatory, reimbursement, and policy functions performed within the agency or by a contractor or consultant, (2) another federal or state agency, agency of a state government, an agency established by state law, or its fiscal agent, (3) providers and suppliers of services for administration of Title XVIII, (4) third parties where the contact is expected to have information relating to the individual's capacity to manage his or her own affairs, (5) Peer Review Organizations, (6) other insurers for processing individual insurance claims, (7) facilitate research on the quality and effectiveness of care provided, as well as payment related projects, (8) support constituent requests made to a congressional representative, (9) support litigation involving the agency, and (10) combat fraud and abuse in certain health benefits programs. We have provided background information about the modified system in the **SUPPLEMENTARY INFORMATION** section below. Although the Privacy Act requires only that CMS provide an opportunity for interested persons to comment on the proposed routine uses, CMS invites comments on all portions of this notice. See **EFFECTIVE DATES** section for comment period.

EFFECTIVE DATES: CMS has filed a new system of records report with the Chair of the House Committee on Government Reform and Oversight, the Chair of the Senate Committee on Governmental Affairs, and the Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) on November 28, 2001. We will not disclose any information under a routine use until 40 days after notification to OMB and Congress, whichever is latest. We may defer implementation of this system of records or one or more of the routine use statements listed below if we receive comments that persuade us to defer implementation.

ADDRESSES: The public should address comments to: Director, Division of Data Liaison and Distribution (DDLD), CMS, Room N2–04–27, 7500 Security Boulevard, Baltimore, Maryland 21244–1850. Comments received will be available for review at this location, by appointment, during regular business hours, Monday through Friday from 9 a.m.–3 p.m., eastern time zone.

FOR FURTHER INFORMATION CONTACT: William Seabrease, Health Insurance Specialist, Center for Beneficiary Choices, CMS, Mail-stop C5–16–15, 7500 Security Boulevard, Baltimore, Maryland 21244–1850. The telephone number is (410) 786–6187.

SUPPLEMENTARY INFORMATION:

I. Description of the New System of Records

A. Background

The MBD was established to provide CMS with a singular, authoritative database of comprehensive data on people with Medicare. The MBD is necessary to successfully support ongoing program administration including Medicare claims payment, entitlement; Medicaid coverage, Medicare+Choice elections and payments; coordination of benefits for the purpose of conducting Medicare business; payment demonstrations; and demographic research. As CMS's authoritative enterprise beneficiary database, it will provide new sets of data that is not currently available in the EDB, GHP or MSIS. The "Medicare Beneficiary Database (MBD)," System No. 09–70–0536 will also maintain beneficiary data elements extracted from existing CMS systems of records: EDB, GHP, and MSIS. The renamed "Enrollment Database," was established in 1965 to maintain accurate and complete data on Medicare enrollment and entitlement. Notice of the modification to this system, "Health Insurance Master Record (HIMR)," HHS/CMS/BDMS, System No. 09–70–0502 was published in the **Federal Register** at 55 FR 37549 (September 12, 1990), 61 FR 6645 (Feb. 21, 1996) (added unnumbered social security use), 63 FR 38414 (July 16, 1998) (added three fraud and abuse uses), and 65 FR 50552 (Aug. 18, 2000) (deleted one and modified two fraud and abuse uses). The "Group Health Plan (GHP)," System No. 09–70–4001, published in the **Federal Register** at 57 FR 60819 (December 22,1992), was established to maintain a master file of group health plan members for accounting control, to expedite the exchange of data with the plans, and to control the posting of pro-rata amounts to the part B deductible of enrolled members. The "Medicaid Statistical Information System (MSIS)," System No. 09–70–6001, published in the **Federal Register** at 59 FR 41327 (August 11, 1994), was established to maintain an accurate, current, and comprehensive database containing standardized enrollment, eligibility, and paid claims of Medicaid beneficiaries to be used for the administration of the Medicaid program at the Federal level, produce statistical reports, support Medicaid research, and assist in the detection of fraud and abuse.

CMS has long realized that the Medicare program is in the middle of rapidly changing health insurance industry characterized by an expansion of service delivery models and payment options. The Medicare+Choice provisions of the Balance Budget Act (BBA) of 1997 (Pub. L. 105–217) has made the challenge of managing beneficiary health choices one of the most critical challenges facing CMS and the health industry at large. To be of maximum use, the data must be organized and categorized into a comprehensive system. CMS sought to identify key sources, including both organizations and systems that could provide valid and reliable information. Medicare will no longer exist within an environment characterized by limited health insurance options and standard delivery models. The MBD provides CMS with a timely model for data inventory of beneficiary information retained in a database environment that provides flexibility to react quickly to changing Medicare program needs.

Data relating to Medicare Managed Care beneficiaries will be the initial focus of the system implementation.

The MBD provides a solution as a singular, reliable and authoritative source, in which all systems can retrieve current, standard, valid and timely data for processing beneficiary selections of capitated delivery options. It will provide a comprehensive "national view" of beneficiary information that is consistent throughout the Medicare program, which will primarily benefit CMS's operational and customer service business goals. In addition to providing a flexible system to accommodate changes, the MBD will support significant improvements in the accuracy of the beneficiary residence address used for capitation, determining payments and will serve as the first identifying record of dual Medicare/Medicaid eligible population which is essential to the capitation process.

An independent technical evaluation of CMS's managed care systems found that without major enhancements, Medicare+Choice provisions could not be supported by existing Medicare systems. Also the comprehensive review of existing systems was necessary in order to proceed with a development effort that would ensure that future customer service and program management objectives were met. The MBD alters an old architecture that could only support two beneficiary Medicare choice options: Fee-for service or traditional Health Maintenance Organizations (HMO). As these models merge and additional choices become available, (i.e., Medicare+Choice Organizations, Medicare Savings Accounts (MSA) and Private Fee for Service options), CMS determined the need for a beneficiary management structure, the MBD, designed to support these expanded program and coverage options.

The MBD design will accommodate the future growth in delivery service options; scalable to support the entire Medicare beneficiary population of approximately 42 million. This would include both the targeted sets of business requirements and processes for beneficiary choice between capitated delivery service options, now and later to support all beneficiaries remaining in the traditional Medicare Fee For Service Program.

The MBD includes standard data for identification such as the Medicare HICN, SSN, sex, race/ethnicity, date of birth, and geographical location for Medicare beneficiaries. Further, the MBD will maintain data on the following types of beneficiary information: demographic information, Medicare entitlement information, Medicare Secondary Payer data, hospice election, Plan elections and enrollments, End Stage Renal Disease (ESRD) entitlement, historic and current listing of residences, and Medicaid eligibility and Managed Care institutional status. The MBD will have a common interface layer that enables existing legacy systems and new applications to access MBD in a uniform fashion. The system shall support both online and batch transaction volumes up to 200,000-batch update transaction per-day; up to 2 million interactive inquiries per-day. An operational day is assumed to be 16 hours. It is envisioned to be capable of supporting access and interoperability across mainframe, mid-tier, and desktop systems. The MBD is currently scoped to encompass up to 15 logical database tables, containing about 250 logically grouped data elements. The logical database tables include: The Beneficiary Demographics and Communication Profiles, Medicare Entitlement Information, Hospice Election and Usage Information, Beneficiary Service and Delivery Elections, Other Beneficiary Explicit Elections, Fee-For-Service Periods, Managed Care Institutional Status Information, ESRD Medicare entitlement information, Medicaid Eligibility information, and Other Required Beneficiary Specific information. It also will accommodate new and modified beneficiary data that was determined to be necessary to support effective implementation of the BBA.

B. Statutory and Regulatory Basis for System of Records

Authority for maintenance of the system is given under §§ 226, 226A, 1811, 1818, 1818A, 1831, 1833(a)(1)(A), 1836, 1837, 1838, 1843, 1866, 1876, 1881, and 1902(a)(6) of the Social Security Act and Title 42 United States Code (U.S.C.) 426, 1395(a)(1)(A), 1395c, 1395cc, 1395i–2, 1395i–2a, 1395j, 1395l, 1395mm, 1395o, 1395p, 1395q, 1395rr, 1395v, and 1396(a).

II. Collection and Maintenance of Data in the System

A. Scope of the Data Collected

Individuals age 65 or over who have been, or currently are, entitled to health insurance (Medicare) benefits under Title XVIII of the Social Security Act or under provisions of the Railroad Retirement Act; individuals under age 65 who have been, or currently are, entitled to such benefits on the basis of having been entitled for not less than 24 months to disability benefits under title II of the Act or under the Railroad Retirement Act; individuals who have been, or currently are, entitled to such benefits because they have end-stage renal disease; individuals age 64 and 8 months or over who are likely to become entitled to health insurance (Medicare) benefits upon attaining age 65, individuals under age 65 who have at least 21 months of disability benefits who are likely to become entitled to Medicare upon the 25th month of entitlement to such benefits, and the populations dually eligible for both Medicare and Medicaid (Title XIX of the Social Security Act).

The data elements include, but are not limited to, standard data for identification such as HICN, SSN, sex, race/ethnicity, date of birth, geographic location, Medicare enrollment and entitlement information, Medicare Secondary Payer (MSP) data containing insurance information on payers primary to Medicare necessary for appropriate Medicare claim payment, hospice election, plan elections and enrollment, End Stage Renal Disease (ESRD) entitlement, historic and current listing of residences, and Medicaid eligibility and institutional status.

B. Agency Policies, Procedures, and Restrictions on the Routine Use

The Privacy Act permits us to disclose information without an individual's consent if the information is to be used for a purpose that is compatible with the purpose(s) for which the information was collected. Any such disclosure of data is known as a "routine use." The government will only release MBD information that can be associated with an individual as provided for under "Section III. Proposed Routine Use Disclosures of Data in the System." Both identifiable and non-identifiable data may be disclosed under a routine use. We will only disclose the minimum personal data necessary to achieve the purpose of the MBD. CMS has the following policies and procedures concerning disclosures of information that will be maintained in the system. Disclosure of information from the system of records will be approved only to the extent necessary to accomplish the purpose of the disclosure and only after CMS:

1. Determines that the use or disclosure is consistent with the reason that the data is being collected, e.g., ensuring proper enrollment, establishing the validity of individual's entitlement to benefits, verifying the accuracy of information presented by the individual, insuring proper reimbursement for services provided, and claims payment.

2. Determines that:

a. The purpose for which the disclosure is to be made can only be

accomplished if the record is provided in individually identifiable form;

b. The purpose for which the disclosure is to be made is of sufficient importance to warrant the effect and/or risk on the privacy of the individual that additional exposure of the record might bring; and

c. There is a strong probability that the proposed use of the data would in fact accomplish the stated purpose(s).

3. Requires the information recipient to:

a. Establish administrative, technical, and physical safeguards to prevent unauthorized use of disclosure of the record;

b. Remove or destroy at the earliest time all patient-identifiable information; and

c. Agree to not use or disclose the information for any purpose other than the stated purpose under which the information was disclosed.

4. Determines that the data are valid and reliable.

III. Proposed Routine Use Disclosure of Data in the System

A. Entities Who May Receive Disclosures Under Routine Use

These routine uses specify circumstances, in addition to those provided by statute in the Privacy Act of 1974, under which CMS may release information from the MBD without the consent of the individual to whom such information pertains. Each proposed disclosure of information under these routine uses will be evaluated to ensure that the disclosure is legally permissible, including but not limited to ensuring that the purpose of the disclosure is compatible with the purpose for which the information was collected. In addition, our policy will be to prohibit release even of non-identifiable data, except pursuant to one of the routine uses, if there is a possibility that an individual can be identified through implicit deduction based on small cell sizes (instances where the patient population is so small that individuals who are familiar with the enrollees could, because of the small size, use this information to deduce the identity of the beneficiary). We are proposing to establish the following routine use disclosures of information maintained in the system:

1. To agency contractors, or consultants who have been engaged by the agency to assist in accomplishment of a CMS function relating to the purposes for this system of records and who need to have access to the records in order to assist CMS.

We contemplate disclosing information under this routine use only in situations in which CMS may enter into a contractual or similar agreement with a third party to assist in accomplishing a CMS function relating to purposes for this system of records.

CMS occasionally contracts out certain of its functions when doing so would contribute to effective and efficient operations. CMS must be able to give a contractor or consultant whatever information is necessary for the contractor or consultant to fulfill its duties. In these situations, safeguards are provided in the contract prohibiting the contractor or consultant from using or disclosing the information for any purpose other than that described in the contract and requires the contractor or consultant to return or destroy all information at the completion of the contract.

2. To another federal or state agency, agency of a state government, an agency established by state law, or its fiscal agent to:

a. Contribute to the accuracy of CMS's proper payment of Medicare benefits,

b. Enable such agency to administer a federal health benefits program, or as necessary to enable such agency to fulfill a requirement of a federal statute or regulation that implements a health benefits program funded in whole or in part with federal funds, and/or

c. Assist federal/state Medicaid programs within the state.

Other federal or state agencies in their administration of a federal health program may require MBD information in order to support evaluations and monitoring of Medicare claims information of beneficiaries, including proper reimbursement for services provided;

The Internal Revenue Service may require MBD data for the application of tax penalties against employers and employee organizations that contribute to Employer Group Health Plan or Large Group Health Plans that are not in compliance with 42 U.S.C. 1395y(b);

In addition, other state agencies in their administration of a federal health program may require MBD information for the purposes of determining, evaluating and/or assessing cost, effectiveness, and/or the quality of health care services provided in the state;

The Railroad Retirement Board requires MBD information to administer provisions of the Railroad Retirement and Social Security Acts relating to railroad employment and/or the administration of the Medicare program;

The Social Security Administration requires MBD data to enable them to assist in the implementation and maintenance of the Medicare program;

Disclosure under this routine use shall be used by state Medicaid agencies pursuant to agreements with the Department of Health and Human Services for determining Medicaid and Medicare eligibility, for quality control studies, for determining eligibility of recipients of assistance under Titles IV, XVIII, and XIX of the Social Security Act, and for the administration of the Medicaid program. Data will be released to the state only on those individuals who are patients under the services of a Medicaid program within the state or who are residents of that state;

3. To providers and suppliers of services directly or through fiscal intermediaries or carriers for the administration of Title XVIII of the Social Security Act.

Providers and suppliers of services require MBD information in order to establish the validity of evidence or to verify the accuracy of information presented by the individual, as it concerns the individual's entitlement to benefits under the Medicare program, including proper reimbursement for services provided.

4. To third party contacts in situations where the party to be contacted has, or is expected to have information relating to the individual's capacity to manage his or her affairs or to his or her eligibility for, or an entitlement to, benefits under the Medicare program and,

a. The individual is unable to provide the information being sought (an individual is considered to be unable to provide certain types of information when any of the following conditions exists: the individual is confined to a mental institution, a court of competent jurisdiction has appointed a guardian to manage the affairs of that individual, a court of competent jurisdiction has declared the individual to be mentally incompetent, or the individual's attending physician has certified that the individual is not sufficiently mentally competent to manage his or her own affairs or to provide the information being sought, the individual cannot read or write, cannot afford the cost of obtaining the information, a language barrier exists, or the custodian of the information will not, as a matter of policy, provide it to the individual), or

b. The data are needed to establish the validity of evidence or to verify the accuracy of information presented by the individual, and it concerns one or more of the following: the individual's entitlement to benefits under the Medicare program, the amount of reimbursement, and in cases in which the evidence is being reviewed as a

result of suspected fraud and abuse, program integrity, quality appraisal, or evaluation and measurement of activities.

Third parties contacts require MBD information in order to provide support for the individual's entitlement to benefits under the Medicare program; to establish the validity of evidence or to verify the accuracy of information presented by the individual, and assist in the monitoring of Medicare claims information of beneficiaries, including proper reimbursement of services provided.

5. To Peer Review Organizations (PRO) in connection with review of claims, or in connection with studies or other review activities, conducted pursuant to Part B of Title XI of the Social Security Act and in performing affirmative outreach activities to individuals for the purpose of establishing and maintaining their entitlement to Medicare benefits or health insurance plans.

The PRO will work to implement quality improvement programs, provide consultation to CMS, its contractors, and to state agencies. The PRO will assist state agencies in related monitoring and enforcement efforts, assist CMS and intermediaries in program integrity assessment, and prepare summary information for release to CMS.

6. To insurance companies, third party administrators (TPA), employers, self-insurers, managed care organizations, other supplemental insurers, non-coordinating insurers, multiple employer trusts, group health plans (i.e., health maintenance organizations (HMO) or a Medicare-approved health care prepayment plan (HCPP), directly or through a contractor. Information to be disclosed shall be limited to Medicare enrollment data. In order to receive the information, they must agree to:

a. Certify that the individual about whom the information is being provided is one of its insured or employees;

b. Utilize the information solely for the purpose of processing the individual's insurance claims; and

c. Safeguard the confidentiality of the data and prevent unauthorized access.

Other insurers, HMO, and HCPP may require MBD information in order to support evaluations and monitoring of Medicare claims information of beneficiaries, including proper reimbursement for services provided.

7. To an individual or organization for a research project or in support of an evaluation project related to the prevention of disease or disability, the restoration or maintenance of health, or payment related projects.

The MBD data will provide for research or in support of evaluation projects, a broader, longitudinal, national perspective of the status of Medicare beneficiaries. CMS anticipates that many researchers will have legitimate requests to use these data in projects that could ultimately improve the care provided to Medicare beneficiaries and the policy that governs the care.

8. To a Member of Congress or to a congressional staff member in response to an inquiry of the congressional office made at the written request of the constituent about whom the record is maintained.

Beneficiaries sometimes request the help of a Member of Congress in resolving an issue relating to a matter before CMS. The Member of Congress then writes CMS, and CMS must be able to give sufficient information to be responsive to the inquiry.

9. To the Department of Justice (DOJ), court or adjudicatory body when:

a. The agency or any component thereof, or

b. Any employee of the agency in his or her official capacity, or

c. Any employee of the agency in his or her individual capacity where the DOJ has agreed to represent the employee, or

d. The United States Government, is a party to litigation or has an interest in such litigation, and by careful review, CMS determines that the records are both relevant and necessary to the litigation.

Whenever CMS is involved in litigation, or occasionally when another party is involved in litigation and CMS's policies or operations could be affected by the outcome of the litigation, CMS would be able to disclose information to the DOJ, court or adjudicatory body involved.

10. To a CMS contractor (including, but not limited to fiscal intermediaries and carriers) that assists in the administration of a CMS-administered health benefits program, or to a grantee of a CMS-administered grant program, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud or abuse in such programs.

We contemplate disclosing information under this routine use only in situations in which CMS may enter into a contract or grant with a third party to assist in accomplishing CMS functions relating to the purpose of combating fraud and abuse;

CMS occasionally contracts out certain of its functions when doing so would contribute to effective and efficient operations. CMS must be able to give a contractor or grantee whatever information is necessary for the contractor or grantee to fulfill its duties. In these situations, safeguards are provided in the contract prohibiting the contractor or grantee from using or disclosing the information for any purpose other than that described in the contract and requiring the contractor or grantee to return or destroy all information.

11. To another federal agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States (including any state or local governmental agency), that administers, or that has the authority to investigate potential fraud or abuse in, a health benefits program funded in whole or in part by federal funds, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud or abuse in such programs.

Other agencies may require MBD information for the purpose of combating fraud and abuse in such federally funded programs.

B. Additional Provisions Affecting Routine Use Disclosures

In addition, our policy will be to prohibit release even of non-identifiable data, except pursuant to one of the routine uses, if there is a possibility that an individual can be identified through implicit deduction based on small cell sizes (instances where the patient population is so small that individuals who are familiar with the enrollees could, because of the small size, use this information to deduce the identity of the beneficiary).

This System of Records contains Protected Health Information as defined by the Department of Health and Human Services' regulation "Standards for Privacy of Individually Identifiable Health Information" (45 CFR parts 160 and 164, 65 FR 82462 as amended by 66 FR 12434). Disclosures of Protected Health Information authorized by these routine uses may only be made if, and as, permitted or required by the "Standards for Privacy of Individually Identifiable Health Information."

IV. Safeguards

The MBD system will conform to applicable law and policy governing the privacy and security of federal automated information systems. These include but are not limited to: the

Privacy Act of 1974, Computer Security Act of 1987, the Paperwork Reduction Act (PRA) of 1995, the Clinger-Cohen Act of 1996, and OMB Circular A–130, Appendix III, "Security of Federal Automated Information Resources." CMS has prepared a comprehensive system security plan as required by the Office and Management and Budget (OMB) Circular A–130, Appendix III. This plan conforms fully to guidance issued by the National Institute for Standards and Technology (NIST) in NIST Special Publication 800–18, "Guide for Developing Security Plans for Information Technology Systems." Paragraphs A–C of this section highlight some of the specific methods that CMS is using to ensure the security of this system and the information within it.

A. Authorized Users

Personnel having access to the system have been trained in Privacy Act and systems security requirements. Employees and contractors who maintain records in the system are instructed not to release any data until the intended recipient agrees to implement appropriate administrative, technical, procedural, and physical safeguards sufficient to protect the confidentiality of the data and to prevent unauthorized access to the data. In addition, CMS is monitoring the authorized users to ensure against excessive or unauthorized use. Records are used in a designated work area or workstation and the system location is attended at all times during working hours.

To assure security of the data, the proper level of class user is assigned for each individual user as determined at the agency level. This prevents unauthorized users from accessing and modifying critical data. The system database configuration includes five classes of database users:

➢ Database Administrator class owns the database objects; e.g., tables, triggers, indexes, stored procedures, packages, and has database administration privileges to these objects;

➢ Quality Control Administrator class has read and write access to key fields in the database;

➢ Quality Indicator (QI) Report Generator class has read-only access to all fields and tables;

➢ Policy Research class has query access to tables, but are not allowed to access confidential patient identification information; and

➢ Submitter class has read and write access to database objects, but no database administration privileges.

B. Physical Safeguards

All server sites have implemented the following minimum requirements to assist in reducing the exposure of computer equipment and thus achieve an optimum level of protection and security for the MBD system: Access to all servers is controlled, with access limited to only those support personnel with a demonstrated need for access. Servers are to be kept in a locked room accessible only by specified management and system support personnel. Each server requires a specific log-on process. All entrance doors are identified and marked. A log is kept of all personnel who were issued a security card, key and/or combination, which grants access to the room housing the server, and all visitors are escorted while in this room. All servers are housed in an area where appropriate environmental security controls are implemented, which include measures implemented to mitigate damage to Automated Information System (AIS) resources caused by fire, electricity, water and inadequate climate controls.

Protection applied to the workstations, servers and databases include:

➢ User Log-ons—Authentication is performed by the Primary Domain Controller/Backup Domain Controller of the log-on domain.

➢ Workstation Names—Workstation naming conventions may be defined and implemented at the agency level.

➢ Hours of Operation—May be restricted by Windows NT. When activated all applicable processes will automatically shut down at a specific time and not be permitted to resume until the predetermined time. The appropriate hours of operation are determined and implemented at the agency level.

➢ Inactivity Log-out—Access to the NT workstation is automatically logged out after a specified period of inactivity.

➢ Warnings—Legal notices and security warnings display on all servers and workstations.

➢ Remote Access Services (RAS)—Windows NT RAS security handles resource access control. Access to NT resources is controlled for remote users in the same manner as local users, by utilizing Windows NT file and sharing permissions. Dial-in access can be granted or restricted on a user-by-user basis through the Windows NT RAS administration tool.

C. Procedural Safeguards

All automated systems must comply with federal laws, guidance, and policies for information systems security as stated previously in this section. Each automated information system should ensure a level of security commensurate with the level of sensitivity of the data, risk, and magnitude of the harm that may result from the loss, misuse, disclosure, or modification of the information contained in the system.

V. Effect of the New System of Records on Individual Rights

CMS proposes to establish this system in accordance with the principles and requirements of the Privacy Act and will collect, use, and disseminate information only as prescribed therein. We will only disclose the minimum personal data necessary to achieve the purpose of MBD. Disclosure of information from the system of records will be approved only to the extent necessary to accomplish the purpose of the disclosure. CMS has assigned a higher level of security clearance for the information maintained in this system in an effort to provide added security and protection of data in this system.

CMS will take precautionary measures to minimize the risks of unauthorized access to the records and the potential harm to individual privacy or other personal or property rights. CMS will collect only that information necessary to perform the system's functions. In addition, CMS will make disclosure from the proposed system only with consent of the subject individual, or his/her legal representative, or in accordance with an applicable exception provision of the Privacy Act.

CMS, therefore, does not anticipate an unfavorable effect on individual privacy as a result of the disclosure of information relating to individuals.

Dated: November 28, 2001.

Thomas A. Scully,

Administrator, Centers for Medicare & Medicaid Services.

09–70–0536

SYSTEM NAME:

Medicare Beneficiary Database, HHS/CMS/CBS.

SECURITY CLASSIFICATION:

Level Three Privacy Act Sensitive Data.

SYSTEM LOCATION:

CMS Data Center, 7500 Security Boulevard, North Building, First Floor, Baltimore, Maryland 21244–1850, and at various other remote locations (See Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals age 65 or over who have been, or currently are, entitled to health insurance (Medicare) benefits under Title XVIII of the Social Security Act or under provisions of the Railroad Retirement Act; individuals under age 65 who have been, or currently are, entitled to such benefits on the basis of having been entitled for not less than 24 months to disability benefits under title II of the Act or under the Railroad Retirement Act; individuals who have been, or currently are, entitled to such benefits because they have end-stage renal disease; individuals age 64 and 8 months or over who are likely to become entitled to health insurance (Medicare) benefits upon attaining age 65, and individuals under age 65 who have at least 21 months of disability benefits who are likely to become entitled to Medicare upon the 25th month of entitlement to such benefits and those populations that are dually eligible for both Medicare and Medicaid (Title XIX of the Social Security Act).

CATEGORIES OF RECORDS IN THE SYSTEM:

The data elements include, but are not limited to, standard data for identification such as health insurance claim number (HICN), social security number (SSN), sex, race/ethnicity, date of birth, geographic location, Medicare enrollment and entitlement information, Medicare Secondary Payer data necessary for appropriate Medicare claim payment, hospice election, plan elections and enrollment, End Stage Renal Disease (ESRD) entitlement, historic and current listing of residences, and Medicaid eligibility and Managed Care institutional status.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Authority for maintenance of the system is given under sections 226, 226A, 1811, 1818, 1818A, 1831, 1833(a)(1)(A), 1836, 1837, 1838, 1843, 1866, 1876, 1881, and 1902(a)(6) of the Social Security Act and Title 42 United States Code (U.S.C.) 426, 1395(a)(1)(A), 1395c, 1395cc, 1395i–2, 1395i–2a, 1395j, 1395l, 1395mm, 1395o, 1395p, 1395q, 1395rr, 1395v, and 1396(a).

PURPOSE(S):

The primary purpose of this system of records is to provide the Centers for Medicare & Medicaid Services (CMS) with a singular, authoritative, database of comprehensive data on people with Medicare. The development and operation of the MBD would establish within CMS, a singular, national source of comprehensive beneficiary information. This information would be consistent throughout the Medicare Program, providing key benefits to CMS's operation, administrative and customer service goals. The MBD will combine and house beneficiary centric data that resides currently within CMS databases such as the EDB, MSIS and GHP. It becomes the authoritative database for approved agency contractors who need specific types of data to support and implement business processes, based upon a beneficiary's health insurance needs. Although the MBD does not replace any of these systems at this time, the MBD does provide the most current and reliable information for contractors to make timely decisions about payment and service delivery elections. Information retrieved from this system of records will also be disclosed to: (1) Support regulatory, reimbursement, and policy functions performed within the agency or by a contractor or consultant, (2) another federal or state agency, agency of a state government, an agency established by state law, or its fiscal agent, (3) providers and suppliers of services for administration of Title XVIII, (4) third parties where the contact is expected to have information relating to the individual's capacity to manage his or her own affairs, (5) Peer Review Organizations, (6) other insurers for processing individual insurance claims, (7) facilitate research on the quality and effectiveness of care provided, as well as payment related projects, (8) support constituent requests made to a congressional representative, (9) support litigation involving the agency, and (10) combat fraud and abuse in certain health benefits programs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OR USERS AND THE PURPOSES OF SUCH USES:

These routine uses specify circumstances, in addition to those provided by statute in the Privacy Act of 1974, under which CMS may release information from the MBD without the consent of the individual to whom such information pertains. Each proposed disclosure of information under these routine uses will be evaluated to ensure that the disclosure is legally permissible, including but not limited to ensuring that the purpose of the disclosure is compatible with the purpose for which the information was collected. In addition, our policy will be to prohibit release even of non-identifiable data, except pursuant to one of the routine uses, if there is a possibility that an individual can be identified through implicit deduction based on small cell sizes (instances where the patient population is so small that individuals who are familiar with the enrollees could, because of the small size, use this information to deduce the identity of the beneficiary). We are proposing to establish the following routine use disclosures of information maintained in the system:

1. To agency contractors, or consultants who have been engaged by the agency to assist in accomplishment of a CMS function relating to the purposes for this system of records and who need to have access to the records in order to assist CMS.

2. To another federal or state agency, agency of a state government, an agency established by state law, or its fiscal agent to:

a. Contribute to the accuracy of CMS's proper payment of Medicare benefits,

b. Enable such agency to administer a federal health benefits program, or as necessary to enable such agency to fulfill a requirement of a federal statute or regulation that implements a health benefits program funded in whole or in part with federal funds, and/or

c. To assist federal/state Medicaid programs within the state.

3. To providers and suppliers of services directly or through fiscal intermediaries or carriers for the administration of Title XVIII of the Social Security Act.

4. To third party contacts in situations where the party to be contacted has, or is expected to have information relating to the individual's capacity to manage his or her affairs or to his or her eligibility for, or an entitlement to, benefits under the Medicare program and,

a. The individual is unable to provide the information being sought (an individual is considered to be unable to provide certain types of information when any of the following conditions exists: the individual is confined to a mental institution, a court of competent jurisdiction has appointed a guardian to manage the affairs of that individual, a court of competent jurisdiction has declared the individual to be mentally incompetent, or the individual's attending physician has certified that the individual is not sufficiently mentally competent to manage his or her own affairs or to provide the information being sought, the individual cannot read or write, cannot afford the cost of obtaining the information, a language barrier exist, or the custodian of the information will not, as a matter of policy, provide it to the individual), or

b. The data are needed to establish the validity of evidence or to verify the accuracy of information presented by the individual, and it concerns one or

more of the following: the individual's entitlement to benefits under the Medicare program, the amount of reimbursement, and in cases in which the evidence is being reviewed as a result of suspected fraud and abuse, program integrity, quality appraisal, or evaluation and measurement of activities.

5. To Peer Review Organizations (PRO) in connection with review of claims, or in connection with studies or other review activities, conducted pursuant to Part B of Title XI of the Social Security Act and in performing affirmative outreach activities to individuals for the purpose of establishing and maintaining their entitlement to Medicare benefits or health insurance plans.

6. To insurance companies, third party administrators (TPA), employers, self-insurers, managed care organizations, other supplemental insurers, non-coordinating insurers, multiple employer trusts, group health plans (i.e., health maintenance organizations (HMO), Cost Plans, or a Medicare-approved health care prepayment plan (HCPP), Programs for All Inclusive Care for the Elderly, Medicare + Choice Organizations (i.e. Coordinated Care Plans (CCPs), Religious Based Fraternal Plans Private Fee For Service (PFFS), Medical Savings Accounts (MSAs), Demonstrations) directly or through a contractor. Information to be disclosed shall be limited to Medicare enrollment data. In order to receive the information, they must agree to:

a. Certify that the individual about whom the information is being provided is one of its insured or employees;

b. Utilize the information solely for the purpose of processing the individual's insurance claims; and

c. Safeguard the confidentiality of the data and prevent unauthorized access.

7. To an individual or organization for a research project or to support an evaluation project related to the prevention of disease or disability, the restoration or maintenance of health, or payment related projects.

8. To a Member of Congress or to a congressional staff member in response to an inquiry of the congressional office made at the written request of the constituent about whom the record is maintained.

9. To the Department of Justice (DOJ), court or adjudicatory body when:

a. The agency or any component thereof, or

b. Any employee of the agency in his or her official capacity, or

c. Any employee of the agency in his or her individual capacity where the DOJ has agreed to represent the employee, or

d. The United States Government, is a party to litigation or has an interest in such litigation, and by careful review, CMS determines that the records are both relevant and necessary to the litigation.

10. To a CMS contractor (including, but not limited to fiscal intermediaries and carriers) that assists in the administration of a CMS-administered health benefits program, or to a grantee of a CMS-administered grant program, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud or abuse in such programs.

11. To another federal agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States (including any state or local governmental agency), that administers, or that has the authority to investigate potential fraud or abuse in, a health benefits program funded in whole or in part by federal funds, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud or abuse in such programs.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All records are stored on magnetic media.

RETRIEVABILITY:

All Medicare records are accessible by Health Insurance Claim Number, and SSN search. This system supports both on-line and batch access.

SAFEGUARDS:

CMS has safeguards for authorized users and monitors such users to ensure against excessive or unauthorized use. Personnel having access to the system have been trained in the Privacy Act and systems security requirements. Employees who maintain records in the system are instructed not to release any data until the intended recipient agrees to implement appropriate administrative, technical, procedural, and physical safeguards sufficient to protect the confidentiality of the data and to prevent unauthorized access to the data.

In addition, CMS has physical safeguards in place to reduce the exposure of computer equipment and thus achieve an optimum level of protection and security for the MBD system. For computerized records, safeguards have been established in accordance with the Department of Health and Human Services (HHS) standards and National Institute of Standards and Technology guidelines, e.g., security codes will be used, limiting access to authorized personnel. System securities are established in accordance with HHS, Information Resource Management (IRM) Circular No. 10, "Automated Information Systems Security Program;" CMS's "IT Systems Securities Policies, Standards, and Guidelines Handbook;" OMB Circular No. A–130 (revised), Appendix III.

RETENTION AND DISPOSAL:

Records are maintained in the active files for a period of 15 years. The records are then retired to archival files maintained at the Health Care Data Center.

SYSTEM MANAGER(S) AND ADDRESS:

Acting Director, Center for Medicare Choices & Deputy Director for Beneficiary Education in the Center for Beneficiary Choices, CMS, 7500 Security Boulevard, C5–18–27, Baltimore, Maryland 21244–1850.

NOTIFICATION PROCEDURE:

For purpose of access, the subject individual should write to the system manager who will require the system name, health insurance claim number, address, date of birth, and sex, and for verification purposes, the subject individual's name (woman's maiden name, if applicable), and social security number (SSN). Furnishing the SSN is voluntary, but it may make searching for a record easier and prevent delay.

RECORD ACCESS PROCEDURE:

For purpose of access, use the same procedures outlined in Notification Procedures above. Requestors should also reasonably specify the record contents being sought. (These procedures are in accordance with department regulation 45 CFR 5b.5(a)(2)).

CONTESTING RECORD PROCEDURES:

The subject individual should contact the system manager named above, and reasonably identify the record and specify the information to be contested. State the corrective action sought and the reasons for the correction with supporting justification. (These procedures are in accordance with department regulation 45 CFR 5b.7).

RECORD SOURCE CATEGORIES:

The data contained in this system of records are extracted from other CMS systems of records: Enrollment Database, Group Health Plan, and the Medicaid Statistical Information System.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Appendix A. Health Insurance Records

Medicare records are maintained at the CMS Central Office (see section 1 below for the address). Health Insurance Records of the Medicare program can also be accessed through a representative of the CMS Regional Office (see section 2 below for addresses). Medicare records are also maintained by private insurance organizations that share in administering provisions of the health insurance programs. These private insurance organizations, referred to as Managed Care Organizations, are under contract to the Centers for Medicare & Medicaid Services and the Social Security Administration to perform specific task in the Medicare program (see section three below for information on MCOs).

1. *Central Office Address:* CMS Data Center, 7500 Security Boulevard, North Building, First Floor, Baltimore, Maryland 21244–1850.

2. *CMS Regional Offices:* BOSTON REGION—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont. John F. Kennedy Federal Building, Room 1211, Boston, Massachusetts 02203. Office Hours: 8:30 a.m.–5 p.m.

NEW YORK REGION—New Jersey, New York, Puerto Rico, Virgin Islands. 26 Federal Plaza, Room 715, New York, New York 10007. Office Hours: 8:30 a.m.–5 p.m.

PHILADELPHIA REGION—Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia. Post Office Box 8460, Philadelphia, Pennsylvania 19101. Office Hours: 8:30 a.m.–5 p.m.

ATLANTA REGION—Alabama, North Carolina, South Carolina, Florida, Georgia, Kentucky, Mississippi, Tennessee. 101 Marietta Street, Suite 702, Atlanta, Georgia 30223. Office Hours: 8:30 a.m.–4:30 p.m.

CHICAGO REGION—Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin. Suite A—824, Chicago, Illinois 60604. Office Hours: 8 a.m.–4:45 p.m.

DALLAS REGION—Arkansas, Louisiana, New Mexico, Oklahoma, Texas, 1200 Main Tower Building, Dallas, Texas. Office Hours: 8 a.m.–4:30 p.m.

KANSAS CITY REGION—Iowa, Kansas, Missouri, Nebraska. New Federal Office Building, 601 East 12th Street, Room 436, Kansas City, Missouri 64106. Office Hours: 8 a.m.–4:45 p.m.

DENVER REGION—Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming. Federal Office Building, 1961 Stout Street, Room 1185, Denver, Colorado 80294. Office Hours: 8 a.m.–4:30 p.m.

SAN FRANCISCO REGION—American Samoa, Arizona, California, Guam, Hawaii, Nevada. Federal Office Building, 10 Van Ness Avenue, 20th Floor, San Francisco, California 94102. Office Hours: 8 a.m.–4:30 p.m.

SEATTLE REGION—Alaska, Idaho, Oregon, Washington. 1321 Second Avenue, Room 615, Mail Stop 211, Seattle, Washington 98101. Office Hours 8 a.m.–4:30 p.m.

3. *Managed Care Organizations:* Monthly report of Managed Care Organizations is available at *www.cms.gov.*

BILLING CODE 4120–03–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Statement of Organization, Functions, and Delegations of Authority

This notice amends Part R of the Statement of Organization, Functions and Delegations of Authority of the Department of Health and Human Services (DHHS), Health Resources and Services Administration (60 FR 56605 as amended November 6, 1995, as last amended at 66 FR 56333–34, dated November 7, 2001).

This notice establishes the Office for the Advancement of Telehealth and revises the functional statement for the Office of Policy and Program Development (RV3) in the HIV/AIDS Bureau (RV).

1. Establish the Office for the Advancement of Telehealth as follows:

Office for the Advancement of Telehealth (RV9)

Telehealth is the use of electronic communications and information technologies to provide and support health care services and training when distance separates the participants. The Office for the Advancement of Telehealth (OAT) serves as the focal point for coordinating and advancing the use of electronic communications and information (telehealth) technologies across all of HRSA's programs. Telehealth information can be used in a broad array of applications, including, but not limited to, the provision of: health care at a distance (telemedicine); distance-based learning to improve the knowledge of the agency grantees, and others; and improved information dissemination to both consumers and providers about the latest developments in health care, and other activities designed to improve the health status of the nation. The Office for the Advancement of Telehealth carries out the following functions, specifically; (1) provides leadership in developing and coordinating telehealth programs and policies; (2) provides professional assistance and support in developing telehealth initiatives; (3) administers grant programs to promulgate and evaluate the use of appropriate telehealth technologies among grantees and others; (4) in conjunction with HRSA's OIT assesses new and existing telehealth technologies and advises on strategies to maximize the potential of these technologies for meeting educational and technical assistance objectives; (5) in conjunction with OIT disseminates the latest information and research findings related to the use of telehealth technologies in the agency programs and underserved areas, including findings on "best practices"; (6) works with other components of the Department, with other Federal and state agencies, and with the private sector to promote and overcome barriers to cost-effective telehealth programs; and (7) provides advise on telehealth policy.

2. Abolish the functional statement for the Office of Policy and Program Development (RV3) in its entirety and replace with the following:

Office of Policy and Program Development (RV3)

Serves as the Bureau's focal point for program planning and related coordination activities including the development and dissemination of program objectives, alternatives, policy statements and the formulation and interpretation of program related policies. Specifically: (1) Advises the Associate Administrator and Division Directors in the development of plans and proposals to support Administration goals, and serves as the primary staff unit on special projects for the Associate Administrator; (2) coordinates with the Office of Planning and Evaluation, HRSA, and other appropriate offices in the preparation of

HIV/AIDS-related program policies including the preparation of testimony and related information to be presented to the Congress; (3) monitors and analyzes HIV/AIDS-related policy developments, both within and outside the Department, for their potential impact on HIV/AIDS activities, and advises the Associate Administrator on alternative courses of action for responding to such developments; (4) organizes, guides, and coordinates the Bureau's program planning and development activities, and prepares the Bureau's strategic planning agenda; (5) provides staff services and coordinates activities pertaining to policy and position papers to assure the fullest possible consideration of programmatic requirements in meeting established departmental, and HRSA goals; (6) maintains liaison with the Agency, Department, and other agencies; (7) participates in the development and coordination of program policies and implementation plans, including the development, clearance, and dissemination of regulations, criteria, guidelines, and operating procedures; (8) serves as the point of contact for the Agency, developing and coordinating working relationships and conducts specific joint activities among programs to assure optimum interaction on related HIV/AIDS activities and to minimize duplication and overlap; (9) conducts special inquiries and studies with emphasis on coordinating, managing and/or undertaking special projects which cut across Office or Division lines and responsibilities; (10) coordinates Bureau and HRSA comments on HIV/AIDS-related reports, position papers, and related issues; (11) coordinates responses to requests for information received from other OPDIVs of the Department and from outside the Department; (12) provides program policy interpretation and technical assistance to other governmental and private organizations and institutions; and (13) develops and coordinates performance measures.

3. In the HIV/AIDS Bureau, abolish the Office of Communications and Information Dissemination (RV8).

Delegation of Authority

All delegations and redelegations of authorities to officers and employees of the Health Resources and Services Administration which were in effect immediately prior to the effective date of this action will be continued in effect in them or their successors, pending further redelegation, provided they are consistent with this action.

This document is effective upon date of signature.

Dated: November 30, 2001.

Elizabeth M. Duke,

Acting Administrator.

[FR Doc. 01–30233 Filed 12–5–01; 8:45 am]

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (301) 443–7978.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project

Notification of Intent To Use Schedule III, IV, or V Opioid Drugs for the Maintenance and Detoxification Treatment of Opioid Addiction Under 21 U.S.C. 823(g)(2)

—(New)—The Drug Addiction Treatment Act of 2000 ("DATA," Pub. L. 106–310 (21 U.S.C. 823(g)(2)) amended the Controlled Substances Act to permit practitioners (physicians) to seek and obtain waivers to prescribe certain approved narcotic treatment drugs for the treatment of opiate addiction. The legislation sets eligibility requirements and certification requirements as well as an interagency application process for physicians who seek waivers.

To implement these new provisions, SAMHSA has developed a notification form to permit it to determine whether practitioners (i.e., individual physicians and physicians in group practices (as defined under section 1877(h)(4) of the Social Security Act, licensed to practice medicine) meet the qualifications for waivers set forth under the new law. The information entered on the form will assist SAMHSA in determining whether practitioners are eligible for a waiver. The Secretary will convey practitioner determination to the Drug Enforcement Administration (DEA), which will assign an identification number to qualifying practitioners; this number will be included in the practitioner's registration under 21 U.S.C. 823(f). Practitioners will also use this notification form to renew their waivers at the time they renew their DEA practitioner registration—every three years.

Practitioners will use the form for three types of notification: (a) New, (b) emergency, and (c) renewal. Under "new" notifications, practitioners will make their initial waiver requests to SAMHSA. "Emergency" notifications will inform SAMHSA and the Attorney General of a practitioner's intent to prescribe immediately to facilitate the treatment of an individual (one) patient under 21 U.S.C. 823(g)(2)(E)(ii). "Renewal" notifications will be submitted to HHS to initiate review of an identification number already provided by DEA.

The form will collect data on the following items: Practitioner name; state medical license number and DEA registration number; address of primary location, telephone and fax numbers; e-mail address; name and address of group practice; group practice employer identification number; names and DEA registration numbers of group practitioners; purpose of notification (new, emergency, or renewal); name of narcotic drugs or combinations for use under the notification; certification of qualifying criteria for treatment and management of opiate-dependent patients; certification of capacity to refer patients for appropriate counseling and other appropriate ancillary services; certification of maximum patient load.

At present, there are no narcotic drugs or combinations for use under notifications; however, SAMHSA believes that it is appropriate to develop a notification system to implement DATA in anticipation of narcotic treatment medications becoming available in the future. Respondents will be able to submit the form electronically, through a dedicated Web page that SAMHSA will establish for the purpose, as well as via U.S. mail.

The following table summarizes the estimated annual burden for the use of this form.

Purpose of submission	Number of respondents	Responses per respondent	Burden per response (hr.)	Total burden (hrs.)
Initial Application for Waiver	1,200	1	.083	100
Notification to Prescribe Immediately	33	1	.083	3
Application for Renewal	1,200	1	.083	100
Total	1,200			203

Send comments to Nancy Pearce, SAMHSA Reports Clearance Officer, Room 16–105, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. Written comments should be received within 60 days of this notice.

Dated: November 29, 2001.

Richard Kopanda,

Executive Officer, Substance Abuse and Mental Health Services Administration.

Fish and Wildlife Service

Notice of Issuance of Permit for Marine Mammals

On July 11, 2001, a notice was published in the **Federal Register** (66 FR 36295), that an application had been filed with the Fish and Wildlife Service by Harbor Branch Oceanographic Institution, Fort Pierce, FL, for a permit (PRT–038605) to take for scientific research 6 captive held, 2 captive born, as well as 1 Pre-Act, West Indian manatee (*Trichechus manatus*) for scientific research.

Notice is hereby given that on October 30, 2001, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*), and the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*), the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On July 25, 2001, a notice was published in the **Federal Register** (66 FR 38739), that an application had been filed with the Fish and Wildlife Service by Michael Walker for a permit (PRT–045478) to import one polar bear taken from the Northern Beaufort Sea population, Canada for personal use.

Notice is hereby given that on October 22, 2001, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On July 25, 2001, a notice was published in the **Federal Register** (66 FR 38739), that an application had been filed with the Fish and Wildlife Service by John D. Harris for a permit (PRT–045396) to import one polar bear taken from the Lancaster Sound population, Canada for personal use.

Notice is hereby given that on October 22, 2001, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On July 25, 2001, a notice was published in the **Federal Register** (66 FR 38739), that an application had been filed with the Fish and Wildlife Service by Michael E. Walker for a permit (PRT–045478) to import one polar bear taken from the Northern Beaufort Sea population, Canada for personal use.

Notice is hereby given that on October 24, 2001, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

Documents and other information submitted for these applications are available for review by any party who submits a written request to the U.S. Fish and Wildlife Service, Division of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203, telephone (703) 358–2104 or fax (703) 358–2281.

Dated: November 2, 2001.

Anna Barry,

Senior Permit Biologist, Branch of Permits, Division of Management Authority.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[OR 020–02–1610–DO–241A,HAG02–0007]

Harney and Malheur Counties, OR; Andrews Resource Area, Steens Mountain; Resource Management Plan

AGENCY: Bureau of Land Management, Burns District, Andrews Field Office.

ACTION: Notice of Intent to (1) prepare a Resource Management Plan (RMP) for the Andrews Resource Area (ARA) and (2) prepare a management plan for the Steens Mountain Cooperative Management and Protection Area (CMPA), designated October 30, 2000. These actions will be addressed in a single Environmental Impact Statement (EIS). The ARA is located in Harney and Malheur Counties, Oregon. The CMPA lies solely within Harney County, largely within the ARA, and to a lesser extent, within the Three Rivers Resource Area (RA), Burns District.

SUMMARY: This document provides notice that the Bureau of Land Management (BLM) intends to prepare an RMP, with an associated EIS, for the ARA/CMPA. This planning activity encompasses approximately 1,723,564 acres of public land, including 425,550 acres in the CMPA. The area to be addressed involves the ARA, the CMPA, and a small segment of the Burns District's Three Rivers RA, which is included in the CMPA. Depending on the alternative selected and approved, a portion of the Three Rivers RMP may be amended by this planning effort.

The plan will fulfill the needs and obligations set forth by the National Environmental Policy Act (NEPA), the Federal Land Policy and Management Act (FLPMA), the Steens Mountain Cooperative Management and Protection Act of 2000 (Act), and BLM management policies. The analysis and resulting decisions will also meet the requirements of the Wilderness Act and Wild and Scenic Rivers Act, as applicable. The BLM will work closely with the Steens Mountain Advisory

Council (SMAC), a citizen's advisory group established by the Act, and with other interested parties to collaboratively identify the management decisions that are best suited to local, regional and national needs and concerns.

This notice gives early notification of the public scoping process, which is designed to identify planning issues and develop planning criteria. The SMAC will initiate the scoping process through its work on preliminary planning issues, criteria and alternatives. The scoping process will also include opportunity for internal and external review of the existing management plan.

DATES: The formal scoping comment period is expected to begin in January 2002 with publication of a notice in local newspapers and other media. Formal scoping will end sixty days after publication of that notice. At least 15 days public notice will be given for activities for which the public is invited to attend. Written comments will be accepted throughout the planning process at the address shown below.

Public Participation

The SMAC will be the primary public advisory group for this planning effort. In addition, open-house type public meetings will be held during the scoping and plan preparation period. Public meetings will be held in Burns, Oregon, and at other communities as interest warrants. Early participation by all those interested is encouraged and will help determine the future management of the CMPA and ARA. All public comments and lists of attendees for each meeting will be available to the public and open for 30 days to participants who wish to clarify the views they expressed. Meetings and comment deadlines will be announced through the local news media, newsletters and the Burns BLM web site (*www.or.blm.gov/Burns/*). I n addition to the ongoing public participation process, formal opportunities for public participation will be provided through comment on the alternatives and upon publication of the Draft RMP/EIS.

ADDRESSES: Written comments should be sent to Andrews Resource Management Plan, Bureau of Land Management, Burns District Office, HC 74–12533, Highway 20 West, Hines, Oregon 97738; Fax (541) 573–4411, or e-mail (*rkarges@or.blm.gov*). Documents pertinent to this proposal may be examined at the Burns District Office in Hines, Oregon. Comments, including names and street addresses of respondents, will be available for public review at the Burns District Office during regular business hours, 7:45 a.m. to 4:30 p.m., Monday through Friday, except holidays, and may be published as part of the EIS. Individual respondents may request confidentiality. If you wish to withhold your name or street address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations and businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety.

FOR FURTHER INFORMATION CONTACT: For further information and/or to have your name added to our mailing list, contact Rhonda Karges, Telephone (541) 573–4433 or Gary Foulkes, Telephone (541) 573–4541 at the BLM Burns District Office.

SUPPLEMENTARY INFORMATION: The creation of the CMPA, including 169,465 acres of the newly created Steens Mountain Wilderness Area, along with the changing needs and interests of the public, necessitate formulation of the Andrews/Steens RMP. The new ARA RMP and the management plan for the CMPA will be combined into one planning effort. In addition, management plans for the Steens Wilderness and WSRs, as well as a transportation plan for the CMPA will be incorporated into the RMP.

Some preliminary issues and management concerns were identified when the Act was developed, through subsequent meetings with individuals and user groups, and by BLM personnel. Major issue themes that will be addressed in the plan effort include: upland and watershed management; riparian areas and wetlands; woodlands management; vegetation; wildlife habitat; special status species; energy and minerals; special management areas; fire/fuels management; recreation management; lands and realty issues; wild horses; cultural resources; noxious weeds; Off Highway Vehicle management; water quality/aquatic resources/fisheries; transportation; and socio-economics. After gathering public comments on issues that the plan should address and reviewing them in concert with the SMAC, the issues will be placed in one of three categories:

1. Issues to be resolved in the plan;
2. Issues resolved through policy or administrative action; or
3. Issues beyond the scope of the plan.

Rationale will be provided in the plan for each issue placed in category two or three. In addition to these major issues, a number of management questions and concerns will be addressed in the plan. The public is encouraged to help identify these questions and concerns during the scoping phase. An interdisciplinary approach will be used to develop the plan in order to consider the variety of resource issues and concerns identified. Disciplines involved in the planning process will include (but not be limited to) those with expertise in rangeland management, minerals and geology, botany, forestry, outdoor recreation, wilderness management, archaeology, paleontology, wildlife and fisheries, lands and realty, hydrology, soils, sociology and economics.

Background Information

The CMPA was established through an Act of Congress (P.L. 106–399). Special Management Areas created within the CMPA include: the Wildland Juniper Management Area; the Steens Mountain Wilderness, which contains a No Livestock Grazing Area; new Wild and Scenic River (WSR) designations; and a Redband Trout Reserve. Congress recognized that the CMPA fosters exceptional cooperative management opportunities and offers outstanding natural, cultural, scenic, wilderness, and recreational resources. To ensure those resources are appropriately managed, the Act mandated that BLM prepare a management plan for the CMPA by October 30, 2004.

In 1995, preparation of the Southeastern Oregon Resource Management Plan (SEORMP) was initiated by the BLM, Vale and Burns District Offices. The SEORMP initially included the ARA. As a result of the Act, however, the Andrews Field Office determined it was necessary to create a separate RMP for the ARA and CMPA to address changes in management resulting from the Act.

Consequently, the ARA is no longer addressed in the SEORMP. The ARA has been managed under the Andrews Management Framework Plan since 1982 and the grazing decisions in the Andrews Rangeland Program Summary (RPS) since 1984. Part of a 900,000 acre Mineral Withdrawal Area designated by the Act is within Malheur County and Vale District's Jordan Resource Area, and the effects of the withdrawal on

those lands have been addressed in the SEORMP.

Miles Brown,

Andrews Field Office Manager.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY–040–01–1610]

Notice of Intent To Prepare an Environmental Impact Statement for the Coordinated Activity Plan for the Jack Morrow Hills Area, Sweetwater, Fremont, and Sublette Counties, WY

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: The Bureau of Land Management (BLM) Rock Springs Field Office proposes to prepare a Supplemental Draft Environmental Impact Statement (EIS), Coordinated Activity Plan (CAP), and amendment to the Green River Resource Management Plan (GRRMP) for the Jack Morrow Hills (JMH) area of Wyoming. The JMH CAP is an integrated activity planning effort to provide more specific management direction for certain public lands located in Sweetwater, Fremont, and Sublette Counties, Wyoming. The JMH CAP will amend the GRRMP with regard to fluid mineral leasing and mineral location. Comments to the draft EIS for the CAP, issued in July 2000, resulted in the submission of new resource information; consequently, the BLM is preparing a supplemental draft EIS for the JMH CAP. To the extent possible, existing analyses and information used to prepare the original draft EIS will be updated and used in preparing the supplemental draft EIS.

This notice also requests any resource information, including fluid mineral resource information (oil and gas, coalbed methane), mineral location information (gold, diamonds), operational or development plans, and other resource information that will help in developing fluid mineral and mineral location management direction, Resource Management Plan (RMP) decisions, and in analyzing environmental impacts.

DATES: The official scoping period for this planning effort will commence with the publication of this notice. Open house workshops will be scheduled in Lander and Rock Springs, Wyoming, during the week of December 9, 2001. Two scoping meetings will be held in these same locations during the week of January 6, 2002. Notification of the open house-information sharing workshops and the scoping meetings will be done through public notices, media news releases, internet postings, and/or mailings. The purpose of these workshops and scoping meetings is to share information, identify specific concerns and issues pertaining to the various resource and land use values in the JMH CAP planning area, and to identify any data gaps, needs and data sources pertaining to the area. Scoping comments must be submitted by January 11, 2002, or within 30 days of publication of this notice, whichever occurs later.

Future meetings, hearings, or any other public involvement activities will be scheduled as needed. Notification of these activities will be through other public notices, media news releases, internet postings, or mailings.

ADDRESSES: Scoping comments must be submitted to: Rock Springs BLM Field Office, 280 Highway 191 North, Rock Springs, Wyoming 82901. Comments submitted by electronic mail should be sent to: *rock_springs_wymail@blm.gov*, reference Supplemental Draft in the subject line. All comments must include legible full name and return address on the envelope, letter, postcard, or e-mail. Public comments submitted for this planning effort, including names and street addresses of respondents, will be available for public review after the comment period closes at the Rock Springs Field Office during regular business hours (7:45 a.m. to 4:30 p.m.), Monday through Friday, except holidays. All submissions from organizations, or businesses, and from individuals who are representatives or officials of organizations, or businesses, will be made available for public inspection in their entirety. Individual respondents may request confidentiality. If you wish to withhold your name or address from public review, or from disclosure, under the Freedom of Information Act, you must state this prominently at the beginning of your comments. Such requests will be honored to the extent allowed by law.

FOR FURTHER INFORMATION CONTACT: Andy Tenney, Assistant Team Leader, Bureau of Land Management, Rock Springs Field Office, 280 Highway 191 North, Rock Springs, Wyoming 82901–3447, telephone number 307–352–0311.

SUPPLEMENTARY INFORMATION: The JMH CAP planning area contains 622,340 acres of Federal, State, and private lands. It includes Steamboat Mountain, the Greater Sand Dunes, White Mountain Petroglyphs, and Oregon Buttes Areas of Critical Environmental Concern (ACEC); seven wilderness study areas; and part of the South Pass Historic Landscape ACEC. BLM has deferred fluid mineral leasing and mineral location decisions in the Jack Morrow Hills core area and has placed a moratorium on fluid mineral leasing throughout the JMH CAP planning area pending completion of this CAP. This planning effort will address the leasing and development of energy resources; transportation planning, access, designation of roads; wildlife habitat and vegetation management; livestock grazing practices; and other issues.

In conformance with the Federal Land Policy and Management Act (FLPMA) and the National Environmental Policy Act (NEPA), a supplemental draft EIS will be prepared in the course of developing the CAP. The existing GRRMP and interim management criteria will guide management actions in the JMH CAP area until the CAP is completed.

BLM invites public identification of the issues that should be addressed in the JMH CAP planning process. Comments may be sent to the address above. Preliminary issues that have been identified to date include:

Issue 1: Minerals Resource Management and Rights-of-Way.

Issue 2: Resource Uses Affecting Vegetation, Soils, Air, and Watershed Values.

Issue 3: Recreation and Cultural Resource Management.

Issue 4: Special Management Area Resource Management.

Public participation will be an essential component of the supplemental draft EIS and Coordinated Activity Plan preparation process. Several techniques for public involvement will be used including: **Federal Register** announcements, one-to-one discussion with key groups and individuals interested in the JMH CAP area, internet postings, news releases and articles in the local media, and individual mailings to all parties who have expressed an interest in the process. For those persons wishing to be placed on this mailing list, a BLM contact is provided elsewhere in this notice.

RMP level decisions to be made through the CAP will constitute amendment to the Green River RMP and will be subject to protest by parties who participate in the planning process and who have an interest which is, or may be, adversely affected by the adoption of RMP decision as provided by Title 43, Code of Federal Regulations, § 1610.5–2 (43 CFR 1610.5–2).

Dated: November 13, 2001.
Alan R. Pierson,
State Director.

State Office Move; Oregon and Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice announces the move of the Bureau of Land Management (BLM) Oregon/Washington State Office, and the temporary closure of the Land Office during the move.

FOR FURTHER INFORMATION CONTACT: Sherrie L. Reid, Chief Realty Records Section, BLM Oregon/Washington State Office, 1515 S.W. 5th Ave., PO Box 2965, Portland, Oregon 97208–2955, (503)952–6655.

SUPPLEMENTARY INFORMATION: Effective at the close of business on January 16, 2002, the Land Office of the BLM Oregon State Office will close for the purpose of moving to 333 S.W. 1st. Ave., Portland, Oregon 97204. The Land Office provides access to and inspection of the official Public Land Tenure Records and Cadastral Survey Records of the Federal Government, and the serialized case files of active land and mineral transactions for Oregon and Washington. The Land Office will reopen, at the new address, at 8:30 a.m. on Monday, January 28, 2002. The Land Office telephone number will be (503) 808–6001.

The BLM Oregon State Office mailing address for delivery by the U.S. Post Office will remain PO Box 2965, Portland, Oregon 97208–2965. For other commercial delivery services that require a street address, the BLM Oregon State Office Warehouse address is: 14015 N.E. Airport Way, Portland, Oregon 97230.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV–930–4210–05; N–37128]

Notice of Realty Action: Lease/Conveyance for Recreation and Public Purposes

AGENCY: Bureau of Land Management, Interior.

ACTION: Recreation and Public Purpose Lease/Conveyance—Change of Use.

SUMMARY: The following described public land in Las Vegas, Clark County, Nevada has been examined and found suitable for lease/conveyance for recreational or public purposes under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*) (R&PP). This land was previously segregated for R&PP on March 12, 1992, in the **Federal Register** under (NV–930–92–4212–11; N–55370 *et al.*) on page 3777, for case file N–41565–07. The City of Las Vegas proposes to amend its existing lease, N–37128, to include the land as part of a public park.

Mount Diablo Meridian, Nevada

T. 20 S., R. 60 E., sec 27
SW¼NE¼NW½
Containing 10 acres, more or less.

The land is not required for any federal purpose. The lease/conveyance is consistent with current Bureau planning for this area and would be in the public interest. The lease/patent, when issued, will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior, and will contain the following reservations to the United States:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

And will be subject to:

1. An easement 25 feet in width along the South boundary and 20 feet in width along the West boundary in favor of the City of Las Vegas for road, sewer, public utilities and flood control purposes.

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas Field Office, 4765 W. Vegas Drive, Las Vegas, Nevada.

2. Those rights for public utility purposes which have been granted to the Nevada Power Company by Permit No. N–59745, and to the Las Vegas Valley Water District by Permit No. N–56526, and to the City of Las Vegas by Permit No. N–47872 under the Act of October 26, 1976 (FLPMA).

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas Field Office, 4765 W. Vegas Drive, Las Vegas, Nevada.

Upon publication of this notice in the **Federal Register**, the above described land will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for lease/conveyance under the Recreation and Public Purposes Act, leasing under the mineral leasing laws and disposals under the mineral material disposal laws. For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments regarding the proposed lease/conveyance for classification of the lands to the Field Manager, Las Vegas Field Office, Las Vegas, Nevada 89108.

Classification Comments

Interested parties may submit comments involving the suitability of the land for a public park. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, or if the use is consistent with State and Federal programs.

Application Comments

Interested parties may submit comments regarding the specific use proposed in the application and plan of development, whether the BLM followed proper administrative procedures in reaching the decision, or any other factor not directly related to the suitability of the land for a public park.

Any adverse comments will be reviewed by the State Director.

In the absence of any adverse comments, the classification of the land described in this Notice will become effective 60 days from the date of publication in the **Federal Register**. The lands will not be offered for lease/conveyance until after the classification becomes effective.

Dated: October 26, 2001.

Rex Wells,

Assistant Field Manager, Division of Lands, Las Vegas, NV.

Notice of Intent To Prepare a Resource Management Plan for the Black Rock Desert-High Rock Canyon Emigrant Trails National Conservation Area, et al.; Nevada

AGENCY: Bureau of Land Management, Winnemucca (Nevada) and Surprise (California) Field Offices, Department of the Interior.

ACTION: Notice of intent to prepare a Resource Management Plan for the Black Rock Desert-High Rock Canyon Emigrant Trails National Conservation Area, (NCA) and associated wilderness, and other contiguous lands in Nevada.

SUMMARY: The Bureau of Land Management (BLM) Winnemucca and Surprise Field Offices will jointly prepare a RMP and an Environmental Impact Statement (EIS) for the recently designated Black Rock Desert-High Rock Canyon Emigrant Trails NCA and associated wilderness areas, designated by the Black Rock Desert-High Rock Canyon Emigrant Trails National Conservation Area Act of 2000 (Pub. L. 106–554, December 21, 2000). The following contiguous areas also will be addressed in the plan: (1) The Lahontan Cutthroat Trout Instant Study Area (ISA) and a small area of BLM administered public lands located west of the ISA between the ISA and the Summit Lake Indian Reservation, both of which are contiguous to the northern edge of the NCA; and (2) the southern part of the Black Rock Desert Playa (South Playa), which is contiguous to the southern edge of the NCA.

The planning area encompasses approximately 1,217,500 acres of public land, located in Humboldt, Pershing, and Washoe counties in northwestern Nevada. These public lands are jointly managed by the BLM Winnemucca and Surprise Field Offices. The RMP will be based on statutory requirements and will meet the requirements of the Federal Land Policy and Management Act (FLPMA) of 1976, the Wilderness Act of 1964, the Black Rock Desert-High Rock Canyon Emigrant Trails National Conservation Area Act of 2000, and other applicable provisions of law. The RMP will guide BLM's management actions within the NCA, wilderness, and identified contiguous areas. The BLM will work closely with interested parties to identify the management decisions that are best suited to the needs of the public. This collaborative process will take into account local, regional, and

national needs and concerns. This notice initiates the public scoping process to identify planning issues and to develop planning criteria.

DATES: In compliance with the enabling legislation (Black Rock Desert-High Rock Canyon Emigrant Trails National Conservation Area Act of 2000 (Pub. L. 106–554, December 21, 2000)), the plan must be completed by December 20, 2003. The public is encouraged to participate in the planning process, beginning with the identification of issues and planning criteria. The scoping comment period will commence with the publication of this notice. Formal scoping will end 60 days after publication of this notice. Comments on issues and planning criteria would be most helpful if received on or before the end of the scoping period. Public participation activities, including scoping meetings to identify issues and planning critieria, will be announced at least 15 days before the scheduled meeting in the local news media and in notices sent to persons and parties on the mailing list. In order to ensure local community participation, public meetings will be rotated among locations including, but not necessarily limited to Cedarville, California, and Gerlach, Reno, and Winnemucca, Nevada. In audition to the ongoing public participation process and the scoping meetings, formal opportunities for public participation will be provided through comment on the alternatives and upon publication of the draft RMP/draft EIS. A web site will also be established to display updated information to the public and to provide a means for submission of public comments via e-mail. Persons who would like to be placed on mailing lists, should notify the Winnemucca or Surprise Field Offices at the addresses listed below, or call (775) 623–1500.

ADDRESSES: Written comments should be sent to the attention of the NCA Resource Management Plan Project Manager, 5100 East Winnemucca Boulevard, Winnemucca, Nevada 89445, Phone (775) 623–1500. Comments, including names and street addresses of respondents, may be published as part of the EIS. Individual respondents may require confidentiality. If you wish to withhold your name or street address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations and businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety.

A map of the planning area is available at the Winnemucca Field Office (address and phone number listed above); the Surprise Field Office, 602 Cressler Street, Cedarville, CA 96104, Phone (530) 279–6101; the Nevada State Office, 1340 Financial Blvd., Reno, NV 89502, Phone (775) 861–6400; and at the California State Office, 2800 Cottage Way, Suite W–1834, Sacramento, CA 95825–1886, Phone (916) 978–4600.

FOR FURTHER INFORMATION CONTACT: Terry Reed, Field Office Manager or Roger Farschon, Acting NCA Manager, at the Winnemucca Field Office, Phone (775) 623–1500 or the Acting Surprise Field Office Manager, Phone (530) 279–6101.

SUPPLEMENTARY INFORMATION: The RMP will determine management of approximately 1,217,500 acres of federally administered public lands including: the Black Rock Desert-High Rock Canyon Emigrant Trails NCA (Approximately 800,100 acres), ten associated wilderness areas (approximately 757,100 acres), the Lahontan Cutthroat Trout ISA (approximately 13,400 acres) and a small area of BLM administered public lands located west of the ISA between the ISA and the Summit Lake Indian Reservation (approximately 2,300 acres), and the southern portion of the Black Rock Desert Playa (South Playa) (approximately 24,100 acres). Approximately 379,500 acres of wilderness are located within the boundaries of the NCA.

The public is asked to assist the BLM with the identification of issues related to management of the planning area, including the NCA and wilderness. Preliminary issues and management concerns have been identified by BLM personnel, other agencies, and in meetings with individuals and user groups. Anticipated issues include, but are not limited to the following: how will natural, cultural, and wilderness resources be protected?; how can visitor use, access and safety best be achieved?; how will NCA management be integrated with other agency and community plans and needs?; and what facilities and infrastructure are needed to provide visitor services and administration of the NCA? After gathering public comments on what issues the plan should address, the suggested issues will be placed in one of three categories: (1) Issues to be resolved in the plan; (2) issues resolved through policy or administrative action; and (3) issues beyond the scope of the plan. BLM will provide feedback to the public on the final issues to be addressed in the plan. An interdisciplinary approach will be used to develop the plan in order to consider the variety of resource issues and concerns identified. Disciplines involved in the planning process will include specialists with expertise in rangeland management, minerals and geology, forestry, outdoor recreation, archaeology, paleontology, wildlife and fisheries, land and realty, hydrology, soils, sociology, and economics.

Plan development will involve close cooperation with the State of Nevada, tribal, county and municipal governments, federal agencies, and interested groups, agencies, and individuals. The Resource Advisory Councils (RACs) for the planning area, the Sierra Front-Northwestern Great Basin RAC and the Northeast California RAC, will be used to provide additional public input. Consistent with the enabling legislation, the plan for the NCA and associated wilderness areas will emphasize the protection and enhancement of the NCA's and wilderness areas' resource values while providing the public with opportunities for compatible recreation activities. The plan for the specified contiguous areas will emphasize management consistent with applicable laws and regulations. The concerns and interest of area residents, including the activities of recreation, grazing, hunting, trapping, mining, energy development, and access will be addressed in the plan.

The Plan will incorporate appropriate decisions from existing BLM plans such as current management plans for the area. It also will use information developed and management alternatives proposed in previous studies of the lands within or adjacent to the NCA (including the Draft Sonoma-Gerlach/ Paradise Denio Plan Amendment).

Terry A. Reed,

Field Manager, Winnemucca, Nevada.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ES–960–1910–BJ–4489] ES–51270, Group 35, Missouri

Notice of Filing of Plat of Survey; Missouri

The plat of the dependent resurvey of a portion of the township boundaries and portions of the subdivisional lines

and the survey of the Lock and Dam No. 26 acquisition boundary, in Townships 48 and 49 North, Range 5 East, of the 5th Principal Meridian, Missouri, will be officially filed in Eastern States, Springfield, Virginia at 7:30 a.m., on January 8, 2002.

The survey was requested by the U.S. Army Corps of Engineers.

All inquiries or protests concerning the technical aspects of the survey must be sent to the Chief Cadastral Surveyor, Eastern States, Bureau of Land Management, 7450 Boston Boulevard, Springfield, Virginia 22153, prior to 7:30 a.m., January 8, 2002.

Copies of the plat will be made available upon request and prepayment of the appropriate fee.

Dated: November 15, 2001.

Corwyn J. Rodine,

Chief Cadastral Surveyor.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NMNM 94899, NMNM 94902, NMNM 94903]

Notice of Proposed Withdrawal and Opportunity for Public Meeting; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The United States Department of Agriculture, Forest Service, has filed applications to withdraw approximately 329.44 acres of National Forest System lands to protect the area and future investment of existing microwave electronic sites. This notice closes the National Forest System lands for up to 2 years from location and entry under the United States mining laws. The land will remain open to mineral leasing and to all other uses which may be made of National Forest System lands.

DATES: Comments must be received by March 6, 2002.

ADDRESSES: Comments should be sent to the U.S. Department of Agriculture, Forest Service, Cibola National Forest, 2113 Osuna Road, NE, Suite A, Albuquerque, New Mexico 87113–1001.

FOR FURTHER INFORMATION CONTACT: Sue McHenry, Cibola National Forest, 505–346–2650.

SUPPLEMENTARY INFORMATION: On April 12, 2001, the United States Department of Agriculture, Forest Service, filed applications to withdraw the following described National Forest System lands from location and entry under the United States mining laws, subject to valid existing rights:

1. NMNM 94899 (Microwave Electronic Site), New Mexico Principal Meridian, Cibola National Forest

T. 11 N., R. 7 W.,
Sec. 8, S½SE¼SW¼ and SW¼SW¼SE¼;
Sec. 17, W½NW¼NE¼, NE¼NW¼, N½SE¼NW¼, SW¼SE¼NW¼, and SE¼SW¼NW¼.

The area described contains 130 acres in Cibola County.

2. NMNM 94902 (Capilla Peak Electronic Site), New Mexico Principal Meridian

T. 5 N., R. 5 E.,
Sec. 3, W½ of lot 2, E½ of lot 3, E½W½ of lot 3, NE¼NW¼SW¼NE¼, W½W½SW¼NE¼, SE¼SE¼SW¼NW¼, E½SE¼NW¼, SW¼SE¼NW¼, N½NE¼NE¼SW¼, SW¼NE¼NE¼SW¼, NW¼NE¼SW¼, E½NE¼NW¼SW¼, and NW¼NE¼NW¼SW¼.
T. 6 N., R. 5 E.,
Sec. 34, E½SE¼SE¼SW¼ and W½SW¼SW¼SE¼.

The area described aggregates 131.94 acres in Torrance County.

3. NMNM 94903, East La Mosca Electronic Site, New Mexico Principal Meridian

T. 12 N., R. 7 W.,
Sec. 20, E½E½SE¼SE¼NE¼;
Sec. 21, W½W½SW¼SW¼NW¼.

The area described contains 5.0 acres in Cibola County.

La Mosca Peak Electronic Site, New Mexico Principal Meridian

T. 20 N., R. 7 E.,
Sec. 20, SW¼SW¼NW¼NE¼, W½W½SW¼NE¼, S½NW¼NE¼NW¼, SW¼NE¼NW¼, NW¼SE¼NE¼NW¼, S½SE¼NE¼NW¼, NE¼SE¼NW¼, N½NW¼SE¼NW¼, NW¼NW¼SE¼, and N½N½SW¼NW¼SE¼.

The area described contains 62.5 acres in Cibola County.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Cibola National Forest Supervisor at the above address.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the Cibola National Forest Supervisor, at the above address, within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The applications will be processed in accordance with the regulations set forth in 43 CFR 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the lands will be segregated as specified above unless the applications are denied or canceled or the withdrawals are approved prior to that date. The temporary uses which will be permitted during this segregative period are land uses permitted by the Forest Service under existing laws and regulations including, but not limited to, construction and operation of the electronic sites.

Dated: November 6, 2001.

Steven W. Anderson,

Acting Albuquerque Field Manager.

BILLING CODE 3410–11–P

DEPARTMENT OF THE INTERIOR

National Park Service

Availability of Record of Decision for the General Management Plan for Cane River Creole National Historical Park, LA

AGENCY: National Park Service, Interior.

ACTION: Notice of availability of the Record of Decision for the Final General Management Plan and Environmental Impact Statement, Cane River Creole National Historical Park, Natchitoches Parish, Louisiana.

SUMMARY: The U.S. Department of the Interior's National Park Service signed a Record of Decision (March 29, 2001) on a General Management Plan for Cane River Creole National Historical Park.

The National Park Service will implement Alternative 1, the preferred alternative, as described in the Final General Management Plan/ Environmental Impact Statement. Cane River Creole National Historical Park will persevere and rehabilitate the cultural landscapes, historic structures, and artifacts of the two park units, Oakland and Magnolia Plantations, to reflect the continuum of history up to about 1960. This will result in few changes to the current configuration of plantation structures or the general appearance of the landscape.

The long history of the plantations and the major cultural, social, and economic stories of Louisiana plantation lifeways and agriculture that they represent will be told (interpreted) to

the public. Based on research and documentation, accounts of the lives and lifestyles of the people who lived and worked at the plantations will be shared through media and programs.

The park will provide access, parking, trails, and basic visitor services at each unit. Development at Oakland Plantation will include an access road and parking area for cars and buses. Visitors will be able to explore the site using an accessible trail system. An outdoor pavilion-style shelter will be constructed and serve as an entry portal for that site, providing visitor information and restrooms. Eventually a park maintenance facility will be constructed either offsite near Oakland or, if an offsite location cannot be found or is infeasible, then a facility will be constructed onsite in the development management area. Development at Magnolia Plantation will include parking for cars and buses, with the goal of limiting bus parking onsite and establishing additional offsite bus parking near Magnolia. An accessible trail system will be developed and will link the major resources of the site.

The parks's historic features will be interpreted, with several structures being adapted either to provide visitors interior access and services or to accommodate park management needs. At Oakland Plantation, the main plantation hours will be furnished, staffed, and interpreted. The plantation store will include a cooperating association sales outlet and interpretive exhibits. Visitors will also be able to access the interior of the mule barn, overseer's house, and quarters. Park offices will be located in the doctor's house and the seed house will be adapted initially for maintenance activities, to be converted later to educational space for groups. At Magnolia, the plantation store will be staffed and provide visitor information and restrooms. Controlled access to the gin barn's main floor will be provided. The interiors of two of the quarters will be restored for visitor access and interpretation and visitors will also have access to the interior of the overseer's house/slave hospital.

To provide the knowledge base needed to fully implement the plan, the park will engage in additional study, data collection and resource monitoring, especially of archeological and ethnographic resources, historic structures and furnishings, cultural landscapes, and visitor uses. The National Park Service will work in partnership with the Cane River National Heritage Area Commission and others to develop a joint regional visitor center and headquarters in the Natchitoches/Cane River area, outside the downtown Natchitoches historic landmark district. This facility will be important for orienting the public to the area's resources and will provide a variety of interpretive and educational opportunities. Also, park managers will pursue the possibility of developing a joint curatorial facility, possibly as part of the joint visitor center complex. The park will work collaboratively with a variety of public and private entities to encourage and fund research, education, and preservation projects and heritage events.

FOR FURTHER INFORMATION CONTACT: Laura Soullière, Superintendent, Cane River Creole National Historical Park; 400 Rapides Drive; Natchitoches, LA 71457. Telephone: (318) 352–0383.

SUPPLEMENTARY INFORMATION: The complete Record of Decision is available on the NPS planning website at *http://www.nps.gov/planning.*

Dated: November 30, 2001.

Patricia A. Hooks,

Regional Director, Southeast Region.

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337–TA–450]

In the Matter of Certain Integrated Circuits, Processes for Making Same, and Products Containing Same; Notice of Commission Decision Not To Review an Initial Determination Denying Respondents' Motion for Summary Determination of Lack of Importation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination ("ID") (Order No. 15) issued by the presiding administrative law judge (ALJ) in the above-captioned investigation, denying a motion of respondents Silicon Integrated Systems Corp. and Silicon Integrated Systems Corporation for summary determination on respondents' first affirmative defense of lack of importation.

FOR FURTHER INFORMATION CONTACT: Michael Liberman, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–3115. Copies of the ALJ's ID and all other nonconfidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–2000. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810. General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS–ON–LINE) at *http://dockets.usitc.gov/eol/public.*

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on March 6, 2001. The complainants are United Microelectronics Corporation of Hsinchu City, Taiwan; UMC Group (USA) of Sunnyvale, California; and United Foundry Service, Inc. of Hopewell Junction, New York. The respondents are Silicon Integrated Systems Corp. of Hsinchu City, Taiwan; and Silicon Integrated Systems Corporation of Sunnyvale, California. 66 FR 13567 (2001).

On September 13, 2001, complainants filed a motion for summary determination on respondents' first affirmative defense of lack of importation. On September 25, 2001, respondents filed a cross-motion for summary determination on lack of importation. On the same day, the Commission investigative attorney ("IA") filed his response in support of complainants" motion.

On October 5, 2001, complainants filed a memorandum in opposition to respondents' cross-motion for summary determination on lack of importation and a reply memorandum in support of complainants' motion for summary determination. On the same day, the IA filed his response in opposition to respondents' cross-motion for summary determination.

On October 23, 2001, complainants filed a motion for leave to file a supplemental memorandum in support of their motion, which was granted. On October 25, 2001, respondents filed a response to complainants' motion for supplemental memorandum.

On November 2, 2001, the ALJ granted complainants' motion for summary determination (Order No. 15) and denied respondents' motion for summary determination. On November 8, 2001, respondents filed petition for review of the ID. On November 16,

2001, complainants and the IA filed responses in opposition to respondents' petition.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in section 210.42 of the Commission's Rules of Practice and Procedure (19 CFR 210.42).

By order of the Commission.

Issued: December 3, 2001.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337–TA–455]

In the Matter of Certain Network Interface Cards and Access Points for Use In Direct Sequence Spread Spectrum Wireless Local Area Networks and Products Containing Same; Notice of Commission Decision Not To Review an Initial Determination Extending the Target Date for Completion of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination ("ID") (Order No. 53) issued by the presiding administrative law judge (ALJ) in the above-captioned investigation which extended the target date for completion of the investigation to January 10, 2003.

FOR FURTHER INFORMATION CONTACT: Michael Liberman, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–3115. Copies of the ALJ's ID and all other nonconfidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–2000. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810. General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS–ON–LINE) at *http://dockets.usitc.gov/eol/public.*

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on April 9, 2001, based on a complaint filed by Proxim against 14 entities. 66 FR 18507 (2001). The complaint alleged violations of section 337 of the Tariff Act of 1930 in the importation into the United States, sale for importation, and/or sale within the United States after importation of certain wireless network interface cards and access points by reason of infringement of certain claims of U.S. Letters Patents Nos. 5,077,753, 5,809,060, and 6,075,812 owned by Proxim.

On November 1, 2001, the ALJ issued an ID (Order No. 53) extending the target date for completion of the investigation to January 10, 2003. No petitions for review of the ID were filed.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in section 210.42(h) of the Commission's Rules of Practice and Procedure (19 CFR 210.42(h)).

Issued: December 3, 2001.

By order of the Commission.

Donna R. Koehnke,

Secretary.

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review; Comment Request

November 29, 2001.

The Department of Labor (DOL) has submitted the following public information collection requests (ICRs) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35). A copy of each individual ICR, with applicable supporting documentation, may be obtained by calling the Department of Labor. To obtain documentation contact Darrin King on (202) 693–4129 or e-mail: *King-Darrin@dol.gov.*

Comments should be sent to Office of Information and Regulatory Affairs, Attn: Stuart Shapiro, OMB Desk Officer for OSHA, Office of Management and Budget, Room 10235, Washington, DC 20503 ((202) 395–7316), within 30 days from the date of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Type of Review: Extension of a currently approved collection.

§ 1910.440(b)(3)	1,904,465	0.02	38,089
§ 1910.440(b)(4) and (b)(5)	601	0.50	301
Total	4,005,966		205,397

Total Annualized Capital/Startup Costs: $0.

Total Annual Costs (operating/maintaining systems or purchasing services): $0.

Description: The Standards' paperwork requirements allow employers to deviate from established diving practices and tailor diving operations to unusually hazardous diving conditions, and to analyze diving records (including hospitalization and treatment records) for information they can use to improve diving operations. These requirements are also a direct and efficient means for employers to inform dive-team members about diving-related hazards, procedures to use in avoiding and controlling these hazards, and recognizing and treating diving-related illnesses and injuries. Additionally, employers can review equipment records to ensure that employees performed the required actions, and that the equipment is in safe working order.

Disclosing the records to employees and their designated representatives permits them to identify operational and equipment conditions that may contribute to diving accidents or diving-related medical conditions. Moreover, the records provide the most efficient means for OSHA compliance officers to determine that employers are performing the regulatory requirements of the Standards.

Type of Review: Extension of a currently approved collection.

Agency: Occupational Safety and Health Administration (OSHA).

Title: Fire Brigades.

OMB Number: 1218–0075.

Affected Public: Business or other for-profit; Not-for-profit institutions; Federal Government; and State, Local, or Tribal Government.

Type of Response: Recordkeeping and Third-party disclosure.

Frequency: On occasion.

Number of Respondents: 8,391.

Number of Annual Responses: 8,391.

Estimated Time Per Response: 5 minutes to obtain a physician's certificate and 2 hours to develop an organizational statement.

Total Burden Hours: 6,042.

Total Annualized Capital/Startup Costs: $0.

Total Annual Costs (operating/maintaining systems or purchasing services): $0.

Description: 29 CFR 1910.156 requires employers to develop an organized statement for fire brigades. The organizational statement describes what the fire brigade is expected to do, and will help employees understand their duties are as fire brigade members. It also informs OSHA compliance offices of the type of fire fighting that will be performed.

Type of Review: Extension of a currently approved collection.

Agency: Occupational Safety and Health Administration (OSHA).

Title: Occupational Exposure to Hazardous Chemicals in Laboratories.

OMB Number: 1218–0131.

Affected Public: Business or other for-profit; Federal Government; and State, Local, or Tribal Government.

Type of Response: Recordkeeping and Third-party disclosure.

Frequency: On occasion; Annually; Semi-annually; and Quarterly.

Number of Respondents: 41,900.

Requirement	Annual responses	Average time per response (hours)	Estimated burden hours

Total Annual Costs (operating/maintaining systems or purchasing services): $6,190,692.

Description: The information collection requirements specified in the Cadmium in General Industry Standard (Sec. 1910.1027; "the Standard") protect employees from the adverse health effects that may result from occupational exposure to cadmium. The major information collection requirements in the Standard include conducting employee exposure monitoring, notifying employees of their cadmium exposures, implementing a written compliance program, implementing medical surveillance of employees, providing examining physicians with specific information, ensuring that employees receive a copy of their medical surveillance results, maintaining employees' exposure monitoring and medical surveillance records for specific periods, and providing access to these records by OSHA, the National Institute of Occupational Safety and Health, the employee who is the subject of the records, the employee's representative, and other designated parties.

Type of Review: Extension of a currently approved collection.

Agency: Occupational Safety and Health Administration (OSHA).

Title: Standard on Walking-Working Surfaces—29 CFR Part 1910, Subpart D.

OMB Number: 1218–0199.

Affected Public: Business or other for-profit; Not-for-profit institutions; Federal Government; and State, Local, or Tribal Government.

Type of Response: Recordkeeping and Third-party disclosure.

Frequency: Initially and On occasion.

Number of Respondents: 10,100.

Number of Annual Responses: 10,100.

Estimated Time Per Response: 3 minutes.

Total Burden Hours: 505.

Total Annualized Capital/Startup Costs: $0.

Total Annual Costs (operating/maintaining systems or purchasing services): $0.

Description: The following provisions of the Standards on Walking-Working Surfaces (29 CFR part 1910, subpart D; "the Standards") specify collection of information requirements: Secs. 1910.22(b)(2), 1910.22(d)(1), 1910.26(c)(2)(vii), and 1910.28(e)(3). These provisions require employers to: Permanently mark aisles and passageways in buildings; post signs in a conspicuous location that show floor-loading limits approved by the building official, and replace these signs if lost, removed, or defaced; mark defective ladders and remove them from service until repaired; and, if a registered professional engineer designs an outrigger scaffold, construct and erect it according to this design, and maintain at the jobsite a copy of the detailed

drawings and specifications showing the sizes and spacing of members. These paperwork requirements prevent serious injury and death among employees by notifying them of: Clearance limits in aisles and passageways to avoid improper use (and resulting impact) by mechanical-handling equipment; maximum loadings to prevent floor collapse; defective ladders that could become unstable or collapse during use; and proper construction and erection of outrigger scaffolds to avoid instability or collapse.

Type of Review: Extension of a currently approved collection.

Agency: Occupational Safety and Health Administration (OSHA).

Title: Powered Industrial Trucks.

OMB Number: 1218–0242.

Affected Public: Business or other for-profit; Not-for-profit institutions; Federal Government; and State, Local, or Tribal Government.

Type of Response: Recordkeeping and Third-party disclosure.

Frequency: On occasion; Initially; Triennially; and Annually.

Number of Respondents: 999,000.

Requirement	Annual reponses	Average response time (hours)	Estimated burden hours
Notification of Truck Approval	199,800	0.08	15,984
Notification of Truck Modifications	49,950	0.08	3,996
Notification of Front—End Attachments	19,980	0.08	1,598
Inspection of Markers	0	0.00	0
Operator Training—Initial Training	28,881	6.17	178,196

Operator Evaluation—Evaluating Rehires	231,047	0.25	57,762
Certifying Evaluation and Training	539,110	0.34	183,298
Total	1,620,714		822,191

Total Annualized Capital/Startup costs: $0.

Total Annual Costs (operating/maintaining systems or purchasing services): $0.

Description: Under the paperwork requirement specified by paragraph (a)(3) of 1910.178, employers must place a marker (e.g., label) on an approved truck indicating that a national testing laboratory accepted its design and construction.[1] Paragraph (a)(4) requires that employers obtain the manufacturer's written approval before modifying a truck in a manner that affects its capacity and safe operation; if the manufacturer grants such approval, the employer must revise capacity, operation, and maintenance instruction plates, tags, and decals accordingly. For front-end attachments not installed by the manufacturer, paragraph (a)(5) mandates that employers provide a marker on the trucks that identifies the attachment, as well as the weight of both the truck and the attachment when the attachment is at maximum elevation with a laterally centered load. Paragraph (a)(6) specifies that employers must ensure that the markers required by paragraphs (a)(3) through (a)(5) remain affixed to trucks and are legible.

Paragraphs (1)(1) through (1)(6) of 1910.178 contain the paperwork requirements necessary to certify the training provided to powered industrial truck operators. Accordingly, these paragraphs specify the following requirements for employers:

- Paragraph (1)(1)—Ensure that trainees successfully complete the training and evaluation requirements of paragraph (1) prior to operating a truck without direct supervision.
- Paragraph (1)(2)—Allow trainees to operate a truck only under the direct supervision of an individual with the knowledge, training, and experience to train operators and to evaluate their performance, and under conditions that do not endanger other employees. The training program must consist of formal instruction, practical training, and evaluation of the trainee's performance in the workplace.
- Paragraph (1)(3)—Provide the trainees with initial training on each of 22 specified topics, except on topics that the employer demonstrates do not apply to the safe operation of the truck(s) in the employer's workplace.
- Paragraphs (1)(4)(i) and (1)(4)(ii)—Administer refresher training and evaluation on relevant topics to operators found by observation or formal evaluation to operate a truck unsafely, involved in an accident or near-miss incident, or assigned to operate another type of truck, or if the employer identifies a workplace condition that could affect safe truck operations.
- Paragraph (1)(4)(iii)—Evaluate each operator's performance at least once every three years.
- Paragraph (1)(5)—Train rehires only in specific topics that they performed unsuccessfully during an evaluation and that are appropriate to the employer's truck(s) and workplace conditions.
- Paragraph (1)(6)—Certify that each operator meets the training and evaluation requirements specified by paragraph (1). This certification must include the operator's name, the training date, the evaluation date, and the identity of the individual(s) who performed the training and evaluation.

Requiring markers notifies employees of the conditions under which they can safely operate powered industrial trucks, thereby, preventing such hazards as fires and explosions caused by poorly designed electrical systems, rollovers/tipovers that result from exceeding a truck's stability characteristics, and falling loads that occur when loads exceed the lifting capacities of attachments. Certification of training and evaluation provides a means of informing employers that their employees received the training, and demonstrated the performance necessary to operate a truck within its capacity and control limitations. Therefore, by ensuring that employees operate only trucks that are in proper working order, and do so safely, employers prevent severe injury and death to truck operators and other employees who are in the vicinity of the trucks. Finally, these paperwork requirements are the most efficient means for an OSHA compliance officer to determine that an employer properly notified employees regarding the design and construction of, and modifications made to, the trucks they are operating.

[1] A national testing laboratory evaluates a truck's electrical system for fire safety.

and that an employer provided them with the required training.

Ira L. Mills,

Departmental Clearance Officer.

BILLING CODE 4510–35–M

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review; Comment Request

November 30, 2001.

The Department of Labor (DOL) has submitted the following public information collection requests (ICRs) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35). A copy of this ICR, with applicable supporting documentation, may be obtained by calling the Department of Labor. To obtain documentation contact Darrin King on (202) 693–4129 or e-mail: *King-Darrin@dol.gov*.

Comments should be sent to Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for ETA, Office of Management and Budget, Room 10235, Washington, DC 20503 ((202) 395–7316), within 30 days from the date of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Type of Review: Revision of a currently approved collection.

Agency: Employment and Training Administration (ETA).

Title: Quantum Opportunity Program (QOP) Demonstration Net Impact Evaluation.

OMB Number: 1205–0397.

Affected Public: Individuals or households.

Frequency: One time in 2002.

Number of Respondents: 846.

Number of Annual Responses: 846.

Estimated Time Per Response: 20 minutes.

Total Burden Hours: 282.

Total Annualized Capital/Startup Costs: $0.

Total Annual Costs (operating/maintaining systems or purchasing services): $0.

Description: The revision to the QOP Demonstration Net Impact Evaluation will provide for a second wave of the survey to be completed approximately 72 months after random assignment of the youth in the research sample. It will allow for an analysis of the impact of QOP on participants' outcomes including education and training, employment, earnings, public assistance participation, childbearing, and other behavior and activities. The findings will be directly relevant for the future development of employment and training policy for youth.

Ira L. Mills,

Departmental Clearance Officer.

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review; Comment Request

November 29, 2001.

The Department of Labor (DOL) has submitted the following public information collection requests (ICRs) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. Chapter 35). A copy of each individual ICR, with applicable supporting documentation, may be obtained by calling the Department of Labor. To obtain documentation contact Marlene Howze at ((202) 219–8904 or e-mail *Howze-Marlene@dol.gov*).

Comments should be sent to Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for PWBA, Office of Management and Budget, Room 10235, Washington, DC 20503 ((202) 395–7316), within 30 days from the date of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Type of Review: Extension of a currently approved collection.

Agency: Pension and Welfare Benefits Administration (PWBA).

Title: Suspension of Pension Benefits Regulation Pursuant to 29 CFR 2530.203–3.

OMB Number: 1210–0048.

Affected Public: Business or other for-profit, Individuals or households, and Not-for-profit institutions.

Frequency: On occasion.

Number of Respondents: 74,872.

Number of Annual Responses: 74,872.

Estimated Time Per Response: 15 minutes.

Total Burden Hours: 18,718.

Total Annualized Capital/Startup Costs: $0.

Total Annual Costs (operating/maintaining systems or purchasing services): $62,892.48.

Description: Section 203(a)(3)(B) of the Employee Retirement Income Security Act of 1974 (ERISA) governs the circumstances under which pension plans may suspend pension benefit payments to retirees who return to work or to participants who continue to work beyond normal retirement age. The requirement that retirees or participants be notified in the event of a suspension of benefits is intended to protect their non-forfeitable right to their normal retirement benefits. The information collection requirement ensures that the retiree or participant is informed at the initiation of every withholding or suspension of benefits.

DEPARTMENT OF LABOR

Employment and Training Administration

Disability Employment Grant Program Funded Under the Workforce Investment Act Title I, Disability Program; Notice of Changes to Solicitation for Grant Application (SGA)

On November 7, 2001, the Department of Labor (DOL) announced in the **Federal Register** (Vol. 66, No. 216; pp. 56347–56358) a solicitation for grant applications (SGA) for the Disability Program (Reference: SGA/DFA 02–100). Proposals for this SGA were to be submitted by 4 p.m. Eastern Standard Time (EST) on Friday, December 21, 2001.

Under Part III Review Process, Evaluation Criteria and Statement of Work, four (4) criteria are described. As a result of several inquiries, the Department wishes to clarify its' intent of criterion A. Project Design. Effective this date, Part III Project Design, No. 2. Training and Supportive Services paragraphs 4 & 5 are replaced as follows:

Applicants are encouraged to include on-the-job training and internship or self-employment strategies in their project design. Project design must describe why these are effective strategies for the client group being served and how many participants are expected to receive specific services (e.g., how many will be in on-the-job training). Private sector employer commitment to on-the-job positions should be identified.

Applicants are also encouraged to include strategies related to training in the information technology skills sector, such as software design, network applications, and service repair technicians. The description provided should be clear on the complexity of the training and expectations for higher salaried employment outcomes with a long range career potential. This may include training on Microsoft WORD, Word Perfect, Lotus, or other basic computer familiarity training.

Other than indicated herein, the requirements established by the above referenced November 7, 2001 SGA (SGA/DFA 02–100) remain in force.

Signed at Washington, DC, this 30th day of November 2001.

Lorraine H. Saunders,

Grant Officer, Division of Federal Assistance.

BILLING CODE 4510–30–P

LEGAL SERVICES CORPORATION

Notice of Availability of 2002 Competitive Grant Funds for Service Areas LA–1, LA–4 and LA–8 in Louisiana

AGENCY: Legal Services Corporation.

ACTION: Solicitation of proposals for the provision of civil legal services for basic field-general service areas LA–1, LA–4 and LA–8 in Louisiana.

SUMMARY: The Legal Services Corporation (LSC) is the national organization charged with administering federal funds provided for civil legal services to the poor. Congress has adopted legislation requiring LSC to utilize a system of competitive bidding for the award of grants and contracts.

LSC hereby announces that it is reopening competition for 2002 competitive grant funds and is soliciting grant proposals from interested parties who are qualified to provide effective, efficient and high quality civil legal services to the eligible client population in the service areas LA–1, LA–4 and LA–8 in Louisiana. The exact amount of congressionally appropriated funds and the date and terms of their availability for calendar year 2002 are not known, although it is anticipated that the funding amount will be similar to calendar year 2001 funding. LSC has canceled the competition and rejected all bids for Louisiana service area LA–9.

DATES: Request for Proposals (RFP) are available from *www.ain.lsc.gov*. A Notice of Intent to compete is due by 5 p.m. EST, December 28, 2001. Grant proposals must be received at LSC offices by 5 p.m. EST, January 21, 2002.

ADDRESSES: Legal Services Corporation—Competitive Grants, 750 First Street NE., 10th Floor, Washington, DC 20002–4250.

FOR FURTHER INFORMATION CONTACT: Jennifer Bateman, Grants Coordinator, Office of Program Performance, (202) 336–8835.

SUPPLEMENTARY INFORMATION: LSC is seeking proposals from non-profit organizations that have as a purpose the furnishing of legal assistance to eligible clients, and from private attorneys, groups of private attorneys or law firms, state or local governments, and substate regional planning and coordination agencies which are composed of substate areas and whose governing boards are controlled by locally elected officials.

The solicitation package, containing the grant application, guidelines, proposal content requirements and specific selection criteria, is available at *www.ain.lsc.gov*.

Issue Date: December 3, 2001.

Michael A. Genz,

Director, Office of Program Performance.

BILLING CODE 7050–01–P

NATIONAL COUNCIL ON DISABILITY

Sunshine Act Meeting

AGENCY: National Council on Disability

SUMMARY: This notice sets forth the schedules and proposed agenda of the upcoming quarterly meeting of the National Council on Disability (NCD). Notice of this meeting is required under section 522b(e)(1) of the Government Sunshine Act, Pub. L. 94–409).

Type: Quarterly Meeting.

Quarterly Meeting Dates: February 4–5, 2002, 8:30 a.m. to 5:00 p.m.

Location: Los Angeles Marriott Hotel Downtown, 333 South Figueroa Street, Los Angeles, California; 213–617–1133.

Contact Information: Mark S. Quigley, Public Affairs Specialist, National Council on Disability, 1331 F Street NW., Suite 850, Washington, DC 20004; 202–272–2004 (Voice), 202–272–2074 (TTY), 202–272–2022 (Fax).

Agency Mission: NCD is an independent federal agency composed of 15 members appointed by the President and confirmed by the U.S. Senate. Its overall purpose is to promote policies, programs, practices, and procedures that guarantee equal opportunity for all people with disabilities, including people from culturally diverse backgrounds, regardless of the nature or significance of the disability; and to empower people with disabilities to achieve economic self-sufficiency, independent living, and inclusion and integration into all aspects of society.

Accommodations: Those needing sign language interpreters or other disability accommodations should notify NCD at least one week prior to this meeting.

Language Translation: In accordance with Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, those people with disabilities who are limited English proficient and seek translation services for this meeting should notify NCD at least one week prior to these meeting.

Multiple chemical Sensitivity/ Environmental Illness: People with multiple chemical sensitivity/ environmental illness must reduce their exposure to volatile chemical substances to attend this meeting. To

reduce such exposure, NCD requests that attendees not wear perfumes or scented products at this meeting. Smoking is prohibited in meeting rooms and surrounding areas.

Open Meeting: In accordance with the Government in the Sunshine Act and NCD's bylaws, this quarterly meeting will be open to the public for observation, except where NCD determines that a meeting or portion thereof should be closed in accordance with NCD's regulations pursuant to the Government in the Sunshine Act. A majority of NCD members present shall determine when a meeting or portion thereof is closed to the public, in accordance with the Government in the Sunshine Act. At meetings open to the public, NCD may determine when non-members may participate in its discussions. Observers are not expected to participate in NCD meetings unless requested to do so by an NCD member and recognized by the NCD chairperson.

Quarterly Meeting Agenda:

Reports from the Chairperson and the Executive Director
Committee Meetings and Committee Reports
Executive Session (closed)—
Unfinished Business
New Business
Announcements
Adjournment

Records will be kept of all National Council on Disability proceedings and will be available after the quarterly meeting for public inspection at the National Council on Disability.

Signed in Washington, DC, on December 3, 2001.

Ethel D. Briggs,

Executive Director.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts; Federal Advisory Committee on International Exhibitions (FACIE)

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Federal Advisory Committee on International Exhibitions (FACIE) will be held by teleconference from 3 p.m. to 4 p.m. on Monday, December 17, 2001 in Room 709 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW, Washington, DC, 20506.

This meeting is for the purpose of review, discussion, evaluation, and recommendations on financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency. In accordance with the determination of the Chairman of May 22, 2001, these sessions will be closed to the public pursuant to subsection (c)(4),(6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Kathy Plowitz-Worden, Panel Coordinator, National Endowment for the Arts, Washington, DC, 20506, or call 202/682–5691.

Dated: November 30, 2001.

Kathy Plowitz-Worden,

Panel Coordinator, Panel Operations, National Endowment for the Arts.

BILLING CODE 7537–01–P

NATIONAL LABOR RELATIONS BOARD

Revision of Statement of Organization and Functions; Position of Deputy General Counsel

AGENCY: National Labor Relations Board.

ACTION: Revision of the description of the powers and duties of the Deputy General Counsel.

SUMMARY: The National Labor Relations Board is revising the description of the powers and duties of the Deputy General Counsel to make plain that the Board's Deputy General Counsel is authorized to perform the functions and duties of the office of General Counsel upon the vacancy of the General Counsel's office.

EFFECTIVE DATE: December 6, 2001.

FOR FURTHER INFORMATION CONTACT: John J. Toner, Executive Secretary, 1099 14th Street NW., Room 11600, Washington, DC 20570, Telephone: (202) 273–1936.

SUPPLEMENTARY INFORMATION: The National Labor Relations Board has determined that § 3345(a)(1) of the Federal Vacancies Reform Act of 1998, 5 U.S.C. 3345 et seq., authorizes the Board's Deputy General Counsel to perform the functions and duties of the office of General Counsel, upon the vacancy of the General Counsel's office. In pertinent part, § 3345(a) provides:

> If an officer of an Executive agency * * * whose appointment to office is required to be made by the President, by and with the advice and consent of the Senate, dies, resigns, or is otherwise unable to perform the functions and duties of the office—
>
> (1) The first assistant to the office of such officer shall perform the functions and duties of the office temporarily in an acting capacity subject to the time limitations of section 3346.

Historically, the provisions of section 3(d) of the National Labor Relations Act (29 U.S.C. 153(d)) have been the only mechanism for appointments to the position of Acting General Counsel. The Vancies Act is an alternative means of filing vacancies in positions appointed by the President subject to Senate confirmation, but, until 1988, that statute was applicable only to positions in cabinet departments. By amendment in 1988, Congress made the Vancies Act applicable to all "executive agencies," with the intent of expanding the scope of the statute to independent agencies such as the Board. Thus, although NLRA section 3(d) remains a valid mechanism for appointment to the position of Acting General Counsel, it is now clear that the Vacancies Act provides an alternative procedure and that the President can appoint an Acting General Counsel under that Act, under section 3(d) of the NLRA, or can allow the provisions of section 3345(a) to take effect.

The Deputy General Counsel position is a "first assistant" position within the meaning of 5 U.S.C. 3345(a)(1). Although "first assistant" is not expressly defined in the statute, it was referred to in debate as a term of art that generally refers to the office holder's top deputy. The National Labor Relations Board's Statement of Organization and Functions makes clear that the Deputy General Counsel acts as the alter ego of the General Counsel and readily satisfies the functions of a "first assistant:" "The Deputy General Counsel is vested with the authority to speak and act for the General Counsel in all phases of the responsibilities of the office to the full extent permitted by law * * *"

Accordingly, the National Labor Relations Board is revising its statement of Organization and Functions, part 201, subpart A, section 202, second paragraph (32 F.R. 9588, as amended by 37 F.R. 15956, 44 F.R. 32415) to read as follows:

Sec. 202 The General Counsel.

* * * * *

The Deputy General Counsel is vested with the authority to speak and act for the General Counsel in all phases of the responsibilities of the office to the full extent permitted by law and is responsible for overall coordination of the General Counsel's organization. The Deputy General Counsel position is a "first assistant" for purposes of section

3345(a)(1) of the Federal Vacancies Reform Act. References to the General Counsel hereinafter may refer to either the General Counsel or Deputy General Counsel collectively.

* * * * *

Dated, Washington, DC, December 3, 2001.

By direction of the Board.

John J. Toner,

Executive Secretary, National Labor Relations Board.

NATIONAL SCIENCE FOUNDATION

Notice of Permits Issued Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permits issued under the Antarctic Conservation of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permits issued under the Antarctic Conservation Act of 1978. This is the required notice.

FOR FURTHER INFORMATION CONTACT: Nadene G. Kennedy, Permit Office, Office of Polar Programs, Rm. 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

SUPPLEMENTARY INFORMATION: On August 29, 2001, the National Science Foundation published a notice in the **Federal Register** of permit applications received. A permit was issued on November 26, 2001 to: Rennie S. Holt, Permit No. 2002–007.

Nadene G. Kennedy,

Permit Officer.

[FR Doc. 01–30220 Filed 12–5–01; 8:45 am]

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–352 and 50–353]

Exelon Generation Company, LLC, Limerick Generating Station, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from Title 10 of the Code of Federal Regulations (10 CFR) part 50, Appendix E, Item IV.F.2. c, for Facility Operating License Nos. NPF–39 and NPF–85, issued to Exelon Generation Company, LLC (Exelon, the licensee), for operation of the Limerick Generating Station, Units 1 and 2, located in Montgomery County, Pennsylvania. Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would allow a one-time exemption from the requirements of 10 CFR Part 50, Appendix E, Item IV.F.2. c, regarding conduct of a full-participation exercise of the offsite emergency plan every 2 years. Under the proposed exemption, the licensee would reschedule the exercise originally scheduled for November 1, 2001, and complete the exercise requirements by March 14, 2002.

The proposed action is in accordance with the licensee's application for an exemption dated October 16, 2001.

The Need for the Proposed Action

Currently under 10 CFR part 50, Appendix E, Item IV.F.2. c, each licensee at each site is required to conduct a full-participation exercise of its offsite emergency plan every 2 years. Federal agencies, such as the Federal Emergency Management Agency, observe these exercises and evaluate the performance of the licensee, state, and local authorities having a role under the emergency plan.

The licensee had initially planned to conduct an exercise of its offsite emergency plan on November 1, 2001, which was within the required 2-year interval. However, due to the ongoing national security threat in the United States, and the response, recovery, and other offsite agency activities associated with the September 11, 2001, terrorist attacks, the licensee has decided to postpone the exercise. The licensee does not plan to conduct the full-participation exercise until after the 2-year interval has expired.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that the proposed action involves an administrative activity unrelated to plant operations.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the Commission concludes that there are no significant environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any different resource than those previously considered in the Final Environmental Statement for the Limerick Generating Station, Units 1 and 2, dated April 1984.

Agencies and Persons Consulted

On November 13, 2001, the staff consulted with the Pennsylvania State official, Dennis Dyckman of the Pennsylvania Department of Environment and Natural Resources, regarding the environmental impact of the proposed action. The State official had no comments. In addition, the licensee notified the Federal Emergency Management Agency and the Pennsylvania Emergency Management Agency, who indicated support for rescheduling the exercise.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

Further details with respect to the proposed action can be found in the licensee's letter dated October 16, 2001. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the ADAMS Public Library component on the NRC Web site, *http://www.nrc.gov*

(the Electronic Reading Room). Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1–800–397–4209, or 301–415–4737, or by e-mail at *pdr@nrc.gov*.

Dated at Rockville, Maryland, this 30th day of November 2001.

For the Nuclear Regulatory Commission.

Christopher Gratton,

Sr. Project Manager, Section 2, Project Directorate 1, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

[FR Doc. 01–30238 Filed 12–5–01; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–62]

University of Virginia, University of Virginia Research Reactor; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of a license amendment to Facility Operating License No. R–66, issued to the University of Virginia (UVA or the licensee), that would allow decommissioning of the UVA Research Reactor located in the north portion of the UVA grounds near Charlottesville, Virginia.

Environmental Assessment

Identification of the Proposed Action

By application dated February 9, 2000, as supplemented on April 26, June 6, and December 19, 2000, and May 4 and 11, 2001, the licensee submitted a decommissioning plan in accordance with 10 CFR 50.82(b), in order to dismantle the 2000-kilowatt (thermal) UVA Research Reactor, to dispose of its component parts and radioactive material, and to decontaminate the facility in accordance with the proposed dismantling plan to meet the Commission's unrestricted release criteria. After the Commission verifies that the release criteria have been met, Facility Operating License No. R–66 would be terminated. The licensee submitted an Environmental Report on February 9, 2000, dated February 2000, that was supplemented on December 19, 2000, that addresses the estimated environmental impacts resulting from decommissioning the UVA Research Reactor.

UVA ceased operating the reactor in July 1998. All the reactor fuel has been removed from the facility.

A "Notice and Solicitation of Comments Pursuant to 10 CFR 20.1405 and 10 CFR 50.82(b)(5) Concerning Proposed Action to Decommission the University of Virginia, University of Virginia Reactor" was published in the **Federal Register** on April 4, 2000 (65 FR 17684), and in the Charlottesville, Virginia daily newspaper, The Daily Progress, on April 23, 2000. One comment was received from the Director, Radiological Health, Commonwealth of Virginia, Department of Health, Radiological Health Program that "the proposed decommissioning plan appears to adequately ensure the return of the facility to unrestricted use without adversely affecting the public health and safety."

Need for the Proposed Action

The proposed action is necessary because of UVA's decision to cease operations permanently. As specified in 10 CFR 50.82, any licensee may apply to the Nuclear Regulatory Commission for authority to surrender a license voluntarily and to decommission the affected facility. Further, 10 CFR 51.53(d) stipulates that each applicant for a license amendment to authorize decommissioning of a production or utilization facility shall submit with its application an environmental report that reflects any new information or significant environmental change associated with the proposed decommissioning activities. UVA is planning to use the area that would be released for other academic purposes.

Environmental Impact of the Proposed Action

All decontamination will be performed by trained personnel in accordance with previously reviewed procedures, and will be overseen by experienced health physics staff. Solid and liquid waste will be removed from the facility and managed in accordance with NRC requirements. The operations are calculated to result in a total occupational radiation exposure of about 4 person-rem. Radiation exposure to the general public during decommissioning is expected to be negligible. This will be accomplished by keeping the public at a safe distance and by controlling effluent releases during decommissioning.

Occupational and public exposure may result from offsite disposal of the low-level residual radioactive material from the UVA Research Reactor. The handling, storage, and shipment of this radioactive material are to meet the requirements of 10 CFR 20.2006, "Transfer for Disposal and Manifest," and 49 CFR parts 100–177, "Transportation of Hazardous Materials." It is anticipated that about 220 ft^3 (7 m^3) of irradiated hardware will be shipped during two truck shipments in Type B shipping casks to a waste processor. About 2700 ft^3 (76 m^3) of other waste in strong tight containers will be shipped during four truck shipments to a waste processor. Approximately 9700 ft^3 (275 m^3) of waste will be shipped in strong tight containers to the Envirocare of Utah facility in nine truck shipments. Included in these shipments will be mixed waste consisting primarily of activated and/or contaminated lead (43 ft^3 or 1.2 m^3) and cadmium (1 ft^3 or 0.03 m^3). Radiation exposure to the general public during waste shipments is expected to be negligible.

The NRC Final Rule on License Termination, 10 CFR 20.1402, provides radiological criteria for release of a site for unrestricted use. Release criteria for unrestricted use is a maximum Total Effective Dose Equivalent (TEDE) of 25 mrem per year from residual radioactivity above background. Application of the As Low As Reasonably Achievable (ALARA) principle is also a requirement. The results of the final survey will be used to demonstrate that the predicted dose to a member of the public from any residual activity does not exceed the 25 mrem per year dose limit.

Liquid waste that is generated during the decommissioning activities will be released to the environment in accordance with the regulations in 10 CFR part 20, subpart K, "Waste Disposal," or will be solidified and disposed of as solid waste in accordance with state and Federal guidelines. Containment measures will be taken as necessary to minimize the spread of contamination. Engineered features such as enclosures and temporary barriers with high-efficiency particulate air filters will be used to control the spread of airborne radioactive material. Airborne releases of radioactive materials are not expected.

The licensee analyzed accidents applicable to decommissioning activities. The accident with the greatest potential impact on members of the public is the dropping of a waste shipping liner containing radioactive material. The maximum TEDE to a member of the public at the site boundary for this accident is about 43 mrem which is within the dose limits for members of the public given in 10 CFR part 20, subpart D, "Radiation Dose

Limits for Individual Members of the Public."

Based on the review of the specific proposed activities associated with the dismantling and decontamination of the UVA facility, the staff has determined that the proposed action will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, the staff concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not involve any historic sites. In addition to the lead and cadmium discussed above, asbestos is present at the UVA Research Reactor. Asbestos will be removed by a licensed asbestos abatement contractor. Decommissioning activities will not affect non-radiological facility effluents and have no other environmental impact. The licensee states that there are no sensitive or endangered species on the UVA Research Reactor site. Therefore, the staff concludes that there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

The four alternatives for disposition of the UVA Research Reactor are: DECON, SAFSTOR, ENTOMB, and no action. UVA has proposed the DECON option.

DECON is the alternative in which the equipment, structures, and portions of the facility containing radioactive contaminants are removed or decontaminated to a level that permits the property to be released for unrestricted use. SAFSTOR is the alternative in which the nuclear facility is placed and maintained in a condition that allows the nuclear facility to be safely stored and subsequently decontaminated (deferred decontamination) to levels that permit release for unrestricted use. ENTOMB is the alternative in which radioactive contaminants are encased in a structurally long-lived material, such as concrete; the entombed structure is appropriately maintained; and continued surveillance is carried out until the radioactivity decays to a level permitting release of the property for unrestricted use. The no-action alternative would leave the facility in its present configuration.

The SAFSTOR, ENTOMB, and no-action alternatives would entail continued surveillance and physical security measures to be in place and continued monitoring by licensee personnel. The SAFSTOR and no-action alternatives would also require continued maintenance of the facility. The radiological impacts of SAFSTOR would be less than the DECON option because of radioactive decay prior to the start of decommissioning activities. However, this option involves the continued use of resources during the SAFSTOR period. The ENTOMB option would also result in lower radiological exposure than the DECON option but would involve the continued use of resources. UVA has determined that the proposed action (DECON) is the most efficient use of the existing facility, since it proposes to use the space that will become available for other academic purposes. These alternatives would have no significant environmental impact. In addition, the regulations in 10 CFR 50.82(b)(4)(i) only allow an alternative if it provides for completion of decommissioning without significant delay. The environmental impacts of the proposed action and the alternatives are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Environmental Report submitted on February 9, 2000, dated February 2000, as supplemented on December 19, 2000, for the UVA Research Reactor.

Agencies and Persons Contacted

In accordance with its stated policy, on November 6, 2001, the staff consulted with the Virginia State official, Leslie P. Foldesi, Director, Radiological Health, Commonwealth of Virginia Department of Health, regarding the environmental impact of the proposed action. The state official stated that he concurred with the environmental assessment and had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated February 9, 2000, as supplemented on April 26, June 6, and December 19, 2000, and May 4 and 11, 2001, which are available for public inspection, and can be copied for a fee, at the U.S. Nuclear Regulatory Commission's Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland. The NRC maintains an Agencywide Documents Access and Management System (ADAMS), which provides text and image files of NRC's public documents. These documents may be accessed through the NRC's Public Electronic Reading Room on the internet at *http://www.nrc.gov*. Persons who do not have access to ADAMS or who have problems in accessing the documents located in ADAMS may contact the PDR reference staff at 1–800–397–4209, 301–415–4737 or by email at pdr@nrc.gov.

Dated at Rockville, Maryland, this 27th day of November 2001.

For the Nuclear Regulatory Commission.

Alexander Adams, Jr.,

Senior Project Manager, Operational Experience and Non-Power Reactors Branch, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.

[FR Doc. 01–30239 Filed 12–5–01; 8:45 am]

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for OMB Review; Comment Request for Reclearance of a Revised Information Collection: RI 38–31

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Public Law 104–13, May 22, 1995), this notice announces that the Office of Personnel Management (OPM) has submitted to the Office of Management and Budget (OMB) a request for reclearance of a revised information collection. RI 38–31, We Need More Information About Your Missing Payment, is sent out by the Office of Retirement Programs in response to notification of the loss or non-receipt of payment from the Civil Service Retirement and Disability Fund. The form requests the information needed to enable OPM to trace and/or reissue the payment. Missing payments may also be reported to OPM by a telephone call.

Approximately 8,000 reports of missing payment requests for both Treasury checks and electronic funds

transfers (EFT's) are processed each year; 200 RI 38–31 forms will be completed annually while 7,600 telephone calls are received at OPM. We estimate it takes approximately 10 minutes to complete the form for missing Treasury checks or to report the missing payment by telephone. The annual burden for reporting missing checks is 1,300 hours. The remaining 200 reports are about missing EFT payments. Since people have realized that they can report on the telephone, no missing EFT payments are reported using RI 38–31. The annual burden of reporting 200 missing EFT payments by telephone is 33 hours. The combined burden for collecting this information is 1,333 hours. In 1998 we included a total burden of 25 hours because 50 missing EFT payments were reported using RI 38–31. It takes an estimated 30 minutes to report a missing EFT payment using RI 38–31. The total burden is 17 hours lower because RI 38–31 is no longer used to report missing EFT payments.

For copies of this proposal, contact Mary Beth Smith-Toomey on (202) 606–8358, FAX (202) 418–3251 or e-mail to *mbtoomey@opm.gov*. Please include a mailing address with your request.

DATES: Comments on this proposal should be received January 7, 2002.

ADDRESSES: Send or deliver comments to—

Ronald W. Melton, Chief, Operations Support Division, Retirement and Insurance Service, U.S. Office of Personnel Management, 1900 E Street, NW, Room 3349A, Washington, DC 20415–3540 and

Joseph Lackey, OPM Desk Officer, Office of Information & Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW, Room 10235, Washington, DC 20503.

BILLING CODE 6325–50–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for OMB Review; Comment Request for Review of a Revised Information Collection: INV 41, 42, 43 and 44

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Public Law 104–13, May 22, 1995), this notice announces that the Office of Personnel Management (OPM) has submitted to the Office of Management and Budget (OMB) a request for reclearance of revised information collection forms INV 41, 42, 43 and 44. OPM uses these forms to request information when conducting employment investigations. The investigations are conducted to determine suitability for Federal employment or the ability to hold a security clearance as prescribed in Executive Orders 10450, 12968, and 10577 (5 CFR part V), and 5 U.S.C. 3301.

INV Form 41, Investigative Request for Employment Data and Supervisor Information, is sent to employers and supervisors. INV Form 42, Investigative Request for Personal Information, is sent to references. INV Form 43, Investigative Request for Educational Registrar and Dean of Students Record Data, is sent to educational institutions. INV Form 44, Investigative Request for Law Enforcement Data, is sent to local law enforcement agencies.

Based on current usage, OPM estimates that 1,962,947 individuals will respond annually to the forms (902,204 to INV 41; 494,728 to INV Form 42; 135,304 to INV 43; and 430,711 to INV 44). We believe the forms require an average of 5 minutes to complete. The total estimated public burden is 162,924 hours.

To obtain copies of this proposal, please contact Mary Beth Smith-Toomey at (202) 606–8358 or FAX (202) 418–3251 or by e-mail to *mbtoomey@opm.gov*. Please include a mailing address with your request.

DATES: Comments on this proposal should be received on or before January 7, 2002.

BILLING CODE 5325–40–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549

Tell Us How We're Doing!": SEC File No. 270–406, OMB Control No. 3235–0463

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is soliciting comments on the collection of information summarized below. The Commission plans to submit this previously-approved questionnaire to the Office of Management and Budget for approval.

The title of the questionnaire is "Tell Us How We're Doing!'

The Commission currently sends the questionnaire to persons who have used the services of the Commission's Office of Investor Education and Assistance. The questionnaire consists mainly of eight (8) questions concerning the quality of services provided by OIEA. Most of the questions can be answered by checking a box on the questionnaire.

The Commission needs the information to evaluate the quality of services provided by OIEA. Supervisory personnel of OIEA use the information collected in assessing staff performance and for determining what improvements or changes should be made in OIEA operations for services provided to investors.

The respondents to the questionnaire are those investors who request assistance or information from OIEA.

The total reporting burden of the questionnaire in 2001 was approximately 5 hours. This was calculated by multiplying the total number of investors who responded to the questionnaire times how long it is estimated to take to complete the questionnaire (20 respondents × 15 minutes = 5 hours).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate

of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Michael E. Bartell, Associate Executive Director, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549.

Dated: November 28, 2001.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 01–30215 Filed 12–5–01; 8:45 am]

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–25303]

Notice of Applications for Deregistration Under Section 8(f) of the Investment Company Act of 1940

November 30, 2001.

The following is a notice of applications for deregistration under section 8(f) of the Investment Company Act of 1940 for the month of November, 2001. A copy of each application may be obtained for a fee at the SEC's Public Reference Branch, 450 Fifth St., NW., Washington, DC 20549–0102 (tel. 202–942–8090). An order granting each application will be issued unless the SEC orders a hearing. Interested persons may request a hearing on any application by writing to the SEC's Secretary at the address below and serving the relevant applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on December 26, 2001, and should be accompanied by proof of service on the applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549–0609. For Further Information Contact: Diane L. Titus, at (202) 942–0564, SEC, Division of Investment Management, Office of Investment Company Regulation, 450 Fifth Street, NW., Washington, DC 20549–0506.

Vanguard Preferred Stock Fund [File No. 811–2601]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On July 27, 2001, applicant made a liquidating distribution to its shareholders based on net asset value. Applicant incurred $1,890 in expenses in connection with the liquidation.

Filing Dates: The application was filed on November 14, 2001, and amended on November 27, 2001.

Applicant's Address: 100 Vanguard Blvd., Malvern, PA 19355.

Solanus Funds [File No. 811–10311]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. Applicant has never made a public offering of its securities and does not propose to make a public offering or engage in business of any kind.

Filing Date: The application was filed on November 20, 2001.

Applicant's Address: 6120 Parkland Blvd., Suite 101, Mayfield Heights, OH 44124.

The Baupost Fund [File No. 811–6138]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On August 10, 2001 and October 31, 2001, applicant made liquidating distributions to its shareholders based on net asset value. Expenses of $202,480 incurred in connection with the liquidation were paid by applicant and applicant's investment adviser, The Baupost Group, L.L.C.

Filing Date: The application was filed on November 15, 2001.

Applicant's Address: 10 Saint James Ave., Suite 2000, Boston, MA 02116.

Pilgrim Government Securities Fund [File No. 811–4432]

Pilgrim Balance Sheet Opportunities Fund [File No. 811–4433]

Summary: Each applicant seeks an order declaring that it has ceased to be an investment company. On March 27, 2000, Pilgrim Government Securities Fund transferred its assets to Pilgrim Government Securities Income Fund, Inc., based on net asset value. On March 27, 2000, Pilgrim Balance Sheet Opportunities Fund transferred its assets to Pilgrim Balanced Fund, a series of Pilgrim Mutual funds, based on net asset value. Expenses of $95,415 and $100,897, respectively, incurred in connection with the reorganizations were paid by each applicant and by its surviving fund.

Filing Date: The applications were filed on November 6, 2001.

Applicants' Address: 7337 East Doubletree Ranch Road, Scottsdale, AZ 85258–2034.

Federated Exchange Fund, Ltd. [File No. 811–2626]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On January 2, 1996, applicant transferred its assets to Federated Capital Appreciation Fund, a portfolio of Federated Equity Funds, based on net asset value. Applicant incurred no expenses in connection with the reorganization.

Filing Dates: The application was filed on September 26, 2001, and amended on November 20, 2001.

Applicant's Address: 5800 Corporate Dr., Pittsburgh, PA 15237–7000.

Fortress Utility Fund, Inc. [File No. 811–4530]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On June 1, 1996, applicant transferred its assets to Federated Utility Fund, Inc., based on net asset value. Applicant incurred no expenses in connection with the reorganization.

Filing Dates: The application was filed on Septembe 26, 2001, and amended on November 20, 2001.

Applicant's Address: 5800 Corporate Dr., Pittsburgh, PA 15237–7000.

Fiduciary Management Associates [File No. 811–1897]

Summary: Applicant seeks an order clearing that it has ceased to be an investment company. By May 5, 1998, all shareholders of applicant had redeemed their shares at net asset value. Applicant incurred no expenses in connection with the liquidation.

Filing Dates: The application was filed on September 28, 2001, and amended on November 15, 2001.

Applicant's Address: 1345 Avenue of the Americas, New York, NY 10105.

Equitable Government Securities Account, Inc. [File No,. 811–3684]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. By August 15, 1985, all shareholders of applicant had redeemed their shares at net asset value. Applicant incurred no expenses in connection with the liquidation.

Filing Dates: The application was filed on September 28, 2001, and amended on November 15, 2001.

Applicant's Address: 1285 Avenue of the Americas, New York, NY 10019.

Alliance Corporate Cash Reserves [File No. 811–3973]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. By April 8, 1988, all shareholders of applicant had redeemed their shares at net asset value. Applicant incurred no expenses in connection with the liquidation.

Filing Dates: The application was filed on September 28, 2001, and amended on November 15, 2001.

Applicant's Address: 1345 Avenue of the Americas, New York, NY 10105.

Alliance Regent Sector Opportunity Fund, Inc. [File No. 811–7709]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. By March 24, 1999, all shareholders of applicant had redeemed their shares at net asset value. Applicant incurred no expenses in connection with the liquidation.

Filing Dates: The application was filed on September 28, 2001, and amended on November 15, 2001.

Applicant's Address: 1345 Avenue of the Americas, New York, NY 10105.

Bullock Insured New York Tax Exempt Shares, Inc. [File No. 811–4360]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. Applicant has never made a public offering of its securities and does not propose to make a public offering or engage in business of any kind.

Filing Dates: The application was filed on September 28, 2001, and amended on November 15, 2001.

Applicant's Address: 40 Rector St., New York, NY 10006.

Equitable Capital High Yield Plus Fund [File No. 811–5814] American Energy Resources Fund, Inc. [File No. 811–6326]

Summary: Each applicant seeks an order declaring that it has ceased to be an investment company. Applicants has never made a public offering of their securities and does not propose to make any public offering or engage in business of any kind.

Filing Dates: The application was filed on September 28, 2001, and amended on November 15, 2001.

Applicant's Address: 1285 Avenue of the Americas, New York, NY 10019.

Alliance Developing Markets Fund, Inc. [File No. 811–8806]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. Applicant has never made a public offering of its securities and does not propose to make any public offering or engage in business of any kind.

Filing Dates: The application was filed on September 28, 2001, and amended on November 15, 2001.

Applicant's Address: 1345 Avenue of the Americas, New York, NY 10105.

Money Shares, Inc. [File No. 811–2780]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. By August 15, 1986, all shareholders of applicant had redeemed their shares based on net asset value. Applicant incurred no expenses in connection with the liquidation.

Filing Dates: The application was filed on September 28, 2001, and amended on November 15, 2001.

Applicant's Address: 30 Rector St., New York, NY 10006.

Value Trend Large Cap Fund [File No. 811–9041]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On June 28, 2001, applicant made a liquidating distribution to its shareholders based on net asset value. Expenses of approximately $407 incurred in connection with the liquidation were paid by Value Trend Capital Management, L.P., applicant's investment adviser.

Filing Date: The application was filed on October 30, 2001.

Applicant's Address: 480 North Magnolia Avenue, El Cajon, CA 92020.

Tax Free Fund of Vermont, Inc. [File No. 811–6328]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On September 28, 2001, applicant made a liquidating distribution to its shareholders based on net asset value. Expenses of $32,741 incurred in connection with the liquidation were paid by applicant.

Filing Dates: The application was filed on October 1, 2001, and amended on October 29, 2001.

Applicant's Address: 87 North Main Street, Suite 611, Rutland, VT 05701.

Prudential Developing Markets Fund [File No. 811–8753]

Summary: Applicant seeks on order declaring that it has ceased to be an investment company. On July 28, 2000, applicant made a liquidating distribution to its shareholders based on net asset value. No expenses were incurred in connection with the liquidation.

Filing Dates: The application was filed on July 10, 2001, and amended on November 13, 2001.

Applicant's Address: Gateway Center Three, 100 Mulberry Street, Newark, NJ 07102–4077.

IAI Retirement Funds, Inc. [File No. 811–08032]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On March 19, 2001, applicant made a liquidating distribution to its shareholders based on net asset value. Applicant incurred no expenses in connection with the liquidation.

Filing Dates: The application was filed on September 10, 2001.

Applicant's Address: IAI Retirement Funds, Inc., 3700 U.S. Bank Place, 601 Second Avenue, South, Minneapolis, MN 55402.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of December 10, 2001:

a closed meeting will be held on Tuesday, December 11 at 10:00 a.m., and an open meeting will be held on Thursday, December 13, 2001, at 10:00 a.m., in Room 1C30, the William O. Douglas Room, followed by a closed meeting.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meetings. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(5), (7), (9)(A), (9)(B), and (10) and 17 CFR 200.402(a)(5), (7), 9(i), 9(ii) and (10), permit consideration of the scheduled matters at the closed meetings.

The subject matter of the closed meeting scheduled for Tuesday, December 11, 2001, will be:

Institution and settlement of injunctive actions;

Institution and settlement of administrative proceedings of an enforcement nature;
Formal orders of investigation; and
Adjudicatory matter.

The subject matter of the open meeting scheduled for Thursday, December 13, 2001, will be:

The Commission will consider the Nasdaq Stock Market, Inc.'s request that the Commission interpret Section 28(e) of the Securities Exchange Act of 1934 to apply to riskless principal transactions in certain Nasdaq securities in light of recent amendments to Nasdaq's trade reporting rules.

For further information, please contact Catherine McGuire or Joseph Corcoran, Division of Market Regulation, at (202) 942–0073.

The subject matters of the closed meeting scheduled for Thursday, December 13, 2001, will be:
Institution and settlement of injunctive actions;
Institution and settlement of administrative proceedings of an enforcement nature;
Formal orders of investigation; and
Opinion.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact:

The Office of the Secretary at (202) 942–7070.

Dated: December 3, 2001.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45119; File No. SR–ISE–2001–33]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the International Securities Exchange LLC To Amend the Original Criteria for Underlying Securities Contained in ISE Rule 502

November 30, 2001.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 19, 2001, the International Securities Exchange LLC ("ISE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Currently, paragraph (b)(5) of ISE Rule 502, "Criteria for Underlying Securities," provides that the market price per share of a security underlying an option must have been at least $7.50 for the majority of business days during the three calendar months preceding the date of the selection, as measured by the lowest closing price reported in any market in which the underlying security traded on each of the subject days. The ISE proposes to amend ISE Rule 502(b)(5) to provide an alternative listing requirement for underlying securities that satisfy all of the initial listing requirements in ISE Rule 502 other than the $7.50 per share requirement. Specifically, the ISE proposes to amend ISE Rule 502(b)(5) to permit the ISE to list options on securities that satisfy all of the initial listing requirements other than the $7.50 per share requirement so long as: (1) The underlying security meets the guidelines for continued approval in ISE Rule 503, "Withdrawal of Approval of Underlying Securities;" (2) options on such underlying security are traded on at least one other registered national securities exchange; and (3) the average daily volume for such options over the last three calendar months preceding the date of selection has been at least 5,000 contracts.

The text of the proposed rule change appears below. New text is in italics.

Rule 502. Criteria for Underlying Securities

* * * * *

(b) In addition, the Exchange shall from time to time establish guidelines to be considered in evaluating potential underlying securities for Exchange options transactions. There are many relevant factors which must be considered in arriving at such a determination, and the fact that a particular security may meet the guidelines established by the Exchange does not necessarily mean that it will be selected as an underlying security. Further, in exceptional circumstances an underlying security may be selected by the Exchange even though it does not meet all of the guidelines. The Exchange may also give consideration to maintaining diversity among various industries and issuers in selecting underlying securities. Notwithstanding the forgoing, however, absent exceptional circumstances, an underlying security will not be selected unless:

* * * * *

(b) *Either:*

(i) The market price per share of the underlying security has been at least $7.50 for the majority of business days during the three calendar months preceding the date of selection, as measured by the lowest closing price reported in any market in which the underlying security traded on each of the subject days; *or*

(ii) The underlying security meets the guidelines for continued approval in Rule 503; options on such underlying security are traded on at least one other registered national securities exchange; and the average daily volume for such options over the last three calendar months preceding the date of selection has been at least 5,000 contracts.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

ISE Rule 502 contains the criteria that an underlying security must meet before the Exchange may initially list options on that security. The ISE states that these criteria are uniform among the five options exchanges. The ISE notes that after an exchange lists options on an underlying security, the underlying security must continue to meet another set of uniform, but somewhat less stringent, requirements for the exchange to list additional series of options on the security (the "continued listing requirements").

The ISE believes that although the continued listing requirements are uniform among the five options exchanges, the application of these

[1] 15 U.S.C. 78s(b)(1).
[2] 17 CFR 240.19b–4.

standards in the current market environment has had an anticompetitive effect on the ISE. Specifically, the Exchange states that it cannot list several of the more actively-traded options classes because the price of the underlying securities has fallen below the initial listing requirement since the time the options were listed on the other exchanges. Because the underlying securities remain above the continue listing criteria, the other options exchanges may continue to trade options on these securities—and list additional series—while the ISE cannot begin listing any options on these securities.[3]

To address this situation, the Exchange proposes an alternative listing requirement solely with respect to the underlying security's price during the three calendar months preceding listing. Specifically, ISE Rule 502(b)(5) currently provides that the market price per share of the underlying security must have been at least $7.50 for the majority of business days during the three calendar months preceding the date of selection for listing. The ISE proposes to amend ISE Rule 502(b)(5) to provide that, for underlying securities that satisfy all of the initial listing requirements other than the $7.50 per share price requirement, the ISE would be permitted to list options on the securities so long as: (1) The underlying security meets the guidelines for continued approval contained in ISE Rule 503; (2) options on such underlying security are traded on at least one other registered national securities exchange; and (3) the average daily trading volume for such options over the last three calendar months preceding the date of selection has been at least 5,000 contracts.

The ISE states that it has narrowly drafted the proposed rule change to address the circumstances where an actively-traded options class is currently ineligible for listing on the ISE. The ISE notes that when an underlying security meets the continued listing requirements and at least one other exchange trades options on the underlying security, the options already are available to the investing public. Therefore, the ISE notes that the current proposal will not introduce any additional listed options classes.

The ISE notes that it has limited the proposed rule change to options that are actively-traded by requiring that the average daily trading volume for the options be at least 5,000 contracts over the last three calendar months. Thus, the ISE maintains that the proposed alternative listing standard would be limited to options with volume in the top half of all options, indicating that there is widespread investor interest in the options. Because these options are actively-traded in other markets, the ISE believes that there would be no investor protection concerns with listing the options on the ISE. In addition, the ISE believes that listing these options on the ISE would enhance competition and benefit investors.

(2) Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements under section 6(b)(5) of the Act[4] that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the Exchange consents, the Commission will:

(A) by order approve such proposed rule change; or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filings will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–ISE–2001–33 and should be submitted by December 21, 2001.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

---

[3] According to the Exchange, two of the 50 most-actively traded securities, Lucent and Northern Telecom, currently fall into this category. The Exchange asserts that the only reason they fail to meet the initial listing criteria is that they do not meet the $7.50 per share stock price test.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Approval of Noise Compatibility Program for Hilo International Airport, Hilo, HI

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the Noise Compatibility Program submitted by the State of Hawaii, Department of Transportation under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) and Title 14, Code of Federal Regulations, Part 150 (FAR part 150). These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96–52 (1980). On November 28, 2000, the FAA determined that the noise exposure maps submitted by the State of Hawaii, Department of Transportation under FAR Part 150 were in compliance with applicable requirements. On

October 24, 2001, the Acting Associate Administrator for Airports approved the Hilo International Airport Noise Compatibility Program. All eight of the program measures have been approved. Two measures were approved as voluntary measures and six measures were approved outright.

EFFECTIVE DATE: The effective date of the FAA's approval of the Hilo International Airport Noise Compatibility Program is October 24, 2001.

FOR FURTHER INFORMATION CONTACT: David J. Welhouse, Airport Planner, Honolulu Airports District Office, Federal Aviation Administration, Box 50244, Honolulu, Hawaii 96850–0001, Telephone: (808) 541–1243. Street Address: 300 Ala Moana Blvd., Room 7–128. Documents reflecting this FAA action may be received at this location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the Noise Compatibility Program for the Hilo International Airport, effective October 24, 2001.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a Noise Exposure Map may submit to the FAA a Noise Compatibility Program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the Noise Exposure Maps. The Act requires such program to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport Noise Compatibility Program developed in accordance with FAR part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measures according to the standards expressed in FAR part 150 and is limited to the following determinations:

a. The Noise Compatibility Program was developed in accordance with the provisions and procedures of FAR part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport Noise Compatibility Program are delineated in FAR Part 150, § 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where Federal funding is sought, requests for project grants must be submitted to the FAA Airports District Office in Honolulu, Hawaii.

The State of Hawaii, Department of Transportation submitted to the FAA on December 29, 2000, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from April 1998 through December 2000. The Hilo International Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on November 28, 2000. Notice of this determination was published in the Federal Register on December 21, 2000.

This Hilo International Airport study contains a proposed Noise Compatibility Program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 2005. It was requested that the FAA evaluate and approve this material as a Noise Compatibility Program as described in section 104(b) of the Act. The FAA began its review of the program on April 27, 2001 and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained eight proposed actions for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The Acting Associate Administrator for Airports approved the overall program effective October 24, 2001.

All eight program measures were approved. The following two measures were approved as voluntary measures: Publish an Informal Preferential Runway Use Program and request use of certain flight procedures; and, Restrictions on Military Training Operations. The following six measures were approved outright: Continue to study the possible land exchange with Hawaiian Home Lands to locate suitable State or private lands which could be exchanged for Keaukaha Tract 1 and 2 lands within the 60 DNL contour; Sound attenuation barrier; Sound attenuation treatment of impacted structures; Continue to monitor development proposals in the Hilo International Airport environs and disclose Airport Noise Exposure Maps to the community; Disclose the Base Year and 5-Year Noise Exposure Maps to the local community by providing overlays of the noise contours on a Tax Map; and, Annually monitor Hilo International Airport aircraft noise levels and operations at Hilo International Airport and conduct public informational meetings on the progress of the Part 150 program.

These determinations are set forth in detail in a Record of Approval endorsed by the Administrator on October 24, 2001. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the State of Hawaii.

Issued in Hawthorne, California on November 28, 2001.

Herman C. Bliss,

Manager, Airports Division.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Agency Information Collection Activities: Submission for OMB Review

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: The FHWA has forwarded the information collection request described in this notice to the Office of Management and Budget (OMB) for review and approval. We published a **Federal Register** Notice with a 60-day public comment period on this information collection on September 25, 2001 (66 FR 49061). We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by January 7, 2002.

ADDRESSES: You may send comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503, Attention: DOT Desk Officer. You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burden; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information.

SUPPLEMENTARY INFORMATION:

Title: Customer Satisfaction Surveys.

Abstract: Executive Order 12862, "Setting Customer Service Standards" requires that Federal agencies provide the highest quality service to our customers by identifying them and determining what they think about our services and products. The surveys covered in this request for a generic clearance will provide the FHWA a means to gather this data directly from our customers. The information obtained from the surveys will be used to assist in evaluating service delivery and processes. The responses to the surveys will be voluntary and will not involve information that is required by regulations. There will be no direct costs to the respondents other than their time. The FHWA plans to provide an electronic means for responding to the majority of the surveys via the World Wide Web.

Survey Frequency and Respondents: A total of 31 agency-wide customer satisfaction surveys are planned over the next 3 years. The survey frequency varies from one-time to annually. For all 31 surveys, there will be approximately 55,500 respondents, including State and local governments, highway industry organizations and the general public.

Estimated Total Annual Burden Hours: The burden hours per response will vary with each survey. A few of the surveys will require approximately 30 minutes each to complete; however, the majority of them will take from 5 to 20 minutes each. We estimate a total of 12,000 annual burden hours for all of the surveys.

FOR FURTHER INFORMATION CONTACT: Connie Yew, 202–366–1078, Department of Transportation, Federal Highway Administration, Corporate Management Service Business Unit, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Electronic Access: Internet users may access all comments received by the U.S. DOT Dockets, Room PL–401, by using the universal resource locator (URL): *http://dms.dot.gov*. It is available 24 hours each day, 365 days each year. Please follow the instructions online for more information and help. An electronic copy of this document may be downloaded using a modem and suitable communications software from the Government Printing Office Electronic Bulletin Board Service at telephone number 202–512–1661. Internet users may reach the **Federal Register**'s homepage at *http://www.nara.gov/fedreg* and the Government Printing Office's database at *http://www.access.gpo.gov/nara*.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued on: November 30, 2001.

James R. Kabel,

Chief, Management Programs and, Analysis Division.

[FR Doc. 01–30280 Filed 12–5–01; 8:45 am]

BILLING CODE 4910–22–P

DEPARTMENT OF VETERANS AFFAIRS

Privacy Act of 1974; System of Records

AGENCY: Department of Veterans Affairs.

ACTION: Notice of Amendment of System of Records "Health Care Provider Credentialing and Privileging Records—VA".

SUMMARY: The Privacy Act of 1974 (5 U.S.C. 552(e)(4)) requires that all agencies publish in the **Federal Register** a notice of the existence and character of their systems of records. The Department of Veterans Affairs (VA) is amending the system of records, known as "Health Care Provider Credentialing and Privileging Records-VA" (77VA11) as set forth in the **Federal Register** 55 FR 30790 dated 7/27/90. VA is changing the system number to 77VA10Q and amending the system notice by revising the paragraphs on System Location; Categories of Individuals Covered by the System; Categories of Records in the System; Purposes; Routine Uses; Storage; Retrievability; Safeguards; System Manager(s) and Address. VA is republishing the system notice in its entirety at this time.

DATES: Comments on the amendment of this system of records must be received no later than January 7, 2002. If no public comment is received, the changes will become effective January 7, 2002.

ADDRESSES: Written comments concerning the proposed amendment of the system of records may be submitted to the Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. Comments will be available for public inspection at the above address in the Office of Regulations Management, Room 1158, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays).

FOR FURTHER INFORMATION CONTACT: Veterans Health Administration (VHA) Privacy Act Officer, Department of Veterans Affairs, 810 Vermont Ave., NW., Washington, DC 20420, (727) 320–1839.

SUPPLEMENTARY INFORMATION: VA is renumbering the system of records from 77VA11 to 77VA10Q to reflect organizational changes in the Department. In addition, VA has decided, as a matter of policy, to automate and provide direct, on-line, remote access to data on the credentialing of health care practitioners appointed or otherwise utilized by the VHA. The automation and on-line access to credentialing data improves the quality, timeliness, and reliability of the credentialing process; promotes inter-facility sharing of health care resources; supports national readiness; facilitates the establishment of telemedicine initiatives; simplifies the process for covered health care practitioners; and reduces costs. An electronic credentials data file can cross facility and network boundaries and eliminate duplication.

VHA is responsible for the medical treatment of veterans and promotes the provision of quality health care through credentialing the education, training, and qualifications of the practitioners delivering this care. Historically, VHA has maintained these records in a paper format in each medical treatment facility or Veterans Integrated Service Network (VISN). When a practitioner transfers between facilities or the practitioner's services are shared among facilities, either all or portions of the paper record are transferred to the receiving facility. Some medical treatment facilities keep credentialing data in non-validated electronic formats to meet local needs. However, the exchange of paper and/or non-validated electronic data means that some of the practitioner's credentials must be re-verified with the primary source to ensure the adequate and appropriate education, training, and qualifications of the practitioner. This results in unnecessary use of resources by VA and the sources providing information to VA.

VHA is supplementing the paper record through the development of a centralized electronic data warehouse for the storage of credentialing data and the images of the primary source verification. This effort is a joint project between the VHA and the Department of Health and Human Services, Health Resources and Services Administration (HHS/HRSA). The electronic data warehouse will not only store the electronic data and images, but will cross-validate data provided by the practitioner with data received from the primary or secondary source. Primary source verification is that verification received from the source that provided the credential, *i.e.*, **Federal Register**, educational or training institution, certifying or licensing agency. A secondary information source is one that provides credentialing data that is derived from a primary source, *i.e.*, National Practitioners Data Bank (NPDB). Secondary information sources may require additional supporting documentation either from a primary source or additional secondary sources for corroboration. Providers shall enter data into the system through an Internet browser. Once data has been entered into the system, the credentialing staff initiate the primary source verification of the provider's education, training, and qualifications. To ensure provider identification, and appropriate matching of information entered into an electronic system, available unique identifiers which may include name, social security number, national provider identifier, unique physician identification number, etc. will be used for matching data, when available. In instances where electronic data is available from alternate sources and meets or exceeds VA credentialing requirements, it will be utilized.

Access to data in electronic files is controlled at the health care facility in accordance with nationally and locally established data security procedures. These standards include, but are not limited to, requiring a unique password for each user, restricting access to "need-to-know" data, and deactivating screen displays after short periods of time. All data transmitted across the Internet is supported by encryption, deactivation with the server after short periods of time without interaction, and insulation of the Internet server by a firewall.

VHA has determined that direct, real-time, remote access to the credentialing data of health care practitioners by authorized users should expedite the processing of health care practitioners for appointment, reappointment, rapid deployment and granting of privileges. VHA has also determined that the use of information technology and data warehousing of credentialing information should result in a more timely and accurate credentials file for ensuring practitioners' education, training, and qualifications while facilitating the accurate identification of providers to all interested parties. The availability will decrease the time it takes to address health care delivery needs met not only through the employment or appointment process, but also through contracting, sharing agreements, affiliations, etc. Valid electronic data will assist VA in meeting legislative mandates and executive orders such as Federal emergency responses. The availability of electronic data required for credentialing can also facilitate VA's requirements related to appointment, emergency response by the appropriate health care providers, telemedicine, or response to scarce medical needs.

VHA may collect biometric information (i.e., fingerprint) for the verification of identity. A verification transaction involves the one-to-one matching of sample data against a particular record of the person presenting the sample. This can be done automatically based completely on biometric minutiae. Since the credentialing process is for the purpose of data validation, personal validation and the unequivocal link of a record to the individual reinforces the credentialing process. The use of a biometric data adds an additional level of patient safety by verifying that providers are who they say they are throughout their professional career. Additionally, a biometric identifier can add an additional level of security to the system in the verification of individuals making transactions in the electronic file at log-on.

Validated credentialing information may be shared with other established data systems such as Veterans Information Systems and Technology Architecture (VistA) and Decision Support System (DSS). The purpose of sharing credentialing data is to decrease the duplicative effort of both providers and staff in gathering the same information multiple times for various data bases used in VA. This data is required for such activities as emergency medical responses in the times of national disaster response, telemedicine, and medical cost care recovery and would be disclosed only to the extent it is reasonably necessary to assist in the accomplishment of legislative or executive order mandates.

Amendments to the System Location include that contractors may maintain the records of contractors who provide care in a VA health care facility in accordance with this notice and VHA policy. With the implementation of the electronic credentials data bank, the System Location is also amended so all the electronic records may be maintained by HHS, a component thereof, a contractor or subcontractor of HHS in accordance with the VA Interagency Agreement. The Categories of Individuals Covered by the System is amended to include those health care providers who are not employed by VA but providing care through contractual or other types of agreements to VA patients. The Category of Records in the System is amended to reflect the inclusion of those health care providers who are providing care through arrangements other than employment. The Category of Records in the System is also amended to more clearly specify the data elements collected, including items that will bring VA into compliance with the National Standard disseminated by HHS.

Routine use 1 was deleted. Former routine uses 2, 3, 5, 6, 10, 12, 18, and 20 are amended to clarify the inclusion of all individuals regardless of employment, utilization, or appointment to the professional staff. VA utilizes the services of numerous providers through various appointment processes beyond the employment process. Former routine use 2 (now 1) was amended to allow disclosure of information in response to scarce or emergency needs of the Department or

other entities when specific skills are required. Former routine use 5 (now 4) was amended to delete the section numbers. Former routine use 7 (now 6) was amended to replace the word "private" with "non-Federal." Former routine use 8 (now 7) was amended to delete "local Government" and "State." Routine use 12 (now 11) was amended to specify that the relevant information is disclosed at VA's initiative and that names and addresses of veterans are to be excluded from the relevant information that could be disclosed. Former routine use 13 (now 16) is being modified to clarify the conditions under which data is disclosed to officials of labor organizations recognized under 5 U.S.C., chapter 71. The clarification ties such disclosures to the law authorizing such disclosures, i.e., 5 U.S.C. 7114(b)(4). The former version authorized disclosures to officials of labor organizations " when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting working conditions." An editorial change is being made to routine use 14 (now 13) to clarify the terminology used for fitness for duty examinations. Former routine use 16 (now 15) is being changed to delete the language concerning disclosures to the Equal Employment Opportunity Commission to ensure compliance with the Uniform Guidelines on Employee Selection Procedures, since VA has not chosen to adopt the Uniform Guidelines for use in its Title 38 employment procedures. Former routine use 17 (now 12) is amended to expand the purposes for which information may be disclosed to the Federal Labor Relations Authority to investigate representation petitions and conduct or supervise representation elections. Former routine use 17 (now 12) is also being clarified to indicate that disclosures to the Federal Labor Relations Authority and the Federal Service Impasses Panel may only be made after appropriate jurisdiction has been established. Matters arising out of (1) professional conduct or competence, (2) peer review, and (3) the establishment, determination or adjustment of compensation shall be decided by the Secretary of Veterans Affairs and is not itself subject to collective bargaining and may not be reviewed by another agency. See 38 U.S.C. 7422. One routine use is added to this System (new 20) to allow for the sharing of information and data on a need-to-know basis for providers who move between sites and/or provide care at multiple sites. The routine use disclosure statements are being renumbered.

VA is revising and updating the systems of record notice 77VA10Q, "Health Care Provider Credentialing and Privileging Records—VA".

The notice of intent to publish and an advance copy of the system notice have been sent to the appropriate Congressional committees and to the Director of the Office of Management and Budget (OMB) as required by 5 U.S.C. 552a(r) (Privacy Act) and guidelines issued by OMB (65 FR 77677), December 12, 2000.

Approved: November 19, 2001.

Anthony J. Principi,

Secretary of Veterans Affairs.

77VA10Q

SYSTEM NAME:

Health Care Provider Credentialing and Privileging Records-VA.

SYSTEM LOCATION:

Records are maintained at each VA health care facility. Address locations for VA facilities are listed in VA Appendix 1 of the biennial publication of VA system of records. In addition, information from these records or copies of records may be maintained at the Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 and/or Veterans Integrated Service Network (VISN) Offices. Records for those VA contracted health care providers who are credentialed by the contractor in accordance with VHA policy, where credentialing information is received by VHA facilities will be maintained in accordance with this notice and VHA policy. Electronic copies of records may be maintained by the Department of Health and Human Services (HHS), a component thereof, a contractor, subcontractor of HHS, or by another entity in accordance with the VA Interagency Agreement. Back-up copies of the electronic data warehouse are maintained at off-site locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The records include information concerning health care providers currently or formerly employed or otherwise utilized by VA, and individuals who make application to VA and are considered for employment or appointment as health care providers. These records will include information concerning individuals who through a contractual or other type of agreement may be or are providing health care to VA patients. This may include, but is not limited to: audiologists; dentists; dietitians; expanded-function dental auxiliaries; licensed practical or vocational nurses; nuclear medicine technologists; nurse anesthetists; nurse practitioners; nurses; occupational therapists; optometrists; clinical pharmacists; licensed physical therapists; physician assistants; physicians; podiatrists; psychologists; registered respiratory therapists; certified respiratory therapy technicians; diagnostic and therapeutic radiology technologists; social workers; and speech pathologists.

CATEGORIES OF RECORDS IN THE SYSTEM:

The record consists of information related to:

(1) The credentialing (the review and verification of an individual's qualifications for employment or utilization which includes licensure, registration or certification, professional education and training, employment history, experience, appraisals of past performance, health status, etc.) of applicants who are considered for employment and/or appointment, for providing health services under a contract or other type of agreement, and/or for appointment to the professional staff.

(2) The privileging (the process of reviewing and granting or denying a provider's request for clinical privileges to provide medical or other patient care services, within well defined limits, which are based on an individual's professional license, registration or certification, experience, training, competence, health status, ability, and clinical judgment) health care providers who are permitted by law and by the medical facility to provide patient care independently and individuals whose duties and responsibilities are determined to be beyond the normal scope of activities for their profession;

(3) The periodic reappraisal of health care providers' professional credentials and the reevaluation of the clinical competence of providers who have been granted clinical privileges; and/or

(4) Accessing and reporting to the National Practitioner Data Bank (NPDB).

The record may include individual identifying information (e.g., name, date of birth, gender, social security number, national provider number, and/or other personal identification number), address information (e.g., home and/or mailing address, home telephone number, e-mail address, facsimile number), biometric data and information related to education and training (e.g., name of medical or professional school attended and date of graduation, name of training program, type of training, dates attended, and date of completion). The record may also include information

related to: the individual's license, registration or certification by a State licensing board and/or national certifying body (e.g., number, expiration date, name and address of issuing office, status including any actions taken by the issuing office or any disciplinary board to include previous or current restrictions, suspensions, limitations, or revocations); citizenship; honors and awards; type of appointment or utilization; service/product line; professional society membership; professional performance, experience, and judgment (e.g., documents reflecting work experience, appraisals of past and current performance and potential); educational qualifications (e.g., name and address of institution, level achieved, transcript, information related to continuing education); Drug Enforcement Administration and or State controlled dangerous substance certification (e.g., current status, any revocations, suspensions, limitations, restrictions); information about mental and physical status; evaluation of clinical and/or technical skills; involvement in any administrative, professional or judicial proceedings, whether involving VA or not, in which professional malpractice on the individual's part is or was alleged; any actions, whether involving VA or not, which result in the limitation, reduction, revocation, or acceptance of surrender or restriction of the individual's clinical privileges; and, clinical performance information that is collected and used to support a determination of an individual's request for clinical privileges. Some information that is included in the record may be duplicated in an employee personnel folder.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 38 U.S.C. 501(a) and 7304(a)(2).

PURPOSES(S):

The information may be used for: Verifying the individual's credentials and qualifications for employment or utilization, appointment to the professional staff, and/or clinical privileges; advising prospective health care entity employers, health care professional licensing or monitoring bodies, the NPDB, or similar entities of activities of individuals covered by this system; accreditation of a facility by an entity such as the Joint Commission on Accreditation of Healthcare Organizations; audits, reviews and investigations conducted by staff of the health care facility, the VISN Directors and Division Offices, VA Central Office, VHA program offices who require the credentialing information, and the VA Office of Inspector General; law enforcement investigations; quality assurance audits, reviews and investigations; personnel management and evaluations; employee ratings and performance evaluations; and, employee disciplinary or other adverse action, including discharge. The records and information may be used for statistical analysis, to produce various management reports, evaluate services, collection, distribution and utilization of resources, and provide clinical and administrative support to patient medical care.

ROUTINE UESE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. A record from this system of records may be disclosed to any source from which additional information is requested (to the extent necessary to identify the individual, inform the source of the purpose(s) of the request, and to identify the type of information requested), when necessary to obtain information relevant to a Department decision concerning the hiring or retention of an employee; the issuance or reappraisal of clinical privileges; the issuance of a security clearance; the conducting of a security or suitability investigation of an individual; the letting of a contract; the issuance of a license, grant, or other benefits; or in response to scarce or emergency needs of the Department or other entities when specific skills are required.

2. A record from this system of records may be disclosed to an agency in the executive, legislative, or judicial branch, or the District of Columbia's Government in response to its request, or at the initiation of VA, information in connection with the hiring of an employee; appointment to the professional staff; the issuance of a security clearance; the conducting of a security or suitability investigation of an individual; the letting of a contract; the issuance of a license, grant, or other benefit by the agency; or the lawful statutory or administrative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision; or at the initiative of VA, to the extent the information is relevant and necessary to an investigative purpose of the agency.

3. Disclosure may be made to a congressional office from the record or an individual in response to an inquiry from the congressional office made at the request of that individual.

4. Disclosure may be made to National Archives and Records Administration in records management inspections conducted under authority of Title 44 United States Code.

5. Information from this system of records may be disclosed to a Federal agency or to a State or local government licensing board and/or to the Federation of State Medical Boards or a similar non-Government entity, which maintains records concerning individuals' employment histories or concerning the issuance, retention or revocation of licenses, certifications, or registration necessary to practice an occupation, profession or specialty, in order for the Department to obtain information relevant to a Department decision concerning the hiring, utilization, appointment, retention or termination of individuals covered by this system or to inform a Federal agency or licensing boards or the appropriate non-Government entities about the health care practices of a currently employed, appointed, otherwise utilized, terminated, resigned, or retired health care employee or other individuals covered by this system whose professional health care activity so significantly failed to meet generally accepted standards of clinical practice as to raise reasonable concern for the safety of patients. These records may also be disclosed as part of an ongoing computer-matching program to accomplish these purposes.

6. Information may be disclosed to non-Federal sector (i.e., State or local governments) agencies, organizations, boards, bureaus, or commissions (e.g., the Joint Commission on Accreditation of Healthcare Organizations). Such disclosures may be made only when: (a) The records are properly constituted in accordance with VA requirements; (b) the records are accurate, relevant, timely, and complete; and (c) the disclosure is in the best interest of the Government (e.g., to obtain accreditation or other approval rating). When cooperation with the non-Federal sector entity, through the exchange of individual records, directly benefits VA's completion of its mission, enhances personnel management functions, or increases the public confidence in VA's or the Federal Government's role in the community, then the Government's best interests are served. Further, only such information that is clearly relevant and necessary for accomplishing the intended uses of the information as certified by the receiving entity is to be furnished.

7. Information may be disclosed to a state or national certifying body, which has the authority to make decisions concerning the issuance, retention or revocation of licenses, certifications or registrations required to practice a

health care profession, when requested in writing by an investigator or supervisory official of the licensing entity or national certifying body, for the purpose of making a decision concerning the issuance, retention or revocation of the license, certification or registration of a named health care professional.

8. Information may be disclosed to the Department of Justice and United States Attorneys in defense or prosecution of litigation involving the United States, and to Federal agencies upon their request in connection with review of administrative tort claims filed under the Federal Tort Claims Act, 28 U.S.C. 2672.

9. Hiring, appointment, performance, or other personnel credentialing related information may be disclosed to any facility or agent with which there is, or there is proposed to be, an affiliation, sharing agreement, partnership, contract, or similar arrangement, where required for establishing, maintaining, or expanding any such relationship.

10. Information concerning a health care provider's professional qualifications and clinical privileges may be disclosed to a VA patient, or the representative or guardian of a patient who, due to physical or mental incapacity, lacks sufficient understanding and/or legal capacity to make decisions concerning his/her medical care. This information may also be disclosed to a VA patient, who is receiving or contemplating receiving medical or other patient care services from the provider when the information is needed by the patient or the patient's representative or guardian in order to make a decision related to the initiation of treatment, continuation or discontinuation of treatment, or receiving a specific treatment that is proposed or planned by the provider. Disclosure will be limited to information concerning the health care provider's professional qualifications (professional education, training and current licensure/certification status), professional employment history, and current clinical privileges.

11. VA may disclose on its own initiative any information in this system, except the names and home addresses of veterans and their dependents, which is relevant to a suspected or reasonably imminent violation of law, whether civil, criminal or regulatory in nature and whether arising by general or program statute or by regulation, rule or order issued pursuant thereto, to a Federal, State, local or foreign agency charged with the responsibility of investigating or prosecuting such violation, or charged with enforcing or implementing the statute, regulation, rule or order. On its own initiative, VA may also disclose the names and addresses of veterans and their dependents to a Federal agency charged with the responsibility of investigating or prosecuting civil, criminal or regulatory violations of law, or charged with enforcing or implementing the statute, regulation, rule or order issued pursuant thereto.

12. VA may disclose to the Federal Labor Relations Authority (including its General Counsel) information related to the establishment of jurisdiction, the investigation and resolution of allegations of unfair labor practices, or information in connection with the resolution of exceptions to arbitration awards when a question of material fact is raised; to disclose information in matters properly before the Federal Service Impasses Panel, and to investigate representation petitions and conduct or supervise representation elections.

13. Information may be disclosed to the VA-appointed representative of an employee regarding all notices, determinations, decisions, or other written communications issued to the employee in connection with an examination ordered by VA under fitness-for-duty examination procedures or Agency-filed disability retirement procedures.

14. Information may be disclosed to officials of the Merit Systems Protection Board, including the Office of the Special Counsel, when requested in connection with appeals, special studies of the civil service and other merit systems, review of rules and regulations, investigation of alleged or possible prohibited personnel practices, and such other functions, promulgated in 5 U.S.C. 1205 and 1206, or as may be authorized by law.

15. Information may be disclosed to the Equal Employment Opportunity Commission when requested in connection with investigations of alleged or possible discriminatory practices, examination of Federal affirmative employment programs, or the other functions of the Commission as authorized by law or regulation.

16. Information listed in 5 U.S.C. 7114(b)(4) may be disclosed to officials of labor organizations recognized under 5 U.S.C., chapter 71 when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting working conditions.

17. Identifying information in this system, including name, address, social security number and other information as is reasonably necessary to identify such individual, may be disclosed to the NPDB at the time of hiring, appointment, utilization, and/or clinical privileging/reprivileging of physicians, dentists and other health care practitioners, and other times as deemed necessary by VA, in order for VA to obtain information relevant to a Department decision concerning the hiring, appointment, utilization, privileging/reprivileging, retention or termination of the individual.

18. Relevant nformation from this system of records may be disclosed to the NPDB and/or State Licensing Board in the State(s) in which a practitioner is licensed, in which the VA facility is located, and/or in which an act or omission occurred upon which a medical malpractice claim was based when VA reports information concerning: (a) Any payment for the benefit of a physician, dentist, or other licensed health care practitioner which was made as the result of a settlement or judgment of a claim of medical malpractice if an appropriate determination is made in accordance with agency policy that payment was related to substandard care, professional incompetence or professional misconduct on the part of the individual; (b) a final decision which relates to possible incompetence or improper professional conduct that adversely affects the clinical privileges of a physician or dentist for a period longer than 30 days; or, (c) the acceptance of the surrender of clinical privileges or any restriction of such privileges by a physician or dentist either while under investigation by the health care entity relating to possible incompetence or improper professional conduct, or in return for not conducting such an investigation or proceeding. These records may also be disclosed as part of a computer-matching program to accomplish these purposes.

19. In response to a request about a specifically identified individual covered by this system from a prospective Federal or non-Federal health care entity employer, the following information may be disclosed: (a) Relevant information concerning the individual's professional employment history including the clinical privileges held by the individual; (b) relevant information concerning a final decision which results in a voluntary or involuntary limitation, reduction or loss of clinical privileges; and (c) relevant information concerning any payment which is made in settlement (or partial settlement) of, or in satisfaction of a judgment in, a medical malpractice action or claim and, when through a peer review process that is undertaken

pursuant to VA policy, negligence, professional incompetence, responsibility for improper care, and/or professional misconduct has been assigned to the individual.

20. Disclosure may be made to any Federal, State, local, tribal or private entity in response to a request concerning a specific provider for the purposes of credentialing providers who provide health care at multiple sites or move between sites. Such disclosures may be made only when: (a) The records are properly constituted in accordance with VA requirements; (b) the records are accurate, relevant, timely, and complete; and (c) disclosure is in the best interests of the Government (i.e., to meet the requirements of contracts, sharing agreements, partnerships, etc.). When the exchange of credentialing information through the exchange of individual records directly benefits VA's completion of its mission and enhances public confidence in VA's or the Federal Government's role in the delivery of health care, then the best interests of the Government are served.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on paper documents or in electronic format. Information included in the record may be stored on microfilm, magnetic tape or disk.

RETRIEVABILITY:

Records are retrieved by the names and social security number or other assigned identifiers, e.g. the National Provider Identifier, of the individuals on whom they are maintained.

SAFEGUARDS:

1. Access to VA working and storage areas in VA health care facilities is restricted to VA employees on a "need-to-know" basis; strict control measures are enforced to ensure that disclosure to these individuals is also based on this same principle. Generally, VA file areas are locked after normal duty hours and the health care facilities are protected from outside access by the Federal Protective Service or other security personnel.

2. Access to computer rooms within the health care facilities is generally limited by appropriate locking devices and restricted to authorized VA employees and vendor personnel. Automated data processing peripheral devices are generally placed in secure areas (areas that are locked or have limited access) or are otherwise protected. Information in the VistA system may be accessed by authorized VA employees. Access to file information is controlled at two levels; the system recognizes authorized employees by a series of individually unique passwords/codes as a part of each data message, and the employees are limited to only that information in the file, which is needed in the performance of their official duties.

3. Access to records in VA Central Office and the VISN Directors and Division Offices is only authorized to VA personnel on a "need-to-know" basis. Records are maintained in manned rooms during working hours. During non-working hours, there is limited access to the building with visitor control by security personnel.

4. The automated system is Internet enabled and will conform to all applicable Federal regulations concerning information security. The automated system is protected by a generalized security facility and by specific security techniques used within the application that accesses the data file and may include individually unique passwords/codes and may utilize Public Key Infrastructure personal certificates. Both physical and *system security measures will meet or* exceed those required to provide an adequate level of protection for host systems. Access to file information is limited to only that information in the file which is needed in the performance of official duties. Access to computer rooms is restricted generally by appropriate locking devices to authorized operational personnel. Information submitted to the automated electronic system is afforded the same protections as the data that is maintained in the original files. Access from remote locations, including remote on-line access from other agencies to the data storage site, is controlled in the same manner. Access to the electronic data is supported by encryption and the Internet server is insulated by a firewall.

RETENTION AND DISPOSAL:

Records are maintained at the employing VA facility. If the individual transfers to another VA facility location, the record is transferred to the new location, if appropriate. Paper records are retired to a Federal records center 3 years after the individual separates from VA employment or no longer utilized by VA (in some cases, records may be maintained at the facility for a longer period of time) and are destroyed 30 years after separation. Paper records for applicants who are not selected for VA employment or appointment are destroyed 2 years after non-selection or when no longer needed for reference, whichever is sooner. Electronic records are transferred to the Director, Credentialing and Privileging Program, Office of Quality and Performance, VHA Central Office, when the provider leaves the facility. Information stored on electronic storage media is maintained and disposed of in accordance with records disposition authority approved by the Archivist of the United States.

SYSTEM MANAGER(S) AND ADDRESS:

Official responsible for policies and procedures: Director, Credentialing and Privileging Program, Office of Quality and Performance (10Q), Veterans Health Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420.

Officials maintaining the system: (1) The Chief of Staff at the VA health care facility where the provider made application, is employed, or otherwise utilized; (2) the credentialing coordinator of the VA health care facility for individuals who made application for employment or other utilization, or providers currently or previously employed or otherwise utilized at VA Central Office or at a VISN location; and (3) HHS/HRSA, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, for the electronic data warehouse. In most cases, the electronic data will be maintained by the Department of Health and Human Services, Health Resources and Services Administration (HHS/HRSA), a component thereof (a contractor, subcontractor of HHS/HRSA, or by another entity) in accordance with the VA Interagency Agreement.

NOTIFICATION PROCEDURE:

Individuals who wish to determine whether this system of records contains information about them should contact the VA facility where they made application for employment or appointment, or to the VA facility where they are or were employed. Inquiries should include the employee's full name, social security number, date of application for employment or appointment or dates of employment or appointment, and return address.

RECORD ACCESS PROCEDURES:

Individuals seeking information regarding access to and contesting of records in this system may write, call or visit the VA facility where they made application for employment or appointment, or the VA facility where they are or were employed.

CONTESTING RECORDS PROCEDURES:

(See Record Access Procedures above.)

RECORD SOURCE CATEGORIES:

Information in this system of records is provided by the applicant/employee, or obtained from State licensing boards, Federation of State Medical Boards, National Council of State Boards of Nursing, National Practitioner Data Bank, professional societies, national certifying bodies, current or previous employers, other health care facilities and staff, references, educational institutions, medical schools, VA staff, patient, visitors, and VA patient medical records.

24 CFR Part 30

Amendments to HUD's Civil Money Penalty Regulations; Final Rule

VOL 66 ISS 235 DEC 6 2001 UMI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Part 30

[Docket No. FR–4399–F–02]

RIN 2501–AC56

Amendments to HUD's Civil Money Penalty Regulations

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This rule implements sections 561 and 562 of the Multifamily Assisted Housing Reform and Affordability Act of 1997. These sections concern HUD's ability to impose civil money penalties. Section 561 expands the list of parties and violations subject to civil money penalties related to multifamily properties. Section 562 authorizes HUD to impose civil money penalties for violations of Section 8 project-based housing assistance payments contracts.

DATES: Effective Date: January 7, 2002.

FOR FURTHER INFORMATION CONTACT: Dane M. Narode, Deputy Chief Counsel for Administrative Proceedings, Departmental Enforcement Center, U.S. Department of Housing and Urban Development, 1250 Maryland Avenue, Suite 200, Washington, DC 20024; telephone (202) 708–2350 (this is not a toll-free number). Hearing- or speech-impaired persons may access this number via TTY by calling the toll-free Federal Information Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION:

I. The June 26, 2000 Proposed Rule

The proposed rule proposed to implement section 561 and 562 of the Multifamily Assisted Housing Reform and Affordability Act of 1997 (Pub. L. 105–65, Title V, 111 Stat. 1384) (the MAHRA), the purpose of which is to enhance enforcement against multifamily mortgagors and Section 8 owners who violate program requirements. Section 561 of the MAHRA amended the National Housing Act at 12 U.S.C. 1735f–15, "Civil Money Penalties Against Multifamily Mortgagors," to expand the parties against whom HUD may seek a civil money penalty, as well as the violations potentially subject to a civil money penalty. Under the law, civil money penalty liability can extend to mortgagors, general partners of mortgagors, officers or directors of corporate mortgagors, identity of interest agents, and members of limited liability companies that are mortgagors or partners of partnership mortgagors. Additional violations for which HUD may seek a civil money penalty under section 561 include failure to maintain the mortgaged property, failure to provide acceptable management, and failure to properly maintain the books and accounts of the mortgaged property in accordance with HUD requirements.

Section 562 of the MAHRA added a new section to the U.S. Housing Act of 1937, codified at 42 U.S.C. 1437z–1, entitled "Civil Money Penalties Against Section 8 Owners." Under this section, potentially liable parties include owners, their general partners in the case of a partnership owner, and identity of interest agents. A penalty may be imposed for any knowing and material breach of a housing assistance payments contract, including failure to provide decent, safe and sanitary housing, and knowing submission of false or fraudulent statements or requests for housing assistance payments to HUD or any other government agency.

The final rule implements these sections by amending the existing civil money penalty regulations at 24 CFR part 30. Section 561 of the MAHRA is implemented at § 30.45. Amendments to that section include new definitions, including definitions of "identity of interest agent" and further definitions of terms used within that definition. The section also incorporates the amended statutory list of violations for which HUD may seek a civil money penalty. Section 562 of the MAHRA is implemented in a new 24 CFR 30.68.

II. This Final Rule

The public comment period on the proposed rule closed on August 25, 2000. HUD received 11 comments. Five were from trade associations representing housing owners or managers, four were from groups representing tenants, one was from a management corporation on its own behalf, and one was from an individual owner.

III. Public Comments

A. Comments Arguing That the Rule Unfairly Burdens Mortgagors/Owners

Comment: The potential maximum penalty will cause financial hardship to small owners. Many of the owners subject to the rule are single asset entities with only the one property and the related assistance as their sole source of income. Many of these are small businesses or non-profits with limited outside revenue, individuals, elderly, and other like entities. These owners cannot afford the maximum $30,000 penalty being proposed. The reason such owners often fail to maintain properties or submit audited financial statements are income shortages, and the proposed penalty will only exacerbate the problem.

Response: While the maximum amount of civil money penalty is set as a statutory matter, the rule does not require HUD to assess the maximum civil penalty in any given case of a violation subject to such penalty. Rather, in assessing a penalty, HUD, by statute, must assess a variety of factors, including an entity's ability to pay. (See 12 U.S.C. 1735f–15(d)(3); 12 U.S.C. 1701q–1((d)(3); and 42 U.S.C. 1437z–1(c)(3)(C).) HUD's civil money penalty regulations implement this statutory requirement at 24 CFR 30.80(c). Thus, there is already sufficient statutory and regulatory protection of small owners. HUD has made no change to the rule as a result of this comment.

Comment: The cash flow from assisted projects can be too low for owners to fully comply with all HUD standards. It is unfair to require owners to maintain projects at a higher level than the project income allows. There needs to be balance in the system so that owners who are doing a good job of managing the project within the constraints of the rent they can charge are not subject to penalties. It is not fair to require owners to reach into their own pockets to supplement the rent. HUD field officials should be trained in this standard.

Response: HUD is required to consider "the gravity of the offense" and "the degree of the violator's culpability" when determining whether to seek a civil money penalty and, if so, how much to seek. (See 24 CFR 30.80(a) and (h).) These mandatory considerations should provide sufficient protection to the owner in the scenario described, where an owner is generally doing a good job but is found to have committed a violation. In addition, HUD expects owners with income shortfalls to seek relief that may be available, including budget-based rents or other permitted rent increases, or mortgage restructuring, if applicable. If such relief is available and an owner fails to seek it, HUD will consider that failure as part of its analysis of the gravity of the offense and the degree of culpability. Nonetheless, lack of income is not *per se* an excuse for an owner's failure to comply with legal obligations. Civil money penalties are always a potential result of failure to comply.

As to the commenter's request that HUD provide training, the Departmental Enforcement Center currently provides employees engaged in the civil penalty process with adequate training in applying HUD's regulations on such

penalties, including the standards discussed above. For these reasons, HUD makes no change to the rule as a result of this comment.

Comment: Since owners generally rely on HAP payments to correct violations, and since the owners face civil money penalties if they apply for HAP payments knowing that violations exist, there would never be funds available to correct the violations and return the property to compliance. Therefore, the procedures should allow for an evaluation of the cause of a property's financial distress before imposing monetary penalties.

Response: HUD existing procedures allow sufficient flexibility to consider a variety of circumstances. These procedures include a general requirement that HUD consider "such matters as justice may require," 24 CFR 30.80(j). However, HUD believes that it is important that the agency retain maximum flexibility regarding civil penalties, within the general standards and procedures stated in the regulations. Therefore, after consideration, HUD has decided not to change the rule to address the specific situation raised by the comment. Rather, as to that situation and other individual situations that may arise, owners can consult with legal counsel and/or HUD field office staff, as appropriate.

Comment: Civil money penalties will be "detrimental" to housing managers and hinder the operation of their properties.

Response: While HUD considers the ability to pay in assessing a civil money penalty under 24 CFR 30.80(c), it is also true that the purpose of civil money penalties is to provide a disincentive for a manager, or any party statutorily subject to civil money penalties, to violate its legal obligations regarding HUD-assisted housing developments. Thus, the fact that civil money penalties might be detrimental does not argue against their imposition in appropriate cases. HUD makes no change to the rule as a result of this comment.

B. Comments on the Proposed Amount of Penalties

Comment: HUD should seek penalties appropriate to the violations, and not excessive penalties. A number of commenters stated that the amount of penalties should not be excessive and should relate to the severity of the violation, the financial condition of the violator, and whether there was good faith in attempting to comply with HUD regulations. Some commenters specifically cited the Small Business Regulatory Flexibility Act ("SBRFA"), 5 U.S.C. 612(b), and one commenter stated that some of the SBRFA policies should be incorporated into the final rule so that owners and managers will have a basic understanding of them.

Response: HUD's existing regulations governing civil penalties within which the new rule will be codified already provide for consideration of these factors. The regulations require consideration of, among other things, the gravity of the offense (24 CFR 30.80(a)); the violator's ability to pay (which of necessity includes the financial condition)(24 CFR 30.80(c)); and whether there was good faith (24 CFR 30.80(h)). Furthermore, in order to assess a civil penalty, HUD must show that there was a "knowing and material" violation. (*See, e.g.,* 24 CFR 30.45(b)(1)(ii) and (c).) Lack of knowledge would be a form of good-faith defense that a respondent could raise. Regarding SBRFA-related matters, HUD has fully complied with SBRFA requirements, and has published material on its SBRFA policies, so that it is not necessary to repeat this material in each individual rule. For more information, please see below the section entitled "Small Entities and HUD Enforcement Actions." In addition, information on HUD's SBRFA policies can be found on the World Wide Web by choosing the "Small Business" link from HUD's home page, *http://www.hud.gov,* and clicking on the link to "1996 Law (SBREFA)."

Comment: Civil money penalties could be crippling in many circumstances, and owners and managers need a clear understanding of their exposure to deter potential wrongdoing.

Response: Under its current statutory authority to assess civil money penalties for multifamily housing, section 202 and section 811 developments, as adjusted under the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note, HUD may assess a civil money penalty of up to $30,000. For section 8 properties, the Inflation Adjustment Act currently does not result in an increase above the original $25,000 statutory amount (*See* 42 U.S.C. 1437z–1(b)(3)). Owners and managers should consider these amounts their maximum potential civil money penalty exposure. (For the pre-adjustment penalty for multifamily housing, see 12 U.S.C. 1715f–15(c)(2).) See the preamble to the proposed rule for an explanation as to the section 202 and 811 programs, 65 FR 39502–39504 (June 26, 2000).)

Comment: Four commenters supported increased civil money penalties. One also supported the expansion of parties potentially subject to civil money penalties. Others stated that aggressive enforcement of civil money penalties is the best remedy to insure that tenants get decent homes and HUD funds are spent wisely.

Response: These comments do not seek any change in the regulation. Therefore, no change is necessary as a result.

C. Comments Raising Fairness Concerns

Five commenters raised concerns regarding the fairness of civil money penalties. These comments concerned hypothetical situations where HUD contributes to a violation; false statement provisions; due process concerns; and a concern that potential civil money penalties will encourage owners to opt out of assisted housing programs.

Comment: A provision prohibiting HUD from assessing penalties in the case of misconduct by HUD should be more fully implemented in the rule. Three commenters stated that, as to Section 8 owners, the rule implements the statutory provision that HUD may not impose penalties if a material cause of the violation is the failure of HUD or a PHA to comply with an existing agreement at 24 CFR 30.68(e) (*see* 42 U.S.C. 1437z–1(a)(2). However, the rule does not implement a similar provision in 12 U.S.C. 1735f–15(a) relating to HUD-assisted mortgagors. In addition, the rule should provide examples of HUD actions to which this provision would apply. One of the three commenters cited, as an example, HUD denials of requests for rent increases, which the commenter argued made it unfair for HUD to impose penalties for non-compliance. Another commenter similarly argued that the rule should not allow HUD to take any enforcement action until the agency has "fully complied" with its obligations under the regulatory agreement between the owner and HUD.

Response: The commenters correctly observe that the provision in question regarding failure to comply with existing agreements is found in both authorizing statutes that this rule implements. Therefore, HUD sees no reason why HUD should not implement the parallel provision in § 30.45. Indeed, failure to do so could be misunderstood to indicate that HUD intended to implement this provision for the Section 8 program only. Therefore, in accordance with this comment, HUD revises the proposed rule to implement this provision in § 30.45.

However, HUD disagrees with the commenters' assertion that HUD should provide examples of conduct to which this provision would apply, or address

the specific issue of the regulatory agreement. In particular, HUD disagrees with the commenter's example, citing a denial of a rent increase as cause for excuse from civil money penalties for noncompliance with HUD regulations. In most circumstances, the ordinary denial of a requested rent increase would not be an example of a failure to comply with an existing agreement, and would not insulate the owner from civil money penalties. Rather, such requests would be assessed in accordance with the regulatory requirements governing them, and approved or denied based on those requirements. As to the comment regarding theoretical future failures of HUD to "fully comply" with the regulatory agreement, HUD believes that the issue of whether a failure to comply with an agreement has occurred, and amounts to a violation of the agreement that constitutes a material cause of the owner's malfeasance, is of necessity controlled by the facts of particular cases, and is best examined on a case by case basis in the hearing process. Therefore, HUD makes no change other than to add the parallel provision.

Comment: The provision allowing for civil money penalties to be imposed on Section 8 owners in the case of false statements or false requests to HUD for housing assistance payments is unfair. Two commenters stated that, since it is impossible to determine that each unit is "decent, safe and sanitary" each day, the certification on the HAP voucher exposes the owner to a penalty with each submission. It would be an impossible administrative burden for owners to inspect each unit prior to submission on the voucher. In addition, minor technical violations could unfairly lead to large civil money penalties. Therefore, standards need to be set so that *de minimis* inaccuracies in vouchers, which can always be found, do not lead to civil penalties.

Response: In order to be liable for civil penalties, an owner must make a "knowing or willful" false submission or statement. While it is impossible to comment on future situations that may or may not arise, in the type of hypothetical scenario described by the comment, the submission might not be "knowing" or "willful," and so might not meet the standard for assessing a civil penalty. Of course, this response does not relieve each owner of the responsibility to make reasonable and timely efforts to ascertain the condition of the project and take appropriate corrective action when necessary. In close cases, HUD is still obligated to consider the gravity of the offense and the degree of culpability (see 24 CFR 30.80(a) and (h)). Of course, HUD will consider each case on its merits. In questionable cases, potential respondents are advised to consult with the HUD field office as well as their own counsel. However, the rule as currently written is flexible enough to deal with the commenter's concern, and so no further modification of the rule is necessary.

Comment: Owners will opt out of HUD programs. The proposed rule provides another incentive for owners to opt out at the earliest opportunity. There should be reasonable procedures whereby good owners will not be fined for minor and technical violations. It should be HUD's goal to create incentives for owners who want to stay in HUD's programs.

Response: Reasonable procedures regarding minor and technical violations are already in place. For example HUD is required to consider the gravity of the offense when determining the amount of a civil money penalty. 12 U.S.C. 1735f-15(d)(3); 12 U.S.C. 1701q–1(d)(3); 42 U.S.C. 1437z–1(c)(3)(A), implemented at 24 CFR 30.80(a). In addition, HUD has provided incentives for owners to remain in multifamily assisted housing programs, including mark-to-market and mark-up-to market. Whether or not particular owners will choose to opt out rather than pay civil money penalties is purely hypothetical. In any case, HUD must enforce its program rules, which are for the benefit of tenants and the taxpaying public.

D. Due Process Concerns

Comment: One commenter stated that since the rule does not include a detailed appeals procedure, it violates due process.

Response: The commenter is incorrect. Although these particular revisions to 24 CFR part 30 do not include a separate appeals procedure, the general procedures incorporated into part 30, where these sections will be codified, applies. Under 24 CFR 30.95, hearings regarding part 30 civil money penalties are to be conducted under the procedures in 24 CFR part 26, subpart B. This subpart contains complete hearing procedures that comply with due process, including higher-level administrative appeal and judicial review provisions. Furthermore, judicial review is authorized by the underlying statutes. (*See* 12 U.S.C. 1735f–15(e) and 42 U.S.C. 1437z–1(d)). Therefore, no change is necessary as a result of this comment.

Comment: One commenter stated that the rule should provide that civil penalties cannot be imposed until the appeals process is completed.

Response: Generally, the authorizing statutes provide that a civil penalty may be imposed only after the respondent "has received notice and an opportunity for a hearing on the record." (*See* 12 U.S.C. 1735f–15(d)(1)(B) and 42 U.S.C. 1437z–1(c)(1)(B)). Thus, HUD has authority to impose the penalty at that point, and sees no reason to refrain from imposing a penalty at the time of the initial decision if the respondent is found liable. While respondents have the right to seek a stay of the penalty during the appeals process, HUD does not believe an automatic stay for all cases would be in the public interest, since some cases may involve egregious acts of noncompliance for which a stay would not be appropriate.

E. Use of Funds Collected Through Civil Penalties

Three commenters suggested uses of the funds collected through the civil penalty process to benefit the specific project found liable.

Comment: Since the ultimate goal is to provide decent, safe and sanitary housing, HUD should permit the penalty or a payment in lieu of the penalty to be paid to the project to fix the underlying problems.

Response: The law does not permit the suggested payment of penalties. Penalties collected from multifamily and Section 202 owners may only be deposited in the Flexible Subsidy fund established by Section 201(j) of the Housing and Community Development Amendments of 1978. 12 U.S.C. 1735f–15(j); 12 U.S.C. 1701q–1(j). For FHA-insured or formerly FHA-insured projects, penalties collected against Section 8 owners and agents must either be deposited in the appropriate insurance fund or in another fund established under 42 U.S.C. 1437 (*see* 42 U.S.C. 1437z–1(g)(1)). For projects that are not FHA-insured, penalties collected against Section 8 owners and agents must be applied to the administrative costs incurred in enforcing HUD programs (see 42 U.S.C. 1437z-1(g)(2)). Since HUD cannot promulgate rules that violate Federal law, HUD makes no change as a result of this comment.

Comment: The fines should be directed to be used by the property solely to address any "damage" which was caused to the property for failure to meet the defined level of expectation.

Response: As in the comment above, the law does not permit the suggested application of penalties. Penalties collected from multifamily and section 202 owners may only be deposited in the Flexible Subsidy fund established by section 201(j) of the Housing and Community Development Amendments

of 1978. 12 U.S.C. 1735f–15(j); 12 U.S.C. 1701q–1(j). Penalties collected against Section 8 owners and agents must either be deposited in the appropriate insurance fund or another fund established by 42 U.S.C. 1437, or applied to the administrative costs incurred in enforcing HUD programs. 42 U.S.C. 1437z–1(g). Since HUD cannot promulgate rules that violate Federal law, HUD makes no change as a result of this comment.

F. Accessibility Issues

Comment: Failure to provide accessibility features required by law should be a basis for liability for civil penalties. One commenter stated that under § 561, failure to maintain the premises should include failure to have accessibility features required by law. Failure to have acceptable management should include failure to grant reasonable accommodations and other fair housing compliance as required by law. A commenter stated that under § 562, decent, safe and sanitary housing should be changed to "decent, safe, accessible, and sanitary housing."

Response: The proposed rulemaking for this rule did not put the public on notice that violations of civil rights laws could lead to the assessment of civil money penalties under sections 561 and 562 of the MAHRA. HUD does not believe it can add entirely new categories of penalties at this stage of the rulemaking, but rather would have to do so through a new proposed rule. Therefore, HUD makes no change to this rule as a result of these comments.

G. Additional Factors in Assessing Penalties

Two commenters argued for the inclusion of additional factors when assessing civil money penalties.

Comment: A past pattern of violation, prior to the publication of the final rule, and/or evidence of continuing violation should be given "material weight" in whether or not to establish penalties and in establishing their amount.

Response: 24 CFR 30.80(b) requires HUD to consider any history of past violations in determining whether to assess a civil penalty and the amount of such penalty. Therefore, no further revision to part 30 is necessary as a result of this comment.

Comment: The rule should clarify that mortgagors/owners who are in noncompliance with HUD procedures and management standards, particularly those affecting tenant living conditions and security of tenure, will be subject to penalties. For example, failure by the owner to comply with the notice requirements for Section 8 opt-outs and/or mortgage prepayments should be subject to penalties. Similarly, common violations of HUD management standards stated in handbooks, such as failure to maintain proper waiting lists for vacancies or transfers, improper charges to tenants, violations of local and State landlord/tenant laws and tenants' rights under leases, should be subject to penalties.

Response: HUD agrees that the violation of programatic procedures and standards, including the examples given by the commenter, are indicators of unsatisfactory management. The rule has been clarified to include this interpretation. However, the rule also makes clear that HUD does not believe that a single programmatic violation, unless extraordinarily serious, constitutes unacceptable management for which a civil money penalty may be imposed.

Comment: The rule should clarify that failure to respect the right of tenants to organize, should be subject to civil penalties. One commenter states that rule on tenant organization did not include civil penalties as an enforcement mechanism, and that HUD advised tenant representatives that this was an oversight that could be corrected by a subsequent rulemaking.

Response: HUD agrees with the comment, and the final rule has been revised accordingly.

H. Opt-Out Projects

One commenter stated that the rule should be extended to cover project-based Section 8 developments that opt out and convert to preservation vouchers.

Comment: HUD has authority to apply the civil penalty rule to projects that opt out because the MAHRAA statute which extended "civil monetary authority" over Section 8 units has been amended to provide for preservation vouchers in the event of an opt out. Doing so would eliminate the different standards used for units receiving preservation vouchers as opposed to project-based assistance. Ultimately, the commenter would prefer that oversight of units receiving preservation vouchers be transferred from PIH to the Office of Multifamily Housing. In the meantime, HUD should seek to equalize the standards. If further research suggests that MAHRAA, as amended, does not give HUD the authority to do this, HUD should propose legislation to accomplish this objective.

Response: HUD does not believe that it has the authority under the statute being implemented by this rule to take the steps suggested by the commenter under the MAHRAA, which states that a penalty may be imposed for a knowing and material breach of a HAP contract. (See 42 U.S.C. 1437z–1(b)(2).) This provision applies to owners, general partners, and identity-of-interest management agents of projects receiving project-based Section 8, 42 U.S.C. 1437z–1(b)(1). However, the enhanced vouchers granted to opt-out projects are generally tenant-based, and projects receiving project-based vouchers are generally not projects that have opted out. Thus, the statute being implemented by this rule does not appear to grant HUD the authority over projects that opt out as the commenter claims. Furthermore, HUD is reluctant to seek an expansion of its civil money penalty authority until it has gained sufficient experience to determine the effectiveness of its existing authority. Therefore, HUD makes no change to the rule as a result of this comment.

I. Tenant Participation in Civil Penalty Proceedings

Comment: Tenants and tenant organizations should be able to have a voice in HUD's process for assessing civil money penalties. Specifically, tenants should get notice of any proposed civil penalties; access to information regarding the administrative record of such proceedings, including all correspondence between HUD and owners on proposed penalties; and the right to comment before HUD's final decision. This should be done because tenants have the greatest stake in the maintenance of HUD standards, and they aspire to be major partners with HUD in the oversight of their homes. Allowing tenants to participate will allow tenants to be HUD's "eyes and ears" and enhance HUD's ability to gather evidence.

Response: The civil penalty process, by statute, is conducted by the government. HUD does not believe that involvement by tenants in the actual conduct of civil penalty cases is authorized, and therefore declines to adopt this suggestion.

As to the portion of the comment seeking information regarding ongoing civil penalty proceedings, the Freedom of Information Act would apply to those requests.

J. Clarification of Terms

Five commenters requested that the meaning of various terms used in the rule be clarified.

Comment: The definition of "ownership interest in" is too broad and should be clarified to mean persons holding legal title to interests in the subject entity.

Response: HUD believes that the suggested revision is too restrictive, as there are a variety of legal and equitable forms of ownership interest. Furthermore, for purposes of determining whether there is an identity of interest between ownership and the managing agent, the commenter's suggested definition is inadequate. HUD therefore declines to adopt the suggested change.

Comment: The definition of "effective control" is too broad and should be clarified to mean actual or apparent legal authority to bind the subject entity.

Response: HUD believes that effective control means much more than the authority to bind, and includes various forms of influence over others in the organization. Such influence is often based on financial or family considerations. HUD has thus adopted a functional definition of "effective control." The suggested clarification would prevent HUD from taking relevant factors into consideration when determining whether an identity of interest relationship exists between an owner and a management agent. Therefore, HUD declines to adopt the suggested change.

Comment: HUD should amend "agent employed to manage the property that has an identity of interest" so it is the same as for "identity of interest agent" in Handbook 4381.5 REV–2, Chapter 1.

Response: The definition for identity of interest agent used in the rule is statutory, and HUD does not believe it has the authority to alter it. (*See* 12 U.S.C. 1735f–15–1(k), 42 U.S.C. 1437z–1(h).)

Comment: The rule should contain more precise cross-references to new Section 29 of the U.S. Housing Act of 1937 and the corresponding provisions of 24 CFR parts 26 and 30.

Response: The "Authority" statement at the beginning of the rule and the discussion in the preamble provide appropriate cross-references to the underlying statutory authority.

Comment: The definition of "entity" is too broad. In the case of a public corporation, a low-level staff member such as a "low ranking Vice President" can be the owner of a small number of shares in an employee stock ownership plan, and could be included in the definition. Similarly, the definition of "entity" in 30.45(a)(3) as "any other organization or group of people" is overly broad. The same problem occurs in section 30.68. The definition should be narrowed to limit the scope of liability to those with actual responsibility for violations.

Response: Although the commenter seems to take the position that one can become liable for civil penalties simply by meeting the definition of "entity," in fact the definition of "entity" does not control who is potentially liable for civil penalties; rather, the only potentially liable parties are those listed under 12 U.S.C. 1735f–15(c)(1)(A) and 42 U.S.C. 1437z–1(b)(1). HUD does not believe, as the commenter fears, that the relevant statutory sections and rule would allow HUD to hold a person liable for a civil money penalty for the sole reason that he or she is a "low-level staff member" of, or holds a few shares in, the management agent. The proposed definition of "entity" properly takes account of the various legal and business entities that can be involved in housing transactions.

Comment: Entities subject to fines in §§ 30.45(b)(1) and (c)(1) and 30.68(b) should include the officers or directors of a corporate general partner in a partnership entity. This is necessary to prevent bad landlords from avoiding liability by using complex corporate structures to shield themselves.

Response: Applicable statutes do not give HUD authority to impose civil money penalties directly against the parties mentioned in the comment. 12 U.S.C. 1735f–15(c)(1)(A); 12 U.S.C. 1701q–1(b)(1) and (c)(1); 42 U.S.C. 1437z–1(b)(1). Of course, "any" general partners, including corporate ones, are covered under 12 U.S.C. 1735f–15(c)(1)(A) and 42 U.S.C. 1437z–1(b)(1).

K. Effective Date

Comment: The rule should be effective retroactively. The effective date should be amended to include past patterns of violation or continuing violations that have not been corrected as of the date of publication of the rule. This is essential to prevent bad landlords who have escaped effective enforcement action for years from getting away with impunity by claiming that only violations going forward from the date of rule publication are subject to fines. HUD should be able to take into account a previous administrative record of non-compliance with HUD standards in assessing fines quickly and firmly after the date of publication.(#8)

Response: HUD currently has the authority to impose civil money penalties for violations listed in the original civil penalty statutes which occurred after December 15, 1989, the effective date of those statutes. Sections 108(b) and 109(b) of the Department of Housing and Urban Development Reform Act of 1989, Public Law 101–235, 103 Stat. 2007, 2011. With respect to violations which were added by Section 561 of MAHRAA, HUD has statutory authority to impose civil money penalties only for violations which take place after the effective date of the final rule implementing section 561. (See Public Law 105–65 at section 561(c)(1). Section 562 has a similar provision. (See Public Law 105–65 at section 562(b).

Although HUD cannot make violators liable under the new laws for conduct occurring prior to the effective date of final regulations, HUD does consider a history of past violations in determining whether to assess a civil penalty and how much. 24 CFR 30.80(b).

L. Section 811 and 202 Properties

Comment: Four commenters support the application of the rule to 811 and 202 properties.

Response: Since these comments seek no change in the proposed rule, no response is necessary.

IV. Small Entities and HUD Enforcement Actions

The Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 847, approved March 29, 1996) (SBREFA) provides, among other things, for agencies to establish specific policies or programs to assist small entities. Small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. On May 21, 1998 (63 FR 28214), HUD published a **Federal Register** notice describing HUD's actions on implementation of SBREFA.

Section 223 of SBREFA requires agencies that regulate the activities of small entities to establish a policy or program to reduce or, *under appropriate circumstances,* waive civil penalties when a small entity violates a statute or regulation. Where penalties are determined appropriate, HUD's policy is to consider: (1) The nature of the violation (the violation must not be one that is repeated or multiple, willful, criminal or poses health or safety risks), (2) whether the entity has shown a good faith effort to comply with the regulations; and (3) the resources of the regulated entity.

With respect to the imposition of civil money penalties, HUD is cognizant that section 222 of the SBREFA requires the Small Business and Agriculture Regulatory Enforcement Ombudsman to "work with each agency with regulatory authority over small businesses to ensure that small business concerns that receive or are subject to an audit, on-site inspection, compliance assistance effort or other enforcement related communication or contact by agency personnel are provided with a means to comment on the enforcement activity conducted by this personnel." To

implement this statutory provision, the Small Business Administration has requested that agencies include the following language on agency publications and notices which are provided to small businesses concerns at the time the enforcement action is undertaken. The language is as follows:

Your Comments Are Important

The Small Business and Agriculture Regulatory Enforcement Ombudsman and 10 Regional Fairness Boards were established to receive comments from small businesses about federal agency enforcement actions. The Ombudsman will annually evaluate the enforcement activities and rate each agency's responsiveness to small business. If you wish to comment on the enforcement actions of [insert agency name], call 1–888–REG–FAIR (1–888–734–3247).

As HUD stated in its May 21, 1998 **Federal Register** notice, HUD intends to work with the Small Business Administration to provide small entities with information on the Fairness Boards and National Ombudsman program, at the time enforcement actions are taken, to ensure that small entities have the full means to comment on the enforcement activity conducted by HUD.

V. Findings and Certifications

Environmental Impact

In accordance with 40 CFR 1508.4 of the Council on Environmental Quality regulations and 24 CFR 50.19(c)(1) and (c)(6) of the HUD regulations, the policies and procedures contained in this final rule are determined not to have the potential of having a significant impact on the human environment and are therefore exempt from further environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

Federalism Impact

This final rule does not have federalism implications and does not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of Executive Order 13132 (entitled "Federalism").

Regulatory Flexibility Act

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed and approved this final rule. In so doing, the Secretary certifies that this final rule would not have a significant economic impact on a substantial number of small entities. This rule implements sections 561 and 562 of the Multifamily Reform Act. The rule makes conforming changes to HUD's regulations at 24 CFR part 30 to reflect statutory changes made to the National Housing Act and the United States Housing Act of 1937. These changes were mandated by the Multifamily Reform Act and are not discretionary on the part of HUD.

The purpose of these amendments is to grant HUD additional enforcement tools to use against those who violate agreements and program requirements. The Multifamily Reform Act expanded the list of persons and the types of violations subject to civil money penalties under HUD's insured housing and Section 8 programs. To the extent that these statutory changes impact small entities, it will be as a result of actions taken by the small entities themselves—that is, by violating multifamily and Section 8 program regulations and requirements.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) requires Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and on the private sector. This final rule does not, within the meaning of the UMRA, impose any Federal mandates on any State, local, or tribal governments nor on the private sector.

Executive Order 12866, Regulatory Planning and Review

The Office of Management and Budget (OMB) reviewed this proposed rule under Executive Order 12866 (entitled "Regulatory Planning and Review"). OMB determined that this proposed rule is a "significant regulatory action," as defined in section 3(f) of the Order (although not economically significant, as provided in section 3(f)(1) of the Order). Any changes made to the proposed rule subsequent to its submission to OMB are identified in the docket file, which is available for public inspection in the office of the Rules Docket Clerk, Room 10276, U.S. Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC, 20410–0500.

List of Subjects in 24 CFR Part 30

Administrative practice and procedure, Loan programs—housing and community development, Mortgages, Penalties.

Accordingly, for the reasons stated in the preamble, HUD amends 24 CFR part 30 as follows:

PART 30—CIVIL MONEY PENALTIES: CERTAIN PROHIBITED CONDUCT

1. The authority citation for 24 CFR part 30 is revised to read as follows:

Authority: 12 U.S.C. 1701q–1, 1703, 1723i, 1735f–14, and 1735f–15; 15 U.S.C. 1717a; 28 U.S.C. 2461 note; 42 U.S.C. 1437z–1 and 3535(d).

2. Add paragraph (f) to § 30.5 to read as follows:

§ 30.5 Effective dates.

* * * * *

(f) Under § 30.68, a civil money penalty may be imposed for violations, or for those parts of continuing violations, occurring on or after January 7, 2002.

3. Revise § 30.45 to read as follows:

§ 30.45 Multifamily and section 202 or 811 mortgagors.

(a) *Definitions.* The following definitions apply to this section only:

(1) *Agent employed to manage the property that has an identity of interest* and *identity of interest agent.* An entity:

(i) That has management responsibility for a project;

(ii) In which the ownership entity, including its general partner or partners (if applicable) and its officers or directors (if applicable), has an ownership interest; and

(iii) Over which the ownership entity exerts effective control.

(2) *Effective control.* The ability to direct, alter, supervise, or otherwise influence the actions, policies, decisions, duties, employment, or personnel of the management agent.

(3) *Entity.* An individual corporation; company; association; partnership; authority; firm; society; trust; state, local government or agency thereof; or any other organization or group of people.

(4) *Multifamily property.* Property that includes 5 or more living units and that has a mortgage insured, co-insured, or held pursuant to the National Housing Act (12 U.S.C. 1702 *et seq.*).

(5) *Ownership interest.* Any direct or indirect interest in the stock, partnership interests, beneficial interests (for a trust) or other medium of equity participation. An indirect interest includes equity participation in any entity that holds a management interest (e.g. general partner, managing member of an LLC, majority stockholder, trustee) or minimum equity interest (e.g., a 25% or more limited partner, 10% or more stockholder) in the ownership entity of the management agent.

(6) *Section 202 or 811 property.* Property that includes 5 or more living units and that has a mortgage held pursuant to a direct loan or capital

advances under section 202 of the Housing Act of 1959 (12 U.S.C. 1701q) or capital advances under section 811 of the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. 8013).

(b) *Violation of agreement.*—(1) *General.* The Assistant Secretary for Housing-Federal Housing Commissioner, or his or her designee, may initiate a civil money penalty action against a mortgagor of a section 202 or 811 property or a mortgagor, general partner of a partnership mortgagor, or any officer or director of a corporate mortgagor of a multifamily property who:

(i) Has agreed in writing, as a condition of a transfer of physical assets, a flexible subsidy loan, a capital improvement loan, a modification of the mortgage terms, or a workout agreement, to use nonproject income to make cash contributions for payments due under the note and mortgage, for payments to the reserve for replacements, to restore the project to good physical condition, or to pay other project liabilities; and

(ii) Knowingly and materially fails to comply with any of the commitments listed in paragraph (b)(1)(i) of this section.

(2) *Maximum penalty.* The maximum penalty for each violation under paragraph (b) of this section is the amount of loss that the Secretary would experience at a foreclosure sale, or a sale after foreclosure, of the property involved.

(c) *Other violations.* The Assistant Secretary for Housing-Federal Housing Commissioner, or his or her designee, may initiate a civil money penalty action against any of the following who knowingly and materially take any of the actions listed in 12 U.S.C. 1735f–15(c)(1)(B):

(1) Any mortgagor of a multifamily property;

(2) Any general partner of a partnership mortgagor of such property;

(3) Any officer or director of a corporate mortgagor;

(4) Any agent employed to manage the property that has an identity of interest with the mortgagor, with the general partner of a partnership mortgagor, or with any officer or director of a corporate mortgagor of such property; or

(5) Any member of a limited liability company that is the mortgagor of such property or is the general partner of a limited partnership mortgagor or is a partner of a general partnership mortgagor.

(d) *Acceptable management.* For purposes of this rule, "management acceptable to the Secretary" under 12 U.S.C. 1735f–15(c)(1)(B)(xiv) shall include:

(1) Proper fiscal management;

(2) Proper handling of vacancies and tenanting in accordance with HUD regulations;

(3) Appropriate handling of rent collection;

(4) Proper maintenance;

(5) Compliance with HUD regulations on tenant organization; and

(6) Any other matters that pertain to proper management.

(e) *Civil money penalty.* A consistent pattern of violations of HUD program requirements, or a single violation that causes serious injury to the public or tenants, can be a basis for an action to assess a civil money penalty.

(f) *Section 202 or 811 projects.* The Assistant Secretary for Housing-Federal Housing Commissioner, or his or her designee, may initiate a civil money penalty action against any mortgagor of a section 202 or 811 property who knowingly and materially takes any of the actions listed in 12 U.S.C. 1701q–1(c)(1).

(g) *Maximum penalty.* The maximum penalty for each violation under paragraph (c) of this section is $30,000.

(h) *Payment of penalty.* No payment of a civil money penalty levied under this section shall be payable out of project income.

(i) *Exceptions.* The Secretary may not impose penalties under this section for a violation, if a material cause of the violation is the failure of the Secretary, an agent of the Secretary, or a public housing agency to comply with an existing agreement.

4. Add § 30.68 to read as follows:

§ 30.68 Section 8 owners.

(a) *Definitions.* The following definitions apply to this section only:

Agent employed to manage the property that has an identity of interest and *identity of interest agent.* An entity:

(1) That has management responsibility for a project;

(2) In which the ownership entity, including its general partner or partners (if applicable), has an ownership interest; and

(3) Over which the ownership entity exerts effective control.

Effective control. The ability to direct, alter, supervise, or otherwise influence the actions, policies, decisions, duties, employment, or personnel of the management agent.

Entity. An individual corporation; company; association; partnership; authority; firm; society; trust; state, local government or agency thereof; or any other organization or group of people.

Ownership interest. Any direct or indirect interest in the stock, partnership interests, beneficial interests (for a trust) or other medium of equity participation. An indirect interest includes equity participation in any entity that holds a management interest (*e.g.* general partner, managing member of an LLC, majority stockholder, trustee) or minimum equity interest (*e.g.*, a 25% or more limited partner, 10% or more stockholder) in the ownership entity of the management agent.

(b) *General.* The Assistant Secretary for Housing-Federal Housing Commissioner, or his or her designee, and the Assistant Secretary for Public and Indian Housing, or his or her designee, may initiate a civil money penalty action against any owner, any general partner of a partnership owner, or any agent employed to manage the property that has an identity of interest with the owner or the general partner of a partnership owner of a property receiving project-based assistance under section 8 of the United States Housing Act of 1937 (42 U.S.C. 1437f) for a knowing and material breach of a housing assistance payments contract, including the following:

(1) Failure to provide decent, safe, and sanitary housing pursuant to section 8 of the United States Housing Act of 1937 and 24 CFR 5.703; or

(2) Knowing or willful submission of false, fictitious, or fraudulent statements or requests for housing assistance payments to the Secretary or to any department or agency of the United States.

(c) *Maximum penalty.* The maximum penalty for each violation under this section is $25,000.

(d) *Payment of penalty.* No payment of a civil money penalty levied under this section shall be payable out of project income.

(e) *Exceptions.* The Secretary may not impose penalties under this section for a violation, if a material cause of the violation is the failure of the Secretary, an agent of the Secretary, or a public housing agency to comply with an existing agreement.

4. Revise § 30.80(k) introductory text, to read as follows:

§ 30.80 Factors in determining appropriateness and amount of civil money penalty.

* * * * *

(k) In addition to the above factors, with respect to violations under §§ 30.45, 30.55, 30.60, and 30.68, the Assistant Secretary for Housing-Federal Housing Commissioner, or his or her designee, or the Assistant Secretary for Public and Indian Housing, or his or her designee, shall also consider:

* * * * *

Dated: November 26, 2001.

Mel Martinez,

Secretary.

Department of Veterans Affairs

38 CFR Part 17

Copayments for Inpatient Hospital Care and Outpatient Medical Care, Copayments for Medications; Interim and Final Rule

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 17

RIN 2900–AK50

Copayments for Inpatient Hospital Care and Outpatient Medical Care

AGENCY: Department of Veterans Affairs.

ACTION: Interim and final rule.

SUMMARY: This document amends VA's medical regulations to set forth a mechanism for determining copayments for inpatient hospital care and outpatient medical care. This is necessary to implement provisions of the Veterans Millennium Health Care and Benefits Act and to set forth exemptions from copayment requirements as mandated by statute.

DATES: *Effective Date:* December 6, 2001.

Comment Date: Comments must be received by VA on or before February 4, 2002.

ADDRESSES: Mail or hand-deliver written comments to: Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Ave., NW., Room 1154, Washington, DC 20420; or fax comments to (202) 273–9289; or e-mail comments to *OGCRegulations@mail.va.gov*. Comments should indicate that they are submitted in response to "RIN 2900–AK50." All comments received will be available for public inspection in the Office of Regulations Management, Room 1158, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays).

FOR FURTHER INFORMATION CONTACT: Nancy L. Howard at (202) 273–8198, Revenue Office (174), Office of Finance, Veterans Health Administration, 810 Vermont Avenue, NW., Washington, DC 20420. (The telephone number is not a toll-free number.)

SUPPLEMENTARY INFORMATION: This document amends VA's medical regulations to set forth a mechanism for determining copayments for inpatient hospital care and outpatient medical care provided to veterans by VA. As explained below, a number of groups of veterans and services would be exempted from the copayment requirements.

The provisions of 38 U.S.C. 1710(a), (f), and (g) state that certain veterans are not eligible for inpatient hospital care or outpatient medical care provided by VA under 38 U.S.C. 1710(a) unless they agree to pay a copayment.

Inpatient Hospital Care

The rule restates provisions of 38 U.S.C. 1710(f), which state that the copayment for inpatient hospital care during any 365-day period is the sum of:

(i) $10 for every day the veteran receives inpatient hospital care, and

(ii) The lesser of:

(A) The sum of the inpatient Medicare deductible for the first 90 days of care and one-half of the inpatient Medicare deductible for each subsequent 90 days of care (or fraction thereof) after the first 90 days of such care during such 365-day period, or

(B) VA's cost of providing the care.

Outpatient Medical Care

Previously, the copayment amount for outpatient medical care was $50.80. This was based on statutory provisions that required the copayment to be "an amount equal to 20 percent of the estimated average cost (during the calendar year in which the services are furnished) of an outpatient visit in a * * * [VA] facility."

This statutory provision was changed by the Veterans Millennium Health Care and Benefits Act, Public Law 106–117, 113 Stat. 1545. VA now has authority to change the copayment amount to "the applicable amount or amounts established by the Secretary by regulation."

HR Report 106–237, July 16, 1999, which accompanied the Veterans Millennium Health Care and Benefits Act, indicates that the previous copayment for routine outpatient medical care is too high. The Committee noted, at pp. 43 and 44, that "[such copayments] may in many cases approach the full cost for the episode of treatment. Requiring so high a copayment for a routine, primary care visit appears to the Committee to be unreasonable. * * * The Committee recommends that the Secretary not set a single copayment amount, but consider practices within the health care industry to differentiate between primary care and specialty clinic visits."

Accordingly, based on the new statutory authority, we are establishing a copayment amount of $15 for primary care visits and $50 for specialty care visits. Further, as discussed below, we would not charge a copayment for certain services.

The $50 copayment for specialty care visits is essentially the same as the current copayment. However, the $15 copayment for primary care visits is more in line with copayment amounts charged in the private sector. A VHA copayment work group found that the mean copayment for primary care in HMOs is $6.84, the mean copayment for mental health care in HMOs is $15.32, and the mean copayment for emergency care in HMOs is $28.91. The work group also found that the most common copayment for all types of HMO care is $10.00. TRICARE Prime copayments range from $6 to $12 for primary and specialty care, from $6 to $25 for mental health care, and $10 to $30 for emergency care.

A primary care outpatient visit is an episode of care furnished in a clinic that provides integrated, accessible healthcare services by clinicians who are accountable for addressing a large majority of personal healthcare needs, developing a sustained partnership with patients, and practicing in the context of family and community. Primary care includes, but is not limited to, diagnosis and management of acute and chronic biopsychosocial conditions, health promotion, disease prevention, overall care management, and patient and caregiver education. Each patient's identified primary care clinician delivers services in the context of a larger interdisciplinary primary care team. Patients have access to the primary care clinician and much of the primary care team without need of a referral. A specialty care outpatient visit is an episode of care furnished in a clinic that does not provide primary care, and is only provided through a referral. Some examples of specialty care provided at a specialty care clinic are radiology services requiring the immediate presence of a physician, audiology, optometry, magnetic resonance imagery (MRI), computerized axial tomography (CAT) scan, nuclear medicine studies, surgical consultative services, and ambulatory surgery.

We believe these definitions of primary care and specialty care are consistent with the common understanding of these terms.

The rule provides that if a veteran has more than one primary care encounter on the same day and no specialty care encounter on that day, the copayment amount is the copayment for one primary care outpatient visit. The rule also provides that if a veteran has one or more primary care encounters and one or more specialty care encounters on the same day, the copayment amount is the copayment for one specialty care outpatient visit. This is intended to encourage veterans to get as much care as they can get scheduled on the same day. Further, we believe that this will help veterans meet their appointments and, consequently, will help veterans obtain the care they need as quickly as possible.

Exceptions

As mandated by statutory authority, the rule provides that the following veterans are not subject to the

copayment requirements for inpatient hospital care or outpatient medical care:

- A veteran with a compensable service-connected disability;
- A veteran who is a former prisoner of war;
- A veteran awarded a Purple Heart;
- A veteran who was discharged or released from active military service for a disability incurred or aggravated in the line of duty;
- A veteran who receives disability compensation under 38 U.S.C. 1151;
- A veteran whose entitlement to disability compensation is suspended pursuant to 38 U.S.C. 1151, but only to the extent that the veteran's continuing eligibility for care is provided for in the judgment or settlement described in 38 U.S.C. 1151;
- A veteran whose entitlement to disability compensation is suspended because of the receipt of military retirement pay;
- A veteran of the Mexican border period or of World War I;
- A military retiree provided care under an interagency agreement as defined in section 113 of Public Law 106–117, 113 Stat. 1545; and
- A veteran who VA determines to be unable to defray the expenses of necessary care under 38 U.S.C. 1722(a).

Also, as mandated by statutory authority, the rule provides that veterans are not subject to the copayment requirements for inpatient hospital care or outpatient medical care authorized under 38 U.S.C. 1710(e) for Vietnam-era herbicide-exposed veterans, radiation-exposed veterans, Gulf War veterans, or post-Gulf War combat-exposed veterans. Further, as mandated by statutory authority, the rule provides that care provided for a veteran's noncompensable zero percent service-connected disability is not subject to the copayment requirements for inpatient hospital care or outpatient medical care.

We have authority to impose a copayment for inpatient hospital care and outpatient medical services only if the care or services are provided under 38 U.S.C. 1710. Accordingly, the rule also exempts the following from the copayment requirements for inpatient hospital care and outpatient medical services because they are provided under authorities other than 38 U.S.C. 1710:

- Special registry examinations (including any follow-up examinations or testing ordered as part of the special registry examination) offered by VA to evaluate possible health risks associated with military service;
- Counseling and care for sexual trauma as authorized under 38 U.S.C 1720D;
- Compensation and pension examinations requested by the Veterans Benefits Administration;
- Care provided as part of a VA-approved research project authorized by 38 U.S.C. 7303;
- Outpatient dental care provided under 38 U.S.C. 1712;
- Readjustment counseling and related mental health services authorized under 38 U.S.C 1712A;
- Emergency treatment paid for under 38 U.S.C. 1725 or 1728;
- Extended care services authorized under 38 U.S.C. 1710B; and
- Care or services authorized under 38 U.S.C. 1720E for certain veterans regarding cancer of the head or neck.

The rule also exempts publicly announced VA public health initiatives (*e.g.*, health fairs) or outpatient visits solely consisting of preventive screening and immunizations (*e.g.* influenza immunization, pneumonococcal immunization, hypertension screening, hepatitis C screening, tobacco screening, alcohol screening, hyperlipidemia screening, breast cancer screening, cervical cancer screening, screening for colorectal cancer by fecal occult blood testing, and education about the risks and benefits of prostate cancer screening). These initiatives are viewed as cost-effective for health care in that they often provide early detection of irregularities or abnormalities that can be resolved without major intervention. Charging a copayment for these services would deter a veteran from obtaining these services. Also, these health care screenings often are provided at no charge to the patient in private health care settings.

The rule provides that laboratory services, flat film radiology services, and electrocardiograms are not subject to the copayment requirements. These services are considered to be a part of the initial provision of care and a separate copayment would not be charged.

The rule provides that outpatient care is not subject to the outpatient copayment requirements under this section when provided to a veteran during a day for which the veteran is required to make a copayment for extended care services that were provided either directly by VA or obtained for VA by contract. We believe that this will encourage veterans to obtain outpatient care needed which should reduce medical problems for patients in a hospital, nursing home, or domiciliary.

Administrative Procedure Act

We have found good cause to dispense with the notice-and-comment and delayed effective date provisions of the Administrative Procedure Act (5 U.S.C. 553) because compliance with such provisions would be impracticable and contrary to the public interest. It is necessary to reduce primary care copayments for outpatient medical care as quickly as possible to encourage enrolled veterans to utilize VA primary outpatient care services, thereby helping to avoid potentially more costly specialty services.

Unfunded Mandates

The Unfunded Mandates Reform Act requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before developing any rule that may result in an expenditure by State, local, or tribal governments, in the aggregate, or by the private sector of $100 million or more in any given year. This rule would have no consequential effect on State, local, or tribal governments.

Paperwork Reduction Act

This document contains no provisions constituting a collection of information under the Paperwork Reduction Act (44 U.S.C. 3501–3520).

OMB Review

This document has been reviewed by OMB under Executive Order 12866.

Regulatory Flexibility Act

The Secretary hereby certifies that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. This amendment would not directly affect any small entities. Only individuals could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

Catalog of Federal Domestic Assistance Numbers

The Catalog of Federal Domestic Assistance numbers for the programs affected by this document are 64.005, 64.007, 64.008, 64.009, 64.010, 64.011, 64.012, 64.013, 64.014, 64.015, 64.016, 64.018, 64.019, 64.022, and 64.025.

List of Subjects in 38 CFR Part 17

Administrative practice and procedure, Alcohol abuse, Alcoholism, Claims, Day care, Dental health, Drug abuse, Foreign relations, Government

contracts, Grant programs-health, Grant programs-veterans, Health care, Health facilities, Health professions, Health records, Homeless, Medical and dental schools, Medical devices, Medical research, Mental health programs, Nursing homes, Philippines, Reporting and record-keeping requirements, Scholarships and fellowships, Travel and transportation expenses, Veterans.

Approved: November 30, 2001.

Anthony J. Principi,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 17 is amended as set forth below:

PART 17—MEDICAL

1. The authority citation for part 17 continues to read as follows:

Authority: 38 U.S.C. 501, 1721, unless otherwise noted.

2. An undesignated center heading and § 17.108 are added to read as follows:

Copayments

§ 17.108 Copayments for inpatient hospital care and outpatient medical care.

(a) *General.* This section sets forth requirements regarding copayments for inpatient hospital care and outpatient medical care provided to veterans by VA.

(b) *Copayments for inpatient hospital care.* (1) Except as provided in paragraphs (d) or (e) of this section, a veteran, as a condition of receiving inpatient hospital care provided by VA (provided either directly by VA or obtained by VA by contract), must agree to pay VA (and is obligated to pay VA) the applicable copayment, as set forth in paragraph (b)(2) of this section.

(2) The copayment for inpatient hospital care shall be, during any 365-day period, a copayment equaling the sum of:

(i) $10 for every day the veteran receives inpatient hospital care, and

(ii) The lesser of:

(A) The sum of the inpatient Medicare deductible for the first 90 days of care and one-half of the inpatient Medicare deductible for each subsequent 90 days of care (or fraction thereof) after the first 90 days of such care during such 365-day period, or

(B) VA's cost of providing the care.

Note to § 17.108(b): The requirement that a veteran agree to pay the copayment would be met by submitting to VA a signed VA Form 10–10EZ. This is the application form for enrollment in the VA healthcare system and also is the document used for providing means-test information annually.

(c) *Copayments for outpatient medical care.* (1) Except as provided in paragraphs (d), (e) or (f) of this section, a veteran, as a condition of receiving outpatient medical care provided by VA, must agree to pay VA (and is obligated to pay VA) a copayment as set forth in paragraph (c)(2) of this section.

(2) The copayment for outpatient medical care is $15 for a primary care outpatient visit and $50 for a specialty care outpatient visit. If a veteran has more than one primary care encounter on the same day and no specialty care encounter on that day, the copayment amount is the copayment for one primary care outpatient visit. If a veteran has one or more primary care encounters and one or more specialty care encounters on the same day, the copayment amount is the copayment for one specialty care outpatient visit.

(3) For purposes of this section, a primary care visit is an episode of care furnished in a clinic that provides integrated, accessible healthcare services by clinicians who are accountable for addressing a large majority of personal healthcare needs, developing a sustained partnership with patients, and practicing in the context of family and community. Primary care includes, but is not limited to, diagnosis and management of acute and chronic biopsychosocial conditions, health promotion, disease prevention, overall care management, and patient and caregiver education. Each patient's identified primary care clinician delivers services in the context of a larger interdisciplinary primary care team. Patients have access to the primary care clinician and much of the primary care team without need of a referral. In contrast, specialty care is generally provided through referral. A specialty care outpatient visit is an episode of care furnished in a clinic that does not provide primary care, and is only provided through a referral. Some examples of specialty care provided at a specialty care clinic are radiology services requiring the immediate presence of a physician, audiology, optometry, magnetic resonance imagery (MRI), computerized axial tomography (CAT) scan, nuclear medicine studies, surgical consultative services, and ambulatory surgery.

Note to § 17.108(c): The requirement that a veteran agree to pay the copayment would be met by submitting to VA a signed VA Form 10–10EZ. This is the application form for enrollment in the VA healthcare system and also is the document used for providing means-test information annually.

(d) *Veterans not subject to copayment requirements for inpatient hospital care or outpatient medical care.* The following veterans are not subject to the copayment requirements of this section:

(1) A veteran with a compensable service-connected disability;

(2) A veteran who is a former prisoner of war;

(3) A veteran awarded a Purple Heart;

(4) A veteran who was discharged or released from active military service for a disability incurred or aggravated in the line of duty;

(5) A veteran who receives disability compensation under 38 U.S.C. 1151;

(6) A veteran whose entitlement to disability compensation is suspended pursuant to 38 U.S.C. 1151, but only to the extent that the veteran's continuing eligibility for care is provided for in the judgment or settlement described in 38 U.S.C. 1151;

(7) A veteran whose entitlement to disability compensation is suspended because of the receipt of military retirement pay;

(8) A veteran of the Mexican border period or of World War I;

(9) A military retiree provided care under an interagency agreement as defined in section 113 of Public Law 106–117, 113 Stat. 1545; or

(10) A veteran who VA determines to be unable to defray the expenses of necessary care under 38 U.S.C. 1722(a).

(e) *Services not subject to copayment requirements for inpatient hospital care or outpatient medical care.* The following are not subject to the copayment requirements under this section:

(1) Care provided to a veteran for a noncompensable zero percent service-connected disability;

(2) Care authorized under 38 U.S.C. 1710(e) for Vietnam-era herbicide-exposed veterans, radiation-exposed veterans, Gulf War veterans, or post-Gulf War combat-exposed veterans;

(3) Special registry examinations (including any follow-up examinations or testing ordered as part of the special registry examination) offered by VA to evaluate possible health risks associated with military service;

(4) Counseling and care for sexual trauma as authorized under 38 U.S.C 1720D;

(5) Compensation and pension examinations requested by the Veterans Benefits Administration;

(6) Care provided as part of a VA-approved research project authorized by 38 U.S.C. 7303;

(7) Outpatient dental care provided under 38 U.S.C. 1712;

(8) Readjustment counseling and related mental health services authorized under 38 U.S.C 1712A;

(9) Emergency treatment paid for under 38 U.S.C. 1725 or 1728;

(10) Care or services authorized under 38 U.S.C. 1720E for certain veterans regarding cancer of the head or neck;

(11) Publicly announced VA public health initiatives (*e.g.*, health fairs) or an outpatient visit solely consisting of preventive screening and immunizations (*e.g.* influenza immunization, pneumonococcal immunization, hypertension screening, hepatitis C screening, tobacco screening, alcohol screening, hyperlipidemia screening, breast cancer screening, cervical cancer screening, screening for colorectal cancer by fecal occult blood testing, and education about the risks and benefits of prostate cancer screening); and

(12) Laboratory services, flat film radiology services, and electrocardiograms.

(f) *Additional care not subject to outpatient copayment.* Outpatient care is not subject to the outpatient copayment requirements under this section when provided to a veteran during a day for which the veteran is required to make a copayment for extended care services that were provided either directly by VA or obtained for VA by contract.

(Authority: 38 U.S.C. 1710)

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 17

RIN 2900–AK85

Copayments for Medications

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: This document amends VA's medical regulations to set forth copayment requirements for medications. This is necessary to implement provisions of the Veterans Millennium Health Care and Benefits Act.

DATES: *Effective Date:* February 4, 2002.

FOR FURTHER INFORMATION CONTACT: Nancy L. Howard at (202) 273–8198, Revenue Office (174), Office of Finance, Veterans Health Administration, 810 Vermont Avenue NW., Washington, DC 20420. (This is not a toll-free telephone number).

SUPPLEMENTARY INFORMATION: In a document published in the **Federal Register** on July 16, 2001, we proposed to amend VA's medical regulations to set forth copayment requirements for medications provided to veterans by VA (66 FR 36960). Interested persons were given 60 days to submit comments. We received over 1000 comments, almost all of which opposed all or portions of the proposal. Based on the rationale set forth in the proposed rule and this document, we are adopting the provisions of the proposed rule as a final rule.

A number of commenters asserted that VA should not charge any veteran a medication copayment. Other commenters asserted that VA should not charge veterans who had combat service a medication copayment. Other commenters asserted that military retirees should not be charged a medication copayment. Other commenters asserted that veterans who are service-connected should not be charged a medication copayment for any condition. No changes are made based on these comments. With certain statutory exceptions set forth in § 17.110(c) of this final rule, the provisions of 38 U.S.C. 1722A require veterans to pay a copayment for each 30-day or less supply of medication furnished on an outpatient basis. The applicable statutory provisions do not allow an exemption based merely on the fact that an individual is a veteran, that an individual was a combat veteran, or that a veteran is a military retiree. The provisions in the final rule concerning service-connection are also reflections of statutory requirements. The final rule exempts from the copayment requirements medication for a veteran who has a service-connected disability rated 50% or more based on a service-connected disability or unemployability. The final rule also exempts from the copayment requirements medication for a veteran's service-connected disability. However, VA has no authority to exempt from the medication copayments medication for a nonservice-connected condition of a veteran whose total service-connected disabilities are rated at less than 50%.

The vast majority of commenters opposed the proposal to increase the copayment amount from $2 to $7. Some asserted there should be no increase at all. Others asserted that the increase was just too great. Others asserted that the increase would cause them a financial hardship. Some of the commenters asserted that the Prescription Drug Component of the Medical Consumer Price Index should not be used to determine whether the copayment amount should be increased since this is typically greater than the overall inflation rate. A number of the commenters also asserted that the copayment increase also would cause the annual caps to be too high. A few were in favor of the proposal. No changes are made based on these comments.

The copayment amount was set at $2 in 1990 by 38 U.S.C. 1722A for each 30-day or less supply of medication and until now has never been changed. The Veterans Millennium Health Care and Benefits Act, Public Law 106–117, amended 38 U.S.C. 1722A authorizing VA to increase the copayment amount and to establish maximum annual copayment amounts. Clearly, the statutory intent was for VA to increase the copayment amount. In helping VA to determine the amount of the copayment, the House Conference Report (H. Rept. 106–237, July 16, 1999) specifically noted that the copayment for DOD's Tricare Prime Plan included a $9 copayment for each 30-day prescription. Further, the House Conference Report indicated, at page 42, that "[a] survey of copayment trends in 1996–7 found the most common [prescription drug] copayment among members of the American Association of Health Plans * * * [to be] in the range of $5 to $10 per prescription." Also, as we stated in the proposal, we believe that the proposed $7 medication copayment would be lower than or equal to most medication copayments charged by the private health care industry. Many recent newspaper articles have reported dramatic increases throughout the health care industry for medication copayment amounts which are reflective of increases in medication costs. Accordingly, even with the increase we may have one of the lowest copayment amounts. Under these circumstances, we believe that a $7 copayment amount is reasonable. Further, we believe that increases should be based on the Prescription Drug Component of the Medical Consumer Price Index since it is most relevant to the cost of prescriptions and thereby should be relevant to any general increases in medication copayments in the private sector.

Also, as we stated in the proposal, under 38 U.S.C. 1722A, VA may not require a veteran to pay an amount in excess of the actual cost of the medication and the pharmacy administrative costs related to the dispensing of the medication. VHA conducted a study of the pharmacy administrative costs relating to the dispensing of medication on an outpatient basis and found that VA incurred a cost of $7.28 to dispense an outpatient medication even without consideration of the actual cost of the medication. This amount covers the cost of consultation time, filling time,

dispensing time, an appropriate share of the direct and indirect personnel costs, physical overhead and materials, and supply costs. Under these circumstances, we believe that a $7 copayment would not exceed VA's costs.

A number of commenters asserted that the increase in the medication copayment would cause them a financial hardship, particularly in those cases when a veteran would obtain multiple prescriptions requiring multiple copayments. No changes are made based on these comments. The issue of financial hardship caused by copayments was addressed by statute. The text portion of this document restates statutory provisions by providing that certain veterans whose income is less than the VA pension level are exempt from the copayment requirements. Moreover, the final rule includes an annual cap to help eliminate financial hardships for veterans who in unusual circumstances need a significant number of prescriptions. Furthermore, VA has statutory authority under 38 U.S.C. 5302 to waive debts arising from a veteran's failure to pay the pharmacy copayment when collection of the debt would be against equity and good conscience. One factor VA uses in determining whether collection would be against equity and good conscience is whether it would cause undue hardship by depriving the veteran and his or her family of basic necessities.

One commenter asserted that the income threshold for requiring a medication copayment should be raised. No changes are made based on this comment. This reflects a statutory requirement and we have no authority to change the amount.

A number of commenters indicated that they would return to private-sector health care if the copayment were increased. Although some might choose not to obtain their medications from VA, as we indicated above, we believe that our copayment amount is still on the low end of the private-sector copayment scale.

A number of commenters asserted that VA should not charge copayments in those cases when VA is reimbursed by Medicare. No changes are made based on these comments. Medicare does not provide medication coverage and does not reimburse VA for medication costs.

One commenter suggested that the copayment amount should vary based on geographic location. No changes are made based on this comment. We do not believe that this would be administratively feasible.

One commenter suggested that we refrain from establishing a new copayment amount based on the conclusion that the copayment authority is scheduled to expire September 30, 2002. No changes are made based on this comment. We anticipate that a timely extension of the copayment authority will be enacted into law. If this does not occur we would delete the copayment provisions.

Compliance With the Congressional Review Act and Executive Order 12866

This rule is economically significant under Executive Order 12866 and constitutes a major rule under the Congressional Review Act. The rule is necessary to implement the provisions of section 201 of Public Law 106–117, The Veterans Millennium Health Care and Benefits Act. These provisions, which are set forth at 38 U.S.C. 1722A, authorize VA to set the copayment charge for medications.

I. Benefits Costs

This rule would directly impact veterans who receive prescriptions for other than service-connected conditions and who have been paying a $2 copayment. Based on VA records for fiscal year 2000, we found that approximately 1.1 million veterans averaged 47 30-day supply prescriptions per year. VA collected $101 million in fiscal year 2000 as copayments. This rule would increase the copayment from the current $2 level to $7. We do not believe the increase in the copayment amount will have an impact upon utilization. It is anticipated that the same number of veterans will continue to receive the same average number of prescriptions generating an increase in collections of $250 million annually.

II. Administrative Costs

The estimated administrative cost for these increased collections would remain the same at the current collection expense of $17 million. This is based upon an average cost of a GS–5 at $12/hour x 8.2 million bills per year at the average rate of 10.3 minutes per bill.

III. Alternatives

In addition to alternatives discussed above, VA considered establishing higher and lower copayment and cap amounts and considered whether or not to have escalator provisions. However, for the reasons discussed above, we believe that the copayment and cap amounts, and the escalator provisions, are appropriate.

Paperwork Reduction Act

This document contains no provisions constituting a collection of information under the Paperwork Reduction Act (44 U.S.C. 3501–3520).

Unfunded Mandates

The Unfunded Mandates Reform Act requires (in section 202) that agencies prepare an assessment of anticipated costs and benefits before developing any rule that may result in an expenditure by State, local, or tribal governments, in the aggregate, or by the private sector of $100 million or more in any given year. This rule would have no consequential effect on State, local, or tribal governments.

OMB Review

This rule is economically significant under Executive Order 12866 and major under the Congressional Review Act. This rule has been reviewed by OMB.

Regulatory Flexibility Act

The Secretary hereby certifies that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. This amendment would not directly affect any small entities. Only individuals could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

Catalog of Federal Domestic Assistance Numbers

The Catalog of Federal Domestic Assistance numbers for the programs affected by this document are 64.005, 64.007, 64.008, 64.009, 64.010, 64.011, 64.012, 64.013, 64.014, 64.015, 64.016, 64.018, 64.019, 64.022, and 64.025.

List of Subjects in 38 CFR Part 17

Administrative practice and procedure, Alcohol abuse, Alcoholism, Claims, Day care, Dental health, Drug abuse, Foreign relations, Government contracts, Grant programs-health, Grant programs-veterans, Health care, Health facilities, Health professions, Health records, Homeless, Medical and dental schools, Medical devices, Medical research, Mental health programs, Nursing homes, Philippines, Reporting and recordkeeping requirements, Scholarships and fellowships, Travel and transportation expenses, Veterans.

Approved: November 30, 2001.
Anthony J. Principi,
Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 17 is amended as set forth below:

PART 17—MEDICAL

1. The authority citation for part 17 continues to read as follows:

Authority: 38 U.S.C. 501, 1721, unless otherwise noted.

2. Section 17.110 is added under the undesignated center heading COPAYMENTS to read as follows:

§ 17.110 Copayments for medication.

(a) *General.* This section sets forth requirements regarding copayments for medications provided to veterans by VA.

(b) *Copayments.* (1) Unless exempted under paragraph (c) of this section, a veteran is obligated to pay VA a copayment for each 30-day or less supply of medication provided by VA on an outpatient basis (other than medication administered during treatment). For the period from February 4, 2002 through December 31, 2002, the copayment amount is $7. The copayment amount for each calendar year thereafter will be established by using the Prescription Drug component of the Medical Consumer Price Index as follows: For each calendar year beginning after December 31, 2002, the Index as of the previous September 30 will be divided by the Index as of September 30, 2001. The ratio so obtained will be multiplied by the original copayment amount of $7. The copayment amount for the new calendar year will be this result, rounded down to the whole dollar amount.

Note to Paragraph (b)(1): Example for determining copayment amount. If the ratio of the Prescription Drug component of the Medical Consumer Price Index for September 30, 2003, to the corresponding Index for September 30, 2001, is 1.2242, then this ratio multiplied by the original copayment amount of $7 would equal $8.57, and the copayment amount for calendar year 2004, rounded down to the whole dollar amount, would be $8.

(2) The total amount of copayments in a calendar year for a veteran enrolled in one of the priority categories 2 through 6 of VA's health care system (see § 17.36) shall not exceed the cap established for the calendar year. The cap for calendar year 2002 is $840. If the copayment amount increases after calendar year 2002, the cap of $840 shall be increased by $120 for each $1 increase in the copayment amount.

(c) *Medication not subject to the copayment requirements.* The following are exempt from the copayment requirements of this section:

(1) Medication for a veteran who has a service-connected disability rated 50% or more based on a service-connected disability or unemployability;

(2) Medication for a veteran's service-connected disability;

(3) Medication for a veteran whose annual income (as determined under 38 U.S.C. 1503) does not exceed the maximum annual rate of VA pension which would be payable to such veteran if such veteran were eligible for pension under 38 U.S.C. 1521;

(4) Medication authorized under 38 U.S.C. 1710(e) for Vietnam-era herbicide-exposed veterans, radiation-exposed veterans, Persian Gulf War veterans, or post-Persian Gulf War combat-exposed veterans;

(5) Medication for treatment of sexual trauma as authorized under 38 U.S.C. 1720D;

(6) Medication for treatment of cancer of the head or neck authorized under 38 U.S.C. 1720E; and

(7) Medications provided as part of a VA approved research project authorized by 38 U.S.C. 7303.

(Authority: 38 U.S.C. 501, 1710, 1720D, 1722A)

Environmental Impact Assessment of Nongovernmental Activities in Antarctica; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 8

[FRL–7114–3]

RIN 2020–AA34

Environmental Impact Assessment of Nongovernmental Activities in Antarctica

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Public Law 104–227, the Antarctic Science, Tourism, and Conservation Act of 1996 (the Act), amends the Antarctic Conservation Act of 1978 to implement the Protocol on Environmental Protection (the Protocol) to the Antarctic Treaty of 1959 (the Treaty). The Act directs the Environmental Protection Agency (EPA) to promulgate regulations that provide for assessment of the environmental impacts of nongovernmental activities in Antarctica and for coordination of the review of information regarding environmental impact assessments received from other Parties under the Protocol. This final rule establishes the requirements for assessment of the environmental impacts of nongovernmental activities in Antarctica and for coordination of the review of information regarding environmental impact assessments received from other parties under the Protocol.

DATES: This rule will be effective on January 7, 2002.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph Montgomery or Ms. Katherine Biggs at telephone: (202) 564–7157 or (202) 564–7144, respectively, or by mail at: NEPA Compliance Division; Office of Federal Activities (2252A); U.S. Environmental Protection Agency; 1200 Pennsylvania Avenue, NW; Washington, D.C. 20460.

SUPPLEMENTARY INFORMATION: This preamble is organized according to the following outline:

I. Introduction
  A. Statutory Background
  B. Background of the Rulemaking
II. Public Comments on the Proposed Rule and EPA's Response to These Comments
III. Description of Program and These Regulations
  A. The Antarctic Treaty and Protocol
  B. The Purpose of These Regulations
  C. Summary of the Protocol
  D. Activities Covered by These Regulations
  1. Persons Required to Carry Out an EIA
  2. Differences Between Governmental and Nongovernmental Activities
  3. Appropriate Level of Environmental Documentation
  4. Criteria for a CEE
  5. Measures to Assess and Verify Environmental Impacts
  E. Incorporation of Information, Consolidation of Environmental Documentation, Waiver or Modification of Deadlines, and Provision for Multi-Year Environmental Documentation
  F. Submission of Environmental Documents
  G. Prohibited Acts, Enforcement and Penalties
  H. Provision for Categorical Exclusions
IV. Coordination of Review of Information Received from Other Parties to the Treaty
V. Administrative Requirements
  A. Executive Order 12866 Clearance
  B. Regulatory Flexibility Act (RFA), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA, 5 U.S.C. 601 et seq.)
  C. Unfunded Mandates Reform Act
  D. Paperwork Reduction Act
  E. National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Public Law 104–113, Section 12(d) (15 U.S.C. 272 note)
  F. Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations
  G. Executive Order 13132, Federalism
  H. Executive Order 13175, Consultation and Coordination with Tribal Governments
  I. Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks
  J. Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution and Use
  K. Submission to Congress and the Comptroller General of the United States

I. Introduction

A. Statutory Background

On October 2, 1996, the President signed into law the Antarctic Science, Tourism, and Conservation Act of 1996 (the Act). The purpose of the Act is to implement the provisions of the Protocol on Environmental Protection (the Protocol) to the Antarctic Treaty of 1959 (the Treaty). The Act provides that:

"The [Environmental Protection Agency] shall within 2 years after the date of * * * enactment * * * promulgate regulations to provide for * * * the environmental impact assessment of nongovernmental activities, including tourism, for which the United States is required to give advance notice under Paragraph 5 of Article VII of the Treaty * * * and * * * coordination of the review of information regarding environmental impact assessment received from other Parties under the Protocol." Regulations must be "consistent with Annex I to the Protocol."

B. Background of the Rulemaking

Although the Act gave the Environmental Protection Agency (EPA) two years to promulgate regulations, the United States (U.S.) sought immediate ratification of the Protocol which, in turn, required EPA, contemporaneous with ratification, to have regulations in effect which enabled the U.S. to comply with its obligations under the Protocol. Accordingly, on April 30, 1997, EPA promulgated an interim final rule so that the United States could ratify the Protocol and implement its obligations under the Protocol as soon as the Protocol entered into force.

Because of the importance of facilitating the Protocol's prompt entry into force, EPA believed it had good cause under 5 U.S.C. 553(b)(B) to find that implementation of notice and comment procedures for the interim final rule would be contrary to the public interest and unnecessary. Therefore, the interim final regulations were issued without notice and an opportunity to comment and, for the same reasons, under 5 U.S.C. 553(d)(3), the interim final regulations took effect on April 30, 1997.

Further, EPA believed that public comment on the requirements for environmental documentation, including procedures and content, in the interim final regulations was unnecessary because the interim final regulations incorporated the environmental documentation requirements of the Protocol, which was signed by the U.S. in 1991 and received the advice and consent of the Senate in 1992. Specifically, language from the Protocol was incorporated into the interim final regulations regarding the content of initial environmental evaluation (IEE) and comprehensive environmental evaluation (CEE) documentation as required by the Protocol, and the timing requirements of the interim final regulations were set out to meet those established by Annex I to the Protocol.

At the time the interim final regulations were promulgated, EPA announced its plans to provide extensive opportunities for public comment in the development of the proposed final regulations. EPA stated the final regulations would be proposed and promulgated in accordance with the provisions of the Administrative Procedure Act (5 U.S.C. 553 *et seq.*), which generally requires notice to the public, description of the substance of the proposed rule and an opportunity for public comment. Further, EPA announced that it would prepare under the National Environmental Policy Act

(42 U.S.C. 4321 *et seq.*) an Environmental Impact Statement (EIS), which would consider the environmental impacts of the proposed rule and alternatives and address the environmental and regulatory issues raised by interested agencies, organizations, groups and individuals. EPA stated that the public would have an opportunity to participate in the scoping process for the EIS. The Notice of Availability for the "Draft Environmental Impact Statement for the Proposed Rule on Environmental Impact Assessment of Nongovernmental Activities in Antarctica" (DEIS) was published in the **Federal Register** on February 16, 2001; the public comment period closed on April 2, 2001. In preparing this final rule, EPA considered the comments received on the issues involved with and the alternatives presented in the DEIS for this regulatory action.

The interim final regulations were intended to be limited in time and effect to provide for a transition period until the final regulations could be developed. This was expected to occur prior to the statutory deadline of October 2, 1998. However, during scoping, the International Association of Antarctica Tour Operators, individual tour operators, and The Antarctica Project/Antarctic and Southern Ocean Coalition requested that the deadline for the interim final rule be extended to give the operators an opportunity to determine the "workability" of the requirements and then to comment to EPA. After consultation with other interested federal agencies, EPA determined that this request was reasonable and that additional time to develop the final rule would be beneficial. Thus, EPA issued a direct amendment to the interim final rule effective July 14, 1998, which extended its applicability through the 2000–2001 austral summer. The interim final regulations served as the model for these final regulations which are described below. Certain aspects of these final regulations are new or different from the interim final regulations, including a new provision that would allow submission of environmental documentation on a multi-year basis and a definition of the term "more than a minor or transitory impact."

II. Public Comments on the Proposed Rule and EPA's Response to These Comments

Five sets of comments were received in response to the June 29, 2001, notice of proposed rule-making. Comments were received from: two federal agencies, the U.S. Department of State and the National Science Foundation; tour industry respondents including the International Association of Antarctica Tour Operators (IAATO), its U.S. members and one non-member; and two non-governmental environmental interest organizations including The Antarctica Project on behalf of the Antarctic and Southern Ocean Coalition, and the Defenders of Wildlife. Most of the comments raised by the industry respondents and the non-governmental environmental interest organizations were the same or similar to comments raised by these entities during scoping for EPA's EIS and the subsequent public comment period on the DEIS. The scoping comments were considered by EPA in the development of the alternatives for the proposed rule-making, and the comments on the DEIS were considered by EPA in the development of the proposed rule.

Federal agencies. The two federal agencies support the rule as proposed. One agency supports implementation of the rule as soon as possible since the rule supports implementation of the Protocol on Environmental Protection to the Antarctic Treaty. The other agency commented that the rule, as proposed, is fully responsive to, and consistent with, the requirements of the Protocol and EPA's implementation authority under the Act.

Tour industry respondents. The tour industry respondents generally support EPA's approach in the proposed rule, particularly the provision for multi-year environmental documentation, although they opine that certain modifications to reduce regulatory burdens, as previously commented to EPA under the EIS scoping and DEIS review process, would be appropriate. However, the tour industry respondents did provide other specific comments which are addressed below.

In their previous comments, the tour industry respondents requested elimination of EPA's ability to pass on the adequacy of environmental documentation and to eliminate the enforcement provision in the rule in order to reduce regulatory burden. EPA is not accepting these proposed modifications because the Act requires EPA to provide for the environmental impact assessment of nongovernmental activities, including tourism, for which the U.S. is required to give advance notice under paragraph 5 of Article VII of the Treaty in order for the U.S. government to implement certain of its obligations under the Protocol. The procedures in the rule ensure that: (1) Nongovernmental operators identify and assess the potential impacts of their proposed activities, including tourism, on the Antarctic environment; (2) operators consider these impacts in deciding whether or how to proceed with proposed activities; and (3) operators provide environmental documentation pursuant to the Act and Annex I of the Protocol. In keeping with the U.S. government's obligations under the Protocol and EPA's obligations under the Act, under the rule, EPA may make a finding that the environmental documentation submitted does not meet the requirements of Article 8 and Annex I of the Protocol and the provisions of the regulations. EPA believes that before such a finding is made, it is prudent to offer comments to the operator so that the operator may, at its discretion, make necessary revisions to the document. If the operator proceeded after EPA made a finding that the documentation does not meet the requirements of Article 8 and Annex I and the requirements of the regulations, the operator would be in violation of the regulations and would be subject to enforcement.

The tour industry respondents requested elimination of Preliminary Environmental Review Memorandums (PERMS) in order to reduce regulatory burden. EPA is not accepting this proposed modification because the preliminary environmental review process that may result in PERM-level environmental documentation is significantly different from submitting the basic information delineated in 40 CFR 8.4(a) of the rule, information similar to that submitted by operators for advance notification purposes. Simply submitting this information does not constitute the preliminary environmental review process as delineated in 40 CFR 8.6 of the rule for PERMS. EPA notes that, to date, none of the U.S.-based operators has submitted PERM-level documentation for its final environmental document.

The tour industry respondents requested that the rule provide for automatic reciprocity when environmental documentation is prepared for other Treaty Parties in order to reduce regulatory burden. EPA is not accepting this proposed modification because it is the responsibility of the U.S. government to comply with its obligations under the Protocol. The U.S. government would need to determine whether on a case-by-case basis it could rely on the regulatory procedures of another Party. Therefore, EPA believes that a discretionary process should not be included in the rule.

To reduce regulatory burden, the tour industry respondents requested that the rule provide a "categorical exclusion"

from the requirement to prepare environmental documentation for ship-based tourism conducted according to the "Lindblad model." EPA is not accepting this proposed modification for the following reasons. As discussed in the Preamble at section III.H., the National Environmental Policy Act (NEPA) defines "categorical exclusion" as "a category of actions which do not individually or cumulatively have a significant effect on the human environment * * * and for which, therefore, neither an environmental assessment nor an environmental impact statement is required" (40 CFR 1508.4). Only narrow and specific classes of activities can be categorically excluded from environmental review. For example, EPA in its NEPA regulations at 40 CFR 6.107(d) excludes "* * * actions which are solely directed toward minor rehabilitation of existing facilities * * *" and the National Science Foundation in its environmental assessment regulations at 45 CFR 641(c)(1) and (2) excludes certain scientific activities (*e.g.*, use of weather/research balloons that are to be retrieved) and interior remodeling and renovation of existing facilities. EPA does not have a specific definition for the "Lindblad model." EPA also believes that a broad categorical exclusion covering ship-based tourism as now conducted does not fit well with the approach used by the U.S. government for categorical exclusions because it does not identify actions to be excluded in sufficient detail. Further, more needs to be known about potential cumulative impacts of nongovernmental activities undertaken by U.S.-based ship-based tour operators before deciding to exclude some or all of these specific activities. Categorical exclusions can be designated by amendment to the rule if categorical exclusion activities are identified in the future. Any such amendment to the rule would be subject to notice and comment.

The tour industry respondents requested that the rule clarify that even if mitigation is not carried out as described in the environmental documentation, this would not subject an operator to enforcement action or otherwise place an operator in violation of its obligations under the Protocol, the Act and EPA's implementing regulations. EPA is not accepting this proposed modification for the following reasons. EPA recognizes that the rule requires only that environmental documentation be prepared and does not specifically require implementation of either the activities, as described, or the planned mitigation measures. However, if, for example, an operator proposes to mitigate the potential environmental impacts associated with a proposed activity, and the assessment of the proposed activity without the mitigative measures would be greater than minor or transitory effects, EPA assumes the operator will proceed with these mitigation measures. Otherwise, to be in compliance with the provisions of the rule, the operator's decision might have been to prepare a CEE, a different level of environmental documentation used when the reasonably foreseeable potential environmental effects of a proposed activity are likely to be more than minor or transitory. (*e.g.*, if planned mitigation measures are the basis for the level of documentation there is an obligation on the part of the operator to implement the planned mitigation, otherwise, the level of documentation might not have met the requirements of the Protocol and the regulations.)

Further, EPA assumes the activities will be undertaken as planned and described because, based on experience to date, the planned mitigation measures are generally one of the following: requirements or prohibitions of federal laws (for example, tour vessels are operated according to the domestic legislation of its flag state that gives effect to MARPOL, U.S.-based tour operators adhere to applicable domestic statutes and regulations, and staff are trained and passengers educated on the mandates and prohibitions of the Treaty, the Protocol, and U.S. regulations); adopted recommendations under the Antarctic Treaty System (for example, certain mitigation measures include staff training and passenger education on Recommendation XVIII–1); and, for most U.S.-based ship-based tour operators, requirements for membership under IAATO's Bylaws (for example, certain mitigation measures include adherence to the membership provisions of the IAATO Bylaws, specifically, agreement not to have more than 100 passengers ashore at any one site at the same time). EPA acknowledges that section II.D.3.(d), Mitigation, in the proposed rule's Preamble (section III.D.3.(d) in the Preamble to this final rule) was not in the Preamble to the Interim Final Rule. However, section II.D.5, Measures to Assess and Verify Environmental Impacts, in the Preamble to the Interim Final Rule states in the example for activities requiring an IEE that the information could include, as appropriate, "* * * *description of any activity requiring mitigation*, the mitigative actions undertaken, and the actual or projected outcome of the mitigation" (italics added for emphasis). Once again, EPA believes that if an operator chooses to mitigate and the mitigation measures are the basis for the level of environmental documentation, EPA assumes the operator will proceed with these mitigation measures. Otherwise, the level of documentation may not have met the requirements of Article 8 and Annex I and the provisions of the regulations. Were an operator to fail to comply with these regulations, the operator could be subject to enforcement under the provisions listed in 40 CFR 8.11.

The tour industry respondents requested that EPA, in the Preamble to the rule, confirm the respondents' interpretation of the nature of the requirements of section 8.9, measures to assess and verify environmental impacts, including that operators are under no regulatory obligation to submit post-season reports related to the assessment and verification of environmental impacts to EPA (or to any other Federal agency), that operators are responsible for deciding whether and how to proceed with proposed activities, and that operators are not subject to any regulatory requirement to make assessment and verification information available to EPA. These same issues were addressed by EPA in the Information Collection Request, Part C of the Supporting Statement, for the Interim Final Rule and have been addressed by EPA in the Supporting Statement for the Information Collection Request for this rule. With regard to assessment and verification information, the Protocol, and thus the Act, requires that operators have procedures designed to provide a regular and verifiable record of the impacts of their activities. Like the Interim Final Rule, such a provision has been incorporated into this final rule in order to ensure that the U.S. government has the ability to implement its environmental impact assessment obligations for nongovernmental operators under the Protocol, including a requirement that operators have procedures designed to provide a regular and verifiable record of the impacts of these activities. EPA believes that this establishes a requirement that the information be available to EPA in order to verify that the operator has assessment and verification procedures. Otherwise, there would be no way to know if an operator was in compliance with this requirement of the regulation. Operators are currently voluntarily providing this information to the

government, thus it is available to EPA. As indicated in the regulations (40 CFR 8.1(b)), this Preamble (section III.C.), and the Supporting Statement for the Information Collection Request for this rule (section 2(b)), the operator is responsible for deciding whether or how to proceed with proposed activities.

The tour industry respondents requested that EPA clarify in the final rule that, at least in the near term, the Agency does not expect environmental documentation to include assessment of cumulative impacts in that information is currently insufficient to determine whether such impacts are in fact likely. EPA is not accepting this proposed modification because, as acknowledged by the tour industry respondents, Annex I includes consideration of cumulative impacts in light of existing and known planned activities for IEE and CEE level documentation. In order to remain consistent with Annex I, the final rule requires the same. However, EPA believes that, to date, the IEEs submitted by U.S.-based operators have contained sufficient detail to assess whether proposed activities may have more than a minor or transitory impact on the Antarctic environment including consideration of cumulative impacts in light of existing and known proposed activities. EPA further believes that the operators' conclusions to date, including those for cumulative impacts, have been supported by the information currently available. (*e.g.*, based on the current scientific studies, there is no evidence of cumulative environmental impacts related to tourism.) However, the issue of cumulative impacts, particularly in the Peninsula area, remains a concern in light of such factors as the increasing number of tour operators, expeditions, and passengers landed; the number of sites visited; and the frequency with which certain sites are visited. For these reasons, EPA jointly sponsored a workshop with the National Science Foundation and IAATO to consider the issue of possible cumulative environmental impacts associated with ship-based tourism. Amongst other things, the workshop discussions exemplified the difficulties of identifying cumulative impacts related specifically to tourism. (For example, research findings suggest that most of the variability associated with the decline in Adelie penguins can be explained by the effects of climate change, and tourism is not having a measurable impact on Adelie penguin populations in the Palmer Station area.) As data and information become available on cumulative impacts, the operators may, as appropriate, decide to modify their activities and/or their mitigation measures, or they may determine that a different level of environmental documentation is appropriate. To date, however, EPA believes that the IEEs prepared by the U.S.-based operators have identified and assessed the potential environmental consequences associated with their planned activities, including cumulative impacts.

Non-governmental environmental interest organizations. One of the non-governmental environmental interest organizations incorporated by reference the comments it made to EPA during the scoping process for the DEIS for the proposed rule and on the DEIS. Comments in these attachments either reiterate comments provided by the commentor on the proposed rule and/or provide recommendations that were considered in EPA's preparation of the DEIS for this rule-making. EPA has focused its response to the issues specifically addressed in the commentor's letter on the proposed rule except where both non-governmental environmental interest organizations provided comment on the same issue; any such issues are specifically responded to below.

Both of the non-governmental environmental interest organizations supported EPA's decision not to categorically exclude Antarctic ship-based tourism organized under the "Lindblad Model." One of the commentors does not believe that categorical exclusions are appropriate for any type of non-emergency activity in Antarctica. EPA disagrees with this opinion. Although no activities have yet been identified that can be categorically excluded, EPA believes this regulatory option should not be precluded automatically. EPA reiterates that categorical exclusions can be designated by amendment to the rule if such activities are identified in the future. Any such amendment to the rule would be subject to notice and comment.

One of the non-governmental environmental interest organizations supported a provision for multi-year environmental documentation and the other objected to the multi-expedition/multi-year environmental documentation provisions. EPA is not removing these provisions from the final rule for the following reasons. EPA believes that the environmental impact assessment process documented in the IEEs prepared by the U.S.-based operators that have included multiple expeditions by a single operator, and by more than one operator, have identified the potential environmental impacts, including direct, indirect and cumulative impacts. The assessment process employed by the operators under the regulations is the same as that delineated in Article 8 and Annex I. EPA believes this process can be, and has been, applied appropriately to multiple expeditions by a single operator, or by more than one operator. Further, the multi-year provision is applicable only if the conditions described in the document, including the assessment of cumulative impacts, are unchanged. An operator would need to take into account any additional data or information obtained over the course of the five-year life of the environmental document and if the conditions described in the initial multi-year document are changed by this data or information, then the operator would need to submit supplemental environmental documentation that appropriately addresses this information relative to the operator's planned activities as delineated in the multi-year document. If, for example, a new activity is added, this information can be submitted as a supplement to the multi-year document provided that this does not change the overall assessment of impacts and conclusion by the operator (*e.g.*, for an IEE, the potential impacts are no more than minor or transitory).

One of the non-governmental environmental interest organizations supported the multi-year environmental documentation provision but recommended that operators submit some form of annual certification, under the enforcement sanctions provision, that there have been no change in the conditions described in the multi-year document. EPA is not accepting this proposed modification to the multi-year provision because this requirement, including the enforcement sanction provision, is implicit in 40 CFR 8.4(e). If the operator were to continue with planned expeditions that do not meet the conditions described in the multi-year document, the operator's documentation may not met the requirements of Article 8 and Annex I and the requirements of the rule and the operator could, therefore, be subject to enforcement under 40 CFR 8.11.

Both of the non-governmental environmental interest organizations disagree with defining in the rule "more than a minor or transitory impact" as having the same meaning as the term "significantly" as defined in regulations under the National Environmental Policy Act at 40 CFR 1508.27. EPA is retaining this definition for the following reasons. The Protocol does not define "minor or transitory." Until the Antarctic Treaty Consultative

Meeting (ATCM) provides guidance or definition, EPA believes it is reasonable to provide such guidance to operators and that it is prudent to define the term "more than a minor or transitory impact" consistent with the threshold definition applied to the environmental impact assessment of governmental activities in Antarctica as delineated in 16 U.S.C. 2401 et seq. If a definition were to be provided under the Protocol or other appropriate means under the Treaty, EPA would amend its final rule, as appropriate, to ensure it is consistent with Annex I as required by the Act. Contrary to the commentors' assertions, as with the Protocol, NEPA's starting point is the environment. As stated in 40 CFR 1500.1, NEPA "is our basic national charter for protection of the environment" (italics added for emphasis).

Both of the non-governmental environmental interest organizations commented on public review of IEEs. One commentor agreed with EPA's process for advertising the public availability of IEEs on its website and the schedule for IEE reviews. The other commentor recommended a regulatory provision for EPA to advertise the availability of IEEs on its website and for public comment on IEEs. EPA is not accepting these proposed modifications because this process is required by Article 8 and Annex I only for CEEs. EPA will continue to publish notice of availability of IEEs on its website. Based on its experience to date, there has been no evidence that interested parties have been unable to obtain IEEs and to offer comments to the operators under this notification scheme. EPA believes that including a regulatory provision for public notice and comment on IEEs would not necessarily reduce environmental impacts (*e.g.*, an operator's conclusion for an IEE would remain that the potential impacts of the proposed activity will be no more than minor or transitory). It would, however, impose obligations and undue burden on U.S. nongovernmental operators not required under Annex I or the Act, and would not be consistent with the environmental impact assessment requirements that apply to U.S. governmental entities for activities in Antarctica. C.f. 45 CFR 641.10 through 641.22 (National Science Foundation regulations for assessing impacts of governmental activities in Antarctica).

Both of the non-governmental environmental interest organizations commented on the schedules for environmental documentation submission and review. One commentor recommended that EPA change either the default provisions that provide for approval of nongovernmental activities or extend the time period in which it can respond to environmental documentation. The other commentor believes the dates listed for CEEs are inaccurate and recommends that CEEs be required 180 days prior to the next ATCM rather than on December 1 since the December 1 date assumes the ATCMs will be on schedule for spring meetings which is not always the case. Regarding the first comment, under the final rule, EPA does not "approve" activities. EPA, in consultation with other interested Federal agencies, will review the environmental documentation to determine whether it meets the requirements of Article 8, Annex I and the regulations. Regarding the comments on the schedules for review, EPA is not accepting the commentors' proposed modifications because it believes the schedules in the rule are reasonable, as has been demonstrated by experience under the Interim Final Rule. Further, these schedules conform to the necessary time frames should an operator decide, based on comments offered by EPA, to revise the document or to submit a higher level of environmental documentation. Regarding the recommendation to change the submission for CEEs to 180 days before the next ATCM, EPA believes this is not reasonable nor is it warranted. The ATCM traditionally has been held in the May-June time frame, although the Protocol does not dictate this schedule. The date of the ATCM may vary. While it is possible that the meeting schedule would be set early enough to allow time for an operator to submit a draft CEE 180 days before the next ATCM, this is not certain. This commentor also expressed concern that since an activity cannot be held up for more than 15 months, there may not be time for the operator to address comments received at the ATCM, particularly if the ATCM is held relatively close to the beginning of the Antarctic tourist season. The final rule states that a draft CEE must be submitted by December 1 of the preceding year. The 15-month clock does not begin on the date the CEE is submitted to the State Department, but rather starts on the date the State Department circulates the draft CEE to the Parties to the Protocol and the Committee for Environmental Protection. Thus, even if the draft CEE was circulated by the State Department as early as mid-December, the 15-month clock for this project would run through mid-March of the next season which falls after the end of the regular tourist season for that year.

One of the non-governmental environmental interest organizations commented that it believes the rule proceeds on a number of erroneous factual, legal and policy conclusions, that it insufficiently implements the mandate of Congress in legislating the Act, and will inadequately protect the Antarctic environment for nongovernmental activities conducted there, particularly tourism. EPA disagrees with this opinion. EPA sought assistance from the Department of State, the Department of Justice and the National Science Foundation on factual, legal and policy issues.
